Clause 3 of Sixth Schedule of SEBI (Mutual Funds) Regulations 2026, read with Para 13.14.1 SEBI Master Circular for Mutual Funds dated March 20, 2026.

Timelines for deployment of funds collected in NFO:

In line with clause 7.24 of SEBI Master Circular for Mutual Funds dated March 20, 2026, funds collected in new fund offer shall be deployed in the following manner:

1. The AMC shall deploy the funds garnered in an NFO within 30 business days from the date of allotment of units.
2. In an exceptional case, if the AMC is not able to deploy the funds in 30 business days, reasons in writing, including details of efforts taken to deploy the funds, shall be placed before the Investment Committee of the AMC.
3. The Investment Committee may extend the timeline by 30 business days, while also making recommendations on how to ensure deployment within 30 business days going forward and monitoring the same. The Investment Committee shall examine the root cause for delay in deployment before granting approval for part or full extension. The Investment Committee shall not ordinarily give part or full extension where the assets for any Investment strategy are liquid and readily available.
4. In case the funds are not deployed as per the asset allocation mentioned in the SID as per the aforesaid mandated plus extended timelines, AMC shall:
 - (i) not be permitted to receive fresh flows in the same Investment strategy till the time the funds are deployed as per the asset allocation mentioned in the SID.

- (ii) not be permitted to levy exit load, if any, on the investors exiting such Investment strategy(s) after 60 business days of not complying with the asset allocation of the Investment strategy.
- (iii) inform all investors of the NFO, about the option of an exit from the concerned Investment strategy without exit load, via email, SMS or other similar mode of communication.
- (iv) report deviation, if any, to Trustees at each of the above stages.

Rebalancing due to Short Term Defensive Consideration:

Due to market conditions, the AMC may invest beyond the range set out in the asset allocation. Such deviations shall normally be for a short term and defensive considerations as per Para 1.9.1.b of SEBI Master Circular on Mutual Funds dated March 20, 2026, and the fund manager will rebalance the portfolio within 30 calendar days from the date of deviation.

Rebalancing due to Passive Breaches:

Further, as per Para 3.11 of SEBI Master Circular on Mutual Funds dated March 20, 2026, as may be amended from time to time, in the event of deviation from mandated asset allocation due to passive breaches (occurrence of instances not arising out of omission and commission of the AMC), the fund manager shall rebalance the portfolio of the Investment strategy within 30 Business Days. In case the portfolio of the Investment strategy is not rebalanced within the period of 30 Business Days, justification in writing, including details of efforts taken to rebalance the portfolio shall be placed before the Investment Committee of the AMC. The Investment Committee, if it so desires, can extend the timeline for rebalancing up to sixty (60) Business Days from the date of completion of mandated rebalancing period. Further, in case the portfolio is not rebalanced within the aforementioned mandated plus extended timelines the AMC shall comply with the prescribed restrictions, the reporting and disclosure requirements as specified in Para 3.11 of the Master Circular on Mutual Funds dated March 20, 2026.

Cash or cash equivalents with residual maturity of less than 91 days may be treated as not creating any exposure. AMFI vide letter dated November 3, 2021 has clarified that Cash Equivalent shall consist of Government Securities, T-Bills and Repo on Government Securities Apart from the above investment restrictions, the Investment Strategy may follow certain internal norms vis-à-vis limiting exposure to scrips, sectors etc., within the above mentioned restrictions, and these are subject to review from time to time.

Investment in overseas securities shall be made in accordance with the requirements stipulated by SEBI and RBI from time to time. The Investment strategy may also enter into repurchase and reverse repurchase in various securities as per the guidelines and regulations applicable to such transactions

C. WHAT IS THE INVESTMENT APPROACH?

Altiva Equity Ex-top 100 Long-Short Fund is an open ended investment strategy, predominantly investing in equity and equity related instruments of Ex – top 100 stocks. Ex-top 100 companies shall be all companies other than large cap companies. The Large cap companies as identified and disclosed by AMFI, shall be considered. Currently, as per paragraph 3.9 of the Master Circular, Large Cap companies are defined as 1st – 100th company in terms of full market capitalization. Mutual Funds are required to follow the list of stocks provided by AMFI in this regard.

The investment approach will be bottom-up stock picking – where investments will be selected primarily on the basis of specific criteria relevant to the company in question rather than general macroeconomic considerations and will focus on the fundamentals of the business, industry structure, quality of management and key earnings drivers. There will be no particular bias towards any sector.

The Investment strategy may adopt defensive or opportunistic strategies in order to meet the Investment strategy objective. Both short and long exposures may be held through stocks, basket of stocks and various stock/ index derivatives. The investment strategy can use various derivative instruments for the purpose of hedging, portfolio balancing and other purposes, as permitted under the Regulations.

