<p><b>RISK PROFILE OF THE SCHEME</b></p>	<p>Apart from the risk factors mentioned in SAI, following are some of the additional risk factors which investors are advised to go through before investing:</p> <p><b>a) STANDARD RISK FACTORS:</b></p> <ul style="list-style-type: none"> <li>* Investment in Mutual Fund Units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal.</li> <li>* As the price / value / interest rates of the securities in which the Scheme invests fluctuates, the value of your investment in the Scheme may go up or down</li> <li>* Past performance of the Sponsor/AMC/Mutual Fund does not guarantee future performance of the Scheme.</li> <li>* Edelweiss NIFTY PSU Bond Plus SDL Index Fund – 2027 is only the name of the Scheme &amp; it does not in any manner indicate either the quality of the Scheme or its future prospects and returns.</li> <li>* The sponsor is not responsible or liable for any loss resulting from the operation of the Scheme beyond the initial contribution of Rs.1,00,000 made by it towards setting up the Fund.</li> <li>* The Scheme is not a guaranteed or assured return Scheme.</li> </ul> <p><b>b) SCHEME SPECIFIC RISK FACTORS:</b></p> <p>The performance of the Scheme may be affected by changes in Government policies, general levels of interest rates and risks associated with trading volumes, liquidity and settlement systems, etc. Some of the Risks are listed below:</p> <p><b>1. Risks Associated with Fixed Income and Money Market Instruments:</b></p> <ul style="list-style-type: none"> <li>* <b>Interest rate risk:</b> Price of a fixed income instrument falls when the interest rates move up and vice-versa, which will affect the NAV accordingly.</li> <li>• <b>Spread risk:</b> Investments in corporate bonds are exposed to the risk of widening of the spread between corporate bonds and gilts. Prices of corporate bonds tend to fall if this spread widens which will affect the NAV of the Scheme accordingly.</li> <li>• <b>Credit risk or default risk:</b> Credit risk is the risk that the issuer of a debenture/ bond or a money market instrument may default on interest &amp;/or principal payment obligations.</li> <li>• <b>Liquidity:</b> The Risk of non execution of sale/purchase order due to low volumes is liquidity risk.</li> <li>• <b>Reinvestment risk:</b> Interest rates may vary from time to time. The rate at which intermediate cash flows are reinvested may differ from the original interest rates on the security, which can affect the total earnings from the</li> </ul>

	<p>security.</p> <ul style="list-style-type: none"> <li>• <b>Performance Risk:</b> Performance of the Scheme may be impacted with changes in factors, which affect the capital market and in particular the debt market.</li> <li>• <b>Market risk:</b> Lower rated or unrated securities are more likely to react to developments affecting the market as they tend to be more sensitive to changes in economic conditions than higher rated securities.</li> </ul> <p><b>2. Risk Factors associated with Scheme:</b></p> <p><b><u>a. Passive Investments:</u></b>  As the scheme proposes to invest not less than 95% of the net assets in the securities of the benchmark Index, the Scheme will not be actively managed. The Scheme may be affected by a general decline in the Indian markets relating to its Underlying Index. The Scheme invests in the securities included in its underlying index regardless of their investment merit. The AMC does not attempt to individually select stocks or to take defensive positions in declining markets.</p> <p><b><u>b. Tracking Error Risk:</u></b>  <b><u>a. Passive Investments:</u></b>  As the scheme proposes to invest not less than 95% of the net assets in the securities of the benchmark Index, the Scheme will not be actively managed. The Scheme may be affected by a general decline in the Indian markets relating to its Underlying Index. The Scheme invests in the securities included in its underlying index regardless of their investment merit. The AMC does not attempt to individually select securities or to take defensive positions in declining markets.</p> <p><b><u>b. Tracking Error Risk:</u></b>  Tracking Error is divergence of the performance (return) of the Fund’s portfolio from that of the Underlying Index. Based on that the availability of issuances by the CPSEs/CPSUs/CPFIs and other Government organizations, it is expected that the Portfolio allocation could be different than that of underlying index allocation and could result in Tracking Error. That said, the risk parameters of the portfolio of the Scheme and underlying index could be similar.</p> <p>The Fund will endeavor to keep the tracking error as low as possible. Under normal circumstances, such tracking error is not expected to exceed 2% per annum.</p> <p>Tracking error could be the result of a variety of factors including but not limited to:</p> <ul style="list-style-type: none"> <li>• Delay in the purchase or non- availability of CPSEs securities which are part of the Index</li> <li>• Delay in liquidation of CPSEs bonds which have been removed by the Index</li> <li>• Due to timing of transactions either on RFQ platforms or in open market</li> <li>• Due to investment in out of index investments such as Government securities, Repo in Government securities and TREPS</li> <li>• Due to over-weight / under-weight investment in bonds of eligible CPSEs issuers at ISIN level which are part of the Index</li> </ul>
--	--

