I. INTRODUCTION

A. RISK FACTORS

1. Standard Risk Factors:

- Investment in mutual fund units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal.
- As the price / value / interest rates of the Securities in which the Scheme invests fluctuates, the value of your investment in the Scheme may go up or down.
- Mutual funds, like Securities investments, are subject to market and other risks and there can be no guarantee against loss resulting from an investment in the Scheme nor can there be any assurance that the Scheme's objectives will be achieved.
- Past performance of the Sponsor / AMC / Mutual Fund does not guarantee future performance of the Scheme.
- The name of the scheme do not in any manner indicate either the quality of the Scheme or its future prospects and returns.
- The Sponsor is not responsible or liable for any loss resulting from the operation of the Scheme beyond the initial contribution of ₹ 1,00,000 (One Lakh - Rupees) made by it towards setting up the Mutual Fund.
- The present Scheme is not a guaranteed or assured return scheme.

2. Scheme Specific Risk Factors

By virtue of requirements under the ELSS, Units issued under Edelweiss Tax Advantage Fund will not be redeemed until the expiry of 3 (three) years from the date of their allotment. The ability of an investor to realise returns on investments in Edelweiss Tax Advantage Fund is consequently restricted for the first three years. Redemption will be made prior to the expiry of the aforesaid 3 (three) years period only in the event of the death of a Unit Holder, subject to the Units having been held for a period of 1 (one) year from the date of their allotment.

a) Risks associated with investing in Equities and Equity related Securities

The value of the Scheme's investments may be affected by factors affecting the securities markets such as price and volume volatility in the capital markets, interest rates, currency exchange rates, changes in law / policies of the government, taxation laws and political, economic or other developments which may have an adverse bearing on individual Securities, a specific sector or all sectors. Consequently, the NAV of the Units of the Scheme may be affected.

Equity Securities and equity-related Securities are volatile and prone to price fluctuations on a daily basis. The liquidity of investments made by the Scheme may be restricted by trading volumes and settlement periods. This may impact the ability of the Unit Holders to redeem their Units. In view of this, the Trustee has the right, in its sole discretion to limit Redemptions (including suspending Redemption) in certain circumstances [outlined in Section III-B 'Restrictions on Redemptions']. Settlement periods may be extended significantly by unforeseen circumstances. The inability of the Scheme to make intended Securities purchases, due to settlement problems, could cause the Scheme to miss certain investment opportunities. Similarly, the inability to sell Securities held in the Scheme's portfolio could result, at times, in potential losses to the Scheme, should there be a subsequent decline in the value of Securities held in the Scheme's portfolio.

Investments in equity and equity related Securities involve a degree of risk and investors should not invest in the Scheme unless they can afford to take the risk of losing their investment.

The liquidity and valuation of the Scheme's investments due to its holdings of unlisted Securities may be affected if they have to be sold prior to the target date for disinvestment.

Securities which are not quoted on the stock exchanges are inherently illiquid in nature and carry a larger liquidity risk in comparison with Securities that are listed on the exchanges or offer other exit options to the investors, including put options. The AMC may choose to invest in unlisted Securities that offer attractive yields within the regulatory limit. This may however increase the risk of the portfolio.

b) Risks associated with investing in money market instruments

Investments in money market instruments would involve a moderate credit risk, i.e. risk of an issuer's inability to meet the principal payments.

Money market instruments may also be subject to price volatility due to factors such as changes in interest rates, general level of market liquidity and market perception of credit worthiness of the issuer of such instruments.

The NAV of the Scheme's Units, to the extent that the Scheme is invested in money market instruments, will be affected by changes in the level of interest rates. When interest rates in the market rise, the value of a portfolio of money market instruments can be expected to decline.

c) Risks associated with investing in Bonds

The NAV of the Scheme, to the extent invested in Debt Securities, will be affected by changes in the general level of interest rates. The NAV of the Scheme is expected to increase from a fall in interest rates while it would be adversely affected by an increase in the level of interest rates.

Debt Securities, while fairly liquid, lack a well-developed secondary market, which may restrict the selling ability of the Scheme and may lead to the Scheme incurring losses till the security is sold.

Debt Securities are subject to the risk of the issuer's inability to meet interest and principal payments on its obligations and market perception of the creditworthiness of the issuer.

The AMC may, considering the overall level of risk of the portfolio, invest in lower rated / unrated Securities offering higher yields.

