In case of any delay, the reasons for such delay would be explained to AMFI. If the NAVs are not available before commencement of business hours on the following Business Day due to any reason, the Mutual Fund shall issue a press release providing reasons and explaining when the Fund would be able to publish the NAVs. The AMC will before the expiry of one month from the close of each half year (i.e. March 31 and September 30) disclose the full portfolio of the Scheme by either sending a complete statement to all the Unit Holders concerned or by publishing such statement, by way of advertisement, in one English daily newspaper having nationwide circulation and in a newspaper published in the language of the region where the head office of the Mutual Fund is situated. Plans / Options available under the Scheme

The Scheme offers two Plans - Super Institutional Plan and Direct Plan.

Each plan offers:

1. Growth Option 2. Dividend Reinvestment 3. Dividend Payout 4. Daily, Weekly, Fortnightly, Monthly & Annual Dividend Reinvestment, 5. Weekly, Fortnightly, Monthly & Annual Dividend Payout.

Growth: Under the growth option no dividend will be declared.

Under the dividend option, a dividend may be declared by the Trustee, at its discretion, from time to time (subject to the availability of distributable surplus as calculated in accordance with the Regulations).

In case of weekly dividend payout or weekly dividend reinvestment option, record date for the declaration of dividend shall be every Tuesday, in case of fortnightly dividend payout or fortnightly dividend reinvestment option the record date shall be 14th and 28th of each month and in case of monthly dividend payout or monthly dividend reinvestment option, the record date shall be 25th of each month. In case these record dates fall on a non-business day, the record date shall be taken to be the next business day. There is no assurance or guarantee to Unit Holders as to the rate of dividend distribution nor that the dividends will be regularly declared, though it is the intention of the Mutual Fund to make regular dividend distribution under the Dividend Option. Dividend distribution is subject to availability of distributable surplus.

If the investor does not clearly specify the choice of option (Growth / Dividend) at the time of investing, it will be treated as a **Growth option**.

If the investor does not clearly specify at the time of investing, the choice of option under Dividend, it will be treated as a **daily dividend reinvestment option**.

The Trustee may decide to distribute by way of dividend, the surplus by way of realised profit, dividends and interest, net of losses, expenses and taxes, if any, to Unit Holders in the Dividend option of the Scheme if such surplus is available and adequate for distribution in the opinion of the Trustee. The Trustee's decision with regard to availability and adequacy, rate, timing and frequency of distribution shall be final. The dividend will be due to only those Unit Holders whose names appear in the register of Unit Holders in the dividend option of the Scheme on the record date.

I. INTRODUCTION

A. RISK FACTORS

1. Standard Risk Factors:

- Investment in mutual fund units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal.
- As the price / value / interest rates of the Securities in which the Scheme invests fluctuates, the value of your investment in the Scheme may go up or down.
- Mutual funds, like Securities investments, are subject to market and other risks and there can be no guarantee against loss resulting from an investment in the Scheme nor can there be any assurance that the Scheme's objectives will be achieved.
- Past performance of the Sponsor / AMC / Mutual Fund does not guarantee future performance of the Scheme.
- Edelweiss Liquid Fund is only the name of the Scheme and does not in any manner indicate either the quality of the Scheme or its future prospects and returns.
- The Sponsor is not responsible or liable for any loss resulting from the operation of the Scheme beyond the initial contribution of ₹ 1,00,000 (One Lakh Rupees) made by it towards setting up the Mutual Fund.
- The present Scheme is not a guaranteed or assured return scheme.
- As with any investment in Securities, the NAV of the Units can go up or down depending on various factors and forces affecting capital markets.

2. Scheme Specific Risk Factors

a) Risks associated with investing in money market instruments

- Investments in money market instruments would involve a moderate credit risk, i.e. risk of an issuer's liability to meet the principal payments.
- Money market instruments may also be subject to price volatility due to factors such as changes in interest rates, general level of market liquidity and market perception of credit worthiness of the issuer of such instruments.
- The NAV of the Scheme's Units, to the extent that the Scheme is invested in money market instruments, will be affected by changes in the level of interest rates. When interest rates in the market rise, the value of a portfolio of money market instruments can be expected to decline.

b) Risks associated with investing in Bonds

- The NAV of the Scheme, to the extent invested in Debt Securities, will be affected by changes in the general level of interest rates. The NAV of the Scheme is expected to increase from a fall in interest rates, while it would be adversely affected by an increase in the level of interest rates.
- Debt Securities, while fairly liquid, lack a well-developed secondary market, which may restrict the selling ability of the Scheme and may lead to the Scheme incurring losses till the security is sold.

- Debt Securities are subject to the risk of the issuer's inability to meet interest and principal payments on its obligations and market perception of the credit worthiness of the issuer.
- The AMC may, considering the overall level of risk of the portfolio, invest in lower rated / unrated Securities offering higher yields.
- The liquidity of investments made in the Scheme may be restricted by trading volumes and settlement periods. Different segments of the Indian financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances. The Trustee has the right, in its sole discretion to limit Redemptions (including suspending Redemption) in certain circumstances [outlined in Section III-B 'Restrictions on Redemptions']. There may be temporary periods when the monies of the Scheme are un-invested and no return is earned thereon. The inability of the Scheme to make intended Securities purchases, due to settlement problems, could cause the Scheme to miss certain investment opportunities. By the same token, the inability to sell Securities held in the Scheme's portfolio due to the absence of a well developed and liquid secondary market for Debt Securities could result, at times, in potential losses to the Scheme, should there be a subsequent decline in the value of the Securities held in the Scheme's portfolio.
- The liquidity and valuation of the Scheme's investments due to its holdings of unlisted Securities may be affected if they have to be sold prior to their target date of divestment.
- Debt Securities, which are not quoted on the stock exchanges, are inherently illiquid in nature and carry a larger amount of liquidity risk, in comparison to Debt Securities that are listed on the exchanges or offer other exit options to the investor, including a put option. The AMC may choose to invest in unlisted Debt Securities that offer attractive yields within regulatory limits. This may however increase the risk of the portfolio. Additionally, the liquidity and valuation of the Scheme's investment due to its holdings of the unlisted Securities may be affected if they have to be sold prior to the target date of investment.
- While Debt Securities that are listed on the stock exchange carry lower liquidity risk, the ability to sell these investments is limited by the overall trading volume on the stock exchanges. Money market Securities, while fairly liquid, lacks a well-developed secondary market, which may restrict the selling ability of the Scheme and may lead to the Scheme incurring losses till the Security is finally sold.
- Money market Securities and Debt Securities are subject to the risk of an issuer's inability to meet interest and principal payments on its debt obligations (credit risk). Credit risk or default risk refers to the risk which may arise due to default on the part of the issuer of the fixed income security (i.e., will be unable to make timely principal and interest payments on the security). Because of this risk debentures are sold at a yield spread above those offered on treasury securities, which are sovereign obligations and generally considered to be free of credit risk. Normally, the value of a fixed income security will fluctuate depending upon the actual changes in the perceived level of credit risk as well as the actual event of default. These Securities may also be subject to price volatility due to factors such as changes in interest rates, general level of market liquidity and market perception of the credit worthiness of the issuer, among others (market risk). The Liquidity Risk refers to the ease with which a Security can be sold

