<b>RISK PROFILE OF THE SCHEME</b>	<p>Apart from the risk factors mentioned in SAI, following are some of the additional risk factors which investors are advised to go through before investing:</p> <p><b>a) STANDARD RISK FACTORS:</b></p> <ul style="list-style-type: none"> <li>* Investment in Mutual Fund Units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal.</li> <li>* As the price / value / interest rates of the securities in which the Scheme invests fluctuates, the value of your investment in the Scheme may go up or down</li> <li>* Past performance of the Sponsor/AMC/Mutual Fund does not guarantee future performance of the Scheme.</li> <li>* Edelweiss MSCI India &amp; Global Healthcare Index Fund is only the name of the Scheme &amp; it does not in any manner indicate either the quality of the Scheme or its future prospects and returns.</li> <li>* The sponsor is not responsible or liable for any loss resulting from the operation of the Scheme beyond the initial contribution of Rs.1,00,000 made by it towards setting up the Fund.</li> <li>* The Scheme is not a guaranteed or assured return Scheme.</li> </ul> <p><b>b) SCHEME SPECIFIC RISK FACTORS:</b></p> <p>The performance of the Scheme may be affected by changes in Government policies, general levels of interest rates and risks associated with trading volumes, liquidity and settlement systems, etc. Some of the Risks are listed below:</p> <p><b>1. Risk Factors Associated with Equity &amp; Equity related instruments</b></p> <p>The value of the Scheme's investments may be affected generally by factors affecting securities markets, such as price and volume volatility in the capital markets, etc. Settlement periods and transfer procedures may restrict the liquidity of the investments made by the Scheme. The Scheme may face liquidity risk or execution risk or redemption risk or the risk of NAV going below par.</p> <p>Investments in equity and equity related securities involve a degree of risk and investors should not invest in the Scheme unless they can afford to take the risk of losing their investment. The liquidity and valuation of the Scheme's investments due to its holdings of unlisted securities may be affected if they have to be sold prior to the target date for disinvestment.</p> <p>Securities which are not quoted on the stock exchanges are inherently illiquid in nature and carry a larger liquidity risk in comparison with securities that are listed on the exchanges or offer other exit options to the investors, including put options. The AMC may choose to invest in unlisted securities that offer attractive</p>

	<p>yields within the regulatory limit. This may however increase the risk of the portfolio.</p> <p>At times, taking benefit of investing in Special Situations may involve certain risks like the promoter may choose not to accept the discovered prices or the Regulatory hurdles may delay any specific corporate action. For details, please refer SAI.</p> <p><b>2. Risks associated with Investments in Foreign Securities</b></p> <p>Investments in International (overseas) equity and equity related instruments Securities involves increased risk and volatility, not typically associated with domestic investing, due to changes in currency exchange rates, foreign government regulations, differences in auditing and accounting standards, potential political and economic instability, limited liquidity, and volatile prices. Further, risks associated with introduction of extraordinary exchange control, economic deterioration, and changes in bi-lateral relationships.</p> <p>Investments in foreign securities under the Scheme shall be governed by the limits specified by SEBI/RBI from time to time. EAML reserves the right to refund/reject any application under the Scheme in case the investment in foreign securities exceeds the limits specified by SEBI/RBI from time to time.</p> <p><b>Currency Risk:</b> The schemes may invest in securities denominated in a broad range of currencies and may maintain cash in such currencies. As a consequence, fluctuations in the value of such currencies against the currency denomination of the relevant scheme will have a corresponding impact on the value of the portfolio. Furthermore, investors should be aware that movements in the rate of exchange between the currency of denomination of a fund and their home currency will affect the value of their shareholding when measured in their home currency.</p> <p><b>Country Risk:</b> The Country risk arises from the inability of a country, to meet its financial obligations. It is the risk encompassing economic, social and political conditions in a foreign country, which might adversely affect foreign investors' financial interests.</p> <p>As the Scheme will also invest in Foreign Securities as permitted by Reserve Bank of India and Securities and Exchange Board of India. To the extent that some part of the assets of the Schemes may be invested in securities denominated in foreign currencies, the Indian Rupee equivalent of the net assets, distributions and income may be adversely affected by the changes in the value of certain foreign currencies relative to the Indian Rupee. The repatriation of capital also may be hampered by changes in regulations concerning exchange controls or political circumstances as well as all other restrictions on investments as applicable.</p> <p><b>3. Risks Associated with investing in Money Market Instruments</b></p> <p>Edelweiss MSCI India Domestic &amp; World Healthcare 45 Index Fund will invest not less than 95% of its corpus in the securities representing the MSCI India Domestic &amp; World Healthcare 45 Index as this Scheme endeavors to earn returns that</p>
--	--

