New Delhi

Edelweiss Asset Management Company (AMC) on Wednesday said its equity and hybrid assets under management (AUM) have crossed the ₹1 lakh crore milestone.

"This achievement has been supported by strong consistency in performance of our equity and hybrid funds and widening distribution reach," Edelweiss AMC Managing Director and Chief Executive Officer Radhika Gupta said in a media briefing. Further, she committed that it will offer differentiated product solutions backed by strong research, robust risk management and consistent investment approach.

Edelweiss AMC's equity and hybrid AUM has grown sharply from ₹29,382 crore in May 2023 to ₹1 lakh crore by June 2026. During the same period, its folio count increased from 11.59 lakh to over 39 lakh.

WEALTH CREATION

According to the fund house, the achievement underscores the growing focus on long-term wealth creation through MFs and the increasing role of systematic investing in helping investors pursue their financial goals.

On an overall basis, as of June 29, the fund house manages a total AUM of over ₹1.78 lakh crore across equity, debt, factor investing, Altiva SIF, and GIFT City offerings. Its SIP book stands at around ₹690 crore, supported by a robust base of around 40 lakh active folios.

The fund house's specialised investment platform, Altiva SIF, managed assets worth more than ₹5,950 crore, making it the largest in the segment, according to the company.
