# RISK PROFILE OF THE SCHEME

Apart from the risk factors mentioned in SAI, following are some of the additional risk factors which investors are advised to go through before investing:

#### a) STANDARD RISK FACTORS:

- Investment in Mutual Fund Units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal.
- As the price / value / interest rates of the securities in which the Scheme invests fluctuates, the value of your investment in the Scheme may go up or down
- Past performance of the Sponsor/AMC/Mutual Fund does not guarantee future performance of the Scheme.
- Edelweiss CRISIL IBX 50:50 Gilt Plus SDL Short Duration Index Fund is only the name
  of the Scheme & it does not in any manner indicate either the quality of the Scheme
  or its future prospects and returns.
- The sponsor is not responsible or liable for any loss resulting from the operation of the Scheme beyond the initial contribution of Rs.1,00,000 made by it towards setting up the Fund.
- The Scheme is not a guaranteed or assured return Scheme.

#### • Risks Associated with investing in Government Bonds

Investment in Government securities like all other debt instruments is subject to price and interest rate risk. Generally, when interest rates rise, prices of fixed income securities fall and when interest rates drop, the prices increase. The extent of fall or rise in prices is a function of the existing coupon, days to maturity and the increase or decrease in interest rates. Price-risk is not unique to Government securities but is true for all fixed income securities. Despite a high degree of liquidity in comparison with other debt instruments on occasions, there could be difficulties in transacting in the market due to extreme volatility or unusual constriction in market volumes or on occasions when an unusually large transaction has to be put through.

#### Risks associated with investing in State Development Loans (SDLs)

Market Liquidity risk with fixed rate SDL, even though the SDL market is relatively liquid when compared to other corporate bond instruments, on certain occasions, there could be difficulties in transacting in the market due to extreme volatility leading to constriction in market volumes. Also, the liquidity of the Scheme may suffer in case the relevant guidelines issued by state governments undergo any adverse changes. Interest Rate risk associated with SDL - while SDL generally carry relatively minimal credit risk since they are issued by the respective State

Governments, they do carry price risk depending upon the general level of interest rates prevailing from time to time. Generally, when interest rates rise, prices of fixed income securities fall and when interest rates decline, the prices of fixed income securities increase. The extent of fall or rise in the prices is a function of the coupon rate, days to maturity and the increase or decrease in the level of interest rates. The price-risk is, however, not unique to SDL, it exists for all fixed income securities. Therefore, their prices tend to be influenced more by movement in interest rates in the financial system than by changes in the government's credit rating. By contrast, in the case of corporate or institutional fixed income Securities, such as bonds or debentures, prices are influenced by their respective credit standing as well.

#### Risks Associated with investing in Money Market Instruments

- Interest rate Risk: Price of a fixed income instrument generally falls when the interest rates move up and vice- versa. The extent of fall or rise in the prices depends upon the coupon and maturity of the security. It also depends upon the yield level at which the security is being traded. The NAV of the Scheme is expected to increase from a fall in interest rates while it would be adversely affected by an increase in the level of interest rates.
- Spread Risk: In a floating rate security the coupon is expressed in terms of a spread
  or mark up over the benchmark rate. In the life of the security this spread may
  move adversely leading to loss in value of the portfolio. The yield of the underlying
  benchmark might not change, but the spread of the security over the underlying
  benchmark might increase leading to loss in value of the security.
- Credit risk or default Risk: Credit risk is the risk that the issuer of a debenture/ bond or a money market instrument may default on interest and/or principal payment obligations. Even when there is no default, the price of a security may change with expected changes in the credit rating of the issuer. It is to be noted here that a Government Security is a sovereign security and is the safest.
- Liquidity & Settlement Risk: The liquidity of a fixed income security may change, depending on market conditions leading to changes in the liquidity premium attached to the price of such securities. At the time of selling the security, the security can become illiquid, leading to loss in value of the portfolio. Different segments of the financial markets have different settlement cycle/periods and such settlement cycle/periods may be impacted by unforeseen circumstances, leading to Settlement Risk. This can adversely affect the ability of the Fund to swiftly execute trading strategies which can lead to adverse movements in NAV.
- Reinvestment Risk: Interest rates may vary from time to time. The rate at which
  intermediate cash flows are reinvested may differ from the original interest rates
  on the security, which can affect the total earnings from the security.
- **Performance Risk:** Performance of the Scheme may be impacted with changes in factors, which affect the capital market and in particular the debt market.
- **Prepayment Risk:** The Scheme may receive payment of monthly cashflows earlier than scheduled, which may result in reinvestment risk.

- Market Risk: Lower rated or unrated securities are more likely to react to developments affecting the market as they tend to be more sensitive to changes in economic conditions than higher rated securities
- Concentration Risk: The Scheme Portfolio may invest across sectors subject to SEBI
  prescribed limits applicable from time to time in line with Scheme objective,
  Investment strategy and applicable regulations.

