# Marketcap to GDP

FY-23 Marketcap to GDP ratio now below 100 after sharp correction in May

# Return on Equity

ROE is gradually improving

# Market Return Contribution

Contribution of EPS is increasing in overall returns

■ PE expansion ■ EPS Growth

# Government Reforms

Reforms that are likely to generate macro dividend in coming years

Production linked  
incentive scheme for  
11 manufacturing  
sector

Insolvency and  
bankruptcy code

Corporate Tax Cut in  
2019

Asset monetisation  
scheme

GST

Various privatisation  
and disinvestment  
initiative

# Government Reforms

- \* The GoI has announced PLI schemes to the tune of INR2.75trn until date. These are expected to be paid out on ~4–6% of incremental revenues.
- \* This would imply incremental revenues of about INR31trn over the next five years and capex of INR2.8trn over the next two years (indicating additional capex of close to INR1.4 trn every year).
- \* This would be ~20% addition to the annual capex of~INR 7trn seen over the last three years.

Sector	Incentive (INR bn)	Capex (INR bn)	Sales (INR bn)
Semiconductors and Display manufacturing	760	760	1900
Automobiles & Auto Components	570	280	1400
Mobile Manufacturing & Specified Electronic Components	409	110	11500
Pharmaceuticals	253	236	3500
Advance Chemistry Cell (ACC) Battery	181	450	450
Telecom & Networking Products	122	30	2400
Food Products	109	60	1200

# Impact of high oil prices on equity

Link between crude oil prices, the Indian economy and the Sensex, a far less worrisome

The chart above shows that rise in crude oil price correlates with rise in equities. They share a positive correlation.

The chart above shows that rise in crude oil price correlates with rise in GDP, until oil price rise exceeds 100% YOY.

# Nifty EPS estimates for FY 23 & 24 has not seen any downgrades

# PAT to GDP mean reverting

PAT to GDP continues to improve and is now expected to reach 4.7% in next 2 years.

# India GDP growth fastest among peers

(%)	2021	2022E	2023E
<b>World Output</b>	<b>6.1</b>	<b>3.6</b>	<b>3.6</b>
Advanced Economies	5.2	3.3	2.4
United States	5.7	3.7	2.3
Euro Area	5.3	2.8	2.3
EM and Developing	6.8	3.8	4.4
China	8.1	4.4	5.1
<b>India</b>	<b>8.9</b>	<b>8.2</b>	<b>6.9</b>
Brazil	4.6	0.8	1.4
Saudi Arabia	3.2	7.6	3.6
South Africa	4.9	1.9	1.4

# How big a risk is taper tantrum?

In last fed rate reversal cycle in 2013, equity declined 10-15% in first 3 months, but clocked double digit returns over next 1 year period.

Stock market returns from 2013 tapering announcement

# Don't miss the best days of market

Top 10 daily gains and drawdowns in Nifty 50 since 2000

- \* Most best days of markets have come immediately after biggest drawdowns or within 6 months.
- \* Selling during a drawdown and not participating in the pullback rally, essentially missing the 10 best days of Nifty gain, can lower overall returns **from 10.6x to 4.5x (CAGR dropping to 7.4% from 11.8%)** since Jan 2000.
- \* A similar analysis on the Nifty Midcap Index suggests returns **drop to 12.8x from 25.6x** since Jan 2001.