at or near its true value. The primary measure of liquidity risk is the spread between the bid price and the offer price quoted by a dealer. Liquidity risk is characteristic of the Indian fixed income market. The Investment Manager will endeavour to manage credit risk through in-house credit analysis. The Scheme may also, but is not obliged to, use various hedging products from time to time, as are available and permitted by SEBI, to attempt to reduce the impact of undue market volatility on the Scheme's portfolio. There is no guarantee that hedging techniques will achieve the desired result.

- The investments made by the Scheme are subject to reinvestment risk. This risk refers to the interest rate levels at which cash flows received from the Securities in the Scheme are reinvested. The additional income from reinvestment is the "interest on interest" component. The risk is that the rate at which interim cash flows can be reinvested may be lower than that originally assumed. The risk refers to the fall in the rate for reinvestment of interim cash flows.
- The NAV of the Scheme's Units, to the extent that the Scheme is invested in fixed income Securities, will be affected by changes in the general level of interest rates. When interest rates decline, the value of a portfolio of fixed income Securities can be expected to rise. Conversely, when interest rates rise, the value of a portfolio of fixed income Securities can be expected to decline.
- To the extent the Scheme's investments are in floating rate debt instruments or fixed debt instruments swapped for floating rate return, they will be affected by interest rate movement (basis risk) - coupon rates on floating rate securities are reset periodically in line with the benchmark index movement. Normally, the interest rate risk inherent in a floating rate instrument is limited compared to a fixed rate instrument. Changes in the prevailing level of interest rates will likely affect the value of the Scheme's holdings until the next reset date and thus the value of the Scheme's Units. The value of Securities held by the Scheme generally will vary inversely with changes in prevailing interest rates. The Mutual Fund could be exposed to interest rate risk:
 - (i) due to the time gap in the resetting of the benchmark rates, and
 - (ii) to the extent the benchmark index fails to capture interest rate changes appropriately (spread risk): though the basis (i.e. benchmark) gets readjusted on a regular basis, the spread (i.e. markup) over benchmark remains constant. This can result in some volatility to the holding period return of floating rate instruments.
- **Settlement Risk (counterparty risk):** Specific floating rate assets may also be created by swapping a fixed return into a floating rate return. In such a swap, there is the risk that the counterparty (who will pay floating rate return and receive fixed rate return) may default;
- **Liquidity Risk:** The market for floating rate Securities is still in its evolutionary stage and therefore may render the market illiquid from time to time, for such Securities that the Scheme is invested in.
- **Prepayment Risk:** The Borrower / Issuer of security may prepay the receivables prior to their respective due dates. This may result in change in the yield and tenor for the Scheme.
- Different types of Securities in which the Scheme may invest

as given in the SID carry different levels and types of risk. Accordingly the Scheme's risk may increase or decrease depending upon its investment pattern. e.g. corporate bonds carry a higher amount of risk than government Securities. Further even among corporate bonds, bonds which are rated AAA are comparatively less risky than bonds which are AA rated.

- Investments in the Scheme made in foreign currency by a Unit Holder are subject to the risk of fluctuation in the value of the Indian Rupee.

c) Risks associated with Derivatives

- Derivatives products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decisions of a fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies. The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments.
- As and when the Scheme trades in derivative products, there are risk factors and issues concerning the use of derivatives that investors should understand. Derivatives require the maintenance of adequate controls to monitor the transactions and the embedded market risks that a derivative adds to the portfolio.
- Besides the price of the underlying asset, the volatility, tenor and interest rates affect the pricing of derivatives. Other risks in using derivatives include but are not limited to:
 - (a) **Credit Risk** - this occurs when a counterparty defaults on a transaction before settlement and, therefore, the Scheme is compelled to negotiate with another counterparty at the then prevailing (possibly unfavourable) market price, in order to maintain the validity of the hedge.
 - (b) **Market Liquidity Risk** - this is where the derivatives cannot be sold (unwound) at prices that reflect the underlying assets, rates and indices.
 - (c) **Model Risk** - this is the risk of mis-pricing or improper valuation of derivatives.
 - (d) **Basis Risk** - this is when the instrument used as a hedge does not match the movement in the instrument / underlying asset being hedged. The risks may be inter-related also; for e.g. interest rate movements can affect equity prices, which could influence specific issuer / industry assets

d) Risks associated with Short Selling and Securities Lending

The risks in lending portfolio Securities, as with other extensions of credit, consist of the failure of another party, in this case the approved intermediary, to comply with the terms of the agreement entered into between the lender of Securities, i.e. the Scheme, and the approved intermediary. Such failure to comply can result in a possible loss of rights in the collateral put up by the borrower of the Securities, the inability of the approved intermediary to return the Securities deposited by the lender and the possible loss of any corporate benefits accruing to the lender from the Securities deposited with the approved

intermediary. The Mutual Fund may not be able to sell such Securities and this can lead to temporary illiquidity.

e) Risks associated with Overseas Investment

Subject to necessary approvals and within the investment objectives of the Scheme, the Scheme may invest in overseas markets which carry risks related to fluctuations in the foreign exchange rates, the nature of the securities market of the country, restrictions on repatriation of capital due to exchange controls and the political environment. Further the repatriation of capital to India may also be hampered by and changes in Regulations or political circumstances. In addition, country risks would include events such as introduction of extraordinary exchange controls, economic deterioration, bi-lateral conflict leading to immobilization of overseas financial assets and the prevalent tax laws of the respective jurisdiction for the execution of trades or otherwise.

f) Risks associated with investing Securitised Debts

Generally available asset classes for securitisation in India:

- Commercial vehicles
- Auto and two wheeler pools
- Mortgage pools (residential housing loans)
- Personal loan, credit card and other retail loans
- Corporate loans / receivables

In terms of specific risks attached to securitisation, each asset class would have different underlying risks, however, residential mortgages typically have lower default rates as an asset class. On the other hand, repossession and subsequent recovery of commercial vehicles and other auto assets is normally easier and better compared to mortgages. Some of the asset classes such as personal loans, credit card receivables etc., being unsecured credits in nature, may witness higher default rates. As regards corporate loans / receivables, depending upon the nature of the underlying security for the loan or the nature of the receivable the risks would correspondingly fluctuate. However, the credit enhancement stipulated by rating agencies for such asset class pools is typically much higher and hence their overall risks are comparable to other AAA or equivalent rated asset classes.

