I. INTRODUCTION

A. RISK FACTORS

1. Standard Risk Factors:

- Investment in mutual fund units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal.
- As the price / value / interest rates of the Securities in which the Scheme invests fluctuates, the value of your investment in the Scheme may go up or down.
- Mutual funds, like Securities investments, are subject to market and other risks and there can be no guarantee against loss resulting from an investment in the Scheme nor can there be any assurance that the Scheme's objectives will be achieved.
- Past performance of the Sponsor / AMC / Mutual Fund does not guarantee future performance of the Scheme.
- The names of the scheme do not in any manner indicate either the quality of the Scheme or its future prospects and returns.
- The Sponsor is not responsible or liable for any loss resulting from the operation of the Scheme beyond the initial contribution of ₹ 1,00,000 (One Lakh - Rupees) made by it towards setting up the Mutual Fund.
- The present Scheme is not a guaranteed or assured return scheme.

2. Scheme Specific Risk Factors

a) Risks associated with investing in Equities and Equity related Securities

The value of the Scheme's investments may be affected by factors affecting the securities markets such as price and volume volatility in the capital markets, interest rates, currency exchange rates, changes in law / policies of the government, taxation laws and political, economic or other developments which may have an adverse bearing on individual Securities, a specific sector or all sectors. Consequently, the NAV of the Units of the Scheme may be affected.

Equity Securities and equity-related Securities are volatile and prone to price fluctuations on a daily basis. The liquidity of investments made by the Scheme may be restricted by trading volumes and settlement periods. This may impact the ability of the Unit Holders to redeem their Units. In view of this, the Trustee has the right, in its sole discretion to limit Redemptions (including suspending Redemption) in certain circumstances [outlined in Section III-B 'Restrictions on Redemptions']. Settlement periods may be extended significantly by unforeseen circumstances. The inability of the Scheme to make intended Securities purchases, due to settlement problems, could cause the Scheme to miss certain investment opportunities. Similarly, the inability to sell Securities held in the Scheme's portfolio could result, at times, in potential losses to the Scheme, should there be a subsequent decline in the value of Securities held in the Scheme's portfolio.

Investments in equity and equity related Securities involve a degree of risk and investors should not invest in the Scheme unless they can afford to take the risk of losing their investment.

The liquidity and valuation of the Scheme's investments due to its holdings of unlisted Securities may be affected if they have to be sold prior to the target date for disinvestment.

Securities which are not quoted on the stock exchanges are inherently illiquid in nature and carry a larger liquidity risk in comparison with Securities that are listed on the exchanges or offer other exit options

to the investors, including put options. The AMC may choose to invest in unlisted Securities that offer attractive yields within the regulatory limit. This may however increase the risk of the portfolio.

b) Risks associated with investing in money market instruments

Investments in money market instruments would involve a moderate credit risk, i.e. risk of an issuer's inability to meet the principal payments.

Money market instruments may also be subject to price volatility due to factors such as changes in interest rates, general level of market liquidity and market perception of credit worthiness of the issuer of such instruments.

The NAV of the Scheme's Units, to the extent that the Scheme is invested in money market instruments, will be affected by changes in the level of interest rates. When interest rates in the market rise, the value of a portfolio of money market instruments can be expected to decline.

c) Risks associated with investing in Bonds

The NAV of the Scheme, to the extent invested in Debt Securities, will be affected by changes in the general level of interest rates. The NAV of the Scheme is expected to increase from a fall in interest rates while it would be adversely affected by an increase in the level of interest rates.

Debt Securities, while fairly liquid, lack a well-developed secondary market, which may restrict the selling ability of the Scheme and may lead to the Scheme incurring losses till the security is sold.

Debt Securities are subject to the risk of the issuer's inability to meet interest and principal payments on its obligations and market perception of the creditworthiness of the issuer.

The AMC may, considering the overall level of risk of the portfolio, invest in lower rated / unrated Securities offering higher yields.

The liquidity of investments made in the Scheme may be restricted by trading volumes and settlement periods. Different segments of the Indian financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances.

The Trustee has the right, in its sole discretion to limit Redemptions (including suspending Redemption) in certain circumstances [outlined in Section III-B 'Restrictions on Redemptions']. There may be temporary periods when the monies of the Scheme are un-invested and no return is earned thereon. The inability of the Scheme to make intended Securities purchases, due to settlement problems, could cause the Scheme to miss certain investment opportunities. By the same token, the inability to sell Securities held in the Scheme's portfolio due to the absence of a well developed and liquid secondary market for Debt Securities could result, at times, in potential losses to the Scheme, should there be a subsequent decline in the value of the Securities held in the Scheme's portfolio.

The liquidity and valuation of the Scheme's investments due to its holdings of unlisted Securities may be affected if they have to be sold prior to their target date of divestment.

Debt Securities, which are not quoted on the stock exchanges, are inherently illiquid in nature and carry a larger amount of liquidity risk, in comparison to Debt Securities that are listed on the exchanges or offer other exit options to the investor, including a put option. The AMC may choose to invest in unlisted Debt Securities that offer attractive yields within regulatory limits. This may however increase the risk of the portfolio. Additionally, the liquidity and valuation of the Scheme's

investment due to its holdings of the unlisted Securities may be affected if they have to be sold prior to the target date of investment.

While Debt Securities that are listed on the stock exchange carry lower liquidity risk, the ability to sell these investments is limited by the overall trading volume on the stock exchanges. Money market Securities, while fairly liquid, lacks a well-developed secondary market, which may restrict the selling ability of the Scheme and may lead to the Scheme incurring losses till the Security is finally sold.