The liquidity of investments made in the Scheme may be restricted by trading volumes and settlement periods. Different segments of the Indian financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances. The Trustee has the right, in its sole discretion to limit Redemptions (including suspending Redemption) in certain circumstances [outlined in Section III-B 'Restrictions on Redemptions']. There may be temporary periods when the monies of the Scheme are un-invested and no return is earned thereon. The inability of the Scheme to make intended Securities purchases, due to settlement problems, could cause the Scheme to miss certain investment opportunities. By the same token, the inability to sell Securities held in the Scheme's portfolio due to the absence of a well developed and liquid secondary market for Debt Securities could result, at times, in potential losses to the Scheme, should there be a subsequent decline in the value of the Securities held in the Scheme's portfolio.

The liquidity and valuation of the Scheme's investments due to its holdings of unlisted Securities may be affected if they have to be sold prior to their target date of divestment.

Debt Securities, which are not quoted on the stock exchanges, are inherently illiquid in nature and carry a larger amount of liquidity risk, in comparison to Debt Securities that are listed on the exchanges or offer other exit options to the investor, including a put option. The AMC may choose to invest in unlisted Debt Securities that offer attractive yields within regulatory limits. This may however increase the risk of the portfolio. Additionally, the liquidity and valuation of the Scheme's investment due to its holdings of the unlisted Securities may be affected if they have to be sold prior to the target date of investment.

While Debt Securities that are listed on the stock exchange carry lower liquidity risk, the ability to sell these investments is limited by the overall trading volume on the stock exchanges. Money market Securities, while fairly liquid, lacks a well-developed secondary market, which may restrict the selling ability of the Scheme and may lead to the Scheme incurring losses till the Security is finally sold.

Money market Securities and debt Securities are subject to the risk of an issuer's inability to meet interest and principal payments on its debt obligations (credit risk). These Securities may also be subject to price volatility due to factors such as changes in interest rates, general level of market liquidity and market perception of the creditworthiness of the issuer, among others (market risk). The AMC will endeavour to manage credit risk through in-house credit analysis. The Scheme may also, but is not obliged to, use various hedging products from time to time, as are available and permitted by SEBI, to attempt to reduce the impact of undue market volatility on the Scheme's portfolio. There is no guarantee that hedging techniques will achieve the desired result.

The investments made by the Scheme are subject to reinvestment risk. This risk refers to the interest rate levels at which cash flows received from the Securities in the Scheme are reinvested. The additional income from reinvestment is the "interest on interest" component. The risk is that the rate at which interim cash flows can be reinvested may be lower than that originally assumed.

The NAV of the Scheme's Units, to the extent that the Scheme is invested in fixed income Securities, will be affected by changes in the general level of interest rates. When interest rates decline, the value of a portfolio of fixed income Securities can be expected to rise. Conversely, when interest rates rise, the value of a portfolio of fixed income Securities can be expected to decline.

To the extent the Scheme's investments are in floating rate debt instruments or fixed debt instruments swapped for floating rate

return, they will be affected by interest rate movement (basis risk) - coupon rates on floating rate securities are reset periodically in line with the benchmark index movement. Normally, the interest rate risk inherent in a floating rate instrument is limited compared to a fixed rate instrument. Changes in the prevailing level of interest rates will likely affect the value of the Scheme's holdings until the next reset date and thus the value of the Scheme's Units. The value of Securities held by the Scheme generally will vary inversely with changes in prevailing interest rates. The Mutual Fund could be exposed to interest rate risk:

- (i) due to the time gap in the resetting of the benchmark rates, and
- (ii) to the extent the benchmark index fails to capture interest rate changes appropriately (spread risk): though the basis (i.e. benchmark) gets readjusted on a regular basis, the spread (i.e. markup) over benchmark remains constant. This can result in some volatility to the holding period return of floating rate instruments.

Settlement Risk (counterparty risk): Specific floating rate assets may also be created by swapping a fixed return into a floating rate return. In such a swap, there is the risk that the counterparty (who will pay floating rate return and receive fixed rate return) may default;

Liquidity Risk: The market for floating rate Securities is still in its evolutionary stage and therefore may render the market illiquid from time to time, for such Securities that the Scheme is invested in.

Different types of Securities in which the Scheme may invest as given in the SID carry different levels and types of risk. Accordingly the Scheme's risk may increase or decrease depending upon its investment pattern. E.g. corporate bonds carry a higher amount of risk than government Securities. Further even among corporate bonds, bonds which are rated AAA are comparatively less risky than bonds which are AA rated.

