Portfolio allocation may deviate from the asset allocation for a short-term period due to defensive considerations as per Paragraph 1.14.1.2 of SEBI Master Circular dated June 27, 2024 and as amended from time to time. Defensive considerations may be determined by the fund manager and/or AMC from time to time. In case of the said deviations, the fund manager will endeavor to rebalance the scheme within 7 calendar days from the date of such deviation.

The Scheme is a passively managed open-ended Index scheme, therefore change in investment pattern is normally not foreseen. However, for short durations part of the corpus may be pending for deployment, like on account of new subscriptions, redemptions and changes in composition of the underlying index. In case of any deviation, for rebalancing the portfolio of the Scheme, the following norms shall apply:

- 1) In case of change in constituents of the index due to periodic review, the portfolio of the Fund be rebalanced within 7 calendar days.
- 2) In case the rating of any security is downgraded to below the rating mandated in the index methodology (including downgrade to below investment grade), the portfolio be rebalanced within 30 calendar days.
- 3) In case the rating of any security is downgraded to below investment grade, the said security may be segregated in accordance Paragraph 4.4 of SEBI Master Circular dated June 27, 2024 on creation of segregated portfolio in mutual fund

	<p>schemes.</p> <p>Subject to the above, any change in the asset allocation affecting the investment profile of the Scheme shall be affected only in accordance with the provisions of sub regulation (15A) of Regulation 18 of the Regulations, as detailed later in this document.</p>
Investment Strategy	<ul style="list-style-type: none"> • The Scheme seeks to track investment results of Nifty BHARAT Bond Index –April 2032 subject to tracking errors. Accordingly, the Scheme will invest in AAA rated bonds issued by CPSEs/CPSUs/CPFIs and other Government organizations maturing not beyond the maturity date of the Scheme. The Scheme is a Target Maturity Date bond ETF. It will mature on April 15, 2032 and will distribute all of its maturity proceeds (Net Assets) to the Unitholders after the maturity date. • The Scheme will follow Buy & Hold investment strategy in which existing bonds will be held till maturity unless sold for meeting redemptions, rebalancing requirement or optimizing portfolio construction process. The portfolio of eligible securities invested by the Scheme is expected to have, in aggregate, fundamental characteristics such as modified duration, weighted average maturity, aggregate credit ratings, aggregate Yield To Maturity (YTM) etc. along with other liquidity parameters in line with Nifty BHARAT Bond Index – April 2032. The Scheme may or may not hold all of the eligible securities which are part of Nifty BHARAT Bond Index, in line with Paragraph 3.5 of SEBI Master Circular dated June 27, 2024. • The Issuer weight of the Scheme will be in line with the Issuer weights in the Index subject to suitability and availability of the eligible CPSEs bonds from time to time. • The Scheme may also participate in new issuances / private placement by the eligible issuers which are currently not part of the index but will eventually get included in the index during the next rebalancing period in line with Paragraph 3.5 of SEBI Master Circular dated June 27, 2024. The Scheme may participate in such issuances only if they meet all eligibility criteria as defined by the index and suitable from asset allocation perspective and other parameters of the Scheme. • The Scheme may also invest a portion of its portfolio in Government securities maturing on or before the maturity date of the Scheme, Repo in government securities and TREPS to manage liquidity requirement. <p>Portfolio Turnover: The Scheme is a Target Maturity Date Exchange Traded Fund. It is expected to be managed in a passive manner. However, there may be request of subscriptions and redemption from Authorised Participants and Large Investors on periodic basis, which may necessitate transaction in underlying basket of eligible securities. In general, the portfolio turnover of the Scheme will depend upon the extent of request of unit creation and unit redemption received from Authorised Participants and Large investors, requirement to rebalance the portfolio on account of change in the credit rating, corporate event etc. It may be noted that in the last year of maturity of the Scheme, the Portfolio Turnover may increase on account of re-deployment of maturity proceeds realized from initial investment.</p> <p>Tracking Error: Tracking Error is divergence of the performance (return) of the Fund's portfolio from that of the Underlying Index. Based on that the availability of issuances by the CPSEs/CPSUs/CPFIs and other Government organizations, it is expected that the Portfolio allocation could be different than that of underlying index allocation and could result in Tracking Error. That said, the risk parameters of the portfolio of the Scheme and underlying index could be similar.</p>