	<p>closely correspond to the total returns represented by the MSCI India Domestic &amp; World Healthcare 45 Index. The Scheme will have insignificant cash or debt/money market investments. Therefore, the scheme is not significantly susceptible to risks associated with debt/money markets. Risks associated with debt /money market instruments are as under:</p> <ul style="list-style-type: none"> <li>• <b>Interest rate Risk:</b> Price of a fixed income instrument generally falls when the interest rates move up and vice- versa. The extent of fall or rise in the prices depends upon the coupon and maturity of the security. It also depends upon the yield level at which the security is being traded. The NAV of the Scheme is expected to increase from a fall in interest rates while it would be adversely affected by an increase in the level of interest rates.</li> <li>• <b>Spread Risk:</b> In a floating rate security the coupon is expressed in terms of a spread or mark up over the benchmark rate. In the life of the security this spread may move adversely leading to loss in value of the portfolio. The yield of the underlying benchmark might not change, but the spread of the security over the underlying benchmark might increase leading to loss in value of the security.</li> <li>• <b>Credit risk or default Risk:</b> Credit risk is the risk that the issuer of a debenture/ bond or a money market instrument may default on interest and/or principal payment obligations. Even when there is no default, the price of a security may change with expected changes in the credit rating of the issuer. It is to be noted here that a Government Security is a sovereign security and is the safest. Corporate bonds carry a higher amount of credit risk than Government Securities. Within corporate bonds also there are different levels of safety and a bond rated higher by a particular rating agency is safer than a bond rated lower by the same rating agency.</li> <li>• <b>Liquidity &amp; Settlement Risk:</b> The liquidity of a fixed income security may change, depending on market conditions leading to changes in the liquidity premium attached to the price of such securities. At the time of selling the security, the security can become illiquid, leading to loss in value of the portfolio. Different segments of the financial markets have different settlement cycle/periods and such settlement cycle/periods may be impacted by unforeseen circumstances, leading to Settlement Risk. This can adversely affect the ability of the Fund to swiftly execute trading strategies which can lead to adverse movements in NAV.</li> <li>• <b>Reinvestment Risk:</b> Interest rates may vary from time to time. The rate at which intermediate cash flows are reinvested may differ from the original interest rates on the security, which can affect the total earnings from the security.</li> <li>• <b>Performance Risk:</b> Performance of the Scheme may be impacted with changes in factors, which affect the capital market and in particular the debt market.</li> <li>• <b>Prepayment Risk:</b> The Scheme may receive payment of monthly cashflows earlier than scheduled, which may result in reinvestment risk.</li> <li>• <b>Market Risk:</b> Lower rated or unrated securities are more likely to react to developments affecting the market as they tend to be more sensitive to changes in economic conditions than higher rated securities</li> </ul> <p><b>4. Risk Factors associated with Scheme:</b></p>
--	--