**Staying invested is the best strategy during extreme volatility**

# Market Insights

## The Macro Picture

- \* Despite recent rises, rates are still the lowest in the last decade
- \* Relative Yield Gap comfortably points towards overweight equities
- \* Inflation: A function of supply shortages/transient in nature

## The Earnings & Valuation Picture

- \* After years of downside, earnings are finally looking up in 2HFY23
- \* Incipient signs of pick-up in capex trends look encouraging
- \* National Elections in a couple of years makes government pro-spending after years of reforms
- \* PLI/Growth schemes to add 1-2% of structural growth over medium-term
- \* Valuations stretched on depressed earnings estimates

# How are we playing this in our portfolios

## FY23 likely to be a tale of two Halves

- \* Interest-rate, Omicron, Geo-politics and Inflation related volatility in 1HFY23
- \* Earnings recovery in 2HFY23

## Strong bottom-up earnings trigger is the way forward

- \* Rebound in Credit Growth
- \* Private Sector Investment Demand
- \* House-hold Capex Demand
- \* Beneficiaries of Govt. growth schemes and China plus one demand

## Budget that pushes growth

- \* Growth over Fiscal Prudence
- \* Long-term Capital Formation over Short-term Relief Measures
- \* Embracing the Digital Economy
- \* Commitment to Make-in-India theme

# Key issues to watch out for

- \* Rise of Interest rates out-of-sync with earnings
  - \* Stagflation
- \* Persistent high Oil Prices
- \* Rise of global terrorism

# How are we navigating high inflation and rising rates

**Our funds have active exposure to these 3 sectors that are beneficiaries or show resilience during rate hike cycles and high inflationary environment**

## Consumers

- Consumer companies that have pricing power continue to do well during high inflation-interest rate regime
- Margins are stable as demand for such goods is inelastic to inflationary pressures.
- Positive on businesses that have pricing power and have better brand acceptance.

## Industrials

- When interest rates rise the economy is usually on a stronger footing and industrial activity tend to remain strong and resilient.
- Industrial manufacturing can pass on the higher cost without impacting demand
- Positive on industrial manufacturers who have pricing power and demand is picking up for their products.

## Lending Financials

- Financial sector has historically been among the most sensitive to changes in interest rates.
- Profit margins that expand as rates climb, entities like private banks and lending financials benefit from higher interest rates.
- We have active exposures to select private sector lenders and some dominant lending franchise

# Why we own; What we own – Specialty Chemicals

- Global Specialty chemical market is ~USD 800 bn. where India's share is 1/4th that of China.
- Indian companies have just scratched the surface. Some of the largest specialty chemical companies in India have less than USD 1 bn sales compared to global market size of USD 800bn.
- Indian Chemical industry at the cusp of taking majority of the world's market share, with several legal and pollution issues in China. [Read detailed note here](#)

**Region-wise expected growth in specialty chemicals (CY 2020-2025 CAGR)**

Source: CRISIL Research

Stocks we own in portfolios	
Navin Fluorine International Ltd.	Tata Chemicals Ltd.
Atul Ltd.	Vinati Organics Ltd.
Aarti Industries Ltd.	Deepak Nitrite Ltd.
SRF	Fine Organic Industries Ltd.
Nocil Ltd.	Sudarshan Chemical Industries Ltd.

The above stocks are currently part of the portfolio. There is no assurance or guarantee of future position in the above stocks.

# Why we own; What we own – Industrials

- Government's thrust on capital expenditure to boost economy and high spends on infra bodes well for industrials
- When interest rates rise the economy is usually on a stronger footing to withhold this regime change and hence, industrial activity tend to remain strong and resilient.
- Industrial manufacturing businesses are also mostly beneficially of high commodity prices since they can pass on the higher cost without impacting demand to a large extent.

**Rising share of industrials in aggregate profits amongst top 1000 companies**

Stocks we own in portfolios
ABB India Ltd.
Cummins India Ltd.