	<p>The Fund will endeavor to keep the tracking error as low as possible.</p> <p>Tracking error could be the result of a variety of factors including but not limited to:</p> <ul style="list-style-type: none"> • Delay in the purchase or non-availability of CPSEs securities which are part of the Index • Delay in liquidation of CPSEs bonds which have been removed by the Index • Due to partial investment in Government securities, Repo in Government securities and TREPS • Due to investment in eligible CPSEs issuer which are yet to be part of the Index • Due to mismatch in the weight of the Index and the Scheme throughout life of the Scheme. • Change in asset allocation between the Index and the Scheme in the last year of the Scheme. • Difference in valuation of underlying bonds by the Index Provider and AMC's valuation providers.
Risk Profile of the Scheme	<p>Scheme Specific Risk Factors</p> <p>The performance of the Scheme may be affected by changes in Government policies, general levels of interest rates and risks associated with trading volumes, liquidity and settlement systems, etc. Some of the Risks are listed below:</p> <p>1. Risks Associated with Fixed Income and Money Market Instruments:</p> <ul style="list-style-type: none"> • Interest rate risk: Price of a fixed income instrument falls when the interest rates move up and vice-versa, which will affect the NAV accordingly. • Spread risk: Investments in corporate bonds are exposed to the risk of widening of the spread between corporate bonds and gilts. Prices of corporate bonds tend to fall if this spread widens which will affect the NAV of the Scheme accordingly. • Credit risk or default risk: Credit risk is the risk that the issuer of a debenture/bond or a money market instrument may default on interest &/or principal payment obligations. • Liquidity: The Risk of non execution of sale/purchase order due to low volumes is liquidity risk. • Reinvestment risk: Interest rates may vary from time to time. The rate at which intermediate cash flows are reinvested may differ from the original interest rates on the security, which can affect the total earnings from the security. • Performance Risk: Performance of the Scheme may be impacted with changes in factors, which affect the capital market and in particular the debt market. • Market risk: Lower rated or unrated securities are more likely to react to developments affecting the market as they tend to be more sensitive to changes in economic conditions than higher rated securities. <p>2. Risk Factors associated with Exchange Traded Fund investing in Bonds:</p> <p>i. <u>Lack of Vibrant Secondary Market for Units of the Scheme:</u></p> <p>Although the Units of the Scheme will be listed on the Stock Exchanges such as NSE and BSE, there can be no assurance that a vibrant secondary market for units of the Scheme will be developed or maintained by the Authorised Participants.</p> <p>ii. <u>Halting of Trading in Units of the Scheme:</u></p> <p>Trading in the Units of the Scheme on NSE/BSE may be halted because of market conditions or for reasons that in view of NSE/BSE, SEBI or any other</p>

	<p>Regulatory authorities. Thus, active trading in the units of the Scheme is not advisable.</p> <p>In addition, trading of the Units of the Scheme are subject to trading halts caused by extraordinary market volatility and pursuant to stock exchange and SEBI 'circuit filter' rules.</p> <p>There can be no assurance that the requirements of NSE/BSE necessary to maintain the listing of the Units of the Scheme will continue to be met or will remain unchanged.</p> <p>iii. <u>Lack of secondary market depth:</u></p> <p>In case of unit creation and unit redemption, the Scheme will have to either buy a basket of securities or sell a basket of securities. -. This requires an active secondary market for underlying securities at all points of time. A lack of depth in secondary market for underlying securities could hamper the efficient transaction in unit creation and unit redemption.</p> <p>iv. <u>Units of the scheme may trade at prices other than NAV:</u></p> <p>Depending on the demand-supply dynamic, the units of the Scheme may either trade on the Stock Exchange above or below the NAV of the Scheme. This may give rise to arbitrage opportunities. However, the in-built mechanisms of unit creation and unit redemption in the form of Cash or in-kind is designed to reduce the arbitrage opportunity for market participants.</p> <p>v. <u>Regulatory Risk:</u></p> <p>Any changes in Regulations by SEBI / RBI / Stock Exchange / GOI / and other decision makers may hamper the ability of the market participants in trading resulting into wider premium/discount to NAV.</p> <p>vi. <u>Asset Class Risk:</u></p> <p>The returns from the types of Securities in which the Scheme invests may under-perform returns of general Securities markets or different asset classes. Different types of securities tend to go through cycles of out-performance and under-performance in comparison of Securities markets.</p> <p>vii. <u>Redemption Risk:</u></p> <p>Investors should note that even though the Scheme is an open-ended Scheme, subscription/redemptions of Units of the Scheme directly with the Fund would be limited to such investors who have the ability to subscribe/redeem the units of the Scheme in specific Creation Size. Generally, these lot sizes are larger as compared to normal funds. Thus, even though this Scheme is open ended, due to large lot size, very few investors can directly subscribe and redeem the units of the Scheme. However, investors wishing to subscribe/redeem units in other than specific lot sizes can do so by buying/selling the same on NSE/BSE.</p> <p>The AMC will endeavor to pay the redemption proceeds in Cash. However depending on the market volatility, liquidity conditions, applicable regulatory provisions, investor request etc., the AMC may redeem the Units and make the payout either "in-kind" i.e. through slice of the entire bond Portfolio or in combination of both i.e. Cash and "in-kind".</p>
--	---

