I. INTRODUCTION

A. RISK FACTORS

1. Standard Risk Factors:

- Investment in mutual fund units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal.
- As the price / value / interest rates of the Securities in which the scheme invests fluctuates, the value of your investment in the scheme may go up or down.
- Mutual Funds, like Securities investments, are subject to market and other risks and there can be no guarantee against loss resulting from an investment in the Scheme nor can there be any assurance that the Scheme's objectives will be achieved.
- Past performance of the Sponsor/AMC/Mutual Fund does not guarantee future performance of the scheme.
- Edelweiss Greater China Equity Off-shore Fund is only the name of the scheme and does not in any manner indicate either the quality of the scheme or its future prospects and returns.
- The Sponsor is not responsible or liable for any loss resulting from the operation of the scheme beyond the initial contribution of ₹ 1,00,000 (One Lakh Rupees) made by it towards setting up the Mutual Fund.
- The present scheme is not a guaranteed or assured return scheme.

2. Scheme Specific Risk Factors

a) Risk factors for a Fund of Funds Scheme

- The Scheme will be investing primarily in shares / units of the underlying fund, which in turn invests in companies that are domiciled in, or carrying out the main part of their economic activity in, a country of Greater China region. Hence the Scheme's performance may depend upon the performance of the underlying fund. Any change in the investment policy or the fundamental attributes of the underlying fund will affect the performance of the Scheme.
- Investments in the underlying fund, which is an equity fund, will have all the risks associated with investments in equity and the offshore markets.
- The portfolio disclosure of the Scheme will be largely limited to the investments made by the Scheme.

b) Risk Factors for the Underlying Fund

- The performance of the underlying fund will be affected by a number of risk factors, including the following, which have also been disclosed by the underlying fund in its prospectus filed with the appropriate regulatory authorities:
 - (i) **Political, economic and social risks** - All financial markets may at times be adversely affected by changes in political, economic and social conditions. Economic and / or political instability could lead to legal, fiscal and regulatory changes or the reversal of legal / fiscal / regulatory / market reforms.
 - (ii) **Market risk** - The underlying fund's investments are subject to the risks inherent in all investments in Securities i.e. the

value of holdings may fall as well as rise. As the underlying fund invests primarily in equities, investors are exposed to stock market fluctuations and the financial performance of the companies held in the underlying fund's portfolio. In addition, the underlying fund may be subject to investment holding limits imposed on investors by the markets in which the underlying fund invests.

- (iii) **Currency risk** - The assets in which the underlying fund is invested and the income from the assets will or may be quoted in currencies which are different from the underlying fund's base currency. The performance of the underlying fund will therefore be affected by movements in the exchange rate between the currencies in which the assets are held and the underlying funds' base currency and hence there can be the prospect of additional loss or the prospect of additional gain to the investors greater than the usual risks of investment. The performance of the underlying fund may also be affected by changes in exchange control regulations.
- (iv) **Hedging risk** - The investment manager to the underlying fund is permitted, but not obliged, to use hedging techniques to attempt to offset market and currency risks. There is no guarantee that hedging techniques will achieve the desired result.
- (v) **Diversification risk** - Although their portfolios are well diversified in terms of the number of holdings, investors should be aware that the fund is likely to be more volatile than a broad-based fund, such as a global equity fund, as they are more susceptible to fluctuations in value resulting from adverse conditions in the region (viz. Greater China) in which it invests.
- (vi) **Emerging markets risk** - Accounting, auditing and financial reporting standards in some of the emerging markets in which some of the underlying fund's assets may be invested may be less rigorous than international standards. As a result, certain material disclosures may not be made.