# BFSI and Industrials are relatively cheaper

Trailing P/E of industrials and financials are at reasonable levels compared to history and other sectors.  
Our portfolios are largely O/W on lenders and industrials

SRF

# Top Active calls - Midcaps

Rationale	MCF	L&MCF	SCF
<ul style="list-style-type: none"> <li>We believe the need for business continuity, operational resilience, and the switch to digital transactions have led to strong demand for IT services post the pandemic.</li> <li>PSL is an early identifier of digital trends and has strong product development capabilities.</li> <li>It is well-poised to capitalize on this opportunity and deliver industry-leading growth, led by its strong digital competencies, robust ACVs, and broad-based demand.</li> <li>The recent acquisition of MediaAgility will strengthen its partnership with Google and enable it to capture opportunities in high growth markets.</li> <li>PSL is expected to clock Top tier USD revenue &amp; earnings growth over medium term.</li> </ul>		1.74%	2.53%
<ul style="list-style-type: none"> <li>Auto financiers are expected to see loan growth improve and asset quality pressures ease as business activities normalize. Better economic activity, pick-up in auto sales and revival of used commercial vehicles segment would drive auto loan growth for financiers.</li> <li>Cholamandalam Investment &amp; Fin Co Ltd. has established itself as a strong and well-run vehicle financing (that forms 70% of AUM) NBFC with attractive return ratios, steady net interest margin, and strong operating metrics, which underline its high pedigree among peers.</li> <li>The company outdoes its peers in terms of loan book growth; non-auto segments are likely to drive growth going ahead, even as outlook for auto loans improves.</li> <li>The company has demonstrated stable asset quality through cycles and we expect it to improve further given its ability to tide over credit cycles with relative ease and its lower credit cost versus peers.</li> </ul>	3.77%	2.31%	2.27%
<ul style="list-style-type: none"> <li>Federal Bank is transforming itself into a next-gen private bank via its neo-banking tie-ups across assets, liabilities, and payments businesses. This should not only help the bank thrive in the new era of banking, but also reduce the incremental cost of business and garner better fees/revenues in the long run.</li> <li>The bank's retail portfolio has now diversified into higher-margin CV, MFI, PL and Card businesses, which should drive up NIMs and ROA</li> <li>Given the bank's strong liability franchise, capitalisation, coverage and liquidity than its regional peers, it is better placed to withstand Covid'19-related stresses and gain market share. With lower stress than earlier anticipated, lower credit costs would lead to a sharp recovery in earnings.</li> </ul>	2.35%		1.89%

# Top Active calls - Midcaps

## Rationale

- Cummins is the largest standby genset player in India with a lead market share in medium and large gensets. The company has a strong technology/innovation track record, well supported by its parent, which helps it stay ahead of peers across changes in emission norms
- Cummins is expected to benefit from strong domestic demand especially in infrastructure, mining and data centers. The exports have started to recover led by strong growth continuing in Asia Pacific regions followed by Africa, Middle East and Latin America.
- Cummins' strong parentage and technological capabilities give it an edge over competitors. The company's innovative products and solutions, market leadership in the domestic market, rising optimism for export recovery, and margin expansion is positive for the company.
- The company has begun to witness the benefits arising from strong revival in key segments such as power generation, construction, and mining, which are expected to sustain going forward.
- Crompton's competitive strength in core areas (fans, residential pumps) has only marched northward in recent years, thanks to innovation and market penetration. Besides, in recent years, geysers and coolers have been significantly scaled up, putting Crompton in the league of top and relevant peers.
- Crompton is a strong play in consumer segment given 1) market share gains across core categories of Fans, Pumps & LED lights 2) sustained investments in LT initiatives (brand building, innovation, business processes & teams 3) well defined plan of entering & scaling up new categories (Water Heaters, Air Coolers, Mixer-Grinders) and 4) strong balance sheet.
- Recent acquisition of Butterfly can help achieve scale in kitchen appliances (Rs80bn opportunity), a focus area for Crompton over the past several quarters. Acquisition is in line with Crompton's strategic pillars of 1) strong brand 2) diverse product portfolio 3) deep distribution reach in South 4) in-house manufacturing and strong R&D capabilities and 5) robust organizational processes.