#### Risk Factors associated with Scheme:

#### a. Passive Investments:

As the scheme proposes to invest not less than 95% of the net assets in the securities of the benchmark Index, the Scheme will not be actively managed. The Scheme may be affected by a general decline in the Indian markets relating to its Underlying Index. The Scheme invests in the securities included in its underlying index regardless of their investment merit. The AMC does not attempt to individually select securities or to take defensive positions in declining markets.

#### b. <u>Tracking Error / Tracking difference Risk:</u>

Tracking Error and Tracking difference is divergence of the performance (return) of the Fund's portfolio from that of the Underlying Index. Based on the availability of issuances by the State and Central Government, , it is expected that the Portfolio allocation could be different than that of underlying index allocation and could result in Tracking Error / Tracking difference. That said, the risk parameters of the portfolio of the Scheme and underlying index could be similar.

The Fund will endeavor to keep the tracking error as low as possible. Under normal circumstances, such tracking error is expected to be below 2% per annum and the annualized tracking difference averaged over one year period shall not exceed 1.25% Tracking error / tracking difference could be the result of a variety of factors including but not limited to:

- Due to investment in out of index investments
- Due to mismatch in the weight of the issuers forming part of the Index and the Scheme.
- Change in asset allocation between the Index and the Scheme in the last year of the Scheme.
- Difference in valuation of underlying bonds by the Index Provider and AMC's valuation providers.

#### c. Trade Execution Risk on RFQ Platforms:

Current SEBI regulations mandates Mutual Funds to execute certain % of their monthly trading volume in corporate bonds and commercial papers on RFQ platforms. RFQ platforms are peer-to-peer platforms and are still in development stage. Therefore, they have lower level of secondary market liquidity. Mandatory execution of trades on RFQ among MFs may hamper trade execution efficiency during periods of heavy outflows.

#### 1. Risks Associated with exposure in Tri-party Repo

Risk of exposure in the Tri-party Repo settlement Segment provided by CCIL emanates mainly on two counts —

- Risk of failure by a lender to meet its obligations to make funds available or by a borrower to accept funds by providing adequate security at the settlement of the original trade of lending and borrowing under Tri-party Repo transaction.
- 2) Risk of default by a borrower in repayment.

#### 2. Risks Associated with segregated portfolio

- 1) Unit holder holding units of Segregated Portfolio may not able to liquidate their holdings till the recovery of money from the issuer.
- 2) Portfolio comprising of Segregated Portfolio may not realise any value or may have to be written down.
- 3) Listing of units of Segregated Portfolio in recognised stock exchange does not necessarily guarantee their liquidity. There may not be active trading of units in the stock market. Further trading price of units on the stock market may be significantly lower than the prevailing NAV.

#### FATCA DETAILS:

The Foreign Account Tax Compliance Act is a United States (US) federal law, aimed at prevention of tax evasion by US Citizens and Residents ("US Persons") through use of offshore accounts. The FATCA provisions were included in the HIRE Act enacted by the US legislature. FATCA is designed to increase compliance by US taxpayers and is intended to

bolster efforts to prevent tax evasion by the US taxpayers with offshore investments.
As per SEBI circular no. CIR/MIRSD/2/2014 dated June 30, 2014, the Government of India and the US have reached an agreement in substance on the terms of an Inter-Governmental Agreement ("IGA") to implement the FATCA provisions, which have become globally applicable from July 1, 2014. FATCA requires enhancement of due diligence processes by the Foreign Financial Institutions ("FFI") so as to enable identification of US reportable accounts.

The Fund/Edelweiss Asset Management Limited ("the AMC") are likely to be classified as a FFI under the FATCA provisions, in which case the Fund /the AMC would be required, from time to time, to (i) undertake necessary due diligence process by collecting information/ documentary evidence of the US/non US status of the investors; (ii) disclose/report information as far as may be legally permitted about the holdings/investment returns pertaining to reportable accounts to the US Internal Revenue Service and/or such Indian authorities as may be specified under FATCA or other applicable laws and (iii) carry out such other activities as prescribed under the FATCA provisions, as amended from time to time.

FATCA due diligence will have to be directed at each investor/unit holder (including joint investors) and on being identified as a reportable person/specified US person, all the folios will be reported. Further, in case of folio with joint investors, the entire account value of investment portfolio will be attributable under each such reportable person. Investors/Unit holders would therefore be required to furnish such information to the Fund/AMC, from time to time, in order to comply with the reporting requirements stated in the IGA and or circulars/guidelines issued by SEBI/AMFI in this regard.

The impact of FATCA is relevant not only at the point of on-boarding of the investors but also throughout the life cycle of the investor account / folio with the Fund Hence investor(s) should immediately intimate the Fund/AMC, in case of any change in the FATCA related information provided by them at the time of initial subscription.

The Fund/AMC reserves the right to reject any application or compulsorily redeem the

units held directly or beneficially in case the applicant/investor fails to furnish the relevant information and/or documentation or is found to be holding units in contravention of the FATCA provisions.

Investors are advised to consult their tax advisors to understand the FATCA requirements and its implications in relation to their investment.