Some of the factors, which are typically analyzed for any pool, are as follows:

Size of the loan: this generally indicates the kind of assets financed with loans. Also indicates whether there is excessive reliance on very small ticket size, which may result in difficult and costly recoveries. To illustrate, the ticket size of housing loans is generally higher than that of personal loans. Hence in the construction of a housing loan asset pool for say ₹ 1,00,00,000/- it may be easier to construct a pool with just 10 housing loans of ₹ 10,00,000/- each rather than to construct a pool of personal loans as the ticket size of personal loans may rarely exceed ₹ 5,00,000/- per individual.

Average original maturity of the pool: this indicates the original repayment period and whether the loan tenors are in line with industry averages and borrower's repayment capacity. To illustrate, in a car pool consisting of 60 month contracts, the original maturity and the residual maturity of the pool viz. number of remaining installments to be paid gives a better idea of the risk of default of the pool itself. If in a pool of 100 car loans having original maturity of 60 months, more than 70% of the contracts have paid more than 50% of the monthly installments and if no default has been observed in such contracts, this pool should have a lower probability of default than a similar car

loan pool where 80% of the contracts have not yet paid 5 installments.

Loan to value ratio ("LTV"): indicates how much of the value of the asset is financed by borrower's own equity. The lower the LTV, the better it is. This ratio stems from the principle that where the borrower's own contribution of the asset cost is high, the chances of default are lower. To illustrate: for a truck costing ₹ 20 lakhs, if the borrower has himself contributed ₹ 10 lakhs and has taken ₹ 10 lakhs as a loan, he is going to have lesser propensity to default as he would lose an asset worth ₹ 20 lakhs if he defaults in repaying an installment. This is as against a borrower who may meet only ₹ 2 lakhs out of his own equity for a truck costing ₹ 20 lakhs. Between the two scenarios given above, as the borrower's own equity is lower in the latter case, it would typically have a higher risk of default than the former.

Average seasoning of the pool: this indicates whether borrowers have already displayed repayment discipline. To illustrate, in the case of a pool of personal loans, if a pool of assets consist of borrowers who have already repaid 80% of the installments without default, the probability of default is lower than for a pool where only 10% of installments have been repaid.

In the Indian scenario, also, more than 95% of issuances have been AAA or equivalent rated issuances indicating the strength of the underlying assets as well as adequacy of credit enhancement.

Default rate distribution: this indicates how much % of the pool and overall portfolio of the originator is current, how much is in 0-30 DPD (days past due), 30-60 DPD, 60-90 DPD and so on. The rationale here is that, as against 0-30 DPD, the 60-90 DPD is a higher risk category. Unlike in plain vanilla instruments, in securitisation transactions it is possible to work towards a target credit rating, which could be much higher than the originator's own credit rating.

Investment exposure of the Fund with reference to securitised debt:

- The Scheme will predominantly invest only in those securitisation issuances which have AAA or equivalent rating indicating the highest level of safety from credit risk point of view at the time of making an investment. The Scheme will not invest in foreign securitised debt.
- The Scheme may invest in various types of securitization issuances, including but not limited to asset backed securitisation, mortgage backed securitisation, personal loan backed securitisation, collateralised loan obligation / collateralized bond obligation and so on.
- The Scheme does not propose to limit its exposure to only one asset class or to have asset class based sub-limits as it will primarily look towards the AAA or equivalent rating of the offering.
- The Scheme will conduct an independent due diligence on the cash margins, collateralisation, guarantees and other credit enhancements and the portfolio characteristic of the securitisation to ensure that the issuance fits into the overall objective of the investment in high investment grade offerings irrespective of underlying asset class.

g) Risks associated with investments in securitised paper

Types of securitised debt vary and carry different levels and types of risks. Credit risk on securitised bonds depends upon the originator and varies depending on whether they are issued with recourse to the originator or otherwise. Even within securitised debt, AAA or

equivalent rated securitised debt offers lesser risk of default than AA rated securitised debt. A structure with recourse will have a lower credit risk than a structure without recourse.

As underlying assets in securitised debt may assume different forms and the general types of receivables include auto finance, credit cards, home loans or any such receipts, credit risks relating to these types of receivables depend upon various factors including macro economic factors of these industries and economies. Specific factors like nature and adequacy of property mortgaged against these borrowings, nature of loan agreement / mortgage deed in case of home loan, adequacy of documentation in case of auto finance and home loans, capacity of borrower to meet its obligation on borrowings in case of credit cards and the intention of the borrower influence the risks relating to the asset borrowings underlying the securitised debt.

Changes in market interest rates and pre-payments may not change the absolute amount of receivables for the investors, but may have an impact on the reinvestment of the periodic cash flows that the investor receives in the securitised paper.

Limited Liquidity & Price Risk:

Presently, the secondary market for securitised papers is not very liquid. There is no assurance that a deep secondary market will develop for such securities. This could limit the ability of the Fund to resell them. Even if a secondary market develops and sales were to take place, these secondary transactions may be at a discount to the initial issue price due to changes in the interest rate structure.

Risks due to possible prepayments: Weighted Tenor / Yield:

Asset securitisation is a process whereby commercial or consumer credits are packaged and sold in the form of financial instruments. Full prepayment of underlying loan contract may arise under any of the following circumstances:

- obligor pays the receivable due from him at any time prior to the scheduled maturity date of that receivable; or
- receivable is required to be repurchased by the seller consequent to its inability to rectify a material misrepresentation with respect to that receivable; or
- the servicer recognizing a contract as a defaulted contract and hence repossessing the underlying asset and selling the same.

In the event of prepayments, investors may be exposed to changes in tenor and yield.