Investments in the Scheme made in foreign currency by a Unit Holder are subject to the risk of fluctuation in the value of Indian Rupee.

d) Risks associated with Short Selling and Securities Lending

The risks in lending portfolio Securities, as with other extensions of credit, consist of the failure of another party, in this case the approved intermediary, to comply with the terms of the agreement entered into between the lender of Securities, i.e. the Scheme, and the approved intermediary. Such failure to comply can result in a possible loss of rights in the collateral put up by the borrower of the Securities, the inability of the approved intermediary to return the Securities deposited by the lender and the possible loss of any corporate benefits accruing to the lender from the Securities deposited with the approved intermediary. The Mutual Fund may not be able to sell such Securities and this can lead to temporary illiquidity.

Risk Mitigation / Management Strategy

Risk & Description specific to Equities	Risk Mitigants / Management Strategy
Quality risk Risk of investing in unsustainable / weak companies	<p>The stock selection process is an important part of the idea generation stage, as it provides the greater part of added value to the investments. Underpinning the stock selection process is the rigorous research conducted by dedicated country specialists. The approach to stock selection is largely country specific, which means that these investment professionals have the responsibility to design and refine their stock selection process to cope with the dynamic local factors and market conditions.</p> <p>Quality analysis based investment approach:</p> <ol style="list-style-type: none"> I. Management II. Capital structure III. Sustainability of competitive advantage IV. Return on equity V. Industry attractiveness <p>In general, there are three primary sources of investment return which the investment professionals normally focus on and they form the basic premise of the stock selection process:</p> <ol style="list-style-type: none"> (i) Growth - companies that exhibit sustainable earnings growth in excess of the market through an economic cycle. (ii) Valuations - quantitative analysis in evaluating the value and profitability of the company. (iii) Dividend yield - an additional source of return, over and above capital appreciation.
Price Risk Risk of overpaying for a company	<p>During company visits, qualitative assessments of the relative growth prospects of the companies concerned are made and strategies are decided to create shareholder value. Industries in which companies operate are analysed along with the competitive landscape as well as the management strategy to enhance competitive advantage and returns. As part of the process, meetings are organised not only with companies that fall within the core stock coverage, but also with their competitors, distributors, suppliers and other stakeholders in order to obtain a complete picture of the industry / company and other investment opportunities. In the process, a clear understanding of the business is arrived at, enabling the identification of future long-term winners at an early stage.</p>
Liquidity Risk High impact costs	<p>Dealing in volatile, often illiquid markets imposes a cost on an active investment manager. The responsibility for minimizing the performance drag lies with the Central Dealing team whose focus is to minimize market impact and transaction costs. The competitive advantages in achieving this objective are:</p> <ul style="list-style-type: none"> ▪ A specialist experienced team; ▪ State of the art systems and on-going investment in trading technology; ▪ Analysis of historical transactions and associated impact costs used to determine trading strategies; ▪ Low commission rates paid to brokers, reducing direct costs per trade; and ▪ Significant overall commission payout ensuring premium service from investment banks and brokerage firms. <p>The dealing team's success can be measured by comparing each execution to the Volume Weighted Average Price ("VWAP") and on-line through the independent Best Execution Comparison Service ("BECS") which compares transaction costs with those of the competition. Effectiveness of the dealing team is measured on an ongoing basis.</p>
Volatility Price volatility due to company or portfolio specific factors	<p>As explained above, the volatility arising out of portfolio specific factors are being mitigated using a combination of various methods.</p>
Event Risk Price volatility due to company or portfolio specific events	

Restrictions on Redemptions:

As outlined in Section III-B - 'Restrictions on Redemptions' the Trustee and the AMC may impose restrictions on redemptions when there are circumstances leading to a systemic crisis or event that severely constricts market liquidity or the efficient functioning of markets.

Accordingly, such restriction may affect the liquidity of the Scheme and

there may be a delay in investors receiving part of their redemption proceeds.