## Rationale

## FCF

- PML is India's largest retail-led mixed-use developer. The group has carved a niche for itself in the Indian real estate sector, be it mega retail malls, entertainment complexes, commercial spaces or hospitality units.
- It has real estate assets in Mumbai, Bengaluru, Chennai, Pune, Agra, Indore, Lucknow, Bareilly and Ahmedabad.
- Revival in consumption in malls and occupancy in hotels, and the pace of liquidation of ready inventory in the housing segment are likely to culminate in robust cash flows going ahead.
- Leadership in the mall space, a robust balance sheet, and improving consumption trajectory underpins growth prospects for the business

1.69%

- BRGD is a South India based developer with operations concentrated primarily in Bengaluru along with other cities like Hyderabad, Mysore, Chennai, and Kochi.
- We like BEL for its robust residential presence, high-quality rental assets and strong brand equity. Its diversified product portfolio and sustained momentum in the Bengaluru market are the key positives
- BRGD has a strong rental portfolio comprising of marquee commercial towers, retail malls and hospitality projects. Its operational commercial portfolio spans an area exceeding 3million sq.ft. Further, the company has ~1200 hotel keys operational across various assets.

<ul style="list-style-type: none"> <li>Greenpanel industries is the leader with 23% capacity share in MDF industry, the fastest growing home décor segment – likely to clock high teens growth over FY21-26E.</li> <li>MDF consumption in India is just 1/20<sup>th</sup> of China’s MDF consumption which provides a long runway for growth</li> <li>The industry is benefitting from: i) pickup in home décor demand led by rising share of readymade furniture; ii) shift from low-end plywood to MDF; iii) import substitution; and iv) exports.</li> <li>Greenpanel is currently enjoying favourable industry scenario led by strong demand, absence of imports and profitable exports aiding it to generate robust free cash flow</li> </ul>	2.39%	1.80%
<ul style="list-style-type: none"> <li>JB Chemicals &amp; Pharmaceuticals has a market leading position in three of its top four brands in India. The top 4 products - Cilacar, Rantac, Metrogyl and Nicardia - account for ~80% of domestic revenue and have grown at mid-high teens annually over the past three years.</li> <li>JB Chemicals is a debt-free cash rich company, which can generate strong FCF annually with limited capex over foreseeable future.</li> <li>Company guides for higher share of revenue from chronic portfolio in India formulation led by 1) new launches and foray in new therapy, 2) Prescription market share gain in existing brands 3) Sales force productivity improvement and 4) higher CAPEX allocation towards Indian market.</li> </ul>		2.14%

# Investment Process

---

# Our philosophy while managing your money

Our **FAIR** investment framework helps in identifying Robust and clean businesses available at acceptable price and also keeps us informed on their ESG standings

## Forensics

Use forensic framework to check accounting quality, board governance standards and ownership background

## Acceptable Price

Focus on reasonably priced businesses with medium term earnings power rather than short term and be value/ growth agnostic