Bankruptcy of the originator or seller:

If the originator becomes subject to bankruptcy proceedings and the court in the bankruptcy proceedings concludes that the sale from originator to the Trust was not a sale then the Fund could experience losses or delays in the payments due. All possible care is generally taken in structuring the transaction so as to minimize the risk of the sale to the Trust not being construed as a "True Sale". Legal opinion is normally obtained to the effect that the assignment of receivables to the Trust in trust for and for the benefit of the investors, as envisaged herein, would constitute a true sale.

Bankruptcy of the investor's agent:

If an investor's agent becomes subject to bankruptcy proceedings and the court in the bankruptcy proceedings concludes that the recourse of the investor's agent to the assets / receivables is not in its capacity

as agent / Trustee but in his personal capacity, then an investor could experience losses or delays in the payments due under the swap agreement. All possible care is normally taken in structuring the transaction and drafting the underlying documents so as to provide that the assets / receivables if and when held by an investor's agent is held as agent and in Trust for the Investors and shall not form part of the personal assets of the investor's agent. Legal opinion is normally obtained to the effect that the investors agent's recourse to assets / receivables is restricted in his capacity as agent and trustee and not in its personal capacity.

Credit Rating of the Transaction / Certificate:

The credit rating is not a recommendation to purchase, hold or sell the Certificate in as much as the ratings do not comment on the market price of the Certificate or its suitability to a particular investor. There is no assurance by the rating agency either that the rating will remain at the same level for any given period of time or that the rating will not be lowered or withdrawn entirely by the rating agency.

Risk of Co-mingling:

The servicers normally deposit all payments received from the obligors into the collection account. However, there could be a time gap between collection by a servicer and depositing the same into the collection account especially considering that some of the collections may be in the form of cash. In this interim period, collections from the loan agreements may not be segregated from other funds of the servicer. If the servicer fails to remit such funds, due to investors, the investors may be exposed to a potential loss. Due care is normally taken to ensure that the servicer enjoys the highest credit rating on a standalone basis to minimize co-mingling risk.

Currency Risk

The foreign securities are issued and traded in foreign currencies. As a result, their values may be affected by changes in the exchange rates between foreign currencies and the Indian Rupees as well as between currencies of countries other than India. Restrictions on currency trading that may be imposed by developing market countries will have an adverse effect on the value of the securities of companies that trade or operate in such countries.

Restrictions on Redemptions:

As outlined in Section III-B - 'Restrictions on Redemptions' the Trustee and the AMC may impose restrictions on redemptions when there are circumstances leading to a systemic crisis or event that severely constricts market liquidity or the efficient functioning of markets.

Accordingly, such restriction may affect the liquidity of the Scheme and there may be a delay in investors receiving part of their redemption proceeds.

B. REQUIREMENT OF MINIMUM INVESTORS IN THE SCHEME

The Scheme / Plan shall have a minimum of 20 (twenty) investors and no single investor shall account for more than 25% of the corpus of the Scheme / Plan(s). However, if such limit is breached during the NFO of the Scheme, the Mutual Fund will endeavour to ensure that within a period of 3 (three) months or the end of the succeeding calendar quarter from the close of the NFO of the Scheme, whichever is earlier, the Scheme complies with these two conditions. In case the Scheme / Plan(s) does not have a minimum of 20 (twenty) investors

in the stipulated period, the provisions of Regulation 39(2)(c) of the SEBI (MF) Regulations would become applicable automatically without any reference from SEBI and accordingly the Scheme / Plan(s) shall be wound up and the Units would be redeemed at Applicable NAV. The two conditions mentioned above shall also be complied within each subsequent calendar quarter thereafter, on an average basis, as specified by SEBI.

If there is a breach of the 25% limit by any investor over the quarter, a rebalancing period of 1 (one) month would be allowed and thereafter the investor who is in breach of the rule shall be given 15 (fifteen) days notice to redeem his exposure over the 25% limit. Failure on the part of the said investor to redeem his exposure over the 25% limit within the aforesaid 15 (fifteen) days would lead to automatic Redemption by the Mutual Fund at the Applicable NAV without any exit load on the 15th day of the notice period. The Mutual Fund shall adhere to the requirements prescribed by SEBI from time to time in this regard.

C. SPECIAL CONSIDERATIONS, IF ANY

- Redemptions due to a change in the fundamental attributes of the Scheme or due to any other reason may entail tax consequences. Such tax shall be borne by the investor and the Mutual Fund shall not be liable for any tax consequences that may arise.
- In terms of the Prevention of Money Laundering Act, 2002 ("PMLA") the rules issued there under and the guidelines/circulars issued by SEBI regarding the Anti Money Laundering Laws, all intermediaries, including mutual funds, are required to formulate and implement a client identification programme, and to verify and maintain the record of identity and addresses of investors. If any necessary due diligence, the AMC believes that any transaction is suspicious in nature as regards money laundering, the AMC shall report such transactions to competent authorities under PMLA and the circulars thereunder, further any further information in connection therewith to such authorities and take any actions as may be required for the purposes of fulfilling its obligations under PMLA and rules/guidelines issued thereunder by SEBI and / or RBI without obtaining the prior approval of the investor/unit holder.

An open-ended liquid scheme

B. INVESTMENT OBJECTIVE OF THE SCHEME

Edelweiss Liquid Fund is an open ended liquid Scheme that seeks to provide reasonable returns, commensurate with low risk while providing a high level of liquidity, through a portfolio of money market and debt securities.

However there can be no assurance that the investment objectives of the Scheme will be realised.

C. ASSET ALLOCATION BY THE SCHEME

Under normal circumstances, it is anticipated that the asset allocation shall be as follows:

Instruments	Normal Allocation (% of net assets)	Risk profile
Money market instruments (including cash and reverse repo and debt instruments with maturity up to 91 days)*	Up to 100%	Low
Securitised debt instruments with maturity up to 91 days	Up to 30%	Low

*Investment in Derivatives - Up to 10% of the net asset of the Scheme

Floating rate debt instruments are debt instruments issued by Central / state governments, corporates, PSUs, etc. with interest rates that are reset periodically. The periodicity of interest reset could be daily, monthly, quarterly, half yearly, and annually or any other periodicity that may be mutually agreed between the issuer and the Fund. The Scheme shall not invest in foreign securitised debt.

Money market instruments include commercial papers, commercial bills, treasury bills, Collateralised Borrowing and Lending Obligations (CBLO), government securities having an unexpired maturity up to one year, call or notice money, certificates of deposit, usance bills and any other like instruments as specified by the RBI from time to time.