Money market Securities and debt Securities are subject to the risk of an issuer's inability to meet interest and principal payments on its debt obligations (credit risk). These Securities may also be subject to price volatility due to factors such as changes in interest rates, general level of market liquidity and market perception of the creditworthiness of the issuer, among others (market risk). The AMC will endeavour to manage credit risk through in-house credit analysis. The Scheme may also, but is not obliged to, use various hedging products from time to time, as are available and permitted by SEBI, to attempt to reduce the impact of undue market volatility on the Scheme's portfolio. There is no guarantee that hedging techniques will achieve the desired result.

The investments made by the Scheme are subject to reinvestment risk. This risk refers to the interest rate levels at which cash flows received from the Securities in the Scheme are reinvested. The additional income from reinvestment is the "interest on interest" component. The risk is that the rate at which interim cash flows can be reinvested may be lower than that originally assumed.

The NAV of the Scheme's Units, to the extent that the Scheme is invested in fixed income Securities, will be affected by changes in the general level of interest rates. When interest rates decline, the value of a portfolio of fixed income Securities can be expected to rise. Conversely, when interest rates rise, the value of a portfolio of fixed income Securities can be expected to decline.

To the extent the Scheme's investments are in floating rate debt instruments or fixed debt instruments swapped for floating rate return, they will be affected by interest rate movement (basis risk) - coupon rates on floating rate securities are reset periodically in line with the benchmark index movement. Normally, the interest rate risk inherent in a floating rate instrument is limited compared to a fixed rate instrument. Changes in the prevailing level of interest rates will likely affect the value of the Scheme's holdings until the next reset date and thus the value of the Scheme's Units. The value of Securities held by the Scheme generally will vary inversely with changes in prevailing interest rates. The Mutual Fund could be exposed to interest rate risk:

- (i) due to the time gap in the resetting of the benchmark rates, and
- (ii) to the extent the benchmark index fails to capture interest rate changes appropriately (spread risk): though the basis (i.e. benchmark) gets readjusted on a regular basis, the spread (i.e. markup) over benchmark remains constant. This can result in some volatility to the holding period return of floating rate instruments.

Settlement Risk (counterparty risk): Specific floating rate assets may also be created by swapping a fixed return into a floating rate return. In such a swap, there is the risk that the counterparty (who will pay floating rate return and receive fixed rate return) may default;

Liquidity Risk: The market for floating rate Securities is still in its evolutionary stage and therefore may render the market illiquid from time to time, for such Securities that the Scheme is invested in.

Prepayment Risk: The borrower/issuer of security may prepay the receivables prior to their respective due dates. This may result in change in the yield and tenor for the Scheme.

Different types of Securities in which the Scheme may invest as given in the SID carry different levels and types of risk. Accordingly the Scheme's risk may increase or decrease depending upon its investment pattern. E.g. corporate bonds carry a higher amount of risk than government Securities. Further even among corporate bonds, bonds which are rated AAA are comparatively less risky than bonds which are AA rated.

Investments in the Scheme made in foreign currency by a Unit Holder are subject to the risk of fluctuation in the value of Indian Rupee.

d) Risks associated with Derivatives

The Scheme may invest in derivative products in accordance with and to the extent permitted under the Regulations. The use of derivatives requires an understanding of the underlying instruments and the derivatives themselves. The risk of investments in derivatives includes mispricing or improper valuation and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.

Trading in derivatives carries a high degree of risk although they are traded at a relatively small amount of margin which provides the possibility of great profit or loss in comparison with the principal investment amount.

The Scheme may find it difficult or impossible to execute derivative transactions in certain circumstances. For example, when there are insufficient bids or suspension of trading due to price limits or circuit breakers, the Scheme may face a liquidity issue.

The option buyer's risk is limited to the premium paid, while the risk of an option writer is unlimited. However, the gains of an option writer are limited to the premiums earned. Since in case of the Scheme all option positions will have underlying assets, all losses due to price-movement beyond the strike price will actually be an opportunity loss.

The relevant stock exchange may impose restrictions on exercise of options and may also restrict the exercise of options at certain times in specified circumstances.

The writer of a put option bears the risk of loss if the value of the underlying asset declines below the exercise price. The writer of a call option bears a risk of loss if the value of the underlying asset increases above the exercise price.

Investments in index futures face the same risk as investments in a portfolio of shares representing an index. The extent of loss is the same as in the underlying stocks.

The Scheme bears a risk that it may not be able to correctly forecast future market trends or the value of assets, indexes or other financial or economic factors in establishing derivative positions for the Scheme.

The risk of loss in trading futures contracts can be substantial, because of the low margin deposits required, the extremely high degree of leverage involved in futures pricing and the potential high volatility of the futures markets.

Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends on the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involves uncertainty and the decision of fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies.

The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments.

As and when the Scheme trades in derivative products, there are risk factors and issues concerning the use of derivatives that investors should understand. Derivatives require the maintenance of adequate controls to monitor such transactions and the embedded market risks that a derivative adds to the portfolio.