B. REQUIREMENT OF MINIMUM INVESTORS IN THE SCHEME

The Scheme / Plan shall have a minimum of 20 (twenty) investors and no single investor shall account for more than 25% of the corpus of the Scheme / Plan(s). However, if such limit is breached during the NFO of the Scheme, the Mutual Fund will endeavour to ensure that within a period of 3 (three) months or the end of the succeeding calendar quarter from the close of the NFO of the Scheme, whichever is earlier, the Scheme complies with these two conditions. In case the Scheme / Plan(s) does not have a minimum of 20 (twenty) investors in the stipulated period, the provisions of Regulation 39(2)(c) of the SEBI (MF) Regulations would become applicable automatically without any reference from SEBI and accordingly the Scheme / Plan(s) shall be wound up and the Units would be redeemed at applicable NAV. The two conditions mentioned above shall also be complied within each subsequent calendar quarter thereafter, on an average basis, as specified by SEBI.

If there is a breach of the 25% limit by any investor over the quarter, a rebalancing period of 1 (one) month would be allowed and thereafter the investor who is in breach of the rule shall be given 15 (fifteen) days notice to redeem his exposure over the 25 % limit. Failure on the part of the said investor to redeem his exposure over the 25 % limit within the aforesaid 15 (fifteen) days would lead to automatic Redemption by the Mutual Fund at the Applicable NAV without any exit load on the 15th day of the notice period. The Mutual Fund shall adhere to the requirements prescribed by SEBI from time to time in this regard.

However, there can be no assurance that the investment objective of the Scheme will be realised.</p>	<p>Equity and equity related Securities: 80% - 100%, Debt and Money Market instrument: 0% - 20%</p>	<p>The Scheme will be a diversified equity fund which will invest predominantly in equity and equity related securities with focus on riding economic cycles through dynamic allocation between various sectors and stocks at different stages of economic activity. An economy is typically characterized by the fluctuations in business, investment and consumption activity measured by real GDP growth and other macroeconomic variables. A full economic cycle is basically defined in terms of stages of expansion and contraction in economic activity. During expansion, an economy experiences an increase in economic activity as evidenced by real GDP growth, industrial production, etc whereas during contraction, the pace of economic activity slows down. Identifying the stage of economic cycle is critical to the relative performance in the equity markets as sector performance across the cycle is not homogeneous with different sectors providing true representation of the economic situation at different points of the cycle. As a result, different sectors assume market leadership across different economic phases.</p> <p>The Scheme would aim to deploy the stages of economic cycle approach to investing by identifying such economic trends and investing in the sectors and stocks that are likely to outperform at any given stage of cycle in the economy. During period of expansion, the Scheme would aim to predominantly invest in stocks of companies in the</p> <p>cyclical sectors as they tend to outperform the broader market during expansionary phase due to increased investment and manufacturing activity leading to higher GDP growth. For example, given the new government's focus on building highways, there is likely to be flurry of awards in the roads sector and major beneficiaries among others would be companies in construction, cement sectors. To take advantage of such events, the fund is likely to be overweight on construction and cement sectors. Similarly, during period of contraction the Scheme would look to invest in defensive sectors stocks or sectors that are less sensitive to changes in overall economic activity.</p> <p>However, this fund will generally not invest in sectors such as pharmaceuticals, fast moving consumer goods and IT services. Portfolio Turnover

The fund manager normally will buy stocks which he believes will deliver superior earnings growth over a one to two-year period and hence the portfolio turnover is not expected to be very high. However, it is difficult to estimate the portfolio turnover.

Portfolio turnover is defined as the aggregate value of investment and disinvestment in equity / equity-related Securities (other than those caused by the Purchases and Redemptions by Unit Holders) as a percentage of the average corpus of the Scheme during a specified period of time. The scheme has no specific target relating to portfolio turnover

Portfolio turnover would exclude:

- The turnover caused on account of investing in money market securities; and
- Investments made by the Scheme would also be in accordance with prevailing provisions of the SEBI regulations.

The Scheme may invest in other schemes managed by the AMC or in the schemes of any other mutual funds, provided it is in conformity to the investment objectives of the Scheme, the ELSS and the Regulations. As per the Regulations, no investment management fees will be charged for such investments. From time to time and subject to the SEBI Regulations, the AMC may invest in this Scheme. The decision to invest in the Scheme by the AMC will be based on parameters specified by the Board of the AMC.