The Scheme can invest up to 50% of net assets in foreign securities.

The cumulative gross exposure through equity, debt and derivative positions should not exceed 100% of the net assets of the Scheme.

Cash or cash equivalents with residual maturity of less than 91 days will be treated as not creating any exposure.

D. SCHEME'S INVESTMENT

In case of securities where the principal is to be repaid in a single payout the maturity of the securities shall mean residual maturity.

In case the principal is to be repaid in more than one payout then the maturity of the securities shall be calculated on the basis of weighted average maturity of security.

In case of securities with put and call options (daily or otherwise) the residual maturity of the securities shall not be greater than 91 days w.e.f May 01, 2009.

In case the maturity of the security falls on a non-business day then settlement of securities will take place on the next business day.

With effect from November 1, 2009, such inter-scheme transfers of securities having maturity of upto 91 days only shall be permitted in the Liquid scheme.

The portfolio duration will undergo a change according to the expected movement in interest rates. Liquidity conditions and other macro-economic factors affecting interest rates shall be taken into account for varying the portfolio duration. Under normal circumstances, if the interest rates move down, the duration of the portfolio shall be increased and vice versa.

It is expected that the modified duration for the Fund will be in a range of 1-6 months depending on the interest rate view. However, this can undergo a change in case the market conditions warrant it and according to the Investment Manager's view.

The Investment Manager may review the above pattern of investments based on views on interest rates and asset liability management needs. The Scheme shall not engage in stock lending.

Change in Investment Pattern Subject to the Regulations, the asset allocation pattern indicated above may change from time to time, keeping in view market conditions, market opportunities, applicable regulations and political and economic factors. It must be clearly understood that the percentages stated above are only indicative and not absolute and that they can vary substantially depending upon the perception of the Investment Manager, the intention being at all times to seek to protect the interests of the Unit holders. Such changes in the investment pattern will be for short term and defensive considerations.

Subject to the above, any change in the asset allocation affecting the investment profile of the Scheme shall be effected only in accordance with the provisions of sub regulation (15A) of Regulation 18 of the SEBI Regulations, as detailed later in this document.

E. INVESTMENT STRATEGIES

The domestic debt markets are maturing rapidly with liquidity emerging in various debt segments through the introduction of new instruments and investors. The objective will be to allocate the assets of the Scheme between various money market and fixed income Securities with the objective of providing liquidity and achieving optimal returns.

The actual percentage of investment in various money market and other fixed income Securities will be decided after considering the economic environment including interest rates and inflation, the performance of the corporate sector and general liquidity and other considerations in the economy and markets.

The investment team of the AMC will carry out rigorous in depth credit evaluation of the money market and debt instruments proposed to be invested in. The credit evaluation includes a study of the operating environment of the issuer, the past track record as well as the future prospects of the issuer and the short term / long term financial health of the issuer.

Position of Debt Markets in India

The debt market in India is well developed. The largest market consists of daily trading of the Government of India Securities which averaged above ₹ 60,000 Crores for the month of October, 2016, with instruments tenors ranging from short dated treasury bills to long dated securities extending upto the maturity of October, 2055 as on November 10, 2016.

The government securities market not only provides resources to the government for meeting its short term and long term needs but also acts as the benchmark for pricing corporate papers of varying maturities. The government securities market includes the dated Securities issued by the government, both Central and State and Treasury bills of 91 days, 182 days and 364 days. The corporate bond market is also fast developing with greater number of corporates accessing the markets through MIBOR linked bonds, commercial

paper issuances and short to medium to long dated fixed and floating rate bonds.

The Indian government securities yields tends to be upward sloping i.e. yield of shorter dated Securities being lower than that of longer dated ones.

Potential capital appreciation opportunities arising out of mispricing of yields relative to fundamentals, potential credit upsides (both short term and long term ratings), sector rotations etc will be explored. The portfolio's overall duration will be actively monitored depending on the interest rate environment. The Fund Manager will adopt a long duration strategy in falling interest rate scenario and shift towards low duration strategy as the interest rates bottom out/trend upwards. The Fund Manager will structure the portfolio looking into the need to provide liquidity to meet redemptions as and when they arise. Though every endeavour will be made to achieve the objectives of the Scheme, the AMC / Sponsor / Trustee does not guarantee that the investment objectives of the Scheme will be achieved. No guaranteed returns are being offered under the Scheme. Portfolio Turnover

The Scheme being an open ended liquid scheme, it is expected that there would be a number of Subscriptions and Redemptions on a daily basis. Therefore, it is difficult to estimate with any reasonable measure of accuracy, the likely turnover in the portfolio. The Scheme has no specific target relating to portfolio turnover. Higher portfolio turnover rate may result into higher brokerage and transaction cost.

Guidelines governing investment in Debt Securities

The AMC will follow a policy where, before any investment is made in any debt instrument, a research report will be prepared by the Chief Investment Officer / Fund Manager / Research analyst which will analyze the debt instruments. The research report shall be reviewed at least on a half yearly basis. The recommendations of the research report shall not be binding on the Fund Manager / Chief Investment Officer.

Any purchase which is made against the recommendations of the research recommendation shall be backed by the reasons for the same by the concerned Fund Manager / Chief Investment Officer. For investment into companies for which there is a pre existing research report that is not dated more than six months from the day of the proposed investment, the investment can be made by the Fund Manager directly. However, if the research report is dated more than six months without any subsequent update then a fresh report will be required.

The investment philosophy of the AMC shall be directed towards providing stable returns with a low risk strategy and capital appreciation / accretion through investment in debt instruments and related securities besides preservation of capital. The Scheme shall invest only in debt securities with credit rating of AA- and above.

Investment in Gov Securities

As per Regulations and investment restriction guidelines issued by SEBI, the AMC will follow a policy wherein each decision of purchase / sale of government securities and money market instruments shall be recorded. A weekly report relating to the portfolio of the Scheme will be reviewed by the Investment Committee of the AMC.

Investment and security selection of all kind of debt instruments including Gov securities, State Government securities, and Government guaranteed debt is delegated to the Fund Manager with the responsibility on the Fund Manager / Chief Investment Officer to ensure conformity with the specified minimum credit rating standards for position credit risk and portfolio credit risk. All investments in Gov securities shall be done in accordance with SEBI / RBI guidelines.

