by SEBI from time to time). The exposure of the scheme in equity derivative instruments shall be up to 20% (for non-hedging) of the equity portfolio of the

scheme.

Due to market conditions, the AMC may invest beyond the range set out in the asset allocation. Such deviations shall normally be for short term and defensive considerations as per Paragraph 1.14.1.2 of SEBI Master Circular dated June 27, 2024, and the fund manager will rebalance the portfolio within 7 calendar days from the date of deviation.

Portfolio concentration norms:

Pursuant to paragraph 3.4 of the Master Circular for Mutual Funds dated June 27, 2024 the index shall comply with the following:

- a) The index shall have a minimum of 10 stocks as its constituents.
- b) No single stock shall have more than 35% weight in the index, as the index is thematic index, and the Scheme is Thematic Index Scheme. For other than sectoral/ thematic indices, no single stock shall have more than 25% weight in the index
- c) The weightage of the top three constituents of the index, cumulatively shall not be more than 65% of the Index.
- d) The individual constituent of the index shall have a trading frequency greater than or equal to 80% and an average impact cost of 1% or less over previous six months.

Change In Investment Pattern:

The Scheme, out of the funds allocated shall invest in securities covered by BSE Internet Economy index and shall invest in money market instruments, cash & cash equivalents and/or units of liquid schemes only to the extent necessary to meet the liquidity requirements for honoring repurchase / redemptions / expenses. In view of the nature of the Scheme, the asset allocation pattern as indicated above may not change, except in line with the changes made in SEBI (MF) Regulations, from time to time.

Subject to the above, any change in the asset allocation affecting the investment profile of the Scheme shall be affected only in accordance with the provisions of sub regulation (15A) of Regulation 18 of the Regulations, as detailed later in this document.

Portfolio Rebalancing:

In accordance with Clause 3.5.3.11 and 3.6.7 of the Master Circular for Mutual Funds dated June 27, 2024, in case of change in constituents of the index due to periodic review, the portfolio will be rebalanced within 7 calendar days. Any transactions undertaken in the scheme portfolio in order to meet the redemption and subscription obligations shall be done while ensuring that post. such transactions replication of the portfolio with the index is maintained at all points of time.

Timelines for deployment of funds collected in NFO:

In line with SEBI circular no. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2025/23 dated February 27, 2025, funds collected in new fund offer shall be deployed in the following manner:

Investment Strategy	 The AMC shall deploy the funds garnered in an NFO within 30 business days from the date of allotment of units. In an exceptional case, if the AMC is not able to deploy the funds in 30 business days, reasons in writing, including details of efforts taken to deploy the funds, shall be placed before the Investment Committee of the AMC. The Investment Committee may extend the timeline by 30 business days, while also making recommendations on how to ensure deployment within 30 business days going forward and monitoring the same. The Investment Committee shall examine the root cause for delay in deployment before granting approval for part or full extension. The Investment Committee shall not ordinarily give part or full extension where the assets for any scheme are liquid and readily available. In case the funds are not deployed as per the asset allocation mentioned in the SID as per the aforesaid mandated plus extended timelines, AMC shall: (i) not be permitted to receive fresh flows in the same scheme till the time the funds are deployed as per the asset allocation mentioned in the SID. (ii) not be permitted to levy exit load, if any, on the investors exiting such scheme(s) after 60 business days of not complying with the asset allocation of the scheme. (ii) report deviation, if any, to Trustees at each of the above stages. To achieve the investment strategy would involve reducing the tracking error to the least possible through rebalancing of the portfolio, considering the change in weights of stocks in the index as well as the incremental collections/redemptions from the Scheme. A small portion of the net assets will be held as cash or will be invested in debt and money market instruments permitted by SEBI/RBI including TREPS or in alternative investment for the TREPS as may be provided by the RBI to meet the liquidity requirements under the
Risk Profile of the Scheme	
	 Mutual Fund Units involve investment risks including the possible loss of principal. Please read the SID carefully for details on risk factors before investment. Scheme specific Risk Factors are summarized below: 1. Risk Factors Associated with Equity & Equity related instruments
	The value of the Scheme's investments may be affected generally by factors affecting securities markets, such as price and volume volatility in the capital markets, etc. Settlement periods and transfer procedures may restrict the liquidity of the investments made by the Scheme.
	• Market Risk: Changes in economic conditions, such as recessions or booms,