Besides the price of the underlying asset, the volatility, tenor and interest rates affect the pricing of derivatives. Other risks in using derivatives include but are not limited to:

- (a) **Credit Risk:** This occurs when a counterparty defaults on a transaction before settlement and therefore, the Scheme is compelled to negotiate with another counterparty at the then prevailing (possibly unfavourable) market price, in order to maintain the validity of the hedge.
- (b) **Market Liquidity Risk:** This is where the derivatives cannot be sold at prices that reflect the underlying assets, rates and indices.
- (c) **Model Risk:** This is the risk of mis-pricing or improper valuation of derivatives.
- (d) **Basis Risk:** This is when the instrument used as a hedge does not match the movement in the instrument / underlying asset being hedged. The risks may be inter-related also; for e.g. interest rate movements can affect equity prices, which could influence specific issuer / industry assets. This is when the instrument used as a hedge does not match the movement in the instrument / underlying asset being hedged. The risks may be inter-related also; for e.g. interest rate movements can affect equity prices, which could influence specific issuer / industry assets.

e) Risks associated with Short Selling and Securities Lending

The risks in lending portfolio Securities, as with other extensions of credit, consist of the failure of another party, in this case the approved intermediary, to comply with the terms of the agreement entered into between the lender of Securities, i.e. the Scheme, and the approved intermediary. Such failure to comply can result in a possible loss of rights in the collateral put up by the borrower of the Securities, the inability of the approved intermediary to return the Securities deposited by the lender and the possible loss of any corporate benefits accruing to the lender from the Securities deposited with the approved intermediary. The Mutual Fund may not be able to sell such Securities and this can lead to temporary illiquidity.

f) Risks associated with Overseas Investment

Subject to necessary approvals and within the investment objectives of the Scheme, the Scheme may invest in overseas markets which carry risks related to fluctuations in the foreign exchange rates, the nature of the securities market of the country, restrictions on repatriation of capital due to exchange controls and the political environment. Further the repatriation of capital to India may also be hampered by and changes in Regulations or political circumstances. In addition, country risks would include events such as introduction of extraordinary exchange controls, economic deterioration, bi-lateral conflict leading to immobilisation of overseas financial assets and the prevalent tax laws of the respective jurisdiction for the execution of trades or otherwise.

g) Risks associated with Securitised Debt

Generally available asset classes for securitisation in India:

- Commercial vehicles
- Auto and two-wheeler pools
- Mortgage pools (residential housing loans)

- Personal loan, credit card and other retail loans
- Corporate loans / receivables

In terms of specific risks attached to securitisation, each asset class would have different underlying risks. However, residential mortgages typically have lower default rates as an asset class. On the other hand, repossession and subsequent recovery of commercial vehicles and other auto assets is normally easier and better compared to mortgages. Some of the asset classes such as personal loans, credit card receivables etc., being unsecured credits in nature, may witness higher default rates. As regards corporate loans / receivables, depending upon the nature of the underlying security for the loan or the nature of the receivable the risks would correspondingly fluctuate. However, the credit enhancement stipulated by rating agencies for such asset class pools is typically much higher and hence their overall risks are comparable to other AAA-rated asset classes.

Some of the factors, which are typically analyzed for any pool, are as follows:

Size of the loan: This generally indicates the kind of assets financed with loans. Also indicates whether there is excessive reliance on very small ticket size, which may result in difficult and costly recoveries. To illustrate, the ticket size of housing loans is generally higher than that of personal loans. Hence, in the construction of a housing loan asset pool for say ₹ 1,00,00,000/- it may be easier to construct a pool with just 10 housing loans of ₹ 10,00,000/- each rather than to construct a pool of personal loans as the ticket size of personal loans may rarely exceed ₹ 5,00,000/- per individual.

Average original maturity of the pool: This indicates the original repayment period and whether the loan tenors are in line with industry averages and borrower's repayment capacity. To illustrate, in a car pool consisting of 60 month contracts, the original maturity and the residual maturity of the pool viz. number of remaining installments to be paid gives a better idea of the risk of default of the pool itself. If in a pool of 100 car loans, having an original maturity of 60 months, more than 70% of the contracts have paid more than 50% of the monthly installments and if no default has been observed in such contracts, this pool should have a lower probability of default than a similar car loan pool where 80% of the contracts have not yet paid five installments.

Loan-to-value ratio ("LTV"): Indicates how much of the value of the asset is financed by borrower's own equity. The lower the LTV, the better it is. This ratio stems from the principle that where the borrower's own contribution of the asset cost is high, the chances of default are lower. To illustrate, for a truck costing ₹ 20 lakh, if the borrower has himself contributed ₹ 10 lakh and has taken ₹ 10 lakh as a loan, he is going to have lesser propensity to default as he would lose an asset worth ₹ 20 lakh if he defaults in repaying an installment. This is as against a borrower who may meet only ₹ 2 lakh out of his own equity for a truck costing ₹ 20 lakh. Between the two scenarios given above, as the borrower's own equity is lower in the latter case, he would typically have a higher risk of default than the former.

Average seasoning of the pool: This indicates whether borrowers have already displayed repayment discipline. To illustrate, in the case of a pool of personal loans, if a pool of assets consist of borrowers who have already repaid 80% of the installments without default, the probability of default is lower than for a pool where only 10% of installments have been repaid.

Default rate distribution: This indicates what percentage of the pool and overall portfolio of the originator is current, how much is in 0-30 DPD (days past due), 30-60 DPD, 60-90 DPD and so on. The rationale here is that, as against 0-30 DPD, the 60-90 DPD is a higher

risk category. Unlike in plain vanilla instruments, in securitisation transactions it is possible to work towards a target credit rating, which could be much higher than the originator's own credit rating.

In the Indian scenario, also, more than 95% of issuances have been AAA-rated issuances indicating the strength of the underlying assets as well as adequacy of credit enhancement.