Investment Restrictions pertaining to Derivatives:

Derivatives products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and the decision of the fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies.

The risks associated with the use of derivatives are different from, or possibly greater than, the risks associated with investing directly in securities and other traditional investments.

In terms of Circular No. MFD.BC.191/07.01.279/1999-2000 and MPD. BC.187/07.01.279/1999-2000 dated November 1, 1999 and July 7, 1999 respectively issued by the RBI permitting participation by mutual funds in interest rate swaps and forward rate agreements, the Fund will use derivative instruments for the purpose of hedging and portfolio balancing. Further, the guidelines issued by the RBI from time to time for forward rate agreements and interest rate swaps and other derivative products will be adhered to by the Fund.

Interest Rate Swaps (IRS)

An IRS is an agreement between two parties to exchange stated interest obligations for an agreed period in respect of a notional principal amount. The most common form is a fixed to floating rate swap where one party receives a fixed (pre-determined) rate of interest while the other receives a floating (variable) rate of interest.

Forward Rate Agreement (FRA)

A FRA is basically a forward starting IRS. It is an agreement between two parties to pay or receive the difference between an agreed fixed rate (the FRA rate) and the interest rate (reference rate) prevailing on a stipulated future date, based on a notional principal amount for an agreed period. The only cash flow is the difference between the FRA rate and the reference rate. As is the case with IRS, the notional amounts are not exchanged in FRAs.

Example of a derivatives transaction -

Basic Structure of a Swap

Bank A has a six-month ₹ 10 crore liability, currently being deployed in call. Bank B has a ₹ 10 crore, six-month asset, being funded through call. Both banks are running an interest rate risk.

To hedge this interest rate risk, they can enter into a six-month MIBOR swap. Through this swap, A will receive a fixed pre-agreed rate (say 7%) and pay "call" on the NSE MIBOR ("benchmark rate"). Bank A paying at "call" on the benchmark rate will hedge the interest rate

risk of lending in call. Bank B will pay 7% and receive interest at the benchmark rate. Bank A receiving of “call” on the benchmark rate will hedge its interest rate risk arising from its call borrowing.

The mechanism is as follows:

- Assume the swap is for ₹ 10 crore March 1, 2005 to September 1, 2005. A is a fixed rate receiver at 7% and B is a floating rate receiver at the overnight compounded rate.
- On March 1, 2005, A and B will exchange only an agreement of having entered this swap. This documentation would be based on an International Swaps and Derivatives Association (ISDA) template.
- On a daily basis, the benchmark rate fixed by NSE will be tracked by them. On September 1, 2005 they will calculate the following:
 - A is entitled to receive interest on ₹ 10 crore at 7% for 184 days i.e. ₹ 35.28 lakh, (this amount is known at the time the swap was concluded) and will pay the compounded benchmark rate.
 - B is entitled to receive daily compounded call rate for 184 days and pay 7% fixed.
 - On September 1, 2005, if the total interest on the daily overnight compounded benchmark rate is higher than ₹ 35.28 lakhs, A will pay B the difference. If the daily compounded benchmark rate is lower, then B will pay A the difference.
- Effectively, Bank A earns interest at the rate of 7% p.a. for six months without lending money for six months fixed, while Bank B pays interest @ 7% p.a. for six months on ₹ 10 crore, without borrowing for six months fixed.

As per the above mentioned RBI circulars, mutual funds are permitted to do interest rate swaps / forward rate agreements for hedging purposes only. Accordingly, the AMC would undertake the same for similar purposes only. IRS and FRAs also have inherent credit and

settlement risks. However, these risks are reduced as they are limited to the interest streams and not the notional principal amounts.

Investments in derivatives will be in accordance with the SEBI Regulations / guidelines and presently derivatives shall be used for hedging and / or portfolio balancing purposes, as permitted under the Regulations. The circumstances under which such transactions would be entered into would be when, using the IRS route, it is possible to generate better returns / meet the objective of the Scheme at a lower cost. For example, if buying a two-year MIBOR based instrument and receiving the two-year swap rate yields better return than buying the two-year AAA corporate instrument, the Scheme would endeavour to do that. Alternatively, the Scheme would also look to hedge existing fixed rate positions if the view on interest rates is that they are likely to rise in the future.

These investment limitations/parameters as expressed (linked to the net asset / net asset value / capital) shall, in the ordinary course, apply as at the date of the most recent transaction or commitment to invest and changes do not have to be effected merely because, owing to appreciation or depreciation in value or by reason of the receipt of any rights, bonuses or benefits in the nature of capital or of any scheme of arrangement or for amalgamation, reconstruction or exchange, or at any repayment or redemption or other reason outside the control of the Trustee / AMC, any such limits would thereby be breached.

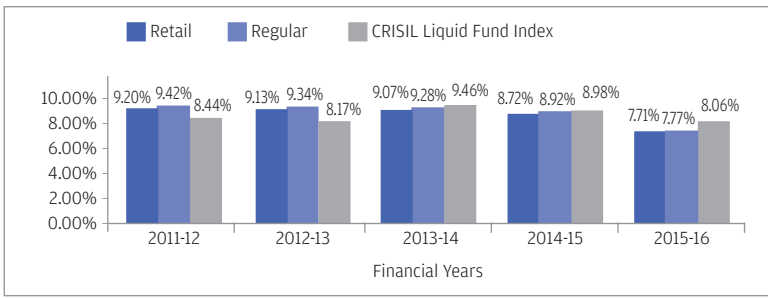

Apart from the investment restrictions prescribed under the Regulations, internal risk parameters for limiting exposure to a particular scrip or sector may be prescribed from time to time to respond to the dynamic market conditions and market opportunities.

The Trustee / AMC may alter these above stated limitations from time to time (as also the provisions of the Trust Deed) and also to the extent the Regulations change so as to permit the Scheme to make its investments in the full spectrum of permitted investments in order to achieve its investment objective.

Further, in case of folio with joint investors, the entire account value of investment portfolio will be attributable under each such reportable person. Investors/Unit holders would therefore be required to furnish such information to the Fund/AMC, from time to time, in order to comply with the reporting requirements stated in the IGA and or circulars/guidelines issued by SEBI/AMFI in this regard.

The impact of FATCA is relevant not only at the point of onboarding of the investors but also throughout the life cycle of the investor account / folio with the Fund. Hence investor(s) should immediately intimate the Fund/AMC, in case of any change in the FATCA related information provided by them at the time of initial subscription.

