I. INTRODUCTION

A. RISK FACTORS:

Apart from the risk factors mentioned in SAI, following are some of the additional risk factors which investors are advised to go through before investing:

a) STANDARD RISK FACTORS:

- * Investment in Mutual Fund Units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal.
- * As the price / value / interest rates of the securities in which the Scheme invests fluctuates, the value of your investment in the Scheme may go up or down
- * Past performance of the Sponsor/AMC/Mutual Fund does not guarantee future performance of the Scheme.
- * Edelweiss NIFTY PSU Bond Plus SDL Index Fund – 2027 is only the name of the Scheme & it does not in any manner indicate either the quality of the Scheme or its future prospects and returns.
- * The sponsor is not responsible or liable for any loss resulting from the operation of the Scheme beyond the initial contribution of Rs.1,00,000 made by it towards setting up the Fund.
- * The Scheme is not a guaranteed or assured return Scheme.

b) SCHEME SPECIFIC RISK FACTORS:

The performance of the Scheme may be affected by changes in Government policies, general levels of interest rates and risks associated with trading volumes, liquidity and settlement systems, etc. Some of the Risks are listed below:

1. Risks Associated with investing in Money Market Instruments

- **Interest rate Risk:** Price of a fixed income instrument generally falls when the interest rates move up and vice-versa. The extent of fall or rise in the prices depends upon the coupon and maturity of the security. It also depends upon the yield level at which the security is being traded. The NAV of the Scheme is expected to increase from a fall in interest rates while it would be adversely affected by an increase in the level of interest rates.
- **Spread Risk:** In a floating rate security the coupon is expressed in terms of a spread or mark up over the benchmark rate. In the life of the security this spread may move adversely leading to loss in value of the portfolio. The yield of the underlying benchmark might not change, but the spread of the security over the underlying benchmark might increase leading to loss in value of the security.
- **Credit risk or default Risk:** Credit risk is the risk that the issuer of a debenture/ bond or a money market instrument may default on interest and/or principal payment obligations. Even when there is no default, the price of a security may change with expected changes in the credit rating of the issuer. It is to be noted here that a Government Security is a sovereign security and is the safest. Corporate bonds carry a higher amount of credit risk than Government Securities. Within corporate bonds also there are different levels of safety and a bond rated higher by a particular rating agency is safer than a bond rated lower by the same rating agency.
- **Liquidity & Settlement Risk:** The liquidity of a fixed income security may change, depending on market conditions leading to changes in the liquidity premium attached to the price of such securities. At the time of selling the security, the security can become illiquid, leading to loss in value of the portfolio. Different segments of the financial markets have different settlement cycle/periods and such settlement cycle/periods may be impacted by unforeseen circumstances, leading to Settlement Risk. This can adversely affect the ability of the Fund to swiftly execute trading strategies which can lead to adverse movements in NAV.

- **Reinvestment Risk:** Interest rates may vary from time to time. The rate at which intermediate cash flows are reinvested may differ from the original interest rates on the security, which can affect the total earnings from the security.
- **Performance Risk:** Performance of the Scheme may be impacted with changes in factors, which affect the capital market and in particular the debt market.
- **Prepayment Risk:** The Scheme may receive payment of monthly cashflows earlier than scheduled, which may result in reinvestment risk.
- **Market Risk:** Lower rated or unrated securities are more likely to react to developments affecting the market as they tend to be more sensitive to changes in economic conditions than higher rated securities

2. Risk Factors associated with Scheme:

a. Passive Investments:

As the scheme proposes to invest not less than 95% of the net assets in the securities of the benchmark Index, the Scheme will not be actively managed. The Scheme may be affected by a general decline in the Indian markets relating to its Underlying Index. The Scheme invests in the securities included in its underlying index regardless of their investment merit. The AMC does not attempt to individually select securities or to take defensive positions in declining markets.

b. Tracking Error Risk:

Tracking Error is divergence of the performance (return) of the Fund's portfolio from that of the Underlying Index. Based on that the availability of issuances by the CPSEs/CPSUs/CPFIs and other Government organizations, it is expected that the Portfolio allocation could be different than that of underlying index allocation and could result in Tracking Error. That said, the risk parameters of the portfolio of the Scheme and underlying index could be similar.

The Fund will endeavor to keep the tracking error as low as possible. Under normal circumstances, such tracking error is not expected to exceed 2% per annum.