Investment exposure of the Fund with reference to securitised debt:

- The Scheme will predominantly invest only in those securitisation issuances which have AAA rating indicating the highest level of safety from a credit risk point of view at the time of making an investment. The Scheme will not invest in foreign securitised debt.
- The Scheme may invest in various types of securitization issuances, including but not limited to asset backed securitisation, mortgage backed securitisation, personal loan backed securitisation, collateralized loan obligation / collateralized bond obligation and so on.
- The Scheme does not propose to limit its exposure to only one asset class or to have asset class based sub-limits as it will primarily look towards the AAA rating of the offering.
- The Scheme will conduct an independent due diligence on the cash margins, collateralisation, guarantees and other credit enhancements and the portfolio characteristic of the securitisation to ensure that the issuance fits into the overall objective of the investment in high investment grade offerings irrespective of underlying asset class.

h) Risks associated with investments in securitised papers

Types of securitised debt vary and carry different levels and types of risks. Credit risk on securitised bonds depends upon the originator and varies depending on whether they are issued with recourse to the originator or otherwise. Even within securitised debt, AAA-rated securitised debt offers lesser risk of default than AA-rated securitised debt. A structure with recourse will have a lower credit risk than a structure without recourse.

As underlying assets in securitised debt may assume different forms and the general types of receivables include auto finance, credit cards, home loans or any such receipts, credit risks relating to these types of receivables depend upon various factors including macro economic factors of these industries and economies. Specific factors like nature and adequacy of property mortgaged against these borrowings, nature of loan agreement / mortgage deed in case of home loan, adequacy of documentation in case of auto finance and home loans, capacity of borrower to meet his obligation on borrowings in case of credit cards and the intention of the borrower influence the risks relating to the asset borrowings underlying the securitised debt.

Changes in market interest rates and pre-payments may not change the absolute amount of receivables for the investors, but may have an impact on the reinvestment of the periodic cash flows that the investor receives in the securitised paper.

Limited Liquidity & Price Risk:

Currently, the secondary market for securitised papers is not very liquid. There is no assurance that a deep secondary market will develop for such securities. This could limit the ability of the Fund to resell them. Even if a secondary market develops and sales were to take place, these secondary transactions may be at a discount to the initial issue price due to changes in the interest rate structure.

Risks due to possible prepayments: Weighted Tenor / Yield:

Asset securitisation is a process whereby commercial or consumer credits are packaged and sold in the form of financial instruments. Full prepayment of underlying loan contract may arise under any of the following circumstances:

- obligor pays the receivable due from him at any time prior to the scheduled maturity date of that receivable; or
- receivable is required to be repurchased by the seller consequent to its inability to rectify a material misrepresentation with respect to that receivable; or
- the servicer, recognizing a contract as a defaulted contract, and hence repossessing the underlying asset and selling the same.

In the event of prepayments, investors may be exposed to changes in tenor and yield

Bankruptcy of the originator or seller:

If the originator becomes subject to bankruptcy proceedings and the court in the bankruptcy proceedings concludes that the sale from originator to the Trust was not a sale then the Fund could experience losses or delays in the payments due. All possible care is generally taken in structuring the transaction so as to minimize the risk of the sale to the Trust not being construed as a "True Sale". Legal opinion is normally obtained to the effect that the assignment of receivables to the Trust in trust for and for the benefit of the investors, as envisaged herein, would constitute a true sale.

Bankruptcy of the investor's agent:

If an investor's agent becomes subject to bankruptcy proceedings and the court in the bankruptcy proceedings concludes that the recourse of the investor's agent to the assets / receivables is not in his capacity as agent / Trustee but in his personal capacity, then an investor could experience losses or delays in the payments due under the swap agreement. All possible care is normally taken in structuring the transaction and drafting the underlying documents so as to provide that the assets / receivables if and when held by an investor's agent is held as agent and in Trust for the Investors and shall not form part of the personal assets of the investor's agent. Legal opinion is normally obtained to the effect that the investors' agent's recourse to assets / receivables is restricted in his capacity as agent and trustee and not in his personal capacity.

Credit Rating of the Transaction / Certificate:

The credit rating is not a recommendation to purchase, hold or sell the Certificate in as much as the ratings do not comment on the market price of the Certificate or its suitability to a particular investor. There is no assurance by the rating agency either that the rating will remain at the same level for any given period of time or that the rating will not be lowered or withdrawn entirely by the rating agency.

Risk of Co-mingling:

The servicers normally deposit all payments received from the obligors into the collection account. However, there could be a time gap between collection by a servicer and depositing the same into the collection account especially considering that some of the collections may be in the form of cash. In this interim period, collections from the loan agreements may not be segregated from other funds of the servicer. If the servicer fails to remit such funds due to investors, the investors may be exposed to a potential loss. Due care is normally taken to ensure that the servicer enjoys the highest credit rating on a standalone basis to minimize co-mingling risk.