The investment strategy can have up to 25% unhedged short exposure in permissible exchange traded derivative instruments like Stock / Index Futures or Options in equity and equity related instruments of Ex – top 100 stocks.

The Investment strategy may also invest up to 30% in overseas markets in equity & equity related instruments including Global Depository Receipts (GDRs), ADRs, foreign securities, bonds, mutual funds, ETFs and such other instruments as may be allowed under the Regulations from time to time.

The Investment strategy may invest in the mutual fund schemes managed by the AMC or in the schemes of any other Mutual Funds in terms of the prevailing Regulations. As per the Regulations, no investment management fees will be charged for such investments.

The Investment strategy may also invest in Debt & Money Market Securities/Instruments and Units of Debt Mutual Fund Investment Strategy.

The investment strategy may also undertake repo transactions in corporate debt securities in accordance with the directions issued by RBI and SEBI from time to time. Such investment shall be made subject to the guidelines which may be prescribed.

The investment strategy may invest in units issued by InvITs and other permissible asset classes.

The investment strategy may undertake following derivative strategies:

Strategy	Explanation
Equity Arbitrage	Short Futures against the underlying stock
Covered Calls	Short Call Option against the underlying stock
Pair Trade using Future/Options	Trade a pair of strongly correlated stocks of the same industry by taking a long position in one and a short position in another when the spread increases
Portfolio Hedging with Index Options	Buying Index Put Option to hedge the Equity portfolio
Portfolio Hedging with Index Future	Shorting Index Future to hedge the Equity Portfolio
Protective Stock Puts	Buying Puts against underlying stock
Protective Stock Calls	Long Calls against Short Stock Future
Short Call	Short a call option, profiting if the asset price is below strike price
Short Put	Short a put option, profiting if the asset price is above strike price
Long Put Option	Buying a put option to profit from decline in the asset price
Long Call Option	Buying a Call option to profit from advance in the asset price
Long Futures	Buying Futures to profit from advance in the asset price
Short Futures	Shorting Futures to profit from decline in the asset price

Bear Put Spread	Buy a put at higher strike price and Short a put at lower strike price. Profit if the asset price is below the lower strike price
Bear Call Spread	Short a Call at lower strike price and Buy a Call at higher strike price. Profit if the asset price stays below the lower strike price
Shorting Straddle / Strangle	Shorting Put and Call options to profit from the asset prices remaining range-bound

It may be noted that the above list of derivative strategies is for illustration purpose and additional derivative strategies may be undertaken/ introduced based on evolving market conditions.

Risk Control:

The Fund shall invest in a diversified basket of equity stocks, debt and money market instruments along with a portion of fund invested in initial/primary market offerings/ FPOs. This allocation will be steadily monitored, and it shall be ensured that investments are made in accordance with the Investment strategy objective and within the regulatory and internal investment restrictions prescribed from time to time. Diversification across sectors/companies at the time of investments shall also manage the risk. The Investment strategy has designed a detailed process to identify, measure, monitor and manage the portfolio risk. The aim is not to eliminate the risk completely but to have a structured mechanism towards risk management thereby maximizing potential opportunities and minimize the adverse effects of risk.

• **Portfolio Turnover:**

The Investment Strategy will endeavour to keep the portfolio turnover reasonable. However, the portfolio turnover ratio may vary as the Investment strategy may change the portfolio according to Asset Allocation to align itself with the objectives of the Investment Strategy. The effect of higher portfolio turnover could be higher brokerage and transaction costs.

D. HOW WILL THE INVESTMENT STRATEGY BENCHMARK ITS PERFORMANCE?

Benchmark (Total Returns Index): Nifty 500 TRI

Justification on use of Benchmark - The selected benchmark is comparable with the investment objective of the fund. It offers broad market representation, covering India's top 500 companies by market capitalization across large-, mid and small-cap stocks, aligning with the diverse investment universe of the fund.

The AMC/Trustees reserves the right to change benchmark in future for measuring performance of the Investment

PART III- OTHER DETAILS

A. COMPUTATION OF NAV

The AMC will prominently calculate and disclose the first NAV under the Investment Strategy not later than 5 Business Days from the date of allotment.

Subsequently, the AMC shall update the NAV under a separate head on its website (<https://www.edelweissmf.com/altivasif>) and on the Association of Mutual Funds of India (AMFI) website (www.amfiindia.com). The NAVs will be normally updated on the websites by 11.00 p.m.* on every Business Day.

***Notes:**

- The investment strategy is permitted to take exposure to overseas securities. In case where the Investment Strategy has taken exposure to overseas securities, the NAV of the investment strategy would be declared by 10:00 a.m. on the following business day.
- In case the investment strategy ceases to hold exposure to any overseas securities during the business day, NAV of the investment strategy for that day would continue to be declared on 10:00 a.m. on the following business day, Subsequent to that day, NAV of the investment strategy shall be declared on 11:00 p.m., on the same day.