The Fund/AMC reserves the right to reject any application or compulsorily redeem the units held directly or beneficially in case the applicant/investor fails to furnish the relevant information and/or documentation or is found to be holding units in contravention of the FATCA provisions.

It is mandatory for every applicant to provide the name of the bank, branch, address, account type and number as per SEBI requirements and any Application Form / Transaction Slip without these details will be treated as incomplete. Such incomplete applications are liable to be rejected. The Registrar and Transfer Agent / AMC may ask the investor to provide a blank cancelled cheque or its photocopy for the purpose of verifying the bank account number.

In order to strengthen Know Your Client (KYC) norms and identify every participant in the securities market with their respective PAN, thereby ensuring a sound audit trail for all transactions, SEBI has mandated that PAN will be the sole identification number for all participants transacting in the securities market, irrespective of the amount of transaction.

If the investment is being made on behalf of a minor, the KYC of the minor or father or mother or the guardian who represents the minor, should be provided. Applications received without KYC will be rejected.

For all applications the applicant or in the case of application in joint names, each of the applicants, should mention his / her PAN allotted under the Act.

SEBI vide its circulars MIRSD/SE/Cir-21/2011 dated October 05, 2011, MIRSD/Cir-23/2011 dated December 02, 2011 and MIRSD/Cir-26/2011 dated December 23, 2011 had laid down a uniform KYC compliance procedure for all investors with effect from January 1, 2012. SEBI also issued KYC Registration Agency (“KRA”) Regulations 2011 and the guidelines in pursuance of the said Regulations for In-Person Verification (“IPV”).

1. Requirement for the existing investors in mutual funds:

The existing investors in mutual funds who have already complied with the KYC requirement (defined for the purpose of this SID as KYC compliant) and have the KYC compliance letter issued to them by CDSL Ventures Limited are exempt from following the new KYC procedure effective January 01, 2012, but only for the purpose of making investments with any SEBI registered mutual fund.

If, however, the KYC compliant investors would like to deal with any SEBI registered intermediary other than mutual funds, they may have to follow the new KYC compliance procedure.

2. Requirement for the new investors in mutual funds:

All investors other than KYC compliant investors as defined above are required to follow the new KYC compliance procedure as mentioned below while making any investment in the Scheme:

- Fill up and sign the KYC application form (for individual investors or non-individual investors as appropriate) available on the AMC’s website i.e. www.edelweissmf.com or www.amfiindia.com or www.cvlindia.com
- At the time of transacting with the Mutual Fund, submit, in person, the completed KYC application form along with all the necessary documents as mentioned in the KYC application form with any of the offices of the distributors (qualified as per the following note), Registrar and Transfer Agent of the Mutual Fund and the Mutual Fund; and
- Obtain a temporary acknowledgement for submission of all the documents and completion of In-Person Verification (“IPV”);

Note: As per the SEBI circular MIRSD/Cir-26/2011 dated December 23, 2011, it is mandatory for SEBI registered intermediaries to carry out IPV of any investor dealing with a SEBI registered intermediary.

For investments in a mutual fund, the asset management companies, registrar and transfer agents of mutual funds and distributors which comply with the certification process of National Institute of Securities Market or Association of Mutual Funds in India and have undergone the process of “Know Your Distributors” are authorised to carry out the IPV. Unless the IPV process is completed, the investor will not be considered as KYC compliant under the KYC compliance procedure and hence will not be permitted to make any investment in the Scheme.

For investors proposing to invest in the Mutual Fund directly (i.e. without being invested through any distributor), IPV done by a scheduled commercial bank may be relied upon by the Mutual Fund. Once all the documents are verified by a KYC Registered Agency, they will send the investor a letter within 10 (ten) Business days from the date of receipt of necessary documents by them from the Mutual Fund or its Registrar and Transfer Agent informing the investor either about compliance by the investor of the new KYC compliance procedure (“final acknowledgement”) or any deficiency in submission of details or documents.

On the basis of the temporary acknowledgement or the final acknowledgement the investor would be eligible to deal with any of the SEBI registered intermediaries as mentioned in the above mentioned SEBI Circulars.

In order to protect investors from fraudulent encashment of cheques, the SEBI Regulations require that cheques for Redemption of Units specify the name of the Unit Holder and the bank name and account number where payments are to be credited. Hence, all applicants for Purchase of Units / Redemption of Units must provide a bank name, bank account number, branch address, and account type in the Application Form.

Subject to SEBI Regulations, the AMC / Trustee / Mutual Fund has the discretion to prevent further transactions by a unit holder, delay or withhold processing redemption / payout and / or payout of redemption proceeds and / or effect forced redemption of units of the unit holder at the applicable NAV subject to entry / exit loads (without the payment of interest) if the KYC status of that investor is not under “VERIFIED” status, after giving due notice and opportunity in respect of the same. Whilst the AMC / Trustee / Mutual Fund will give due notice and ample opportunities for compliance in respect of the same, it is in the interest of the Applicant to ensure that their KYC status is under “VERIFIED” status and in compliance with the circulars etc. as prescribed by SEBI

Not Applicable

Restrictions, if any, on the right to freely retain or dispose of Units being offered

In conformity with the guidelines and notifications issued by SEBI / government of India / any other Regulatory Agencies from time to time, as applicable, Units under the Scheme may be offered as security by way of a lien / charge in favour of scheduled banks, financial institutions, non-banking finance companies, or any other body. In such instance, the Unit Holder will be informed by the Registrar and Transfer Agent through an account statement. In no case will the Units be transferred from the Unit Holder to a lien holder. Dividends declared on units under lien will be paid / reinvested to the credit of the Unit Holder and not the lien holder.

The Units of the Scheme are not transferable. In view of the same, additions/deletions of names will not be allowed under any folio of the Scheme. The above provisions in respect of deletions of names will not be applicable in case of death of Unit Holder (in respect of joint holdings) as this is treated as transmission of Units and not transfer.

Trigger :

Trigger acts as a financial planning tool for information & initiating action. The unit holder can specify a specific event/action, which may be related to time or a specific event/action in advance and when this event/action takes place the trigger will get activated. This helps the unit holders to minimize the loss and/or timely book the profits. Thus, this facility enables the unit holder to keep track of his investments without having to put in time and effort to track portfolio movements on a regular basis. Triggers can broadly be classified in two types i.e. Time Based & Event Based trigger.