Tracking error could be the result of a variety of factors including but not limited to:

- Delay in the purchase or non-availability of CPSEs securities which are part of the Index
- Delay in liquidation of CPSEs bonds which have been removed by the Index
- Due to timing of transactions either on RFQ platforms or in open market
- Due to investment in out of index investments such as Government securities, Repo in Government securities and TREPS
- Due to over-weight / under-weight investment in bonds of eligible CPSEs issuers at ISIN level which are part of the Index
- Due to mismatch in the weight of the issuers forming part of the Index and the Scheme throughout life of the Scheme.
- Change in asset allocation between the Index and the Scheme in the last year of the Scheme.
- Difference in valuation of underlying bonds by the Index Provider and AMC's valuation providers.

c. Trade Execution Risk on RFQ Platforms:

Current SEBI regulations mandates Mutual Funds to execute certain % of their monthly trading volume in corporate bonds on RFQ platforms. RFQ platforms are peer-to-peer platforms and are still in development stage. Therefore, they have lower level of secondary market liquidity. Mandatory execution of trades on RFQ among MFs may hamper trade execution efficiency during periods of heavy outflows.

3. Risks Associated with Stock Lending

The risks in lending portfolio securities, as with other extensions of credit, consist of the failure of another party, in this case the approved intermediary, to comply with the terms of agreement entered into between the lender of securities i.e. the Scheme and the approved intermediary. Such failure to comply can result in the possible loss of rights in the collateral put up by the borrower of the securities, the inability of the approved intermediary to return the securities deposited by the lender and the possible loss of any corporate benefits accruing to the lender from the securities deposited with the approved intermediary. It may be noted that this activity would have the inherent probability of collateral value drastically falling in times of strong downward market trends, rendering the value of collateral inadequate until such time as that diminution in value is replenished by additional security. It is also possible that the borrowing party and/or the approved intermediary may suddenly suffer severe business setback and become unable to honour its commitments. This, along with a simultaneous fall in value of collateral would render potential loss to the Scheme. Besides, there can be temporary illiquidity of the securities that are lent out and the Scheme will not be able to sell such lent out securities until they are returned. There is also a possibility of Opportunity loss.

4. Risks Associated with exposure in Tri-party Repo

Risk of exposure in the Tri-party Repo settlement Segment provided by CCIL emanates mainly on two counts –

- 1) Risk of failure by a lender to meet its obligations to make funds available or by a borrower to accept funds by providing adequate security at the settlement of the original trade of lending and borrowing under Tri-party Repo transaction.
- 2) Risk of default by a borrower in repayment.

5. Risk Associated with Repo transactions in Corporate Debt

- **Lending transactions:** The scheme may be exposed to counter party risk in case of repo lending transactions in the event of the counterparty failing to honour the repurchase agreement. However, in repo lending transactions, the collateral may be sold and a loss is realized only if the sale price is less than the repo amount. The risk may be further mitigated through over-collateralization (the value of the collateral being more than the repo amount). Further, the liquidation of underlying securities in case of counterparty default would depend on liquidity of the securities and market conditions at that time. It is endeavoured to mitigate the risk by following an appropriate counterparty selection process, which include their credit profile evaluation and over-collateralization to cushion the impact of market risk on sale of underlying security.
- **Borrowing transactions:** In the event of the scheme being unable to pay back the money to the counterparty as contracted, the counter party may dispose of the assets (as they have sufficient margin). This risk is normally mitigated by better cash flow planning to take care of such repayments. Further, there is also a Credit Risk that the Counterparty may fail to return the security or Interest received on due date. It is endeavoured to mitigate the risk by following an appropriate counterparty selection process, which include their credit profile evaluation.

6. Risks Associated with segregated portfolio

- 1) Unit holder holding units of Segregated Portfolio may not able to liquidate their holdings till the recovery of money from the issuer.
- 2) Portfolio comprising of Segregated Portfolio may not realise any value or may have to be written down.
- 3) Listing of units of Segregated Portfolio in recognised stock exchange does not necessarily guarantee their liquidity. There may not be active trading of units in the stock market. Further trading price of units on the stock market may be significantly lower than the prevailing NAV.
- 4) Illustration of Segregated Portfolio