	<p>viii. <u>Risk of Investment Strategy</u></p> <p>As the Scheme would be primarily investing in the Bonds of CPSE or any other eligible entities, any government policy which will have an impact on central public sector enterprises, including any change in the disinvestment policy of the government, could impact the price of the underlying assets. This may have negative impact on the performance of the Scheme.</p> <p>ix. <u>Risk of Credit Rating changes</u></p> <p>It is understood that most of the CPSE securities have higher credit rating essentially due to government ownership and implied government support. Any potential change in government control, shareholding pattern, market perception, corporate action etc., could result in potential downgrade of credit rating of the Issuers. This may have negative impact on the performance of the Scheme.</p> <p>x. <u>Risk of Investment in eligible securities</u></p> <p>The Scheme's objective is to invest in CPSEs securities as defined in the Index. The Scheme will invest in the securities predominantly through private placement route. These securities are generally auctioned on Electronic Bidding Platforms (EBP) in anonymous manner through competitive bidding. It is quite possible that the Scheme may not be able to subscribe to these securities in sufficient quantities. This may result in sub-optimal asset allocation until the next bidding takes place.</p> <p>xi. <u>Risk of variation in asset allocation as compared to the Index</u></p> <p>The Scheme intends to accept "in-kind" unit creation request from investors. The criteria for securities eligible for "in-kind" subscription has been defined in this document. It is possible that the "in-kind" subscription may result in variation in asset allocation as compared to the Index asset allocation. However, the rebalancing provisions of the SEBI Regulations will be applicable.</p> <p>xii. <u>Risk of sovereign rating change</u></p> <p>The valuation of the CPSE securities is based on the shape of the sovereign bond yield curve. The level of sovereign bonds are, apart from other factors, dependent on the sovereign rating of India by global Credit Rating Agencies. Any potential change in India's sovereign credit rating may have direct impact on the levels of sovereign bonds which in turn may have impact on the CPSE securities.</p> <p>xiii. <u>Risk of higher supply of CPSEs securities</u></p> <p>There has been an increase in total issuances of CPSE securities in last 3 years. This has resulted in "crowding out effect" in the corporate bond market. As a result, credit spreads of certain CPSE issuers with higher supply have widened as compare to other CPSE issuers. This has also resulted in higher concentration for certain CPSE issuers resulting in lack of appetite. Any incremental issuance from these CPSEs is likely to be met with lukewarm response from the investors, resulting in further widening of credit spreads.</p> <p>xiv. <u>Lack of supply of eligible securities with desired maturity</u></p> <p>The target maturity bond ETF structure has a pre-defined maturity date. This</p>
--	---

	<p>necessitate investment in securities maturing within 3 months before the maturity date of the Scheme. Any decline in potential supply of securities maturing within 3 months before the maturity date of the Scheme may expose the Scheme to the reinvestment risk or investing in lower yielding T-bills / TREPS in the maturing year of the Scheme. This may be detrimental to the investor interest.</p> <p>xv. <u>Increase in supply of Tax-free bonds from CPSEs Issuers</u></p> <p>The target maturity bond ETF structure is designed to provide investor with long-term fixed income asset allocation to high qualities CPSEs with better tax-adjusted returns in the current interest rate environment. Any potential increase in supply of Tax-free bonds from CPSEs issuer may adversely impact the demand and future growth of the Scheme.</p> <p>xvi. <u>Risk of divergence in credit rating of the Scheme and the Index</u></p> <p>The Scheme intends to invest in AAA rated CPSEs entities. Any potential credit rating downgrade will necessitate the Scheme to sell bonds of downgraded CPSEs entities at market level and invest in new AAA rated CPSEs entities. This exercise is dependent on the secondary market liquidity in affected CPSEs entities. In case if the Scheme is unable to liquidate these bonds in the open market, this will result in divergence in the credit rating composition between the Scheme and the Index.</p> <p>xvii. <u>Risk of disinvestment / privatization of invested CPSE entities</u></p> <p>The GOI has recently made several announcements regarding their intentions to either disinvest full or part of their holdings in several CPSE entities. In case if a CPSE entity, which is part of the portfolio, is privatized, it will result in exclusion from the Index. The Scheme will also be required to exit their positions at the prevailing market levels and reinvest the proceeds in CPSE entities at prevailing market levels. This may result in untoward volatility and undesirable outcome.</p> <p>3. Risks associated with investing in Tri Party Repo through CCIL (TREPS):</p> <p>Risk of exposure in the Triparty Repo settlement Segment provided by CCIL emanates mainly on two counts –</p> <ol style="list-style-type: none"> Risk of failure by a lender to meet its obligations to make funds available or by a borrower to accept funds by providing adequate security at the settlement of the original trade of lending and borrowing under Triparty Repo transaction. Risk of default by a borrower in repayment. <p>4. Risks associated with stock lending</p> <p>The risks in lending portfolio securities, as with other extensions of credit, consist of the failure of another party, in this case the approved intermediary, to comply with the terms of agreement entered into between the lender of securities i.e. the Scheme and the approved intermediary. Such failure to comply can result in the possible loss of rights in the collateral put up by the borrower of the securities, the inability of the approved intermediary to return the securities deposited by the lender and the possible loss of any corporate benefits accruing to the lender from the securities deposited with the approved intermediary. It may be noted that this activity would have the inherent probability of collateral value drastically falling in times of strong downward market trends, rendering the value of collateral inadequate until such time as that diminution in value is replenished by additional</p>
--	--