can impact stock prices. Equities can experience significant price fluctuations and volatility in the short term due to market conditions, economic events, or investor sentiment. Broader events like financial crises or natural disasters can also affect equity markets
• Company-Specific Risk: Factors related to a company's operations, management decisions, or competitive position can affect stock performance. Companies with high levels of debt or poor financial health may face difficulties that can impact their stock value. Unexpected events such as management changes, regulatory fines, or product recalls can impact stock prices.
• Liquidity Risk: Stocks with low trading volumes can be harder to buy or sell without affecting the stock price significantly. In times of market stress, liquidity can dry up, making it harder to execute trades at desired prices.
• Political and Regulatory Risk: Changes in government policies, regulations, or taxation can impact corporate profits and stock values. Political instability, conflicts, or trade disputes can affect global markets and individual stocks.
• Currency Risk: Fluctuations in exchange rates can affect the value of investments in foreign equities or equity-related instruments.
• Behavioural Risk : Market prices can be influenced by investor behavior, including irrational exuberance or panic selling, which can lead to significant price swings.
 Sector-Specific Risk: Specific sectors may face unique risks, such as technological changes in tech or regulatory issues in healthcare, which can impact stocks within those sectors. Risk factors associated with investing in Money Market Instruments:
Edelweiss BSE Internet Economy Index Fund will invest not less than 95% of its corpus in the securities representing the BSE Internet Economy Index as this Scheme endeavors to earn returns that correspond to the total returns represented by the BSE Internet Economy Index. The Scheme will have insignificant cash or debt/money market investments. Therefore, the scheme is not significantly susceptible to risks associated with debt/money markets. Risks associated with debt/money market instruments are as under:
• Interest rate Risk: Price of a fixed income instrument generally falls when the interest rates move up and vice- versa. The extent of fall or rise in the prices depends upon the coupon and maturity of the security. It also depends upon the yield level at which the security is being traded.
• Spread Risk: In a floating rate security the coupon is expressed in terms of a spread or mark up over the benchmark rate. In the life of the security this spread may move adversely leading to loss in value of the portfolio. The yield of the underlying benchmark might not change, but the spread of the security over the underlying benchmark might increase leading to loss in value of the security.

• Credit risk or default Risk: Credit risk is the risk that the issuer of a debenture/ bond or a money market instrument may default on interest and/or principal payment obligations. Even when there is no default, the price of a security may change with expected changes in the credit rating of the issuer. It is to be noted here that a Government Security is a sovereign security and is the safest. Corporate bonds carry a higher amount of credit risk than Government Securities. Within corporate bonds also there are different levels of safety and a bond rated higher by a particular rating agency is safer than a bond rated lower by the same rating agency.
• Liquidity & Settlement Risk: The liquidity of a fixed income security may change, depending on market conditions leading to changes in the liquidity premium attached to the price of such securities. At the time of selling the security, the security can become illiquid, leading to loss in value of the portfolio. Different segments of the financial markets have different settlement cycle/periods and such settlement cycle/periods may be impacted by unforeseen circumstances, leading to Settlement Risk. This can adversely affect the ability of the Fund to swiftly execute trading strategies which can lead to adverse movements in NAV.
• Reinvestment Risk: Interest rates may vary from time to time. The rate at which intermediate cash flows are reinvested may differ from the original interest rates on the security, which can affect the total earnings from the security.
• Prepayment Risk: The Scheme may receive payment of monthly cashflows earlier than scheduled, which may result in reinvestment risk.
• Market Risk: Lower rated or unrated securities are more likely to react to developments affecting the market as they tend to be more sensitive to changes in economic conditions than higher rated securities
3. Risk Factors associated with the Scheme:
 a. Thematic fund Heavy reliance on a single sector means that poor performance in that area can lead to substantial losses. If the sector faces challenges, the entire investment can suffer.
 Sectors can experience significant fluctuations due to economic cycles, regulatory changes, or market trends. This volatility can lead to dramatic swings in investment value. Also, some sectors may be more sensitive to economic conditions.
• Changes in government policies or regulations can disproportionately affect specific sectors.
• Investor sentiment can heavily influence sector performance. Any decline in demand for products or services can lead to decreased revenues.
b. Passive Investments:
As the scheme proposes to invest not less than 95% of the net assets in the

securities of the benchmark Index, the Scheme will not be actively managed. The Scheme may be affected by a general decline in the Indian markets relating to its Underlying Index. The Scheme invests in the securities included in its underlying index regardless of their investment merit. The AMC does not attempt to individually select stocks or to take defensive positions in declining markets. The Scheme's performance is directly tied to the Underlying Index. If the Underlying Index is dissolved, withdrawn, or not published for any reason, the Trustee may change the Scheme to track a different, suitable index or temporarily halt tracking the Underlying Index until it becomes available again. Unit holders will be notified of any such changes. During this transition, the investment strategy will be adjusted to reflect the new index, which may result in tracking errors.

c. Tracking Error and Tracking Difference Risk:

Tracking Error and Tracking difference is to measure divergence of the performance (return) of the Fund's portfolio from that of the Underlying Index. Tracking error / Tracking difference are inherent in any index fund and such errors may cause the schemes to generate returns which are not in line with the performance of the BSE Internet Economy Index or one or more securities covered by / included in the BSE Internet Economy Index. That said, the risk parameters of the portfolio of the Scheme and underlying index would be similar. Tracking Error / Tracking Difference may arise from a variety of factors including but not limited to:

- 1. Any delay in the purchase or sale of shares due to illiquidity in the market, settlement and realisation of sales proceeds, delay in credit of securities or in receipt and consequent reinvestment of dividends, etc.
- 2. The index reflects the prices of securities at a point in time, which is the price at close of business day on National Stock Exchange of India Limited (NSE). The scheme, however, may trade the securities at different points in time during the trading session and therefore the prices at which the scheme trades may not be identical to the closing price of each scrip on that day on the NSE. In addition, the scheme may opt to trade the same securities on different exchanges due to price or liquidity factors, which may also result in traded prices being at variance from NSE closing prices.
- 3. The potential of trades to fail may result in the scheme not having acquired the security at the price necessary to mirror the index.
- 4. Transaction and other expenses, such as but not limited to brokerage, custody, trustee and investment management fees.
- 5. Being an open-ended scheme, the scheme may hold appropriate levels of cash or cash equivalents o meet on going redemptions.
- 6. The scheme may not be able to acquire or sell the desired number of securities due to conditions prevailing in the securities market, such as, but not restricted to circuit filters in the securities, liquidity and volatility in security prices.
- 7. Due to the reasons mentioned above and other reasons that may arise, it is expected that the scheme may have a tracking error not to exceed by of 2% per annum from its Benchmarks.
- 8. However, it needs to be clearly understood that his is just an indicative range and that the actual tracking error can be higher or lower than the range given.

d. Operational risks:
1. There are risks associated with the day-to-day management of the fund,
including errors in trading or valuation like safekeeping of ETF assets, cash
reporting and deployment etc
2. Risk associated with the index provider's accuracy in maintaining and
calculating the index. Errors or changes in the index methodology can impact
Fund performance. Failure to update the same while rebalancing may also
impact the performance and tracking error
3. Frequently rebalancing of the Fund's holdings to match the index, which can
lead to transaction costs and potential market impact.
4. Risk factors associated with Derivatives:
Derivative products are leveraged instruments and can provide disproportionate
gains as well as disproportionate losses to the investor. Execution of such strategies
depends upon the ability of the Fund Manager to identify such opportunities.
Identification and execution of the strategies to be pursued by the fund manager
involve uncertainty and decision of fund manager may not always be profitable. No
assurance can be given that the fund manager will be able to identify or execute $% \left({{{\mathbf{x}}_{i}}} \right)$
such strategies.
The ricks accorded with the use of derivatives are different from or nessibly
The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other
traditional investments.
The Fund may use derivatives instruments like equity futures & options, or other
derivative instruments as permitted under the Regulations and Guidelines. The
scheme will be using non-hedging strategy.
 Common risk associated with Trading in derivatives: Exposure risk: An exposure to derivatives can lead to losses. Derivatives carry
the risk of adverse changes in the market price.
 Illiquidity Risk i.e. risk that a derivative trade may not be executed or reversed
quickly enough at a fair price, due to lack of liquidity in the market.
 Execution Risk - The prices which are seen on the screen need not be the same
at which execution will take place.
• Mark to Market Risk - There could be a market to market loss that would arise
and additional margin may need to be provided for the same.
Basis Risk - In extraordinary circumstances, the Fund Manager may have to
unwind positions before the expiry at a basis which may be higher than the
initiation basis to meet redemptions. Premature unwinding of the position
might result in the locked-in profits not getting realized.
 Tracking Error Risk - Corporate actions such as demergers might result in the weights of the index stocks to change. This might lead to a tracking error
affecting the returns to a certain extent.
5. Risks Associated with exposure in Tri-party Repo
Risk of exposure in the Tri-party Repo settlement Segment provided by \ensuremath{CCIL}
emanates mainly on two counts –
a. Risk of failure by a lender to meet its obligations to make funds available or by