The NAV shall be calculated in accordance with the following formula, or such other formula as may be prescribed by SEBI from time to time:

$$\text{NAV} = \frac{\text{Market or Fair Value of the Investment Strategy's Investments+ Receivables+ Accrued Income+ Other Assets- Accrued Expenses- Payables- Other Liabilities}}{\text{Number of Units Outstandings}}$$

The NAV of the Investment strategy will be calculated and declared upto Four decimal places & the fourth decimal will be rounded off higher to the next digit if the fifth decimal is or more than 5 i.e., if the NAV is Rs. 10.45347 it will be rounded off to Rs. 10.4535.

Illustration of NAV:

If the net assets of the Investment strategy, after considering applicable expenses, are Rs. 10,45,34,700.00 and units outstanding are 1,00,00,000, then the NAV per unit will be computed as follows: 10,45,34,700.00 / 100,00,000 = Rs. 10.4535 per unit (rounded off to four decimals).

The SIF will ensure that the repurchase price will not be lower than 95% of the Applicable NAV.

For other details such as policies w.r.t computation of NAV, rounding off, procedure in case of delay in disclosure of NAV etc. refer to SAI.

B. NEW FUND OFFER (NFO) EXPENSES

These expenses are incurred for the purpose of various activities related to the NFO like sales and distribution fees, marketing and advertising, registrar expenses, printing and stationery, bank charges etc. In accordance with the provisions of SEBI Circular, no New Fund Offer Expenses will be charged to the Investment strategy. The NFO expenses for launch of Investment Strategy will be borne by the AMC.

C. ANNUAL RECURRING EXPENSES

These are the fees and expenses for operating the Investment strategy. These expenses include Investment Management and Advisory Fee charged by the AMC, Registrar and Transfer Agents' fee, marketing and selling costs etc. as given in the table below:

The AMC has estimated the following recurring expenses of the daily net assets of the Investment strategy that will be charged to the Investment strategy as expenses. For the actual current expenses being charged, the investor should refer to the website of the Altiva SIF viz <https://www.edelweissmf.com/altivasif/statutory/total-expense-of-altiva-sif-scheme>. Any change in the current expense ratios will be updated on the website and the same will be communicated to the investor via SMS / e-mail 3 working days prior to the effective date of change.

BER for the Segregated Portfolio

- 1) AMC shall not charge investment and advisory fees on the segregated portfolio. However, BER (excluding the investment and advisory fees) can be charged, on a pro-rata basis only upon recovery of the investments in segregated portfolio.
- 2) The BER so levied shall not exceed the simple average of such expenses (excluding the investment and advisory fees) charged on daily basis on the main portfolio (in percentage terms) during the period for which the segregated portfolio was in existence.
- 3) The legal charges related to recovery of the investments of the segregated portfolio may be charged to the segregated portfolio in proportion to the amount of recovery. However, the same shall be within the maximum BER limit as applicable to the main portfolio. The legal charges in excess of the BER limits, if any, shall be borne by the AMC.
- 4) The costs related to segregated portfolio shall in no case be charged to the main portfolio.

D. LOAD STRUCTURE

Exit Load is an amount which is paid by the investor to redeem the units from the Investment strategy. Load amounts

are variable and are subject to change from time to time. For the current applicable structure, investors may refer the website of the SIF <https://www.edelweissmf.com/altivasif> or call at 1800 425 0090 (MTNL/BSNL) and non-toll-free number +91 40 23001181 or may contact their distributor.

Applicable Load Structure:

Type of Load	Load chargeable (as %age of NAV)
Exit Load	<p>- If the units are redeemed/switched out on or before 90 days from the date of allotment – 0.50% of the applicable NAV.</p> <p>- If the units are redeemed/switched out after 90 days from the date of allotment – Nil</p> <p>AMC reserves the right to revise the load structure from time to time. Such changes will become effective prospectively from the date such changes are incorporated.</p>

Units allotted on reinvestment of IDCWs shall not be subject to load.

The upfront commission shall be paid by the investor directly to the ARN Holder based on the investor's assessment of various factors including service rendered by the ARN Holder.

Please Note that:

- Exit Load will be applicable for inter Investment strategy switches as well as special products under the Investment strategy such as switch-outs/systematic transfer between the Investment strategy of Altiva Specialized Investment Fund.
- No exit load shall be levied in case of switch of units from Direct Plan to - Regular Plan and vice versa. However, after the switch, exit load under the Investment strategy prevailing on the date of switch shall apply for subsequent redemptions/switch out from Altiva Equity Ex-Top 100 Long-Short Fund.
- Bonus Units and Units issued on reinvestment of IDCWs shall not be subject to exit load.
- The normal load structure will be applicable in case of Special Products (SIP/STP/SWP) unless otherwise specified.
- The AMC shall ensure the repurchase price will not be lower than 95% of the Applicable NAV.
- For any change in load structure, the AMC will issue an addendum and display it on the website/Investor Service Centres.