B. REQUIREMENT OF MINIMUM INVESTORS IN THE SCHEME

The Scheme shall have a minimum of 20 investors and no single investor shall account for more than 25% of the corpus of the Scheme. If either/both of such limit(s) is breached during the NFO of the Scheme, it shall be ensured that within a period of three months or the end of the succeeding calendar quarter from the close of the NFO of the Scheme, whichever is earlier, the Scheme complies with these two conditions. During the ongoing offer these two conditions shall be complied with on calendar quarter basis, on an average basis, as specified by SEBI. In case the Scheme does not have a minimum of 20 investors in the stipulated period, the provisions of Regulation 39(2) (c) of the SEBI (MF) Regulations would become applicable automatically without any reference from SEBI and accordingly the Scheme shall be wound up and the Units would be redeemed at applicable NAV. If there is a breach of the 25% limit by any investor over the quarter, a rebalancing period of one month would be allowed and thereafter the investor who is in breach of the rule shall be given 15 days notice to redeem his exposure over the 25 % limit. Failure on the part of the said investor to redeem his exposure over the 25 % limit within the aforesaid 15 days would lead to automatic redemption by the Mutual Fund on the Applicable Net Asset Value on the 15th day of the notice period. The Mutual Fund shall adhere to the requirements prescribed by SEBI from time to time in this regard.

In order to track the investor's holding rather than the folio/account's holdings, the fund houses are recommended to track the investors at the master folio/ master account (whatever be the terminology used by the fund houses) level. In addition since there is a possibility of an investor holding multiple accounts, the account is identified for the purpose of aggregation to comply with 20/25 rule by using a common parameter like PAN. Thus, tracking of investor's holding & number of investors may be conducted using a common parameter like PAN, Master Folio/Master Account, since there is possibility of an investor holding multiple accounts. In line with AMFI's suggestion, tracking of investor's holding & number of investors may be conducted using a common parameter like PAN, master folio/master account, since there is possibility of an investor holding multiple accounts. In case of multiple folios, the sequence or the order of the compulsory redemption is left to the discretion of the fund house in consultation with the investor.

1. **Investment in PSU Bonds:** The Scheme would invest in bonds issued by PSU issuers comprising Nifty PSU Bond Plus SDL Apr 2027 50:50 Index and endeavor to track the benchmark index.
2. **Investment in State Development Loans (SDLs):** The Scheme would invest in State Development Loans issued by State Governments, comprising Nifty PSU Bond Plus SDL Apr 2027 50:50 Index and endeavor to track the benchmark index.

Regulations. As per SEBI Regulations, no Investment Management fees will be charged for such investments and the aggregate inter Scheme investment made by all Schemes in the schemes of the Mutual Fund shall not exceed 5% of the Net Asset Value of the Mutual Fund.

E. INVESTMENT STRATEGY & APPROACH

- The Scheme seeks to track the Nifty PSU Bond Plus SDL Apr 2027 50:50 Index subject to tracking errors. Accordingly, the Scheme will invest in AAA rated PSU bonds and SDLs maturing within the maturity date of the Scheme. The Scheme is a Target Maturity Date Index Fund. It will mature on Friday, April 30, 2027 and will distribute all of its maturity proceeds (Net Assets) to the Unitholders within 10 (Ten) Business days from the date of maturity of the Scheme, in line with current regulatory timelines.
- The Scheme will follow Buy & Hold investment strategy in which existing bonds will be held till maturity unless sold for meeting redemptions, payment of IDCW, rebalancing requirement or optimizing portfolio construction process.
- The portfolio of eligible securities invested by the Scheme is expected to have, in aggregate, fundamental characteristics such as modified duration, weighted average maturity, aggregate credit ratings, aggregate Yield To Maturity (YTM) etc. along with other liquidity parameters predominantly in line with Nifty PSU Bond Plus SDL Apr 2027 50:50 Index. The Scheme may or may not hold all of the eligible securities which are part of Nifty PSU Bond Plus SDL Apr 2027 50:50 Index, in line with SEBI circular no. SEBI/HO/IMD/ DF3/CIR/P/2019/147 dated November 29, 2019. The Issuer weight of the Scheme will be broadly in line with the Issuer weights in the Index subject to suitability and availability of the eligible PSU bonds and SDLs from time to time.
- The Scheme may also participate in new issuances / private placement by the eligible issuers which are currently not part of the index but will eventually get included in the index during the next rebalancing period in line with SEBI circular no. SEBI/HO/IMD/ DF3/CIR/P/2019/147 dated November 29, 2019. The Scheme may participate in such issuances only if they meet all eligibility criteria as defined by the index and suitable from asset allocation perspective and other parameters of the Scheme.
- Further, the norms as indicated in para (1) of SEBI circular no. SEBI/HO/IMD/DF3/CIR/P/2019/147 dated November 29, 2019 reproduced below shall be adopted -
 - (a) The constituents of the index shall be aggregated at issuer level.
 - (b) The index shall have a minimum of 8 issuers.
 - (c) No single issuer shall have more than 15% weight in the index.
 - (d) The rating of the constituents of the index shall be investment grade.
- (e) The constituents of the index shall have a defined credit rating and defined maturity as specified in the index methodology. The Scheme's exposure to money market instruments will be in line with the asset allocation table.