G. FUNDAMENTAL ATTRIBUTES

Following are the Fundamental Attributes of the Scheme, in terms of Regulation 18 (15A) of the SEBI Regulations:

H. HOW WILL THE SCHEME BENCHMARK ITS ASSETS?

The performance of the schemes of the Mutual Fund is reviewed by the Investment Committee of the AMC as well as the Board of the AMC and Trustee periodically. The Investment Committee is operational at the AMC level and has majority representation from the senior management of the AMC. Monthly reports on the performance of the schemes with appropriate benchmark indices are also sent to the directors of the AMC and the Trustee together with the relative performance of the schemes of other mutual funds schemes in the same category and this is placed before the Board of the AMC and the Trustee.

Further, in terms of SEBI Circular No.MFD/CIR/16/400/02 dated March 26, 2002, the performance of the Scheme compared to its benchmark index will be reviewed at every meeting of the Board of the AMC and Trustee and corrective action as proposed will be taken in case of unsatisfactory performance.

The Benchmark for the Scheme is S&P BSE-200 Index. The performance of the Scheme would be benchmarked with S&P BSE- 200 Index since it is in line with the investment objective and this reflects the primary universe of stocks from where the portfolio would be constructed by the fund managers. The Trustees may change the benchmark in future if a benchmark better suited to the investment objective of the Scheme is available.

With the discontinuation of the Dividend Reinvestment

Option under the Dividend option in Edelweiss Tax Advantage Fund no fresh subscriptions would be accepted under the Reinvestment Option of the Scheme with effect from 30 April 2015. For existing unit holders under the

Reinvestment Option, dividends declared in future will be compulsorily paid out / credited to the bank account of the 1st unitholder, instead of being reinvested.

Dividend Transfer Plan (“DTP”) is a new sub-option being introduced under the Dividend Option of Edelweiss Tax Advantage Fund. Features of DTP are as given below:

- DTP is a unique facility wherein a unit holder can opt to automatically invest/transfer the dividend declared by the source scheme into another scheme which is referred as target scheme.
- Dividend from source scheme is transferred on the immediate next business day after the record date at the applicable NAV of the target scheme. Accordingly equivalent units will be allotted in the target scheme.
- Currently the source scheme for DTP is Edelweiss Tax Advantage Fund.
- The target schemes for DTP are all open ended schemes of Edelweiss Mutual Fund.
- Load Structure (entry load & exit load) on units invested in a target scheme via Dividend Transfer Plan will be NIL.

- The provision for minimum subscription amount specified in the respective target Scheme's SID will not be applicable under DTP.
- There is no Minimum amount of dividend eligible for transfer under DTP.
- The DTP facility is available only for units held / to be held in Non-Demat mode in the source and the target schemes.
- The request for enrolment for DTP must be submitted at least 10 days prior to the Record Date for the dividend. In case of the condition not being met, the enrolment would be considered valid from the immediately succeeding Record Date of the dividend, provided the difference between the date of receipt of a valid application for enrolment under DTP and the next Record Date for dividend is not less than 10 days.
- Unit holders will have the right to discontinue the DTP facility at any time by sending a written request to the ISC. Notice of such discontinuance should be received at least 10 days prior to the Dividend Record Date. On receipt of such request, the DTP facility will be terminated. Upon termination, the dividend shall be compulsorily paid out. Once the request for DTP is registered, then it shall remain in force unless it is terminated as aforesaid.
- It is further clarified that the dividend amount transferred would be treated as switch-in / subscription transaction in the target scheme and will be liable to PAN and KYC provisions as may be applicable.
- The Fund is not guaranteeing or assuring any dividend under any of the schemes. The Fund is also not assuring that it will make any dividend distributions under the dividend plans of Edelweiss Tax Advantage Fund, though it has every intention of doing so. All dividend distribution is subject to investment performance of the Schemes.
- The AMC reserves the right to change/ modify the terms and conditions of the DTP without assigning any reason thereof.

Unit holders under the Re-investment Option shall have the option to choose the DTP option. They need to fill in the DTP form (as available on the website) and submit the same at any investor service centre or the AMC office. Currently, investors have the option to choose any open ended scheme of Edelweiss Mutual Fund.

Accordingly, the revised options under the Scheme will be Dividend Option and Growth option with Growth option as the default option. Dividend option will have Dividend Payout and Dividend Transfer Plan as the sub-options.

Consequently, the Systematic Investment Plans (SIPs) that were registered under the Reinvestment Option of the Scheme will be processed under the Dividend Payout option (default) or DTP (if opted by the investor).

Hence investor(s) should immediately intimate the Fund/AMC, in case of any change in the FATCA related information provided by them at the time of initial subscription.