Risk Mitigation / Management Strategy

Risk & Description specific to Equities	Risk Mitigants / Management Strategy
Quality risk Risk of investing in unsustainable / weak companies	The stock selection process is an important part of the idea generation stage, as it provides the greater part of added value to the investments. Underpinning the stock selection process is the rigorous research conducted by dedicated country specialists. The approach to stock selection is largely country specific, which means that these investment professionals have the responsibility to design and refine their stock selection process to cope with the dynamic local factors and market conditions. Quality analysis based investment approach: I. Management II. Capital structure III. Sustainability of competitive advantage IV. Return on equity V. Industry attractiveness In general, there are three primary sources of investment return which the investment professionals normally focus on and they form the basic premise of the stock selection process: (i) Growth - companies that exhibit sustainable earnings growth in excess of the market through an economic cycle. (ii) Valuations - quantitative analysis in evaluating the value and profitability of the company. (iii) Dividend yield - an additional source of return, over and above capital appreciation.
Price Risk Risk of overpaying for a company	During company visits, qualitative assessments of the relative growth prospects of the companies concerned are made and strategies are decided to create shareholder value. Industries in which companies operate are analysed along with the competitive landscape as well as the management strategy to enhance competitive advantage and returns. As part of the process, meetings are organised not only with companies that fall within the core stock coverage, but also with their competitors, distributors, suppliers and other stakeholders in order to obtain a complete picture of the industry / company and other investment opportunities. In the process, a clear understanding of the business is arrived at, enabling the identification of future long-term winners at an early stage.
Liquidity Risk High impact costs	Dealing in volatile, often illiquid markets imposes a cost on an active investment manager. The responsibility for minimizing the performance drag lies with the Central Dealing team whose focus is to minimize market impact and transaction costs. The competitive advantages in achieving this objective are: <ul style="list-style-type: none"> ▪ A specialist experienced team; ▪ State of the art systems and on-going investment in trading technology; ▪ Analysis of historical transactions and associated impact costs used to determine trading strategies; ▪ Low commission rates paid to brokers, reducing direct costs per trade; and ▪ Significant overall commission payout ensuring premium service from investment banks and brokerage firms. The dealing team's success can be measured by comparing each execution to the Volume Weighted Average Price ("VWAP") and on-line through the independent Best Execution Comparison Service ("BECS") which compares transaction costs with those of the competition. Effectiveness of the dealing team is measured on an ongoing basis.
Volatility Price volatility due to company or portfolio specific factors	As explained above, the volatility arising out of portfolio specific factors are being mitigated using a combination of various methods.
Event Risk Price volatility due to company or portfolio specific events

Restrictions on Redemptions:

As outlined in Section III-B - ‘Restrictions on Redemptions’ the Trustee and the AMC may impose restrictions on redemptions when there are circumstances leading to a systemic crisis or event that severely constricts market liquidity or the efficient functioning of markets.

Accordingly, such restriction may affect the liquidity of the Scheme and there may be a delay in investors receiving part of their redemption proceeds.

B. REQUIREMENT OF MINIMUM INVESTORS IN THE SCHEME

The Scheme / Plan shall have a minimum of 20 (twenty) investors and no single investor shall account for more than 25% of the corpus of the Scheme / Plan(s). However, if such limit is breached during the NFO of the Scheme, the Mutual Fund will endeavour to ensure that within a period of 3 (three) months or the end of the succeeding calendar quarter from the close of the NFO of the Scheme, whichever is earlier, the Scheme complies with these two conditions. In case the Scheme / Plan(s) does not have a minimum of 20 (twenty) investors in the stipulated period, the provisions of Regulation 39(2)(c) of the SEBI (MF) Regulations would become applicable automatically without any reference from SEBI and accordingly the Scheme / Plan(s) shall be wound up and the Units would be redeemed at applicable NAV. The two conditions mentioned above shall also be complied within each subsequent calendar quarter thereafter, on an average basis, as specified by SEBI.

If there is a breach of the 25% limit by any investor over the quarter, a rebalancing period of 1 (one) month would be allowed and thereafter the investor who is in breach of the rule shall be given 15 (fifteen) days notice to redeem his exposure over the 25 % limit. Failure on the part of the said investor to redeem his exposure over the 25 % limit within the aforesaid 15 (fifteen) days would lead to automatic Redemption by the Mutual Fund at the Applicable NAV without any exit load on the 15th day of the notice period. The Mutual Fund shall adhere to the requirements prescribed by SEBI from time to time in this regard.

C. SPECIAL CONSIDERATIONS, IF ANY

- From time to time, funds managed by the affiliates / associates of the Sponsor may invest either directly or indirectly in the Scheme. The mutual funds managed by these affiliates / associates may acquire a substantial portion of the Units and collectively constitute a major investment in the Scheme. Accordingly,

Redemption of Units held by such affiliates / associates may have an adverse impact on the value of the Units of the Scheme because of the timing of any such Redemption and may affect the ability of other Unit Holders to redeem their respective Units.

- The tax benefits described in this SID are as available under the prevailing taxation laws. Investors / Unit Holders should be aware that the relevant fiscal rules or their interpretation may change. As is the case with any investment, there can be no guarantee that the tax position or the proposed tax position prevailing at the time of an investment in the Scheme will endure indefinitely. thereunder by SEBI and / or RBI without obtaining the prior approval of the investor / unit holder.

While at all times the Trusteeship Company and the Asset Management Company will endeavor that excessive holding of Units in the Scheme among a few Unit holders is avoided, however, the funds invested by these aforesaid persons may acquire a substantial portion of the Scheme's outstanding Units and collectively may constitute a majority unit holder in the Scheme. Redemption of Units held by such persons may have an adverse impact on the value of the Units of the Scheme because of the timing of any such redemption. It may also have impact on the liquidity of the Scheme, which may lead to an adverse impact on the NAV of the Scheme.
- In accordance with the SEBI Regulations, an AMC subject to certain conditions is permitted to undertake activities in the nature of portfolio management services and management and advisory services to pooled assets including offshore funds, insurance funds, pension funds, provident funds, if any of such activities are not in conflict with the activities of the Mutual Fund. E. INVESTMENT STRATEGIES

The Scheme will primarily be a diversified equity fund which will seek to invest in companies for long term investment. Though the benchmark is S&P BSE 200 Total Return Index, the investments will not be limited to the companies constituting the benchmark.