Risk Mitigation Measures:

The Scheme will predominantly invest in PSU Bonds / SDLs which are constituents of the underlying Index viz. Nifty PSU Bond Plus SDL Apr 2027 50:50 Index. Based on the availability of issuances, it is expected that the portfolio allocation could be different than that of underlying index allocation and could result in Tracking Error. That said, broad risk parameters of the portfolio of the Scheme such as credit rating, weighted average YTM, weighted average maturity, asset allocation etc. are expected to be similar to the Underlying Index.

The Scheme’s exposure to money market instruments will be in line with the asset allocation table.

This allocation will be monitored periodically and it shall be ensured that investments are made in accordance with the Scheme objective and within the regulatory and internal investment restrictions prescribed from time to time.

Since disciplined investing requires risk management, the AMC would incorporate adequate safeguards for controlling risks in the portfolio construction process.

The Scheme has a detailed process to identify, measure, monitor and manage various portfolio risks. The objective is to understand these risk and mitigate them wherever possible.

Few of the key risk identified are:

Risk & Description specific to the Scheme	Risk mitigants / Management Strategy
Market/Volatility Risk Risk arising due to price fluctuations and volatility, having material impact on the overall returns of the Scheme.	The Scheme, being a Target Maturity Date index fund structure, is expected to follow a Buy and Hold investment strategy in a passive manner. Based on that, we expect to mitigate intermittent price volatility in the underlying assets. Investors who remain invested until the maturity of the Scheme are expected to mitigate market / volatility risk to large extent.
Credit risk Risk associated with repayment of investment	The Scheme intends to invest predominantly in AAA rated PSU bonds issued by CPSEs/CPSUs/CPFIs issued by other Government organizations & SDLs issued by State governments. These CPSEs/CPSUs/CPFIs and other Government organizations are controlled by the Government of India. As a result the bond issued by them are considered as relatively safe. SDLs are issued and serviced by the RBI. SDLs are eligible for SLR investments.
Liquidity risk Risk arising due to inefficient Asset Liability Management, resulting in high impact costs	The Scheme intends to invest predominantly in AAA rated PSU bonds issued by CPSEs/CPSUs/CPFIs issued by other Government organizations & SDLs issued by State governments. In general, bonds issued by CPSEs entities enjoy higher level of secondary market liquidity.
Interest rate risk Price volatility due to movement in interest rates	The Scheme being passively managed and a Target Maturity Date index fund structure, is expected to follow a Buy and Hold investment strategy in a passive manner. All investments are within the maturity date of the Scheme and the underlying Index. This should help mitigate the interest rate risk.
Concentration risk Risk arising due to over exposure in few securities	The index intends to hold a diversified portfolio of AAA rated PSU bonds and SDLs.
Event risk Price risk due to company or sector specific event	The Scheme intends to invest in predominantly in AAA rated PSU bonds issued by CPSEs/CPSUs/CPFIs issued by other Government organizations & SDLs issued by State governments. These bonds / SDLs are perceived to be relatively safe with quasi sovereign risk due their government ownership.

Performance risk Risk arising due to change in factors affecting the market	The scheme is passively managed
---	---------------------------------

*** Portfolio Turnover:**

The Scheme is a Target Maturity Date Index Fund. It is expected to be managed in a passive manner. The Scheme will endeavour to keep the portfolio turnover at a minimum. However, the portfolio turnover ratio may vary as the Scheme may change the portfolio according to Asset Allocation to align itself with the objectives of the Scheme and in accordance with the composition of Nifty PSU Bond Plus SDL Apr 2027 50:50 Index. The effect of higher portfolio turnover could be higher brokerage and transaction costs.