Investment in emerging markets involves special considerations and risks. Many emerging market countries are still in the early stages of modern development and are subject to abrupt and unexpected change. In many cases, governments retain a high degree of direct control over the economy and may take actions having sudden and widespread effects. There is a possibility of nationalisation, expropriation or confiscatory taxation, foreign exchange control, political changes, government regulation, social instability or diplomatic developments which could affect adversely the economies of emerging markets or the value of the underlying fund's investments, and the risks of investing in countries with smaller capital markets, such as limited liquidity, price volatility, restrictions on foreign investment and repatriation of capital, and the risks associated with emerging economies, including high inflation and interest rates and political and social uncertainties. Investors should be aware that the investments of the underlying fund being primarily in the emerging markets, its stocks can be negatively impacted by low liquidity, poor transparency and greater financial risks. However, the volatility of the underlying fund is limited by its diversification across a large number of companies and industry groups.

Investments in products relating to emerging markets may also become illiquid which may constrain the ability of the investment manager to the underlying fund to realize some or all of the portfolio.

(vii) **Legal, tax and regulatory risk** – Legal, tax and regulatory changes could occur during the term of the underlying fund which may adversely affect it. If any of the laws and regulations currently in effect should change or any new laws or regulations should be enacted, the legal requirements to which the underlying fund and the investors may be subject could differ materially from current requirements and may materially and adversely affect the underlying fund and the investors. Legislation could be imposed retrospectively (as a result the underlying fund could become subject to additional taxation that was not contemplated either when investments were made, valued or disposed of) or may be issued in the form of internal regulations not generally available to the public.

(viii) **Settlement Risks**

- The securities markets in some countries lack the liquidity, efficiency and regulatory and supervisory controls of more developed markets.
- Lack of liquidity may adversely affect the ease of disposal of assets. The absence of reliable pricing information in a particular security held by the underlying fund may make it difficult to assess reliably the market value of assets.
- The share register of companies in which the underlying fund invests in may not be properly maintained and the ownership or interest may not be (or remain) fully protected.
- Registration of Securities may be subject to delay and during the period of delay it may be difficult to prove beneficial ownership of the Securities.
- The provision for custody of assets may be less developed than in other more mature markets and thus provides an additional level of risk for the fund.
- Settlement procedures may be less developed and still be in physical as well as in dematerialised form.

(ix) **Derivatives Risk** - The underlying fund may use derivatives in connection with its investment strategies. Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the investment manager of the underlying fund to identify such opportunities. Identification and execution of the strategies to be pursued by the investment manager of the underlying fund involve uncertainty and decision of the investment manager of the underlying fund may not always be profitable. No assurance can be given that the investment manager of the underlying fund will be able to identify or execute such strategies.

The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in Securities and other traditional investments. Derivatives may be riskier than other types of investments because they may be more sensitive to

changes in economic or market conditions than other types of investments and could result in losses that significantly exceed a fund's original investment. Certain derivatives may give rise to a form of leverage. As a result, a fund may be more volatile than if the fund had not been leveraged because the leverage tends to exaggerate the effect of any increase or decrease in the value of the fund's portfolio Securities.

Derivatives are also subject to the risk that changes in the value of a derivative may not correlate perfectly with the underlying asset, rate or index. The use of derivatives for hedging or risk management purposes or to increase income or gain may not be successful, resulting in losses to the underlying fund, and the cost of such strategies may reduce the fund's returns and increase the fund's potential for loss.

In view of the above, investment in the Scheme should be regarded as long term in nature. The Scheme is, therefore, only suitable for investors who can afford the risks involved.