	a borrower to accept funds by providing adequate security at the settlement
	of the original trade of lending and borrowing under Triparty Repo transaction.b. Risk of default by a borrower in repayment.
	 Risks Associated with segregated portfolio Unit holder holding units of Segregated Portfolio may not able to liquidate their holdings till the recovery of money from the issuer. Portfolio comprising of Segregated Portfolio may not realise any value or may have to be written down. Listing of units of Segregated Portfolio in recognised stock exchange does not necessarily guarantee their liquidity. There may not be active trading of units in the stock market. Further trading price of units on the stock market may be significantly lower than the prevailing NAV.
	7. Risks associated with Securities Lending: It may be noted that this activity would have the inherent probability of collateral value drastically falling in times of strong downward market trends, rendering the value of collateral inadequate until such time as that diminution in value is replenished by additional security. It is also possible that the borrowing party and/or the approved intermediary may suddenly suffer severe business setback and become unable to honor its commitments. This, along with a simultaneous fall in value of collateral would render potential loss to the Scheme. Besides, there is also be temporary illiquidity of the securities that are lent out and the scheme will not be able to sell such lent out securities until they are returned.
	As with other modes of extensions of credit, there are risks inherent to securities lending, including the risk of failure of the other party, in this case the approved intermediary, to comply with the terms of the agreement entered into between the lender of securities i.e. the scheme and the approved intermediary. Such failure can result in the possible loss of rights to the collateral put up by the borrower of the securities, the inability of the approved intermediary to return the securities deposited by the lender and the possible loss of any corporate benefits accruing to the lender from the securities deposited with the approved intermediary.
Plans/Options	The Scheme will offer two Plans: 1. Regular Plan; and 2. Direct Plan The Direct Plan will be offered only for investors who purchase /subscribe Units of the Scheme directly with the Fund and will not be available for investors who route their investments through a Distributor. In case neither Distributor's Code nor "Direct" is indicated in the application form, the same will be treated as "Direct

that quantum of IDCW and record date shall be fixed by the Board of Trustees and AMC shall issue a notice to the public communicating the decision about IDCW including the record date, within one calendar day of the decision made by the Board of Trustees in their meeting. Record date shall be the date that will be considered for the purpose of determining the eligibility of investors whose name appears on the register of Unit holders. Record date shall be five calendar days from the issue of

notice. The Trusteeship Company reserves the right to declare IDCW on a regular basis. The Fund does not guarantee or assure declaration or payment of IDCW. Although the Trustees have intention to declare IDCW under IDCW Option, such declaration of IDCW if any, is subject to Scheme's performance & the availability & adequacy of distributable surplus in the Scheme at the time of declaration of such IDCW.

Investors should note that, when the Mutual Fund declares a IDCW under the Scheme, the dividend payments shall be dispatched within 15 days of the record date. The requirement of giving notice & the above laid procedure shall not be compulsory for Scheme/plan/option having frequency of IDCW distribution from daily upto monthly IDCW.

Further, investors are requested to note that the amounts can be distributed out of the investors capital (Equilization Reserve), which is part of sales price that represents realized gains.

• Effect of IDCWs:

When IDCWs are declared and paid under the Scheme, the net assets attributable to Unit holders in the IDCW Option will stand reduced by the IDCW amount subject to TDS and statutory levy if any. The NAV of the Unit holders in the Growth Option will remain unaffected by the payment of IDCW. Even though the asset portfolio will be un-segregated, the NAVs of the Growth Option and IDCW Option will be distinctly different after declaration of the first IDCW to the extent of distributed income, tax and statutory levy paid thereon, where applicable, and expenses relating to the distribution of IDCWs.

• Mode of Payment of IDCWs:

The Scheme proposes to pay IDCW by Direct Credit or through RTGS or NEFT or any other EFT means. RBI offers the facility of EFT for facilitating better customer service by direct credit of IDCW amount to a Unit holder's bank account through electronic credit which avoids loss of IDCW in transit or fraudulent encashment. The Mutual Fund will endeavour to offer this facility for payment of IDCW/repurchase proceeds to the Unit holders residing in any of the cities where such a Bank facility is available.

The Fund is arranging with selected bankers to enable direct credits into the bank accounts of the investors at these banks. If an investor has an account with a bank with which the Fund will tie up for direct credit, the IDCW amount will be credited directly to the bank account, under intimation to the Unit holder by email/SMS/post. The Mutual Fund, on a best effort basis, and after scrutinising the

	names of the banks where Unit holders have their accounts, will enable direct credit/RTGS/NEFT/ to the Unit holders' bank accounts.
	While the preferred mode of payment is through EFT route, the AMC is at the sole discretion to pay IDCW by any other means (including at par cheques and demand drafts, where the EFT facility is not available in a particular city or Bank or as the Trusteeship Company or the AMC deems fit in the interest of investors.)
	All the IDCW payments shall be in accordance and compliance with SEBI Regulations, as amended from time to time.
	 If Unit holders have opted for IDCW Payout Option, if the IDCW amount payable to such Unit holders (net of tax deducted at source, wherever applicable) is less than or equal to Rs. 100, following treatment shall be: a. Where the option to pay out IDCW is available in electronic mode: The IDCW shall be paid to the Unit holders. However, if the payment through electronic mode is unsuccessful, the AMC shall issue dividend warrant for such amount; and b. Where the option to payout IDCW is not available in electronic mode: The IDCW shall be mandatorily reinvested in the respective Scheme/Plan by issuing additional Units at the applicable ex-dividend NAV.