*** Tracking Error:**

Tracking Error is divergence of the performance (return) of the Fund's portfolio from that of the Underlying Index. Based on that the availability of issuances by the CPSEs/CPSUs/CPFIs and other Government organizations, it is expected that the Portfolio allocation could be different than that of underlying index allocation and could result in Tracking Error. That said, the risk parameters of the portfolio of the Scheme and underlying index could be similar.

The Fund will endeavor to keep the tracking error as low as possible. Under normal circumstances, such tracking error is not expected to exceed 2% per annum.

Tracking error could be the result of a variety of factors including but not limited to:

- Delay in the purchase or non-availability of CPSEs securities which are part of the Index
- Delay in liquidation of CPSEs bonds which have been removed by the Index
- Due to timing of transactions either on RFQ platforms or in open market
- Due to investment in out of index investments such as Government securities, Repo in Government securities and TREPS
- Due to over-weight / under-weight investment in bonds of eligible CPSEs issuers at ISIN level which are part of the Index
- Due to mismatch in the weight of the issuers forming part of the Index and the Scheme throughout life of the Scheme.
- Change in asset allocation between the Index and the Scheme in the last year of the Scheme.
- Difference in valuation of underlying bonds by the Index Provider and AMC's valuation providers.

In addition, certain investment parameters may be adopted internally by AMC, and amended from time to time, to ensure appropriate diversification / security for the Fund. The Trustee Company / AMC may alter these above stated limitations from time to time, and also to the extent the SEBI (Mutual Funds) Regulations, 1996 change, so as to permit the Scheme to make its investments in the full spectrum of permitted investments for Mutual Funds to achieve its investment objective. N. ABOUT THE INDEX - Nifty PSU Bond Plus SDL Apr 2027 50:50 Index

Introduction

Nifty PSU Bond Plus SDL Apr 2027 50:50 Index seeks to measure the performance of portfolio of AAA rated bonds issued by government owned entities & SDLs maturing during the six months period prior to the maturity date of index. The index shall mature on April 30, 2027.

The index is computed using the total return methodology including price return and coupon return.

Methodology

Index Structure

The index contains 2 equal weighted components as on the base date of index

- 1) PSU Bonds component: Most liquid bond issued by AAA rated government owned entities with issuer level minimum outstanding amount of Rs. 100 crores in the eligible bonds of the issuer maturing during the six months period ending April 30, 2027
- 2) SDLs component: Most recently issued 10 SDLs issued by top 10 states/UTs selected based on their outstanding amount maturing during the six months period ending April 30, 2027

1) Methodology for PSU Bonds component – Constituting 50% of the Index

Eligibility Norms

- **Issuer eligibility**

- Issuing entity should be domiciled in India and should satisfy either of the following:

1. Central Public Sector Enterprises (CPSEs) as listed on DPE & DIPAM website
2. Maharatna, Navratna and Miniratna as listed on DPE website, if not included in CPSEs list as mentioned in point 1
3. Public Financial Institutions (PFIs) owned and managed by GOI and not included in points 1 and 2 above
4. Statutory body set-up by Act of Parliament and having outstanding bonds of more than Rs. 100 crores

- **Bond eligibility**

Bond should be

1. Plain vanilla with fixed coupon and fixed maturity
2. Denominated in INR
3. Be listed and traded on NSE and/or BSE and should be rated

Bond should not be

1. Tax Free
2. Floating Rate Bond
3. Partially Paid up
4. Perpetual
5. Having Single Option (Call/Put)
6. Having step up/step down coupon which is linked to any contingent event
7. Convertible bonds
8. Having staggered redemption

Selection Criteria

- **Issuer Selection**

- Eligible issuers having credit rating of “AAA” (Triple A) at the time of index creation/review are shortlisted. In case an entity is rated by multiple rating agencies, the lowest rating assigned to the Non-Convertible Debenture/Long Term Debt of the entity is considered for the index selection purpose
- Further, issuers from the above step which have individual total outstanding of minimum Rs. 100 crores in eligible bonds maturing during the six months period ending April 30, 2027 are selected for the index

Bond Selection

- For every selected issuer, most liquid bond based on liquidity score calculated based on the trades available during the latest month is part of the index. In case a shortlisted issuer has no bond traded in the latest month, the period of analysis is relaxed to last 2 months and then to last 3 months and so on till 6 months.
- The liquidity score is calculated by allocating 80% weights to aggregate trading value, 10% weights to number of days traded and 10% to number of trades of the bond during the six months period prior to the base date of the index
- If no bonds of an issuer are traded in the last 6 months, the bond with the latest maturity to be part of the index
- Only one bond per issuer to be part of the index