Investors may note that the Trustee has the right to modify the existing load structure, subject to a maximum as prescribed under the SEBI (MF) Regulations. Any imposition or enhancement in the load shall be applicable on prospective investments only. At the time of changing the load structure, the AMC shall consider the following measures to avoid complaints from investors about investment in the Investment strategy without knowing the loads:

- (i) Addendum detailing the changes will be attached to the ISID and Key Information Memorandum (KIM). The addendum shall be circulated to all the distributors/brokers so that the same can be attached to ISID and KIM already in stock.
- (ii) Arrangements will be made to display the addendum to the ISID in the form of a notice in all the ISCs/offices of the AMC/Registrar.

Investors are advised to contact any of the Investor Service Centres or the AMC to know the latest position on Exit Load structure prior to investing in the Investment strategy.

I. INTRODUCTION

A. DEFINITIONS/INTERPRETATION

For detailed description please refer -

<https://www.edelweissmf.com/altivaSIF/docs/Definition.pdf>

B. RISK FACTORS

Investment Strategy specific risk factors:

a) Risks associated with investing in Equity, Equity related Securities and units of REITs:

- The investment strategy may invest in instruments where the volume of transactions may fluctuate significantly depending on the market sentiment. There is a risk that investments made by the Investment strategy may become less liquid in response to market developments or adverse investor perceptions. In extreme market situations, there may be no willing buyer, and the investments cannot be readily sold at the desired time or price, and the Investment strategy may have to accept a lower price when selling the investments or may not be able to sell the investments at all. An inability to sell a portfolio position can adversely affect the investment strategy's value or prevent the strategy from being able to take advantage of other investment opportunities.
- The value of the investments may be affected by factors affecting the Securities markets such as price and volume volatility in the capital markets, interest rates, currency exchange rates, changes in law/policies of the government, taxation laws and political, economic or other developments which may have an adverse bearing on individual Securities, a specific sector or all sectors. Consequently, the NAV of the Units may be affected.
- Equity Securities and equity-related Securities are volatile and prone to price fluctuations on a daily basis. The liquidity of investments made by the investment strategy may be restricted by trading volumes and settlement periods. This may impact the ability of the Unit Holders to redeem their Units. In view of this, the Trustee has the right, in its sole discretion, to limit Redemptions (including suspending Redemption) in certain circumstances. The inability of the investment strategy to make intended Securities purchases, due to settlement problems, could cause the investment strategy to miss certain investment opportunities. Similarly, the inability to sell Securities held in the portfolio could result, at times, in potential losses to the investment strategy, should there be a subsequent decline in the value of Securities held in the investment strategy.
- SIF may not be able to sell or lend securities when required, which may result in temporary illiquidity. Securities lending involves certain inherent risks, including the risk that the counterparty, namely the approved intermediary, may fail to comply with the terms of the securities lending agreement. Such failure may result in loss of rights to the collateral, the inability of the approved intermediary to return the securities deposited by SIF, and the potential loss of any corporate benefits accruing to such securities.
- Investments in equity and equity related Securities involve a degree of risk and investors should not invest in the investment strategy unless they can afford to take the risk of losing their investment.
- The value of the units of the REIT is influenced by prevailing interest rates. Generally, an increase in interest rates may result in a decline in the value of the units, while a decrease in interest rates may lead to an increase in their value. Accordingly, the market price of the units is susceptible to fluctuations in interest rates.
- The liquidity and valuation of the investments due to its holdings of unlisted Securities may be affected if they have to be sold prior to the target date for divestment.
- Securities which are not quoted on stock exchanges are inherently illiquid in nature and carry a larger liquidity risk in comparison with Securities that are listed on the stock exchanges or offer other exit options to the investors, including put options. The investment strategy may choose to invest the assets of the Investment strategy in unlisted Securities that offer attractive yields within the regulatory limit. This may however increase the risks of the

investment strategy.

b) Risk associated with equity investments in Ex-top 100 companies:

While investments in Ex-Top 100 companies may offer substantial opportunities for capital growth, they also involve a higher degree of risk and should be regarded as speculative. Historically, securities of Ex-Top 100 companies have exhibited greater price volatility and lower liquidity compared to securities of Top 100 companies, particularly over the short term.

In addition, Ex-Top 100 companies may lack depth of management, may be unable to generate sufficient funds necessary for growth or development, and may have limited product lines. Such companies may also be in the process of developing or marketing new products or services for which markets are not yet established and may never become established.