## ESG Informed

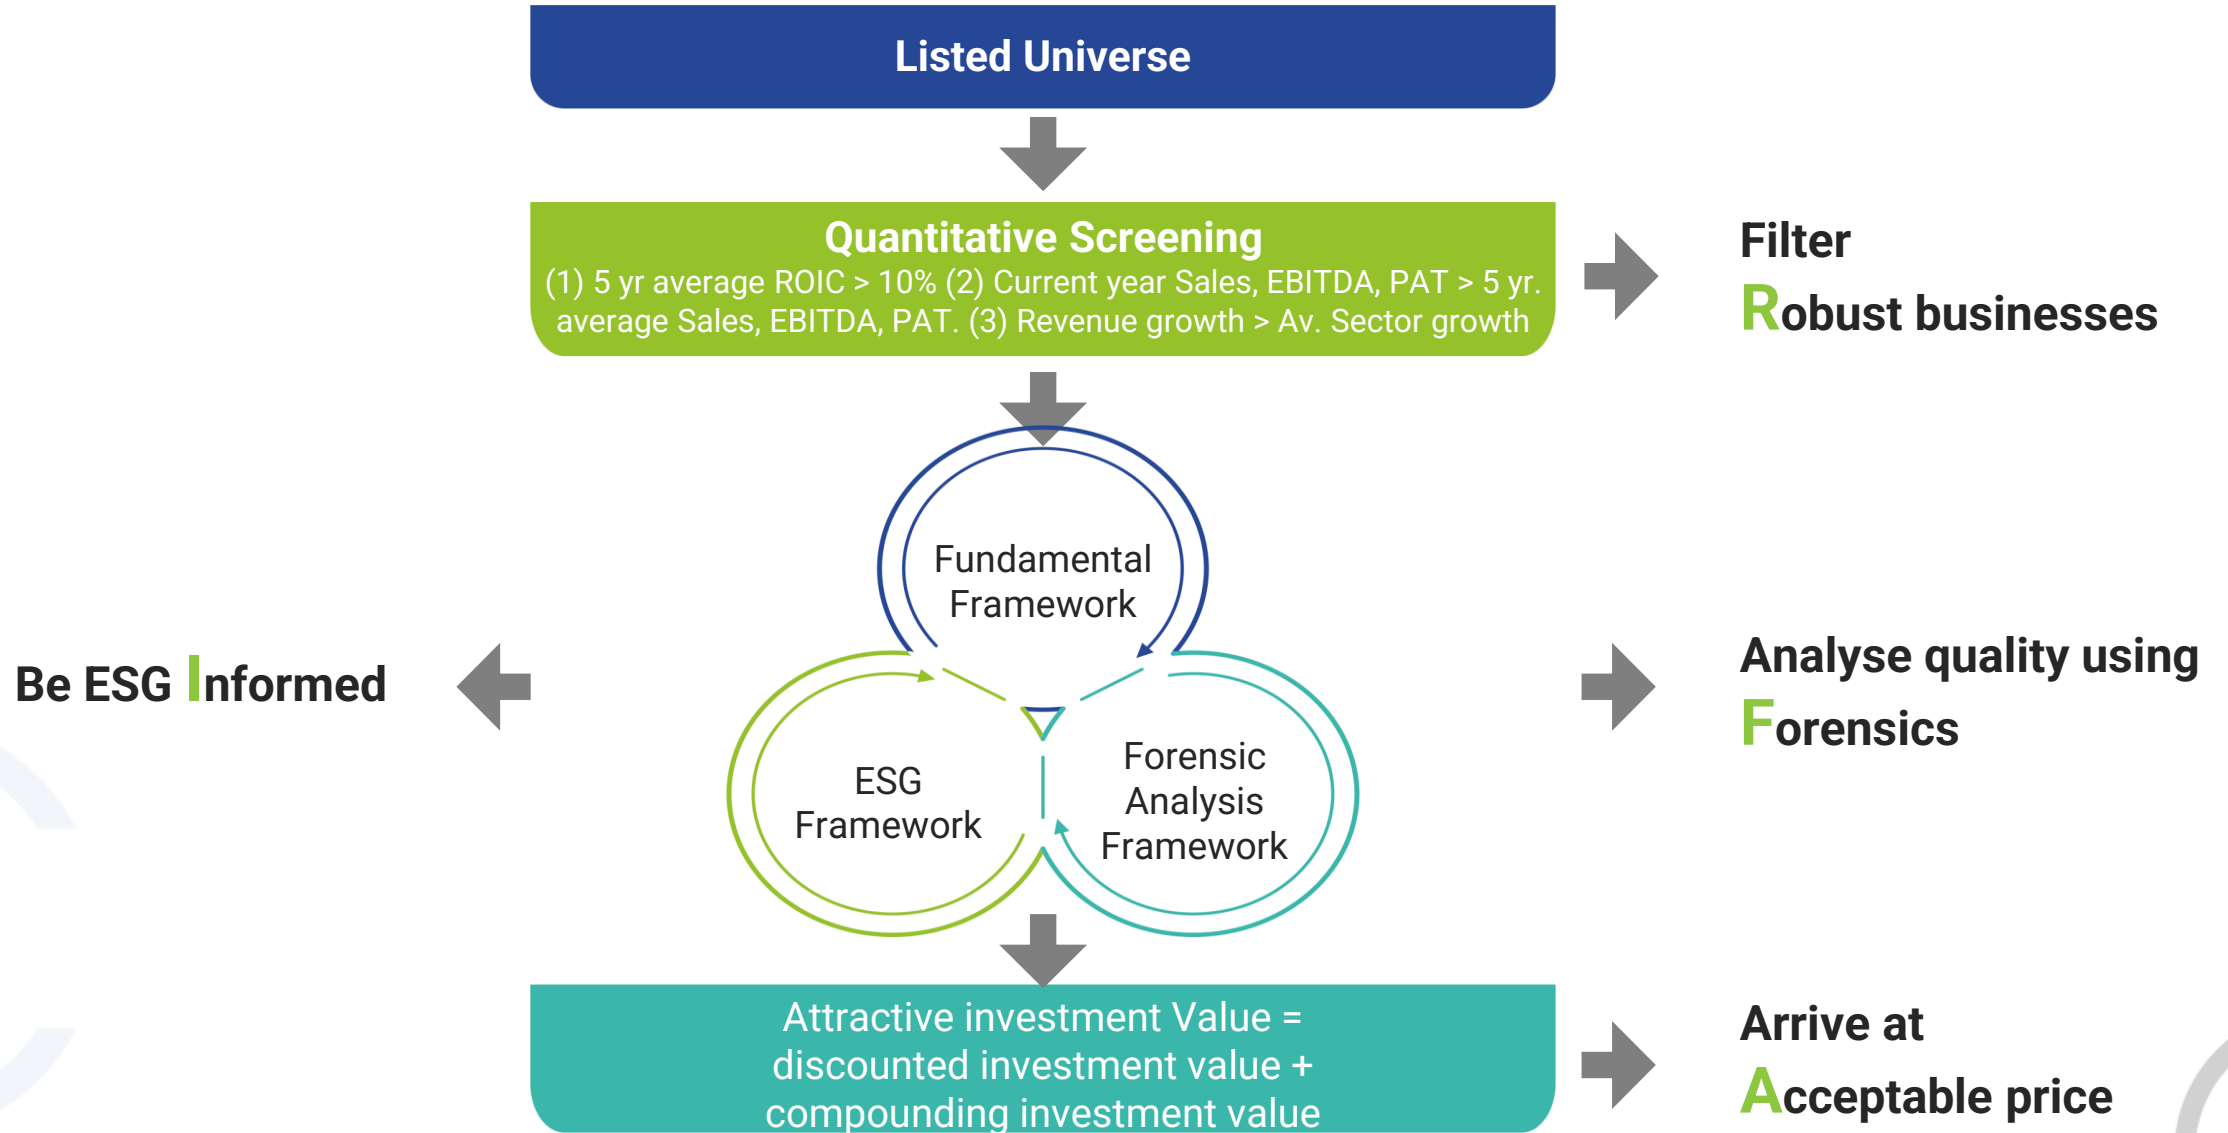

Be informed on ESG factors for businesses that we like to invest and its impact on the environment and humans at large

## Robustness

Pick well managed businesses having scalable opportunities and superior return on capital employed

# Our investment process

# Risk Management at each level of investment process

Risk management is core to our strategy at each level of investment process

# What we don't do

Not doing something is an active call and very important factor in investing

## 01 Take out-sized sector bets

Earnings of every sector goes through cycles and over longer period it is in-line with broader market earnings. Hence, we avoid out-sized sector bets unless it is mandate of the fund

## 02 Macro calls

Macro calls may not work all the time given dynamic nature of our markets today compared to what they were in the past

## 03 Cash-calls

Timing the market is difficult and hence, we keep our portfolios fully invested
