## **Domestic Equity Market Update**

Source: NSE

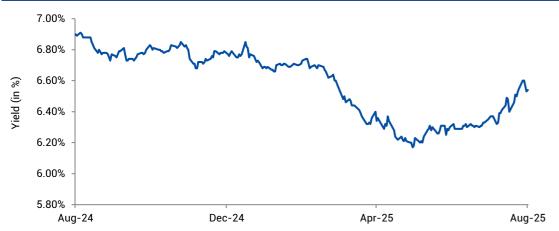

- Domestic equity markets declined after posting gains in the previous two weeks, with key benchmark indices BSE Sensex and Nifty 50 falling by 1.84% and 1.78%, respectively. The decline was broad-based, as both the mid-cap and small-cap segments ended the week in the red
- Domestic equity markets fell after the additional 25% tariff imposed by the U.S. President on India came into effect on Aug 27, 2025. This levy, targeting purchases of Russian oil, is in addition to the existing 25% duties on Indian exports to the U.S., effectively raising the total tariff rate to 50%. The steep increase in tariffs dampened investor sentiment, triggering a sharp sell-off in domestic equities.
- However, the downside remained limited after data showed that India's industrial output grew at the fastest pace in four months, rising 3.5% YoY in Jul 2025. Additionally, proposed GST reforms and a favorable monsoon season acted as catalysts to help navigate uncertainties in the global trade environment.
- On the BSE sectoral front, BSE Realty fell 4.26% after the U.S. administration issued a draft order regarding the implementation of an additional 25% tariff on Indian imports, which came into effect on August 27, 2025. According to a draft notice released by the U.S. Department of Homeland Security, the additional tariffs will apply to Indian products that are entered for consumption or withdrawn from warehouses for consumption. BSE Metal declined by 2.70%, as several domestic metal companies have significant export exposure to the U.S. and are likely to be impacted by the tariffs imposed by the U.S. President.