- 1. Time-based triggers** - Time-based triggers are actioned on the day and/or date opted by the investor. For example, if Investor opted for particular day or date trigger & if he wishes to gift some units to his mother on her birthday, a trigger could be set based on the date as requested by the Unit holder.

2. **Event-based triggers** - Investor can also set triggers based on the occurrence of a particular external event that affects the value of investment. For example,

- Investment value- Change in the value of investment held by unit holder by certain percentage/ value (rise/fall) then trigger can be activated. Percentage change in value of units will be calculated on the amount invested by the unit holders.
- Capital Appreciation/Depreciation - If investment value appreciates/depreciates by certain percentage /value (rise/fall) trigger will be activated.
- Change in NAV-Change in the NAV by certain percentage (rise/falls) on Invested NAV then trigger will be activated.
- S&P BSE Sensex/ NSE Nifty- If S&P BSE Sensex/NSE Nifty changes by certain percentage/points (rise/falls) trigger will be activated. Only end of day closing points of BSE/NSE will be considered for activating the trigger. Percentage rise/falls will be calculated by taking the base index as on the investment date.

Investors can opt for ‘Prepaid STP’ facility - This facility enables an investor to switch a fixed percentage of the investment amount from the Source Scheme to the Target Scheme/s whenever there is a fall in Nifty 50 Index level by a certain percentage from the previous Business Day’s closure. Edelweiss Liquid Fund is a part of Source Scheme for this facility.

Note:

In case the investor opts for both normal redemption and trigger based redemption in a redemption request, the redemption request would be processed as a normal redemption request and would not be registered as trigger based redemption.

For further details on Trigger facility, please refer SAI.

Lien on Units for Loans

Units under the Scheme may be offered as security by way of a lien / charge in favour of scheduled banks, financial institutions, non-banking finance companies (NBFCs) or any other body. The Registrar and Transfer Agent will note and record the lien against such Units. A standard request letter for this purpose is available on request with the Registrar and Transfer Agent or the AMC.

The Unit Holder will not be able to redeem / switch Units under lien until the lien holder provides written authorization to the Mutual Fund that the lien / charge may be vacated. As long as Units are under lien, the lien holder will have complete authority to exercise the lien, thereby redeeming such Units and receiving payment proceeds. In such instance, the Unit Holder will be informed by the Registrar and Transfer Agent through an account statement. In no case will the Units be transferred from the Unit Holder to the lien holder. Dividends declared on Units under lien will be paid / re-invested to the credit of the Unit Holder and not the lien holder unless specified otherwise in the lien letter.

Account Statements for the Scheme

The Account Statement shall not be construed as a proof of title and is only a computer generated statement indicating the details of transactions under the Scheme(s) and is a non-transferable document.

The Account Statement will be issued in lieu of Unit Certificates.

However, if the applicant so desires, the AMC shall issue a nontransferable Unit certificate to the applicant within 30 days of the receipt of request for the certificate. - The AMC shall allot the Units to the applicants whose application has been accepted and also send confirmations specifying the number of Units allotted to the applicant by way of e-mail and / or SMS to the applicant’s registered e-mail address and / or mobile number as soon as possible but not later than 5 (Five) Business Days from the date of closure of the allotment and / or from the date of receipt of the specific request for account statement from the Unit Holders. For ongoing period, CAS for each calendar month to the Unit Holder(s) in whose folio(s) transaction(s) has / have taken place during that calendar month shall be sent on or before 10th of the succeeding calendar month. In case of any specific request for account statement received from a Unit Holder, the account statement would be sent to the Unit Holder within 5 (Five) Business Days from the receipt of such request.
- For the purpose of sending CAS, common investors across mutual funds shall be identified by their PAN.
- The CAS shall not be received by the Unit Holders for the folio(s) not updated with PAN details. The Unit Holders are therefore requested to ensure that the folio(s) are updated with their PAN.
- The statement of holding of the beneficiary account holder for Units held in dematerialized form will be sent by the respective Depository Participants periodically.

Further, the CAS detailing holdings across all schemes of all mutual funds at the end of every 6 (Six) calendar months (i.e. September / March), shall be sent by mail / e-mail on or before the 10th day of succeeding calendar month, to all such Unit Holders in whose folios no transaction has taken place during that period. The half yearly CAS will be sent by e-mail to the Unit Holders whose e-mail address is available, unless a specific request is made to receive the same in physical form.

Allotment of Units and dispatch of account statements to NRIs / FPIs will be subject to RBI approval. Upon allotment of Units an account statement will be sent to each Unit Holder stating the number of Units allotted. With effect from October 1, 2010 mutual fund units held in dematerialized account only are freely transferable, this is as per the SEBI circular no. CIR/IMD/DF/10/ 2010 dated August 18, 2010. All other forms of Units of the Schemes are not transferable. The Trustees may issue a Unit Certificate in lieu of the account statement in respect of the Units held to such Unit Holders who request for the same, after receipt of a specific request from the Unit Holder. The Trustees reserve the right to make the Units transferable at a later date subject to SEBI Regulations issued from time to time. In view of the same, additions / deletion of names will not be allowed under any folio of the Scheme.

The above provisions in respect of deletion of names will not be applicable in case of death of Unit Holder (in respect of joint holdings) as this is treated as transmission of Units and not transfer.

Note: No account statements (annual or otherwise) will be issued to investors who have opted to hold Units in electronic mode.

The dividend warrants shall be dispatched to the Unit Holders within 30 (thirty) days of the date of declaration of the dividend.

D. COMPUTATION OF NAV

Calculation of NAV

$$\text{NAV (₹)} = \frac{\text{Market or Fair Value of Scheme's investments} + \text{Current Assets} - \text{Current Liabilities and Provisions}}{\text{No. of Units outstanding under the Scheme}}$$

Computation of NAV, will be done after taking into account dividends paid, if any, and the distribution tax thereon, if applicable. Therefore, once dividends are distributed under the Dividend Option, the NAV of the Units under the Dividend Option would always remain lower than the NAV of the units issued under the Growth Option. The income earned and the profits realized in respect of the Units issued under the Growth Option remain invested and are reflected in the NAV of the Units.

The NAV will be calculated up to four decimal places for the Scheme.

The valuation of the Scheme's assets and calculation of the Scheme's NAV shall be subject to audit on an annual basis and such regulations as may be prescribed by SEBI from time to time.

The NAV shall be calculated on all calendar days and announced on all Business Days. The AMC will calculate the NAV of the Scheme on every Calendar Day and disclose the NAV of the Scheme on every Business Day.
