RISK PROFILE OF THE SCHEME

Apart from the risk factors mentioned in SAI, following are some of the additional risk factors which investors are advised to go through before investing:

a) STANDARD RISK FACTORS:

Investment in Mutual Fund Units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal.

- * As the price / value / interest rates of the securities in which the Scheme invests fluctuates, the value of your investment in the Scheme may go up or down
- * Past performance of the Sponsor/AMC/Mutual Fund does not guarantee future performance of the Scheme.
- * Edelweiss CRISIL IBX 50:50 Gilt Plus SDL April 2037 Index Fund is only the name of the Scheme & it does not in any manner indicate either the quality of the Scheme or its future prospects and returns.
- * The sponsor is not responsible or liable for any loss resulting from the operation of the Scheme beyond the initial contribution of Rs.1,00,000 made by it towards setting up the Fund.
- * The Scheme is not a guaranteed or assured return Scheme.

1. Risks Associated with investing in Government Bonds

Investment in Government securities like all other debt instruments is subject to price and interest rate risk. Generally, when interest rates rise, prices of fixed income securities fall and when interest rates drop, the prices increase. The extent of fall or rise in prices is a function of the existing coupon, days to maturity and the increase or decrease in interest rates. Price-risk is not unique to Government securities but is true for all fixed income securities. Despite a high degree of liquidity in comparison with other debt instruments on occasions, there could be difficulties in transacting in the market due to extreme volatility or unusual constriction in market volumes or on occasions when an unusually large transaction has to be put through.

2. Risks associated with investing in State Development Loans (SDLs)

Market Liquidity risk with fixed rate SDL, even though the SDL market is relatively liquid when compared to other corporate bond instruments, on certain occasions, there could be difficulties in transacting in the market due to extreme volatility leading to constriction in market volumes. Also, the liquidity of the Scheme may suffer in case the relevant guidelines issued by state governments undergo any adverse changes. Interest Rate risk associated with SDL - while SDL generally carry relatively minimal credit risk since they are issued by the respective State Governments, they do carry price risk depending upon the general level of interest rates prevailing from time to time. Generally, when interest rates rise, prices of fixed income securities fall and when interest rates decline, the prices of fixed income securities increase. The extent of fall or rise in the prices is a function of the coupon rate, days to maturity and the increase or decrease in the level of interest rates. The price-risk is, however, not unique to SDL, it exists for all

fixed income securities. Therefore, their prices tend to be influenced more by movement in interest rates in the financial system than by changes in the government's credit rating. By contrast, in the case of corporate or institutional fixed income Securities, such as bonds or debentures, prices are influenced by their respective credit standing as well.

3. Risks Associated with investing in Money Market Instruments

- Interest rate Risk: Price of a fixed income instrument generally falls when
 the interest rates move up and vice- versa. The extent of fall or rise in the
 prices depends upon the coupon and maturity of the security. It also
 depends upon the yield level at which the security is being traded. The NAV
 of the Scheme is expected to increase from a fall in interest rates while it
 would be adversely affected by an increase in the level of interest rates.
- Spread Risk: In a floating rate security the coupon is expressed in terms of
 a spread or mark up over the benchmark rate. In the life of the security this
 spread may move adversely leading to loss in value of the portfolio. The
 yield of the underlying benchmark might not change, but the spread of the
 security over the underlying benchmark might increase leading to loss in
 value of the security.
- Credit risk or default Risk: Credit risk is the risk that the issuer of a
 debenture/ bond or a money market instrument may default on interest
 and/or principal payment obligations. Even when there is no default, the
 price of a security may change with expected changes in the credit rating of
 the issuer. It is to be noted here that a Government Security is a sovereign
 security and is the safest.
- Liquidity & Settlement Risk: The liquidity of a fixed income security may change, depending on market conditions leading to changes in the liquidity premium attached to the price of such securities. At the time of selling the security, the security can become illiquid, leading to loss in value of the portfolio. Different segments of the financial markets have different settlement cycle/periods and such settlement cycle/periods may be impacted by unforeseen circumstances, leading to Settlement Risk. This can adversely affect the ability of the Fund to swiftly execute trading strategies which can lead to adverse movements in NAV.
- Reinvestment Risk: Interest rates may vary from time to time. The rate at
 which intermediate cash flows are reinvested may differ from the original
 interest rates on the security, which can affect the total earnings from the
 security.