Illustration:

ISIN	Trading Value (TV) (Rs. Crs.)	No. of days trade (NODT)	No. of trades (NOT)	Liquidity Score (TV/ Total TV*0.80 + NODT/Total NODT*0.10 + NOT/Total NOT*0.10)
A	6,500	75	115	37%
B	5,500	82	120	33%
C	5,300	55	85	30%
Total	17,300	212	320	100%

Weight Assignment

- Each issuer that is part of the PSU Bonds portion (constituting 50% of index) is given equal weight as of the base date of the index
- Subsequently, the weights may drift due to price movement and accordingly, the total 50% weight of the PSU Bonds component may also drift and will not get reset
- Any coupon amount received is assumed to be reinvested in the portfolio on the same date, in the proportion of the existing weights

2) Methodology for SDLs component – Constituting 50% of the Index

Eligibility norms

SDL should not be a special bond

Issuer Selection

Top 10 states/UTs are selected based on their total outstanding amount maturing during the six months period prior to the maturity date of the index.

Security Selection

Most recently issued SDL of each of the selected 10 states/UTs from the above universe maturing during the six months period prior to the maturity date of the index to be included in the index as on the base date of the index. Only one SDL per State/UT to be part of the index

Weight Assignment

- Each state that is part of the SDL component (constituting 50% of index) is given equal weight as of the base date of the index
- Subsequently, the weights may drift due to price movement and accordingly, the total 50% weight of the PSU Bonds component may also drift and will not get reset

- Any coupon amount received is assumed to be reinvested in the portfolio on the same date, in the proportion of the existing weights

Index Rebalancing/Reconstitution

- Index will be reviewed at the end of each calendar quarter
- During the quarterly review, existing issuers and their bonds in the index to be continued if they continue to meet the eligibility and selection criteria. If there are new issuances of PSU issuer which meet the eligibility and selection criteria and such issuer is not already part of the index, then such issuer will be selected to be part of the index. For such an issuer, the bond will be selected based on the bond selection criteria
- In case of any inclusion of any new PSU issuer in the index, the total running weight of all the PSU issuers will reset to equal weight across new PSU issuers
- In case there is a breach of 15% in weight of any issuer, excess weight will be redistributed in rest of the portfolio proportionally
- Based on the governments 'in principle approval' to disinvest its stake in some of the government owned entities, such entities are not included to be part of the index at launch/inception of the index. On account of disinvestment in an existing constituent, such issuer shall be excluded from the index effective next rebalancing/reconstitution only if the disinvestment process has been completed
- In case an eligible issuer gets downgraded and fails to meet index methodology for PSU Bonds Component before the portfolio disclosure, such issuer shall be excluded from being a part of the index from next effective date and in no case, it will be more than 5 working days
- Apart from scheduled review, in case an existing issuer gets downgraded below AAA, bonds of such issuer to be excluded from the index within 5 working days
- Existing SDLs in the index to be continued if they continue to meet the eligibility criteria. Ineligible SDLs will be excluded from the next rebalancing date
- Due to the above stated reasons, if the index is rebalanced and issuer/s move out of the index,
 - If the total number of PSU issuers in the index is 4 and above, then the total weight of the PSU securities being excluded will be redistributed among the remaining PSU securities proportionally. This will be subject to 15% issuer limit
 - If the total number of state/UT issuers in the index is 4 and above, then the total weight of the SDLs being excluded will be redistributed among the remaining SDL securities proportionally. This will be subject to 15% issuer limit
 - If the total number of PSU issuers in the index fall below 4, then new PSU issuers will be included in the index based on the issuer selection and bond selection criteria mentioned in the PSU Bonds component index methodology section above, to take the PSU issuer count to 4 and the total existing weightage of PSU Bonds component will be divided equally amongst all the PSU issuers in the index
 - Due to any reason, if the total number of state/UT issuers in the index fall below 4, then new state/UTs will be included in the index based on the issuer selection and security selection criteria mentioned in the SDLs component index methodology section above, to take the state/UT count to 4 and the total existing weightage of SDLs component will be divided equally amongst all the state/UT issuers in the index
- Except for above stated reasons, there will be no inclusion and exclusion for SDLs component in the index during the quarterly review
- If there is no inclusion or exclusion in the index on the review date, the weights will not get reset and existing weights will continue. This will be subject to 15% single issuer limit
- As the index includes securities that shall mature during the six month period ending on the final maturity date of the index, any proceeds from the security redemption prior to the final maturity date of the index shall be re-invested using the following waterfall approach:

- The proceeds from security redemption will be reinvested in the longest maturity outstanding security issued by the same issuer (state/UT in case of SDL and Bond/money market instrument in case of corporate bond) and maturing on or just before the index maturity date. This will be subject to 15% single issuer limit
- In case a replacement in the form of outstanding security of the same issuer cannot be found for reinvestment then the proceeds from such redemption shall be reinvested in the remaining portfolio on the same date in the proportion of the existing weights. This will be subject to compliance to the SEBI portfolio concentration norms (minimum 8 issuers and single issuer weight cap of 15%)
- In case due to any reason it is not possible to meet the portfolio concentration norms as prescribed by SEBI, then the proceeds from such redemption shall be reinvested in a T-Bill maturing on or just before the index maturity date. This will be subject to 15% single issuer limit o If the last outstanding security (including T-Bill) in the index matures before the final index maturity date, all redemption proceeds shall be assumed to be re-invested in The Clearing Corporation of India Ltd.'s (CCIL) TREPS overnight rate for any subsequent days till the maturity of the index.

Index Termination

The index shall mature on Friday, April 30, 2027

Tentative Portfolio as on August 31, 2021

P. INDIAN DEBT MARKETS - PILLARS OF THE INDIAN ECONOMY

India’s bond market has witnessed a rapid growth in the last five years. Its total market capitalization was Rs. 128 trillion (\$1.79 trillion) as on October 2019 according to NSE data.

India’s bond market comprises mainly of sovereign bonds, corporate bonds and money market assets. Sovereign bonds comprised 71% of the market capitalization; corporate bonds were 24% while money market assets comprised 5% of the market capitalization.

Sovereign bonds are issued by the Government of India & Indian States to finance their budget deficits. The budget deficit is generally announced in the Union Budget for the next financial year. It is widely followed by the market participants for their analysis on the government finances. It forms the basis for India’s monetary policy and demand-supply dynamic in the secondary market.

The Government of India typically funds a significant portion of its budget deficit by auctioning government bonds on weekly basis. The auction calendar is made public in advance. For last few years, the government has made conscious efforts to auction bonds with residual maturity greater than ten years in order to lengthen its maturity profile. The government also auctions Treasury Bills on weekly basis to finance their short-term cash flow mismatches. The government’s Treasury Bill auction calendar is also available for market participants in advance. The government auctions 91-day treasury bills on every Wednesday while 182-day & 364-day treasury bills are auctioned on alternate Wednesday. Indian states also borrow in the bond market by auctioning State

Development Loans (SDL) on alternate Tuesdays. These bonds are mostly purchased by Banks, Insurance companies as well as other market participants due to their sovereign nature, superior secondary market liquidity and statutory holding requirements by the regulators.

Indian corporate entities as well as Public Financial Institutions typically borrow wholesale money from the debt capital market. Primary supply of corporate bonds has been steadily increasing in the last three years in proportion to the increase in the demand for quality assets from mutual funds, insurance companies, foreign portfolio investors and pension funds.

As on October 29, 2019, size of the Indian government bond market is around 55 trillion, which is distributed amongst 88 unique issues. As compared to that India’s corporate bond market is more fragmented. The total corporate bond market size is around Rs. 31 trillion, which is distributed amongst around 23,400 unique issues.

The average daily trading volume in the Indian Government Bond market is around Rs. 40,000 crore comprising 1.4% of the amount outstanding. As compared to that the average daily trading volume of bond issued by CPSEs is around 2,100 crore comprising 0.46% of the outstanding amount as per NSE. In the last three years CPSEs has issued around Rs. 5 trillion worth of bonds amongst around 375 private placement issues.

