Macro Economic Update

- The Index of Industrial Production (IIP) grew by 4.1% YoY in Mar 2026, moderating from 5.1% YoY in Feb 2026. Growth was primarily driven by the manufacturing and mining sectors, which expanded by 4.3% and 5.5%, respectively. In contrast, electricity generation remained subdued, registering a marginal increase of 0.8% YoY.
- According to a statement by the Indian Sugar & Bio-energy Manufacturers Association, India's sugar production in the 2025-26 season rose 7% YoY to 275.28 lakh tonnes as of Apr 30, 2026, led by higher output in Maharashtra and Karnataka.
- The RBI launched the May 2026 rounds of three key surveys on inflation expectations, urban consumer confidence and rural consumer confidence to gather inputs for upcoming monetary policy decisions.
- The RBI has repatriated about 77% of its 880.5 metric tonnes of gold to India by end-Mar 2026, speeding up onshoring amid declining global trust in overseas custody and raising gold's share in forex reserves to about 16.7%.
- According to a notification by the Directorate General of Foreign Trade (DGFT), the Commerce Ministry's arm, India has approved an additional 25 lakh tonnes of wheat exports, taking the total permitted exports to 50 lakh tonnes, supported by comfortable domestic stocks and expectations of a strong 2025-26 harvest.

Domestic Equity Market Update

- Domestic equity markets rebounded after registering losses in the previous week, with the benchmark indices BSE Sensex and Nifty 50 gaining 0.33% and 0.42%, respectively.
- Domestic equity markets witnessed a volatile week, shaped by global uncertainty and movements in crude oil prices. Despite intermittent pressure, markets ended the week with gains after reports suggested that Iran had proposed reopening the Strait of Hormuz and easing the conflict. However, investor sentiment remained cautious as stalled U.S.-Iran negotiations and reports of renewed tensions resurfaced. Gains were further capped by the U.S. Federal Reserve's decision to keep interest rates unchanged at its Apr 2026 meeting, with the Fed Chair's mildly hawkish remarks heightening concerns amid elevated energy prices.
- On the BSE sectoral front, BSE IT rallied 2.74%, supported by weakness in the rupee against the U.S. dollar. Since domestic IT companies derive a significant portion of their revenues in dollars, a depreciating rupee is generally beneficial for these export-oriented firms, boosting their earnings visibility. BSE Oil & Gas rose 2.39%, driven by a strong rally in upstream oil companies. Shares of ONGC and Oil India Limited advanced following news of a major overseas discovery in Libya's prolific Ghadames Basin, along with supportive trends in global crude oil prices. BSE Bankex declined 2.34%, led by losses in public sector banks after the RBI finalised the Expected Credit Loss (ECL) framework. Under ECL, banks must recognise potential credit losses earlier by provisioning based on the probability of default, rather than waiting for loans to turn non-performing.