- Performance Risk: Performance of the Scheme may be impacted with changes in factors, which affect the capital market and in particular the debt market.
- **Prepayment Risk:** The Scheme may receive payment of monthly cashflows earlier than scheduled, which may result in reinvestment risk.
- Market Risk: Lower rated or unrated securities are more likely to react to developments affecting the market as they tend to be more sensitive to changes in economic conditions than higher rated securities
- Concentration Risk: The Scheme Portfolio may invest across sectors subject
 to SEBI prescribed limits applicable from time to time in line with Scheme
 objective, Investment strategy and applicable regulations.

4. Risk Factors associated with Scheme:

a. Passive Investments:

As the scheme proposes to invest not less than 95% of the net assets in the securities of the benchmark Index, the Scheme will not be actively managed. The Scheme may be affected by a general decline in the Indian markets relating to its Underlying Index. The Scheme invests in the securities included in its underlying index regardless of their investment merit. The AMC does not attempt to individually select securities or to take defensive positions in declining markets.

b. Tracking Error Risk:

Tracking Error is divergence of the performance (return) of the Fund's portfolio from that of the Underlying Index. Based on the availability of issuances by the State and Central Government, , it is expected that the Portfolio allocation could be different than that of underlying index allocation and could result in Tracking Error. That said, the risk parameters of the portfolio of the Scheme and underlying index could be similar.

The Fund will endeavor to keep the tracking error as low as possible. Under normal circumstances, such tracking error is expected to be below 2% per annum.

Tracking error could be the result of a variety of factors including but not limited to:

- Due to investment in out of index investments
- Due to mismatch in the weight of the issuers forming part of the Index and the Scheme.
- Change in asset allocation between the Index and the Scheme in the last year of the Scheme.

 Difference in valuation of underlying bonds by the Index Provider and AMC's valuation providers.

c. Trade Execution Risk on RFQ Platforms:

Current SEBI regulations mandates Mutual Funds to execute certain % of their monthly trading volume in corporate bonds and commercial papers on RFQ platforms. RFQ platforms are peer-to-peer platforms and are still in development stage. Therefore, they have lower level of secondary market liquidity. Mandatory execution of trades on RFQ among MFs may hamper trade execution efficiency during periods of heavy outflows.

5. Risks Associated with exposure in Tri-party Repo

Risk of exposure in the Tri-party Repo settlement Segment provided by CCIL emanates mainly on two counts –

- Risk of failure by a lender to meet its obligations to make funds available or by a borrower to accept funds by providing adequate security at the settlement of the original trade of lending and borrowing under Tri-party Repo transaction.
- 2) Risk of default by a borrower in repayment.

6. Risks Associated with segregated portfolio

- 1) Unit holder holding units of Segregated Portfolio may not able to liquidate their holdings till the recovery of money from the issuer.
- 2) Portfolio comprising of Segregated Portfolio may not realise any value or may have to be written down.
- 3) Listing of units of Segregated Portfolio in recognised stock exchange does not necessarily guarantee their liquidity. There may not be active trading of units in the stock market. Further trading price of units on the stock market may be significantly lower than the prevailing NAV.

For further details please refer SAI.

SEBI circular dated January 24, 2013 on identification of Beneficial Ownership has prescribed a uniform approach to be followed for determination of beneficial owners. A 'Beneficial owner' is defined as a natural person/s who ultimately own, control or influence a client and/or persons on whose behalf a transaction is being conducted, which includes persons who exercise ultimate effective control over a legal person or arrangement.

All categories of investors except individuals, company listed on a stock exchange or majority owned subsidiary of such company, are requested to provide details about beneficial ownership in the Application Forms for all their investments. The Fund reserves the right to reject applications/restrict further investments or seek additional information from investors who have not provided the requisite information on beneficial ownership. In the event of change in beneficial ownership, investors are requested to immediately update the details with the Fund/Registrar.