Ex-Top 100 companies may be particularly sensitive to increases in interest rates, as they may face greater difficulty in borrowing funds to continue or expand operations, or in servicing and repaying loans, especially those with floating interest rates.

c) Risks associated with investing in Debt and Money Market Instruments:

- **Interest rate Risk:** Price of a fixed income instrument generally falls when the interest rates move up and vice-versa. The extent of fall or rise in the prices depends upon the coupon and maturity of the security. It also depends upon the yield level at which the security is being traded. The NAV of the Investment strategy is expected to increase from a fall in interest rates while it would be adversely affected by an increase in the level of interest rates.
- **Credit risk or default Risk:** Credit risk is the risk that the issuer of a debenture/ bond or a money market instrument may default on interest and/or principal payment obligations. Even when there is no default, the price of a security may change with expected changes in the credit rating of the issuer. It is to be noted here that Government Security is a sovereign security and is the safest. Corporate bonds carry a higher amount of credit risk than Government Securities. Within corporate bonds also there are different levels of safety, and a bond rated higher by a particular rating agency is safer than a bond rated lower by the same rating agency.
- **Liquidity & Settlement Risk:** The liquidity of fixed income security may change, depending on market conditions, leading to changes in the liquidity premium attached to the price of such securities. At the time of selling the security, the security can become illiquid, leading to loss in value of the portfolio. Different segments of the financial markets have different settlement cycle/periods, and such settlement cycle/periods may be impacted by unforeseen circumstances, leading to Settlement Risk. This can adversely affect the ability of the Fund to swiftly execute trading strategies which can lead to adverse movements in NAV.
- **Regulatory Risk:** Changes in government policy in general and changes in tax benefits applicable to SIFs may impact the returns to investors in the Investment strategy.
- **Reinvestment Risk:** Interest rates may vary from time to time. The rate at which intermediate cash flows are reinvested may differ from the original interest rates on the security, which can affect the total earnings from the security.
- **Performance Risk:** Performance of the Investment strategy may be impacted with changes in factors which affect the capital market, and particularly the debt market.
- **Prepayment Risk:** The Investment strategy may receive payment of monthly cashflows earlier than scheduled, which may result in reinvestment risk.
- **Market Risk:** Lower rated or unrated securities are more likely to react to developments affecting the market as they tend to be more sensitive to changes in economic conditions than higher rated securities.

d) Risk factors associated with Derivatives:

Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the Fund Manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of fund manager may not always be profitable. No assurance can be given that the fund manager will

be able to identify or execute such strategies.

The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments.

Trading in derivatives has the following risks:

- An exposure to derivatives in excess of the hedging requirements can lead to losses.
- An exposure to derivatives, when used for hedging purpose, can also limit the profits from a genuine investment transaction.
- Derivatives carry the risk of adverse changes in the market price.
- Illiquidity Risk i.e. risk that a derivative trade may not be executed or reversed quickly enough at a fair price, due to lack of liquidity in the market.

The Investment strategy may use derivatives instruments like equity futures & options, or other derivative instruments as permitted under the Regulations and Guidelines. Usage of derivatives will expose the Investment strategy to liquidity risk, open position risk, and opportunities risk etc. Such risks include the risk of mispricing or improper valuation and the inability of derivatives to correlate perfectly with underlying assets, rates and indices. In case of the derivative strategies, it may not be possible to square off the cash position against the corresponding derivative position at the exact closing price available in the Value Weighted Average Period. Debt derivatives instruments like interest rate swaps, forward rate agreements or other derivative instruments also involve certain risks.

The investment strategy may use derivative instruments of Ex-top 100 companies, which may have lower liquidity and higher volatility compared to similar derivative instruments of Top 100 companies. Further, all the companies in Ex-top 100 category may not have derivative instruments available on the exchanges.

- e) **Risk associated with unhedged derivative positions:** The investment strategy can invest in unhedged derivative positions. The following are the risk associated with the same:

1. Market Risk

Unhedged derivatives are highly sensitive to market fluctuations. A sudden adverse movement in the underlying asset's price can lead to substantial losses. For instance, in India's exchange-traded rupee options market, brokers demanded clients provide proof of underlying exposure for their derivative contracts or unwind their positions, leading to significant turmoil and forced position unwinding

2. Leverage Risk

Derivatives often involve leverage, allowing investors to control a large position with a relatively small amount of capital. While this can amplify gains, it also magnifies losses if the market moves unfavorably. In the Indian equity derivatives market, traders making unhedged bets were required to pay higher margins, with margin calls shooting up to 20–25%, highlighting the amplified risks of unhedged positions.