	<p>security. It is also possible that the borrowing party and/or the approved intermediary may suddenly suffer severe business setback and become unable to honor its commitments. This, along with a simultaneous fall in value of collateral would render potential loss to the Scheme. Besides, there can be temporary illiquidity of the securities that are lent out and the scheme will not be able to sell such lent out securities until they are returned. There is also a possibility of opportunity loss.</p> <p>5. Risks Associated With Segregated Portfolio</p> <p>1) Unit holder holding units of Segregated Portfolio may not be able to liquidate their holdings till the recovery of money from the issuer.</p> <p>2) Portfolio comprising of Segregated Portfolio may not realise any value or may have to be written down.</p> <p>3) Listing of units of Segregated Portfolio in recognised stock exchange does not necessarily guarantee their liquidity. There may not be active trading of units in the stock market. Further trading price of units on the stock market may be significantly lower than the prevailing NAV. For further details please refer SAI.</p>

Should be in market lot of Rs. 5 crore and in multiple thereof. <p>It may be noted that, subscriptions received by the AMC / Mutual Fund within cut-off time on a Business Day shall be processed based on the Intra-Day NAV calculated in accordance with SEBI (MF) Regulations, 1996. Any expenditure incurred by the Scheme for allotment and/or transfer of eligible securities which may include charges like depository participant charges, transaction handling charges etc., will be borne by the Large Investors / Authorised Participants. Accordingly, the said charges will be deducted before allotment of unit.</p> <p>Depending on the market volatility, liquidity conditions, rating action, applicable regulatory provisions and any other factors, the AMC may, at its sole discretion, decide to accept subscription either in "Cash", "in-kind" (through eligible securities) or the combination of both.</p> <p>b. On the Stock Exchange(s):</p> <p>All categories of investors may transact in Units of the Scheme through the Stock Exchanges on which the Units of the Scheme are listed, on any trading day during trading hours in the lot size of one (1) Unit and multiples thereof.</p> <p>The AMC will appoint Authorised Participant(s) who will endeavor to provide liquidity through Stock Exchanges by providing two-way quotes in the Units of the Scheme during trading hours.</p>
Despatch of Redemption Request	The redemption or repurchase proceeds shall be dispatched to the unitholders within 3 working days from the date of redemption or repurchase.
Benchmark Index	<p>The Benchmark for the Scheme will be Nifty BHARAT Bond Index – April 2032.</p> <p>Justification for adoption of benchmark:</p> <p>The same has been chosen as the Scheme will predominantly invest in securities which are constituents of Nifty BHARAT Bond Index - April 2032. Thus, the composition of the aforesaid benchmark is such that it is most suited for comparing the performance of</p>

	the Scheme.															
IDCW Policy (earlier known as Dividend Policy)	<p>Unit holders to note that the Trustee may declare IDCW from time to time in accordance with the IDCW Policy set out below.</p> <p>IDCW Policy: The Trustee may declare IDCW to the Unit holders under the Scheme subject to the availability of distributable surplus and the actual distribution of IDCWs and the frequency of distribution will be entirely at the discretion of the Trustee. Such IDCW will be payable to the Unit holders whose names appear on the register of Unit holders on the record date as fixed for the respective Schemes. The IDCW declared will be paid net of tax deducted at source, wherever applicable, to the Unit holders within seven working days from the record date. There is no assurance or guarantee to the Unit holders as to the rate of IDCW distribution nor that will the IDCW be paid regularly. If the Fund declares IDCW, the NAV of the respective Schemes will stand reduced by the amount of IDCW and Dividend distribution tax (if applicable) paid. All the IDCW payments shall be in accordance and compliance with SEBI Regulations and Listing Regulations, as applicable from time to time.</p> <p>Further, investors are requested to note that the amounts can be distributed out of the investors capital (Equilization Reserve), which is part of sales price that represents realized gains.</p>