	<p><b>a. <u>Passive Investments:</u></b></p> <p>As the scheme proposes to invest not less than 95% of the net assets in the securities of the benchmark Index, the Scheme will not be actively managed. The Scheme may be affected by a general decline in the Indian markets relating to its Underlying Index. The Scheme invests in the securities included in its underlying index regardless of their investment merit. The AMC does not attempt to individually select stocks or to take defensive positions in declining markets.</p> <p><b>b. <u>Tracking Error Risk:</u></b></p> <p>Tracking errors are inherent in any index fund and such errors may cause the schemes to generate returns which are not in line with the performance of the MSCI India Domestic &amp; World Healthcare 45 Index or one or more securities covered by / included in the MSCI India Domestic &amp; World Healthcare 45 Index and may arise from a variety of factors including but not limited to:</p> <ol style="list-style-type: none"> <li>1. Any delay in the purchase or sale of shares due to illiquidity in the market, settlement and realisation of sales proceeds, delay in credit of securities or in receipt and consequent reinvestment of dividends, etc.</li> <li>2. The index reflects the prices of securities at a point in time, which is the price at close of business day on National Stock Exchange of India Limited (NSE) and stock exchanges in the USA. The scheme, however, may trade the securities at different points in time during the trading session and therefore the prices at which the scheme trades may not be identical to the closing price of each scrip on that day on the NSE or stock exchanges in the USA. In addition, the scheme may opt to trade the same securities on different exchanges due to price or liquidity factors, which may also result in traded prices being at variance from NSE closing prices.</li> <li>3. The potential of trades to fail may result in the scheme not having acquired the security at the price necessary to mirror the index.</li> <li>4. Transaction and other expenses, such as but not limited to brokerage, custody, trustee and investment management fees.</li> <li>5. Being an open-ended scheme, the scheme may hold appropriate levels of cash or cash equivalents to meet on going redemptions.</li> <li>6. The scheme may not be able to acquire or sell the desired number of securities due to conditions prevailing in the securities market, such as, but not restricted to circuit filters in the securities, liquidity and volatility in security prices.</li> </ol> <ul style="list-style-type: none"> <li>• Due to the reasons mentioned above and other reasons that may arise, it is expected that the scheme may have a tracking error not to exceed by of 2% per annum from its Benchmarks.</li> <li>• However, it needs to be clearly understood that this is just an indicative range and that the actual tracking error can be higher or lower than the range given.</li> <li>• In the event the MSCI India Domestic &amp; World Healthcare 45 is dissolved or is withdrawn by MSCI or is not published due to any reason whatsoever, the Trustee reserves the right to modify the scheme so as to track a different and suitable index or to suspend tracking the MSCI till such time it is dissolved/withdrawn or not published and appropriate intimation will be sent to the Unit holders of the scheme. In such a case, the investment pattern will be modified suitably to match the composition of the securities that are included in the new index to be tracked and the scheme will be subject to</li> </ul>

	<p>tracking errors during the intervening period.</p> <p><b>5. Risk factors associated with Derivatives</b></p> <p>Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the Fund Manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies.</p> <p>The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments.</p> <p>Trading in derivatives has the following risks:</p> <ol style="list-style-type: none"> <li>An exposure to derivatives in excess of the hedging requirements can lead to losses.</li> <li>An exposure to derivatives, when used for hedging purpose, can also limit the profits from a genuine investment transaction.</li> <li>Derivatives carry the risk of adverse changes in the market price.</li> <li>Illiquidity Risk i.e. risk that a derivative trade may not be executed or reversed quickly enough at a fair price, due to lack of liquidity in the market.</li> </ol> <p>The Fund may use derivatives instruments like equity futures &amp; options, or other derivative instruments as permitted under the Regulations and Guidelines. Usage of derivatives will expose the Scheme to liquidity risk, open position risk, and opportunities risk etc. Such risks include the risk of mispricing or improper valuation and the inability of derivatives to correlate perfectly with underlying assets, rates and indices. In case of the derivative strategies, it may not be possible to square off the cash position against the corresponding derivative position at the exact closing price available in the Value Weighted Average Period. Debt derivatives instruments like interest rate swaps, forward rate agreements or other derivative instruments also involve certain risks. For details, please refer SAI.</p> <p><b>6. Risks Associated with exposure in Tri-party Repo</b></p> <p>Risk of exposure in the Tri-party Repo settlement Segment provided by CCIL emanates mainly on two counts –</p> <ol style="list-style-type: none"> <li>Risk of failure by a lender to meet its obligations to make funds available or by a borrower to accept funds by providing adequate security at the settlement of the original trade of lending and borrowing under Tri-party Repo transaction.</li> <li>Risk of default by a borrower in repayment.</li> </ol> <p><b>7. Risk Associated with Repo transactions in Corporate Debt</b></p> <ul style="list-style-type: none"> <li><b>Lending transactions:</b> The scheme may be exposed to counter party risk in case of repo lending transactions in the event of the counterparty failing to honour the repurchase agreement. However, in repo lending transactions, the</li> </ul>
--	---