FATCA DETAILS:

The Foreign Account Tax Compliance Act is a United States (US) federal law, aimed at prevention of tax evasion by US Citizens and Residents ("US Persons") through use of offshore accounts. The FATCA provisions were included in the HIRE Act enacted by the US legislature. FATCA is designed to increase compliance by US taxpayers and is intended to

bolster efforts to prevent tax evasion by the US taxpayers with offshore investments.
As per SEBI circular no. CIR/MIRSD/2/2014 dated June 30, 2014, the Government of India and the US have reached an agreement in substance on the terms of an Inter-Governmental Agreement ("IGA") to implement the FATCA provisions, which have become globally applicable from July 1, 2014. FATCA requires enhancement of due diligence processes by the Foreign Financial Institutions ("FFI") so as to enable identification of US reportable accounts.

The Fund/Edelweiss Asset Management Limited ("the AMC") are likely to be classified as a FFI under the FATCA provisions, in which case the Fund /the AMC would be required, from time to time, to (i) undertake necessary due diligence process by collecting information/ documentary evidence of the US/non US status of the investors; (ii) disclose/report information as far as may be legally permitted about the holdings/investment returns pertaining to reportable accounts to the US Internal Revenue Service and/or such Indian authorities as may be specified under FATCA or other applicable laws and (iii) carry out such other activities as prescribed under the FATCA provisions, as amended from time to time.

FATCA due diligence will have to be directed at each investor/unit holder (including joint investors) and on being identified as a reportable person/specified US person, all the folios will be reported. Further, in case of folio with joint investors, the entire account value of investment portfolio will be attributable under each such reportable person. Investors/Unit holders would therefore be required to furnish such information to the Fund/AMC, from time to time, in order to comply with the reporting requirements stated in the IGA and or circulars/guidelines issued by SEBI/AMFI in this regard.

The impact of FATCA is relevant not only at the point of on-boarding of the investors but also throughout the life cycle of the investor account / folio with the Fund Hence investor(s) should immediately intimate the Fund/AMC, in case of any change in the FATCA

related information provided by them at the time of initial subscription.

The Fund/AMC reserves the right to reject any application or compulsorily redeem the units held directly or beneficially in case the applicant/investor fails to furnish the relevant information and/or documentation or is found to be holding units in contravention of the FATCA provisions.

Investors are advised to consult their tax advisors to understand the FATCA requirements and its implications in relation to their investment.

Central KYC Records Registry (CKYCR):

The Government of India vide their Notification dated November 26, 2015 authorised the Central Registry of Securitisation Asset Reconstruction and Security Interest of India (CERSAI) to act as and to perform the functions of the Central KYC Records Registry under the said rules, including receiving, storing, safeguarding and retrieving the KYC records under the Prevention of MoneyLaundering Act, 2002. SEBI required all the market intermediaries to update/upload KYC details of the new customer/investors (not KYC-KRA compliant) on CERSAI's online platform. CERSAI is a centralized repository of KYC records of customers/investors in the financial sector with uniform KYC norms and inter-usability of the KYC records across the sector with an objective to reduce the burden of producing KYC documents and getting those verified every time when the customer/investors creates a new relationship with a financial entity. Central KYC (CKYC) will store all the customer/investor information at one central server that is accessible to all the financial institutions. After opening a KYC account under the CKYC, customer/investor will get a 14-digit identification number ("KYC Number") and that the same may be quoted by the investor wanting to invest in mutual funds. Further, the Mutual Fund/AMC is required to check whether the PAN of the investor has been updated in CKYCR. In case the PAN has not been updated, the Mutual Fund/AMC shall collect a self certified copy of the investor's PAN card and update/upload the same in CKYCR. In case the Investor uses the old KRA KYC form for updating of any KYC information, such investor shall be required to provide additional/missing information only by using the supplementary CKYC form or fill the new "CKYC form".

Updation of Aadhaar:

In accordance with the amendment to Prevention of Money Laundering Act (PMLA) Rules. 2017 dated June 1, 2017, Mutual Funds are mandated to obtain Aadhaar Number ("Aadhaar") from their investors and link the same to his/her/their respective folios. As per the new rules linking of Aadhaar with Mutual Fund investments is mandatory, for all the Unit holders. Failing which, the folios may be made inoperative.

Accordingly, the investors are requested to note the following:

- Every individual applicant shall submit the Aadhaar number.
- Non-individual applicants, Aadhaar number(s) issued to managers, officers or employees holding an attorney to transact shall be submitted.
- The applicants intending to hold units allotted in dematerialized mode, shall update the