Income / profits received / earned on the Scheme’s corpus would be accumulated by the Fund as capital accretion & will remain invested in the Scheme and will be reflected in the Net Asset Value (NAV). Unit holders who opt for this Option will not receive any IDCW in normal circumstances.</p> <p>IDCW Option (Payout Facility): Under this Option, IDCW will be declared subject to the availability of distributable surplus as computed in accordance with SEBI Regulations. IDCWs, if declared, will be paid (subject to deduction of dividend distribution tax and statutory levy, if any) to those Unit holders, whose names appear in the register of Unit holders on the notified record date. AMC reserves the right to change the record date from time to time. However, it must be distinctly understood that actual declaration of IDCWs and frequency thereof is at the discretion of Board of Trustees. There is no assurance or guarantee to Unit holders as to the rate of IDCW distribution nor that the IDCWs will be declared regularly, though it is the intention of the Mutual Fund to make regular IDCW distribution under the IDCW Option. Under this facility the IDCW due and payable to the Unit holders will be compulsorily and without any further act by the Unit holders, reinvested in the IDCW option at a price based on the prevailing Net Asset Value per Unit on the record date. The Units for the purpose of re-investment will be created and credited to the Unit holder’s account at a price based on the prevailing Ex-Dividend Net Asset Value (NAV derived post declaration of IDCW) per unit on the record date. There shall, however, be no load on the IDCWs so reinvested. In case the selected date for IDCW declaration falls on a holiday/non-Business Day then the next Business Day will be considered.</p> <p>Default Option: Growth Option If the investor does not clearly specify the choice of Option at the time of investing, the Units of the respective Scheme(s) will be allotted in the Growth Option of the Scheme.</p> <p>Default Facility: Reinvestment of Income Distribution cum capital withdrawal option If the investor selects IDCW Option but fails to mention the facility, it will be deemed that the investor has opted for Reinvestment of Income Distribution cum capital withdrawal option facility.</p>

<p>IDCW Policy</p>	<ul style="list-style-type: none"> <p>• IDCW Distribution Procedure:</p> <p>SEBI Circular lays down the procedure for Declaration of IDCW which clearly says that quantum of IDCW and record date shall be fixed by the Board of Trustees and AMC shall issue a notice to the public communicating the decision about IDCW including the record date, within one calendar day of the decision made by the Board of Trustees in their meeting.</p> <p>Record date shall be the date that will be considered for the purpose of determining the eligibility of investors whose name appears on the register of Unit holders. Record date shall be five calendar days from the issue of notice.</p> <p>The Trusteeship Company reserves the right to declare IDCW on a regular basis and can distribute the same out of investors capital (Equalization Reserve), which is part of sale price that represents realized. The Fund does not guarantee or assure declaration or payment of IDCW. Although the Trustees have intention to declare IDCW under IDCW Option, such declaration of IDCW if any, is subject to Scheme’s performance & the availability & adequacy of distributable surplus in the Scheme at the time of declaration of such IDCW.</p> <p>Investors should note that, when the Mutual Fund declares a IDCW under the Scheme, the dividend payments shall be dispatched within 15 days from the record date. The requirement of giving notice & the above laid procedure shall not be compulsory for Scheme/plan/option having frequency of IDCW distribution from daily upto monthly IDCW.</p> <p>• Effect of IDCWs:</p> <p>When IDCWs are declared and paid under the Scheme, the net assets attributable to Unit holders in the IDCW Option will stand reduced by the IDCW amount subject to TDS and statutory levy if any. The Mutual Fund, on a best effort basis, and after scrutinising the names of the banks where Unit holders have their accounts, will enable direct credit/RTGS/NEFT/ to the Unit holders' bank accounts.</p> <p>While the preferred mode of payment is through EFT route, the AMC is at the sole discretion to pay IDCW by any other means (including at par cheques and demand drafts, where the EFT facility is not available in a particular city or Bank or as the Trusteeship Company or the AMC deems fit in the interest of investors.)</p> <p>All the IDCW payments shall be in accordance and compliance with SEBI Regulations, as amended from time to time.</p> <p>If Unit holders have opted for Payout of Income Distribution cum capital withdrawal option Option, if the IDCW amount payable to such Unit holders (net of tax deducted at source, wherever applicable) is less than or equal to Rs. 250, following treatment shall be:</p> <ul style="list-style-type: none"> • Where the option to payout IDCW is available in electronic mode: The IDCW amount shall be paid to the Unit holders. The Switch will be effected by way of a redemption of Units from the Scheme / Plan/Option and a reinvestment of the redemption proceeds in an open-ended Scheme / Plan/Option and accordingly, to be effective, the switch must comply with the redemption rules of the Scheme and the issue rules of the other Scheme (for e.g. applicable cut off time & NAV, minimum amount to be subscribed/ redeemed, Entry/ Exit Load etc.).