c) **Risks associated with investing in Foreign Securities**

- Subject to necessary approvals and within the investment objectives of the Scheme, the Scheme will be investing in the overseas markets which carry risks related to fluctuations in the foreign exchange rates, the nature of the securities market of the country, restrictions on repatriation of capital due to exchange controls and the political environment. Further the repatriation of capital to India may also be hampered by changes in the Regulations or political circumstances.
- In addition, country risks would include events such as introduction of extraordinary exchange controls, economic deterioration, bi-lateral conflict leading to immobilisation of overseas financial assets and the prevalent tax laws of the respective jurisdictions for the execution of trades or otherwise.
- Subject to the other terms of this SID, all applicants applying for up to 5000 Units (Five Thousand only) shall be given their full allotment. However, keeping in mind the investment restrictions in foreign Securities currently applicable to mutual funds vide SEBI's circulars SEBI/IMD/CIR No. 7/104753/07 dated September 26, 2007 and SEBI/IMD/CIR No.2/1222577/08 dated April 8, 2008, if the overall limit for the Mutual Fund in overseas investments of up to US\$ 300 million has been reached, applicants will receive a pro-rata allotment as calculated by the AMC. In such an event, application monies relating to the unused portion of the investor's original allotment request may be refunded to investors. The arrangement is subject to SEBI regulations and approvals. The process for monitoring the US\$ 300 million limit for overseas investments shall be as follows;
 - The cap of US\$300 million would be monitored at the mutual fund level and not the scheme level.
 - If 90% of the limit is reached, intimation to all investors and empanelled distributors would be made informing them that further sales will be suspended when the mutual fund's combined AUM in overseas schemes reaches the cap of US\$ 300 million. A notice will be issued for such intimation at all our ISC offices, AMC branches and on the website (www.edelweissmf.com).

- Allotment would be done on a pro-rata basis if the US\$300 million cap is breached.
eg:
 - I) Day T (opening AUM) - US\$270 million is the overseas AUM of the mutual fund, Incoming cashflows on Day T - US\$30 million
 - Allotment would be done for the entire amount.
 - II) Day T (opening AUM) - US\$270 million is the overseas AUM of the mutual fund, Incoming cashflows on Day T - US\$60 million
 - Allotment would be done only for US\$ 30 million on a pro rata basis.
 - On this day a notice would be sent out to all ISC offices, AMC branches and on the website (www.edelweissmf.com) stating that further sales are suspended with immediate effect, in case further overseas fund quota from SEBI has not been obtained.
 - If the cap of US\$300 million is reached, refunds would be settled on a T+3 basis
 - The above process will not have any impact on the redemption process.
- d) Schemes investing in Equities**
- Equity Securities and equity-related Securities are volatile and prone to price fluctuations on a daily basis. The liquidity of investments made by the Scheme may be restricted by trading volumes and settlement periods. This may impact the ability of the Unit Holders to redeem their Units. In view of this, the The Trustee has the right, in its sole discretion to limit Redemptions (including suspending Redemption) in certain circumstances [outlined in Section III-B 'Restrictions on Redemptions']. Settlement periods may be extended significantly by unforeseen circumstances. The inability of the Scheme to make intended Securities purchases, due to settlement problems, could cause the Scheme to miss certain investment opportunities. Similarly, the inability to sell Securities held in the Scheme's portfolio could result, at times, in potential losses to the Scheme, should there be a subsequent decline in the value of Securities held in the Scheme's portfolio.
 - The liquidity and valuation of the Scheme's investments due to its holdings of unlisted Securities may be affected if they have to be sold prior to the target date for disinvestment.