3. Liquidity Risk

Unhedged positions may be harder to exit, especially in illiquid markets. In times of market stress, the inability to sell or offset positions at desired prices can lead to significant losses. This was evident in the forced unwinding of positions in India's rupee options market, where drying liquidity and wider bid-ask spreads caused market anomalies

4. Counterparty Risk

In over-the-counter (OTC) derivatives, there's a risk that the counterparty may default on its obligations. This can lead to financial losses if the counterparty fails to meet its contractual commitments.

5. Operational Risk

Errors in trade execution, settlement, or system failures can lead to unintended exposures and losses. Inadequate risk management practices or technological failures can exacerbate these risks.

f) **Risk associated with derivative strategies:**

- **Pricing and Valuation Risk:** Derivative instruments may be mispriced or improperly valued due to market conditions, lack of liquidity, or model-related limitations. Further, derivatives may not always exhibit a perfect correlation with the underlying assets, interest rates, or indices.
- **Execution Risk:** The prices displayed on trading screens may differ from the actual execution prices due to market volatility, liquidity constraints, or delays in order execution.
- **Basis Risk:** This risk arises when the derivative instrument used to hedge the underlying asset does not match the movement of the underlying asset being hedged
- **Margin Risk:** Exchanges could raise the initial margin, variation margin or other forms of margin on derivative contracts, impose one-sided margins or insist that margins be placed in cash. All of these might force positions to be unwound at a loss and might materially impact returns.
- **Counterparty Risk:** The derivative contracts at times are undertaken with various counterparties. These counterparties may not be able to meet the obligations under such derivative contracts. This would lead to credit risk in derivative transactions. Hence, derivative trades are undertaken with approved counterparties or through exchanges. This mitigates credit risk on derivative transactions.

j) **Risks Associated with exposure in Tri-party Repo:**

Risk of exposure in the Tri-party Repo settlement Segment provided by CCIL emanates mainly on two counts –

- Risk of failure by a lender to meet its obligations to make funds available or by a borrower to accept funds by providing adequate security at the settlement of the original trade of lending and borrowing under Triparty Repo transaction.
- Risk of default by a borrower in repayment.

k) **Risks Associated with Stock Lending Risks associated With Stock Lending:**

The risks in lending portfolio securities, as with other extensions of credit, consist of the failure of another party, in this case the approved intermediary, to comply with the terms of agreement entered between the lender of securities and the approved intermediary. Such failure to comply can result in the possible loss of rights in the collateral put up by the borrower of the securities, the inability of the approved intermediary to return the securities deposited by the lender and the possible loss of any corporate benefits accruing to the lender from the securities deposited with the approved intermediary. It may be noted that this activity would have the inherent probability of collateral value drastically falling in times of strong downward market trends, rendering the value of collateral inadequate until such time as that diminution in value is replenished by additional security. It is also possible that the borrowing party and/or the approved intermediary may suddenly suffer severe business setbacks and become unable to honor its commitments. This, along with a simultaneous fall in value of collateral would render potential loss to the Investment strategy. Besides, there can be temporary illiquidity of the securities that are lent out and the Investment strategy will not be able to sell such lent-out securities until they are returned. There is also a possibility of opportunity loss.

l) **Risk factors associated with Repo transactions in Corporate Debt:**

i) **Lending transactions:**

The Investment strategy may be exposed to counterparty risk in case of repo lending transactions in the event of the counterparty failing to honor the repurchase agreement. However, in repo lending transactions, the collateral may be sold, and a loss is realized only if the sale price is less than the repo amount. The risk may be further mitigated through over-collateralization (the value of the collateral being more than the repo amount). Further, the liquidation of underlying securities in case of counterparty default would depend on liquidity of the securities and market conditions at that time. It is endeavored to mitigate the risk by following an appropriate counterparty selection process, which includes their credit profile evaluation and over-collateralization to cushion the impact of market risk

on sale of underlying security.

ii) Borrowing transactions:

In the event of the Investment strategy being unable to pay back the money to the counterparty as contracted, the counter party may dispose of the assets (as they have sufficient margin). This risk is normally mitigated by better cash flow planning to take care of such repayments. Further, there is also a Credit Risk that the Counterparty may fail to return the security or Interest received on due date. It is endeavored to mitigate the risk by following an appropriate counterparty selection process, which includes their credit profile evaluation

m) Risks associated with writing covered call options for equity shares:

- Writing call options are highly specialized activities and entail higher than ordinary investment risks. In such an investment strategy, the profits from call option writing are capped at the option premium, however the downside depends upon the increase in value of the underlying equity shares. This downside risk is reduced by writing covered call options.
- The Investment strategy may write covered call options only in case it has an adequate number of underlying equity shares as per regulatory requirement. This would lead to setting aside a portion of investment in underlying equity shares. If the covered call options are sold to the maximum extent allowed by regulatory authority, the investment strategy may not be able to sell the underlying equity shares immediately if the view changes to sell and exit the stock. The covered call options need to be unwound before the stock positions can be liquidated. This may lead to a loss of opportunity or can cause exit issues if the strike price at which the call option contracts have been written become illiquid. Hence, the investment strategy may not be able to sell the underlying equity shares, which can lead to temporary illiquidity of the underlying equity shares and result in loss of opportunity.
- The writing of the covered call option would lead to loss of opportunity due to appreciation in value of the underlying equity shares. Hence, when the appreciation in equity share price is higher than the option premium received the investment strategy will be at a loss.
- The total gross exposure related to option premium paid and received must not exceed the regulatory limits of the net assets of the Investment strategy. This may restrict the ability of Investment strategy to buy any options.

n) Risk Factors Associated with Investments in Foreign Securities/Overseas Mutual Funds/Overseas ETFs:

Investments in International (overseas) securities including Exchange Traded Funds involves increased risk and volatility, not typically associated with domestic investing,

Some of the risks associated are:

- Changes in currency exchange rates
- Foreign government regulations
- Differences in auditing and accounting standards
- Political and economic instability
- Liquidity and volatile prices
- Economic deterioration, and changes in bi-lateral relationships.

The investment in overseas securities and overseas ETFs is subject to compliance with the industry-wide limit as stipulated by RBI/SEBI from time to time. The Investment strategy may not be able to make investment in overseas securities and overseas ETFs in case of breach of such industry-wide overseas limits. In such a situation, the performance of the Investment strategy could be affected.

o) Risk Factors Associated with Investments in Infrastructure Investment Trusts (InvITs):

- **Market Risk:** InvITs are volatile and prone to price fluctuations on a daily basis owing to market movements. Investors may note that Fund Manager's investment decisions may not always be profitable, as actual market movements may be at variance with the anticipated trends. The NAV of the Investment strategy is vulnerable to movements in the prices of securities invested by the Investment strategy, due to various market related factors like changes in the general market conditions, factors and forces affecting capital market, level of interest rates, trading

volumes, settlement periods and transfer procedures.

- **Liquidity Risk:** As the liquidity of the investments made by the Investment strategy(s) could, at times, be restricted by trading volumes and settlement periods, the time taken by the SIF for liquidating the investments in the Investment strategy may be high in the event of immediate redemption requirement. Investment in such securities may lead to an increase in the fund portfolio risk.
- **Reinvestment Risk:** Investments in InvITs may carry reinvestment risk as there could be repatriation of funds by the Trusts in form of buyback of units or dividend pay-outs, etc. Consequently, the proceeds may get invested in assets providing lower returns.
- **Interest Rate Risk:** The value of the units of InvITs is influenced by prevailing interest rates. An increase in interest rates may lead to a decline in the value of the units, while a decrease in interest rates may result in an increase in their value. Accordingly, the market price of the units of InvITs is susceptible to fluctuations in interest rates.
- **Regulatory Risk:** InvITs operate under a defined regulatory framework. Any changes in government policies, tax laws, or regulations issued by SEBI may materially affect the structure, returns, and compliance requirements of InvITs.

The above are some of the common risks associated with investments in InvITs. There can be no assurance that a fund's investment objectives will be achieved, or that there will be no loss of capital. Investment results may vary substantially on a monthly, quarterly or annual basis.

p) Risk Factors Associated with Investments in Securitised Debt:

Investing in securitized debt carries several risks due to the nature of these instruments. These risks include:

- **Credit Risk:** The underlying assets in securitized debt may suffer from defaults, leading to a loss of principal or interest. The risk is particularly significant if the pool of underlying loans, such as mortgages or consumer loans, experiences high levels of non-payment.
- **Liquidity Risk:** Securitised debt instruments may not be as liquid as other debt securities. The market for these securities can be limited, especially during times of market stress, making it harder to buy or sell them at favorable prices.
- **Prepayment Risk:** Many securitized debt instruments are subject to prepayment risk, meaning that the underlying borrowers may repay their loans earlier than expected. This can result in reinvestment risk, where the returns from the early repayments may be lower than anticipated.
- **Market Risk:** Securitised debt securities are affected by changes in market conditions, such as interest rates or economic factors, which can impact their value and performance.
- **Structural Risk:** Securitised debt involves pooling various assets into a single security, and different tranches (or layers) of the security may carry different risk profiles. Investors in lower-rated tranches may be exposed to higher risk in the event of defaults within the underlying assets.
- **Legal and Regulatory Risk:** Changes in laws or regulations, especially related to the underlying assets (such as mortgages), can impact the performance of securitized debt. Inadequate legal frameworks or enforcement can also affect the recovery in case of defaults.

q) Risks associated with investments in units of mutual funds:

- Investment in the units of the Underlying Funds involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal.
- As the price / value / interest rates of the securities in which the Underlying Funds invest fluctuates, the value of the Fund's investment in the Underlying Funds may go up or down.