The types of companies that may fall within the scope of such investment could include but are not limited to:

- companies with strong growth potential;
- companies with a special product which has a particular market niche and therefore good earnings potential;
- companies undertaking corporate restructuring.

The investment approach will be bottom-up stock picking - where investments will be selected primarily on the basis of specific criteria relevant to the company in question rather than general macro-economic considerations.

There will be no particular bias towards any market cap size or any sector. The Scheme will endeavour to remain fully invested in equity and equity related instruments at all times. An exposure to various derivatives instruments is likely - for the purposes of hedging, portfolio balancing and optimising returns.

The Fund Manager at his discretion can bring down net equity exposure up to 10% of the portfolio value to protect downside risk in the portfolio. PORTFOLIO TURNOVER

The fund manager normally will buy stocks which he believes will deliver superior earnings growth over a one to two-year period and hence the portfolio turnover is not expected to be very high. However, it is difficult to estimate the portfolio turnover.

Portfolio turnover is defined as the aggregate value of investment and disinvestment in equity / equity-related Securities (other than those caused by the Purchases and Redemptions by Unit Holders) as a percentage of the average corpus of the Scheme during a specified period of time. The scheme has no specific target relating to portfolio turnover

Portfolio turnover would exclude:

- The turnover caused on account of investing the initial corpus
- The turnover caused on account of investing in money market securities; and
- The turnover caused on account of redemptions by unit holders
- Investments made by the Scheme would also be in accordance with prevailing provisions of the SEBI regulations.

SEBI vide its circulars MIRSD/SE/Cir-21/2011 dated October 05, 2011, MIRSD/Cir-23/2011 dated December 02, 2011 and MIRSD/Cir-26/2011 dated December 23, 2011 had laid down a uniform KYC compliance procedure for all investors with effect from January 1, 2012. SEBI also issued KYC Registration Agency ("KRA") Regulations 2011 and the guidelines in pursuance of the said Regulations for In-Person Verification ("IPV").

1. Requirement for the existing investors in mutual funds:

The existing investors in mutual funds who have already complied with the KYC requirement (defined for the purpose of this SID as KYC compliant) and have the KYC compliance letter issued to them by CDSL Ventures Limited are exempt from following the new KYC procedure effective January 01, 2012, but only for the purpose of making investments with any SEBI registered mutual fund.

If, however, the KYC compliant investors would like to deal with any SEBI registered intermediary other than mutual funds, they may have to follow the new KYC compliance procedure.

2. Requirement for the new investors in mutual funds:

All investors other than KYC compliant investors as defined above are required to follow the new KYC compliance procedure as mentioned below while making any investment in the Scheme:

Fill up and sign the KYC application form (for individual investors or non-individual investors as appropriate) available on the AMC's website i.e. www.edelweissmf.com or www.amfiindia.com or www.cvlindia.com

Note: As per the SEBI circular MIRSD/Cir-26/2011 dated December 23, 2011, it is mandatory for SEBI registered intermediaries to carry out IPV of any investor dealing with a SEBI registered intermediary.

For investments in a mutual fund, the asset management companies, registrar and transfer agents of mutual funds and distributors which comply with the certification process of National Institute of Securities Market or Association of Mutual Funds in India and have undergone the process of "Know Your Distributors" are authorised to carry out the IPV. Unless the IPV process is completed, the investor will not be considered as KYC compliant under the KYC compliance procedure and hence will not be permitted to make any investment in the Scheme.

For investors proposing to invest in the Mutual Fund directly (i.e. without being invested through any distributor), IPV done by a scheduled commercial bank may be relied upon by the Mutual Fund. Once all the documents are verified by a KYC Registered Agency, they will send the investor a letter within 10 (ten) Business days from the date of receipt of necessary documents by them from the Mutual Fund or its Registrar and Transfer Agent informing the investor either about compliance by the investor of the new KYC compliance procedure ("final acknowledgement") or any deficiency in submission of details or documents.

On the basis of the temporary acknowledgement or the final acknowledgement the investor would be eligible to deal with any of the SEBI registered intermediaries as mentioned in the above mentioned SEBI Circulars.

3. SYSTEMATIC TRANSFER PLAN (STP)

This facility enables Unit Holders to transfer fixed amounts from their accounts in the Scheme to the other schemes launched by the Mutual Fund from time to time. The STP can be made daily (all business days of the month) / weekly (7th, 14th, 21st, 28th of the month) / fortnightly (10th and 25th of the month) / monthly (any date except last 3 days of the month) / quarterly (any date except last 3 days of the month) specified by the Unit Holder. 4. REGULAR PAYOUT FACILITY ('THE RP FACILITY')

The RP Facility will enable investors to withdraw / redeem a fixed percentage of the specified amount from their investments in the Eligible Schemes at a predefined frequency as specified at the time of registering for the RP Facility. Investor / unit holders are requested to take note of the terms and conditions of the RP Facility as stated in the Regular Payout Facility Form, effective from September 29, 2017.

5. TRIGGER

Trigger acts as a financial planning tool for information & initiating action. The unit holder can specify a specific event / action, which may be related to time or a specific event / action in advance and when this event / action takes place the trigger will get activated. This helps the unit holders to minimize the loss and/or timely book the profits. Thus, this facility enables the unit holder to keep track of his investments without having to put in time and effort to track portfolio movements on a regular basis. Triggers can broadly be classified in two types i.e. Time Based & Event Based trigger.