Risk and Description specific to Equities	Risk Mitigants / Management Strategy
<p>Quality Risk Risk of investing in unsustainable / weak companies</p>	<p>The stock selection process is an important part of the idea generation stage, as it provides the greater part of added value to the investments. Underpinning the stock selection process is the rigorous research conducted by dedicated specialists. The approach to stock selection is largely specific, which means that these investment professionals have the responsibility to design and refine their stock selection process to cope with the dynamic local factors and market conditions.</p> <p>Quality analysis based investment approach:</p> <ol style="list-style-type: none"> (i) Management (ii) Capital structure (iii) Sustainability of competitive advantage (iv) Return on equity (v) Industry attractiveness <p>In general, there are three primary sources of investment return which the investment professionals normally focus on and they form the basic premise of the stock selection process:</p> <ol style="list-style-type: none"> (i) Growth - companies that exhibit sustainable earnings growth in excess of the market through an economic cycle; (ii) Valuations - quantitative analysis in evaluating the value and profitability of the company; (iii) Dividend yield - an additional source of return, over and above capital appreciation.
<p>Price Risk Risk of overpaying for a company</p>	<p>During company visits, qualitative assessments of for the relative growth prospects of the companies concerned are made and strategies are decided to create shareholder value. Industries in which companies operate are analysed along with the competitive landscape as well as the management strategy to enhance competitive advantage and returns. As part of the process, meetings are organised not only with companies that fall within the core stock coverage, but also with their competitors, distributors, suppliers and other stakeholders in order to obtain a complete picture of the industry/company and other investment opportunities. In the process, a clear understanding of the business is arrived at, enabling the identification of future long-term winners at an early stage.</p>
<p>Concentration Risk</p>	<p>Portfolio construction is the responsibility of the investment manager assigned to each fund.</p> <p>There are three objectives to the portfolio construction process:</p> <ol style="list-style-type: none"> (i) to capture and preserve value from all the best ideas by country specialists; (ii) to ensure no single decision will derail performance; and (iii) to deliver in line with the fund's risk/return profiles.

Risk and Description specific to Equities	Risk Mitigants / Management Strategy
	<p>Portfolios are constructed using a disciplined and tailored approach, and there is a high degree of commonality across accounts with similar objectives and profiles. During the process, the investment manager assigns a target percentage weight based upon variations, positive or negative, from the predetermined fund benchmark weight. Investment managers may also incorporate their own views on individual stocks and exercise discretion to align with the above guidelines with the objective that is likely to be achieved by inclusion of the stock in a fund portfolio.</p> <p>The investment manager will also reconcile any other anomalies between the stock rankings and portfolio requirements with the overall objective of adding value to the fund portfolio.</p> <p>A dedicated team oversees investment managers to ensure compliance with the fund's internal requirements. The buy / sell decisions generated at the portfolio construction stage of the process are automatically checked against fund guidelines, and electronically forwarded to the trading team for execution.</p>
Liquidity Risk High impact costs	<p>Dealing in volatile, often illiquid markets imposes a cost on an active investment manager. The responsibility for minimizing the performance drag lies with the Dealing team whose focus is to minimize market impact and transaction costs. The competitive advantages in achieving this objective are:</p> <ul style="list-style-type: none"> (i) An experienced team. (ii) State of the art systems and on-going investment in trading technology. (iii) Analysis of historical transactions and associated impact costs used to determine trading strategies. (iv) Low commission rates paid to brokers, reducing direct costs per trade. (v) Significant overall commission payout ensuring premium service from investment banks and brokerage firms. <p>The success of the dealing team can be measured by comparing each execution to the Volume Weighted Average Price (VWAP) and on-line through the independent Best Execution Comparison Service (BECS) which compares transaction costs with those of the competition. Effectiveness of the dealing team is measured on an ongoing basis.</p>
Volatility Price volatility due to company or portfolio specific factors	<p>As explained above, the volatility arising out of portfolio specific factors are being mitigated using a combination of various methods as explained above.</p>
Event Risk Price volatility due to company or portfolio specific events	

e) Risks associated with investing in Money Market Instruments

- Investments in money market instruments would involve a moderate credit risk i.e. risk of an issuer's liability to meet the principal payments.
- Money market instruments may also be subject to price volatility due to factors such as changes in interest rates, general level of market liquidity and market perception of credit worthiness of the issuer of such instruments.
- The NAV of the Scheme's Units, to the extent that the corpus of the Scheme is invested in money market instruments, will be affected by the changes in the level of interest rates. When interest rates in the market rise, the value of a portfolio of money market instruments can be expected to decline.
- For the additional risk factors of the Underlying Fund i.e. Edelweiss - Greater China Fund, investors are requested to refer to the offering document of the Underlying Fund.