The Fund/AMC reserves the right to reject any application or compulsorily redeem the units held directly or beneficially in case the applicant/investor fails to furnish the relevant information and/or documentation or is found to be holding units in contravention of the FATCA provisions.

If the investment is being made on behalf of a minor, the KYC of the minor or father or mother or the guardian who represents the minor, should be provided.

Applications received without KYC will be rejected.

SEBI vide its circulars MIRSD/SE/Cir-21/2011 dated October 05, 2011, MIRSD/Cir-23/2011 dated December 02, 2011 and MIRSD/Cir-26/2011 dated December 23, 2011 had laid down a uniform KYC compliance procedure for all investors with effect from January 1, 2012. SEBI also issued KYC Registration Agency ("KRA") Regulations 2011 and the guidelines in pursuance of the said Regulations for In-Person Verification ("IPV").

1. Requirement for the existing investors in mutual funds:

The existing investors in mutual funds who have already complied with the KYC requirement (defined for the purpose of this SID as KYC compliant) and have the KYC compliance letter issued to them by CDSL Ventures Limited are exempt from following the new KYC procedure effective January 01, 2012, but only for the purpose of making investments with any SEBI registered mutual fund.

If, however, the KYC compliant investors would like to deal with any SEBI registered intermediary other than mutual funds, they may have to follow the new KYC compliance procedure.

2. Requirement for the new investors in mutual funds:

All investors other than KYC compliant investors as defined above are required to follow the new KYC compliance procedure as mentioned below while making any investment in the Scheme:

Fill up and sign the KYC application form (for individual investors or non-individual investors as appropriate) available on the AMC's website i.e. www.edelweissmf.com or www.amfiindia.com or www.cvlindia.com

At the time of transacting with the Mutual Fund, submit, in person, the completed KYC application form along with all the necessary documents as mentioned in the KYC application form with any of the offices of the distributors (qualified as per the following note), Registrar and Transfer Agent of the Mutual Fund and the Mutual Fund; and

Obtain a temporary acknowledgement for submission of all the documents and completion of In-Person Verification ("IPV");

Note: As per the SEBI circular MIRSD/Cir-26/2011 dated December 23, 2011, it is mandatory for SEBI registered intermediaries to carry out IPV of any investor dealing with a SEBI registered intermediary.

For investments in a mutual fund, the asset management companies, registrar and transfer agents of mutual funds and distributors which comply with the certification process of National Institute of Securities Market or Association of Mutual Funds in India and have undergone the process of "Know Your Distributors" are authorised to carry out the IPV. Unless the IPV process is completed, the investor will not be considered as KYC compliant under the KYC compliance procedure and hence will not be permitted to make any investment in the Scheme.

For investors proposing to invest in the Mutual Fund directly (i.e. without being invested through any distributor), IPV done by a scheduled commercial bank may be relied upon by the Mutual Fund. Once all the documents are verified by a KYC Registered Agency, they will send the investor a letter within 10 (ten) Business days from the date of receipt of necessary documents by them from the Mutual Fund or its Registrar and Transfer Agent informing the investor either about compliance by the investor of the new KYC compliance procedure ("final acknowledgement") or any deficiency in submission of details or documents.

On the basis of the temporary acknowledgement or the final acknowledgement the investor would be eligible to deal with any of the SEBI registered intermediaries as mentioned in the above mentioned SEBI Circulars.

In order to protect investors from fraudulent encashment of cheques, the SEBI Regulations require that cheques for Redemption of Units specify the name of the Unit Holder and the bank name and account number where payments are to be credited. Hence, all applicants for Purchase of Units / Redemption of Units must provide a bank name, bank account number, branch address, and account type in the Application Form.

Subject to SEBI Regulations, the AMC / Trustee / Mutual Fund has the discretion to prevent further transactions by a unit holder, delay or withhold processing redemption / payout and / or payout of redemption proceeds and / or effect forced redemption of units of the unit holder at the applicable NAV subject to entry / exit loads (without the payment of interest) if the KYC status of that investor is not under "VERIFIED" status, after giving due notice and opportunity in respect of the same. Whilst the AMC / Trustee / Mutual Fund will give due notice and ample opportunities for compliance in respect of the same, it is in the interest of the Applicant to ensure that their KYC status is under "VERIFIED" status and in compliance with the circulars etc. as prescribed by SEBI.