1. **Time-based triggers** - Time-based triggers are actioned on the day and / or date opted by the investor. For example, if Investor opted for particular day or date trigger & if he wishes to gift some units to his mother on her birthday, a trigger could be set based on the date as requested by the Unit holder.
2. **Event-based triggers** - Investor can also set triggers based on the occurrence of a particular external event that affects the value of investment. For example,
 - Investment value - Change in the value of investment held by unit holder by certain percentage / value (rise / fall) then trigger can be activated. Percentage change in value of units will be calculated on the amount invested by the unit holders.
 - Capital Appreciation/Depreciation - If investment value appreciates / depreciates by certain percentage / value (rise/fall) trigger will be activated.
 - Change in NAV-Change in the NAV by certain percentage (rise / falls) on Invested NAV then trigger will be activated.
 - S&P BSE Sensex / NSE Nifty- If S&P BSE Sensex / NSE Nifty changes by certain percentage /points (rise/falls) trigger will be activated. Only end of day closing points of BSE / NSE will be considered for activating the trigger. Percentage rise / falls will be calculated by taking the base index as on the investment date.

Investors can opt for the following Trigger Facilities:

- **Gain Switching Mechanism Facility (GSM Facility)** - This facility enables an investor to switch a fixed percentage of Capital Appreciation from the Source Scheme to a Target Scheme at a predetermined frequency. Edelweiss Mid Cap Fund is a part of the Source Scheme for this facility.

- **Prepaid STP** - This facility enables an investor to switch a fixed percentage of the investment amount from the Source Scheme to the Target Scheme/s whenever there is a fall in Nifty 50 Index level by a certain percentage from the previous Business Day's closure. Edelweiss Large & Mid Cap Fund is a part of Target Scheme for this facility.
- **Prepaid SIP** - This facility enables investors to invest a predetermined amount in any of the Eligible Schemes of the Fund whenever there is a fall in Nifty 50 Index level by a certain percentage from the previous Business Day's closure, by providing an auto debit mandate from their bank. Edelweiss Large & Mid Cap Fund is a part of the eligible scheme for this facility.
- **Goal Progression SIP (GpRS)** - GPrS Facility will enable the investor / unit holder to specify a goal along with the target amount which the investor wish to achieve by investing through Systematic Investment Plan ("SIP") under the Eligible Schemes of the Fund. This Facility will 'Alert' the investor (by way of Email / SMS) once the target amount as specified by the investor is achieved.

If the investor fails to mention the Action to be taken on fulfillment of the trigger opted by him, the default action would be 'Alert', which means that an alert will be triggered to his registered mobile / email id.

Note:

In case the investor opts for both normal redemption and trigger based redemption in a redemption request, the redemption request would be processed as a normal redemption request and would not be registered as trigger based redemption.

For further details on Trigger facility, please refer SAI.

6. INVESTMENT THROUGH CORPORATE PLATFORM

Under this facility subscription is allowed viz. "Investment through Corporate Platform" for the employees / officers of Corporates.

Through this facility, if the Corporate provides direct credit of their employees'/officers' investments either through SIP or lumpsum into the Scheme's bank account, the requirement for submitting cheque/cancelled cheque during initial (first time) investment shall be waived off. Further, in case of SIP the frequency and the date will be customized by the AMC, at its discretion with effect from January 22, 2018.

Lien on Units for Loans

Units under the Scheme may be offered as security by way of a lien / charge in favour of scheduled banks, financial institutions, non-banking finance companies (NBFCs) or any other body. The Registrar and Transfer Agent will note and record the lien against such Units. A standard request letter for this purpose is available on request with the Registrar and Transfer Agent or the AMC.

The Unit Holder will not be able to redeem / switch Units under lien until the lien holder provides written authorization to the Mutual Fund that the lien / charge may be vacated. As long as Units are under lien, the lien holder will have complete authority to exercise the lien, thereby redeeming such Units and receiving payment proceeds. In such instance, the Unit Holder will be informed by the Registrar and Transfer Agent through an account statement. In no case will the Units be transferred from the Unit Holder to the lien holder. Dividends declared on Units under lien will be paid / re-invested to the credit of the Unit Holder and not the lien holder unless specified otherwise in the lien letter.

Account Statements for the Scheme

The Account Statement shall not be construed as a proof of title and is only a computer generated statement indicating the details of transactions under the Scheme(s) and is a non-transferable document.

The Account Statement will be issued in lieu of Unit Certificates. Normally no Unit certificates will be issued. However, if the applicant so desires, the AMC shall issue a non transferable Unit certificate to the applicant within 30 days of the receipt of request for the certificate. Unit certificate if issued must be duly discharged by the Unit Holder(s) and surrendered along with the request for redemption / switch or any other transaction of Units covered therein.

For normal transactions:

The AMC shall allot the Units to the applicants whose application has been accepted and also send confirmations specifying the number of Units allotted to the applicant by way of e-mail and / or SMS to the applicant's registered e-mail address and / or mobile number as soon as possible but not later than 5 (Five) Business Days from the date of closure of the allotment and / or from the date of receipt of the specific request for account statement from the Unit Holders. For ongoing period, CAS for each calendar month to the Unit Holder(s) in whose folio(s) transaction(s) has / have taken place during that calendar month shall be sent on or before 10th of the succeeding calendar month. In case of any specific request for account statement received from a Unit Holder, the account statement would be sent to the Unit Holder within 5 (Five) Business Days from the receipt of such request.

For the purpose of sending CAS, common investors across mutual funds shall be identified by their PAN / PEKRN.

The CAS shall not be received by the Unit Holders for the folio(s) not updated with PAN / PEKRN details. The Unit Holders are therefore requested to ensure that the folio(s) are updated with their PAN / PEKRN.