- Due to mismatch in the weight of the issuers forming part of the Index and the Scheme throughout life of the Scheme.
- Change in asset allocation between the Index and the Scheme in the last year of the Scheme.
- Difference in valuation of underlying bonds by the Index Provider and AMC's valuation providers.

***c. Trade Execution Risk on RFQ Platforms:***

Current SEBI regulations mandates Mutual Funds to execute certain % of their monthly trading volume in corporate bonds on RFQ platforms. RFQ platforms are peer-to-peer platforms and are still in development stage. Therefore, they have lower level of secondary market liquidity. Mandatory execution of trades on RFQ among MFs may hamper trade execution efficiency during periods of heavy outflows.

**3. Risks associated with investing in Tri Party Repo through CCIL (TREPS):**

Risk of exposure in the Triparty Repo settlement Segment provided by CCIL emanates mainly on two counts –

- a. Risk of failure by a lender to meet its obligations to make funds available or by a borrower to accept funds by providing adequate security at the settlement of the original trade of lending and borrowing under Triparty Repo transaction.
- b. Risk of default by a borrower in repayment.

**4. Risk associated with Stock Lending**

The risks in lending portfolio securities, as with other extensions of credit, consist of the failure of another party, in this case the approved intermediary, to comply with the terms of agreement entered into between the lender of securities i.e. the Scheme and the approved intermediary. Such failure to comply can result in the possible loss of rights in the collateral put up by the borrower of the securities, the inability of the approved intermediary to return the securities deposited by the lender and the possible loss of any corporate benefits accruing to the lender from the securities deposited with the approved intermediary. It may be noted that this activity would have the inherent probability of collateral value drastically falling in times of strong downward market trends, rendering the value of collateral inadequate until such time as that diminution in value is replenished by additional security. It is also possible that the borrowing party and/or the approved intermediary may suddenly suffer severe business setback and become unable to honor its commitments. This, along with a simultaneous fall in value of collateral would render potential loss to the Scheme. Besides, there can be temporary illiquidity of the securities that are lent out and the scheme will not be able to sell such lent out securities until they are returned. There is also a possibility of opportunity loss.

**5. Risk Associated with Repo transactions in Corporate Debt**

- **Lending transactions:** The scheme may be exposed to counter party risk in case of repo lending transactions in the event of the counterparty failing to honour the repurchase agreement. However, in repo lending transactions, the collateral may be sold and a loss is realized only if the sale price is less