The Mutual Fund will endeavor to dispatch the Redemption proceeds within 3 Business Days from the acceptance of the Redemption request, but not beyond 10 Business Days from the date of Redemption. If the payment is not made within the period stipulated in the Regulations, the Unit Holder shall be paid interest @15% p.a. for the delayed period and the interest shall be borne by the AMC.

The bank name and bank account number, as specified in the Registrar's records, will be mentioned in the cheque. The cheque will be payable at par at all the cities having ISCs. If the Unit Holder resides in any other city, he will be paid by a demand draft payable at the city of his residence and the demand draft charges shall be borne by the AMC. 2. Non-Resident Indian Investors

For NRIs, Redemption proceeds will be remitted depending upon the source of investment as follows:

(a) Repatriation Basis

When Units have been purchased through remittance in foreign exchange from abroad or by cheque / draft issued from proceeds of the Unit Holder's FCNR deposit or from funds held in the Unit Holder's Non Resident (External) Rupee account kept in India, the proceeds can be remitted to the Unit Holder in foreign currency (any exchange rate fluctuation will be borne by the Unit Holder). The proceeds can also be sent to his Indian address for crediting to his Non-Resident (External) Rupee Account (NRE) / Foreign Currency (Non-Resident) Account (FCNR) / Non-resident (Ordinary) Account (NRO), if desired by the Unit Holder.

(b) Non Repatriation Basis

When Units have been purchased from funds held in the Unit Holder's non-resident (Ordinary) account, the proceeds will be sent to the Unit Holder's Indian address for crediting to the Unit Holder's non-resident (Ordinary) account.

For FPIs, the designated branch of the authorised dealer may allow remittance of net sale / maturity proceeds (after payment of taxes) or credit the amount to the foreign currency account or Non -resident Rupee account of the FPI maintained in accordance with the approval granted to it by the RBI.

The Scheme will not be liable for any delays or for any loss on account of any exchange fluctuations, while converting the rupee amount in foreign exchange in the case of transactions with NRIs / FPIs.

The Scheme may make other arrangements for effecting payment of Redemption proceeds in future.

The Unit Holder has the option to request for Redemption either in amount in Rupees or in number of Units.

Units purchased by cheque may not be redeemed until after realization of the cheque. In case the investor mentions the number of Units as well as the amount, then the amount will be considered for processing the Redemption request. In case the investor mentions the number of Units or the amount in words and figures, then the value in words will be taken for processing the Redemption request.

If the redemption request amount exceeds the balance lying to the credit of the Unit Holder's said account, then the fund shall redeem the entire amount lying to the credit of the Unit Holder's account in that Scheme / Plan / Option.

If an investor has purchased Units on more than 1 (one) Business Day, the Units purchased prior in time (i.e. those Units which have been held for the longest period of time), are deemed to have been redeemed first, i.e. on a first in first out basis except when the Unit Holder specifically requests Redemption of Units purchased on specific date(s). If multiple Purchases are made on the same day, the Purchase appearing earliest in the account statement will be redeemed first.

As per the ELSS, Unit Holders will not be able to redeem Units under the Scheme for a period of 3 (three) years from the date of allotment of respective Units. After the period of 3 (three) years, Units could be redeemed as mentioned in this SID. However, in the event of the death of a Unit Holder, the nominee or legal heir will be able to redeem the Units held by the deceased Unit Holder subject to the expiry of 1 (one) year from the date of allotment of such Units. D. COMPUTATION OF NAV

Calculation of NAV

The NAV under the Scheme shall be calculated by the method shown below:

$$\text{NAV (₹) = } \frac{\text{(Market or Fair Value of Scheme's investments + receivables + accrued income + other assets)} - \text{(accrued expenses + payable + other liabilities and provisions)}}{\text{No. of Units outstanding under the Scheme}}$$

Computation of NAV, will be done after taking into account dividends paid, if any, and the distribution tax thereon, if applicable. Therefore, once dividends are distributed under the Dividend Option, the NAV of the Units under the Dividend Option would always remain lower than the NAV of the units issued under the Growth Option. The income earned and the profits realized in respect of the Units issued under the Growth Option remain invested and are reflected in the NAV of the Units.

The NAV will be calculated up to three decimal places for the Scheme.

The valuation of the Scheme's assets and calculation of the Scheme's NAV shall be subject to audit on an annual basis and such regulations as may be prescribed by SEBI from time to time.