The statement of holding of the beneficiary account holder for Units held in dematerialized form will be sent by the respective Depository Participants periodically.

Further, the CAS detailing holdings across all schemes of all mutual funds at the end of every 6 (Six) calendar months (i.e. September / March), shall be sent by mail / e-mail on or before the 10th day of succeeding calendar month, to all such Unit Holders in whose folios no transaction has taken place during that period. The half yearly CAS will be sent by e-mail to the Unit Holders whose e-mail address is available, unless a specific request is made to receive the same in physical form.

Allotment of Units and dispatch of account statements to NRIs / FPIs will be subject to RBI approval. Upon allotment of Units an account statement will be sent to each Unit Holder stating the number of Units allotted. With effect from October 1, 2010 mutual fund units held in dematerialized account only are freely transferable, this is as per the SEBI circular no. CIR/IMD/DF/ 10/2010 dated August 18, 2010. All other forms of Units of the Schemes are not transferable. The Trustees may issue a Unit Certificate in lieu of the account statement in respect of the Units held to such Unit Holders who request for the same, after receipt of a specific request from the Unit Holder. The Trustees reserve the right to make the Units transferable at a later date subject to SEBI Regulations issued from time to time. In view of the same, additions / deletion of names will not be allowed under any folio of the Scheme.

The above provisions in respect of deletion of names will not be applicable in case of death of Unit Holder (in respect of joint holdings) as this is treated as transmission of Units and not transfer.

Note: No account statements (annual or otherwise) will be issued to investors who have opted to hold Units in electronic mode.

Dividend

The dividend warrants shall be dispatched to the Unit Holders within 30 (thirty) days of the date of declaration of the dividend.

The AMC / Registrar are not responsible for any delayed delivery or non-delivery or any consequences thereof, if the dispatch has been made correctly as stated in this paragraph.

2. Non-Resident Indian Investors

For NRIs, Redemption proceeds will be remitted depending upon the source of investment as follows:

(a) Repatriation Basis

When Units have been purchased through remittance in foreign exchange from abroad or by cheque / draft issued from proceeds of the Unit Holder's FCNR deposit or from funds held in the Unit Holder's Non Resident (External) Rupee account kept in India, the proceeds can be remitted to the Unit Holder in foreign currency (any exchange rate fluctuation will be borne

by the Unit Holder). The proceeds can also be sent to his Indian address for crediting to his Non-Resident (External) Rupee Account (NRE) / Foreign Currency (Non-Resident) Account (FCNR) / Non-resident (Ordinary) Account (NRO), if desired by the Unit Holder.

(b) Non Repatriation Basis

When Units have been purchased from funds held in the Unit Holder's non-resident (Ordinary) account, the proceeds will be sent to the Unit Holder's Indian address for crediting to the Unit Holder's non-resident (Ordinary) account.

For FPIs, the designated branch of the authorised dealer may allow remittance of net sale / maturity proceeds (after payment of taxes) or credit the amount to the foreign currency account or Non -resident Rupee account of the FPI maintained in accordance with the approval granted to it by the RBI.

The Scheme will not be liable for any delays or for any loss on account of any exchange fluctuations, while converting the rupee amount in foreign exchange in the case of transactions with NRIs / FPIs.

The Scheme may make other arrangements for effecting payment of Redemption proceeds in future.

The Unit Holder has the option to request for Redemption either in amount in Rupees or in number of Units.

Units purchased by cheque may not be redeemed until after realization of the cheque. In case the investor mentions the number of Units as well as the amount, then the amount will be considered for processing the Redemption request. In case the investor mentions the number of Units or the amount in words and figures, then the value in words will be taken for processing the Redemption request.

If the redemption request amount exceeds the balance lying to the credit of the Unit Holder's said account, then the fund shall redeem the entire amount lying to the credit of the Unit Holder's account in that Scheme / Plan / Option.

If an investor has purchased Units on more than 1 (one) Business Day, the Units purchased prior in time (i.e. those Units which have been held for the longest period of time), are deemed to have been redeemed first, i.e. on a first in first out basis except when the Unit Holder specifically requests Redemption of Units purchased on specific date(s). If multiple Purchases are made on the same day, the Purchase appearing earliest in the account statement will be redeemed first.

The minimum amount in rupees for Redemption shall be ₹ 1,000/- or account balance whichever is less.

D. COMPUTATION OF NAV

Calculation of NAV

The NAV under the Scheme shall be calculated by the method shown below:

$$\text{NAV (₹)} = \frac{\begin{aligned} &(\text{Market or Fair Value of Scheme's investments} + \text{receivables} + \text{accrued income} + \text{other assets}) \\ &- (\text{accrued expenses} + \text{payable} + \text{other liabilities and provisions}) \end{aligned}}{\text{No. of Units outstanding under the Scheme}}$$

Computation of NAV, will be done after taking into account dividends paid, if any, and the distribution tax thereon, if applicable. Therefore, once dividends are distributed under the Dividend Option, the NAV of the Units under the Dividend Option would always remain lower than the NAV of the units issued under the Growth Option. The income earned and the profits realized in respect of the Units issued under the Growth Option remain invested and are reflected in the NAV of the Units.

The NAV will be calculated up to three decimal places for the Scheme.

The valuation of the Scheme's assets and calculation of the Scheme's NAV shall be subject to audit on an annual basis and such regulations as may be prescribed by SEBI from time to time.

The NAV shall be calculated and announced on all Business Days. The AMC will calculate the NAV of the Scheme on every Business Day and disclose the NAV of the Scheme on the same Business Day.