	<p>collateral may be sold and a loss is realized only if the sale price is less than the repo amount. The risk may be further mitigated through over-collateralization (the value of the collateral being more than the repo amount). Further, the liquidation of underlying securities in case of counterparty default would depend on liquidity of the securities and market conditions at that time. It is endeavoured to mitigate the risk by following an appropriate counterparty selection process, which include their credit profile evaluation and over-collateralization to cushion the impact of market risk on sale of underlying security.</p> <ul style="list-style-type: none"> <li>• <b>Borrowing transactions:</b> In the event of the scheme being unable to pay back the money to the counterparty as contracted, the counter party may dispose of the assets (as they have sufficient margin). This risk is normally mitigated by better cash flow planning to take care of such repayments. Further, there is also a Credit Risk that the Counterparty may fail to return the security or Interest received on due date. It is endeavoured to mitigate the risk by following an appropriate counterparty selection process, which include their credit profile evaluation.</li> </ul> <p><b>8. Risks Associated with segregated portfolio</b></p> <ol style="list-style-type: none"> <li>1) Unit holder holding units of Segregated Portfolio may not able to liquidate their holdings till the recovery of money from the issuer.</li> <li>2) Portfolio comprising of Segregated Portfolio may not realise any value or may have to be written down.</li> <li>3) Listing of units of Segregated Portfolio in recognised stock exchange does not necessarily guarantee their liquidity. There may not be active trading of units in the stock market. Further trading price of units on the stock market may be significantly lower than the prevailing NAV.</li> </ol> <p>For further details please refer SAI.</p>
<b>Plans, Options and Facilities</b>	<p>The Scheme will offer two Plans:</p> <ol style="list-style-type: none"> <li>1. Regular Plan; and</li> <li>2. ## XVII. FATCA DETAILS:

The Foreign Account Tax Compliance Act is a United States (US) federal law, aimed at prevention of tax evasion by US Citizens and Residents ("US Persons") through use of offshore accounts. The FATCA provisions were included in the HIRE Act enacted by the US legislature. FATCA is designed to increase compliance by US taxpayers and is intended to bolster efforts to prevent tax evasion by the US taxpayers with offshore investments.

As per SEBI circular no. CIR/MIRSD/2/2014 dated June 30, 2014, the Government of India and the US have reached an agreement in substance on the terms of an Inter-Governmental Agreement ("IGA") to implement the FATCA provisions, which have become globally applicable from July 1, 2014. FATCA requires enhancement of due diligence processes by the Foreign Financial Institutions ("FFI") so as to enable identification of US reportable accounts.

The Fund/ Edelweiss Asset Management Limited ("the AMC") are likely to be classified as a FFI under the FATCA provisions, in which case the Fund /the AMC would be required, from time to time, to (i) undertake necessary due diligence process by collecting information/ documentary evidence of the US/non US status of the investors; (ii) disclose/report information as far as may be legally permitted about the holdings/investment returns pertaining to reportable accounts to the US Internal Revenue Service and/or such Indian authorities as may be specified under FATCA or other applicable laws and (iii) carry out such other activities as prescribed under the FATCA provisions, as amended from time to time.

FATCA due diligence will have to be directed at each investor/unit holder (including joint investors) and on being identified as a reportable person/specified US person, all the folios will be reported. Further, in case of folio with joint investors, the entire account value of investment portfolio will be attributable under each such reportable person. Investors/Unit holders would therefore be required to furnish such information to the Fund/AMC, from time to time, in order to comply with the reporting requirements stated in the IGA and/or circulars/guidelines issued by SEBI/AMFI in this regard.

The impact of FATCA is relevant not only at the point of on-boarding of the investors but also throughout the life cycle of the investor account / folio with the Fund. Hence investor(s) should immediately intimate the Fund/AMC, in case of any change in the FATCA related information provided by them at the time of initial subscription.

The Fund/AMC reserves the right to reject any application or compulsorily redeem the units held directly or beneficially in case the applicant/investor fails to furnish the relevant information and/or documentation or is found to be holding units in contravention of the FATCA provisions.

Investors are advised to consult their tax advisors to understand the FATCA requirements and its implications in relation to their investment.