	<p>than the repo amount. The risk may be further mitigated through over-collateralization (the value of the collateral being more than the repo amount). Further, the liquidation of underlying securities in case of counterparty default would depend on liquidity of the securities and market conditions at that time. It is endeavoured to mitigate the risk by following an appropriate counterparty selection process, which include their credit profile evaluation and over-collateralization to cushion the impact of market risk on sale of underlying security.</p> <ul style="list-style-type: none"> <li>• <b>Borrowing transactions:</b> In the event of the scheme being unable to pay back the money to the counterparty as contracted, the counter party may dispose of the assets (as they have sufficient margin). This risk is normally mitigated by better cash flow planning to take care of such repayments. Further, there is also a Credit Risk that the Counterparty may fail to return the security or Interest received on due date. It is endeavoured to mitigate the risk by following an appropriate counterparty selection process, which include their credit profile evaluation.</li> </ul> <p><b>6. Risks Associated with segregated portfolio</b></p> <ol style="list-style-type: none"> <li>1) Unit holder holding units of Segregated Portfolio may not able to liquidate their holdings till the recovery of money from the issuer.</li> <li>2) Portfolio comprising of Segregated Portfolio may not realise any value or may have to be written down.</li> <li>3) Listing of units of Segregated Portfolio in recognised stock exchange does not necessarily guarantee their liquidity. There may not be active trading of units in the stock market. Further trading price of units on the stock market may be significantly lower than the prevailing NAV.</li> </ol> <p>For further details please refer SAI.</p>
<p><b>Plans, Options and Facilities</b></p>	<p>The Scheme will offer two Plans:</p> <ol style="list-style-type: none"> <li>1. Regular Plan; and</li> <li>2. FATCA requires enhancement of due diligence processes by the Foreign Financial Institutions ("FFI") so as to enable identification of US reportable accounts.

The Fund/ Edelweiss Asset Management Limited ("the AMC") are likely to be classified as a FFI under the FATCA provisions, in which case the Fund /the AMC would be required, from time to time, to (i) undertake necessary due diligence process by collecting information/ documentary evidence of the US/non US status of the investors; (ii) disclose/report information as far as may be legally permitted about the holdings/investment returns pertaining to reportable accounts to the US Internal Revenue Service and/or such Indian authorities as may be specified under FATCA or other applicable laws and (iii) carry out such other activities as prescribed under the FATCA provisions, as amended from time to time.

FATCA due diligence will have to be directed at each investor/unit holder (including joint investors) and on being identified as a reportable person/specified US person, all the folios will be reported. Further, in case of folio with joint investors, the entire account value of investment portfolio will be attributable under each such reportable person. Investors/Unit holders would therefore be required to furnish such information to the Fund/AMC, from time to time, in order to comply with the reporting requirements stated in the IGA and/or circulars/guidelines issued by SEBI/AMFI in this regard.

The impact of FATCA is relevant not only at the point of on-boarding of the investors but also throughout the life cycle of the investor account / folio with the Fund. Hence investor(s) should immediately intimate the Fund/AMC, in case of any change in the FATCA related information provided by them at the time of initial subscription.

The Fund/AMC reserves the right to reject any application or compulsorily redeem the units held directly or beneficially in case the applicant/investor fails to furnish the relevant information and/or documentation or is found to be holding units in contravention of the FATCA provisions.

Investors are advised to consult their tax advisors to understand the FATCA requirements and its implications in relation to their investment.

### **XVIII. Central KYC Records Registry (CKYCR):**

The Government of India vide their Notification dated November 26, 2015 authorised the Central Registry of Securitisation Asset Reconstruction and Security Interest of India (CERSAI) to act as and to perform the functions of the Central KYC Records Registry under the said rules, including receiving, storing, safeguarding and retrieving the KYC records under the Prevention of Money Laundering Act, 2002. SEBI required all the market intermediaries to update/upload KYC details of the new customer/investors (not KYC-KRA compliant) on CERSAI's online platform. CERSAI is a centralized repository of KYC records of customers/investors in the financial sector with uniform KYC norms and inter-usability of the KYC records across the sector with an objective to reduce the burden of producing KYC documents and getting those verified every time when the customer/investors creates a new relationship with a financial entity. Central KYC (CKYC) will store all the customer/investor information at one central server that is accessible to all the financial institutions. After opening a KYC account under the CKYC, customer/investor will get a 14-digit identification number ("KYC Number") and that the same may be quoted by the investor wanting to invest in mutual funds. Further, the Mutual Fund/AMC is required to check whether the PAN of the investor has been updated in CKYC. In case the PAN has not been updated, the Mutual Fund/AMC shall collect a self certified copy of the investor's PAN card and update/upload the same in CKYC. In case the investor uses the old KRA KYC form for updating of any KYC information, such investor shall be required to provide additional/missing information only by using the supplementary CKYC form or fill the new "CKYC form".