Restrictions on Redemptions:

As outlined in Section III-B - 'Restrictions on Redemptions' the Trustee and the AMC may impose restrictions on redemptions when there are circumstances leading to a systemic crisis or event that severely constricts market liquidity or the efficient functioning of markets.

Accordingly, such restriction may affect the liquidity of the Scheme and there may be a delay in investors receiving part of their redemption proceeds.

B. REQUIREMENT OF MINIMUM INVESTORS IN THE SCHEME

The Scheme/Plan shall have a minimum of 20 investors and no single investor shall account for more than 25% of the corpus of the Scheme/Plan(s). However, if such limit is breached during the NFO of the Scheme, the Mutual Fund will endeavour to ensure that within a period of three months or the end of the succeeding calendar quarter from the close of the NFO of the Scheme, whichever is earlier, the Scheme complies with these two conditions. In case the Scheme / Plan(s) does not have a minimum of 20 investors in the stipulated period, the provisions of Regulation 39(2)(a) of the Regulations would become applicable automatically without any reference from SEBI and accordingly the Scheme / Plan(s) shall be wound up and the Units would be redeemed at Applicable NAV. The two conditions mentioned above shall also be complied within each subsequent calendar quarter thereafter, on an average basis, as specified by SEBI.

If there is a breach of the 25% limit by any investor over the quarter, a rebalancing period of one month would be allowed and thereafter the investor who is in breach of the rule shall be given 15 days notice to redeem his exposure over the 25% limit. Failure on the part of the said investor to redeem his exposure over the 25% limit within the aforesaid 15 days would lead to automatic redemption by the Mutual Fund at the Applicable NAV without any exit load on the 15th day of the notice period. The Mutual Fund shall adhere to the requirements prescribed by SEBI from time to time in this regard.

SEBI also issued KYC Registration Agency (“KRA”) Regulations 2011 and the guidelines in pursuance of the said Regulations for In-Person Verification (“IPV”).

1. Requirement for the existing investors in mutual funds:

The existing investors in mutual funds who have already complied with the KYC requirement (defined for the purpose of this SID as KYC compliant) and have the KYC compliance letter issued to them by CDSL Ventures Limited are exempt from following the new KYC procedure effective January 01, 2012, but only for the purpose of making investments with any SEBI registered mutual fund.

If, however, the KYC compliant investors would like to deal with any SEBI registered intermediary other than mutual funds, they may have to follow the new KYC compliance procedure.

2. Requirement for the new investors in mutual funds:

All investors other than KYC compliant investors as defined above are required to follow the new KYC compliance procedure as mentioned below while making any investment in the Scheme:

- Fill up and sign the KYC application form (for individual investors or non-individual investors as appropriate) available on the AMC’s website i.e. www.edelweissmf.com or www.amfiindia.com or www.cvlindia.com

For investments in a mutual fund, the asset management companies, registrar and transfer agents of mutual funds and distributors which comply with the certification process of National Institute of Securities Market or Association of Mutual Funds in India and have undergone the process of “Know Your Distributors” are authorised to carry out the IPV. Unless the IPV process is completed, the investor will not be considered as KYC compliant under the KYC compliance procedure and hence will not be permitted to make any investment in the Scheme.

For investors proposing to invest in the Mutual Fund directly (i.e. without being invested through any distributor), IPV done by a scheduled commercial bank may be relied upon by the Mutual Fund. Once all the documents are verified by a KYC Registered Agency, they will send the investor a letter within 10 (ten) Business days from the date of receipt of necessary documents by them from the Mutual Fund or its Registrar and Transfer Agent informing the investor either about compliance by the investor of the new KYC compliance procedure (“final acknowledgement”) or any deficiency in submission of details or documents.

On the basis of the temporary acknowledgement or the final acknowledgement the investor would be eligible to deal with any of the SEBI registered intermediaries as mentioned in the above mentioned SEBI Circulars.