- The Fund's investment in the Underlying Funds will be subject to market and other risks and there can be no guarantee against loss resulting from an investment in the Underlying Funds nor can there be any assurance that the Underlying Funds' objectives will be achieved.
- The past performance of the Sponsor / AMC / Mutual Fund does not guarantee future performance of the Underlying Funds.
- The name of the Underlying Funds does not in any manner indicate either the quality of the Underlying Funds or its future prospects and returns.
- The sponsor of the Underlying Funds is not responsible or liable for any loss resulting from the operation of the Underlying Funds beyond the initial contribution of INR 1,00,000 (One Lakh - Rupees) made by it towards setting up the Mutual Fund.
- The Underlying Funds is not a guaranteed or assured return Investment strategy.

r) Risk Factors Associated with Investments in Debt Instruments with SO / CE:

- **Credit Risk:** The effectiveness of a credit enhancement (e.g., guarantee, letter of credit, insurance) depends on the creditworthiness of the enhancing entity. If the guarantor or insurer defaults, the instrument may lose its enhanced credit quality.
- **Structural Complexity Risk:** Structural enhancements (e.g., senior/subordinated tranching, overcollateralization, reserve accounts) make the instrument's cash flows more complex. Misunderstanding the structure can lead to incorrect risk assessment. Complexity also reduces transparency.
- **Liquidity Risk:** Enhanced instruments are often structured and less liquid than traditional debt. Difficulty in selling the instrument in the secondary market, especially in stressed conditions.

s) Risk Factors Associated with Investments in Credit Default Swaps (CDS):

- **Model Risk:** Valuing CDS requires complex models, especially for spread curves, hazard rates, and correlation in CDS indices.
- **Liquidity Risk:** CDS markets can become illiquid, especially in times of market stress. Wide bid-ask spreads and difficulty exiting positions can lead to unexpected losses or mark-to-market issues.
- **Settlement Risk:** Following a credit event, settlement (especially physical settlement) can be operationally complex.

t) Risk Factors Associated with Investments in Perpetual Debt Instrument (PDI). Perpetual Debt instruments are issued by Banks, non-banking financial institutions (NBFCs) and corporates to improve their capital profile. Some of the PDIs issued by Banks which are governed by the Reserve Bank of India (RBI) guidelines for Basel III Capital Regulations are referred to as Additional Tier I (AT1 bonds). While there are no regulatory guidelines for issuance of PDIs by corporate bodies, NBFCs issue these bonds as per guidelines issued by RBI. The instruments are treated as perpetual in nature as there is no fixed maturity date. The key risks associated with these instruments are highlighted below:

- Risk on coupon servicing: i) Banks: As per the terms of the instruments, Banks may have discretion at all times to cancel distributions/payment of coupons ii) NBFCs: While NBFCs may have discretion at all times to cancel payment of coupon, coupon may also be deferred (instead of being cancelled), in case paying the coupon leads to breach of capital ratios. iii) Corporates: Corporates usually have discretion to defer the payment of coupon. However, the coupon is usually cumulative and any deferred coupon shall accrue interest at the original coupon rate of the PDI

Risk of write-down or conversion into equity: As per the regulatory requirements, Banks have to maintain a minimum Common Equity Tier-1 (CET-1) ratio of Risk Weighted Assets (RWAs), failing which the AT-1 bonds can get written down. Further, AT-1 Bonds are liable to be written down or converted to common equity, at the discretion

of RBI, in the event of Point of Non Viability Trigger (PONV). PONV is a point, determined by RBI, when a bank is deemed to have become non-viable unless there is a write off/ conversion to equity of AT-1 Bonds or a public sector capital injection happens. The write off/conversion has to occur prior to public sector injection of capital. This risk is not applicable in case of NBFCs and Corporates.

- Risk of instrument not being called by the Issuer: i) Banks: The issuing banks have an option to call back the instrument after minimum period as per the regulatory requirement from the date of issuance and specified period thereafter, subject to meeting the RBI guidelines. However, if the bank does not exercise the call on first call date, the Scheme may have to hold the instruments for a period beyond the first call exercise date. ii) NBFCs: The NBFC issuer has an option to call back the instrument after minimum period as per the regulatory requirement from date of issuance and specified period thereafter, subject to meeting the RBI guidelines. However, if the NBFC does not exercise the call option the Scheme may have to hold the instruments for a period beyond the first call exercise date. iii) Corporates: There is no minimum period for call date. However, if the corporate does not exercise the call option, the Scheme may have to hold the instruments for a period beyond the call exercise date.

C. RISK MITIGATION STRATEGIES:

The Investment strategy has designed a detailed process to identify, measure, monitor and manage the portfolio risk. The risk control process involves identifying & measuring the risk through various risk measurement tools. The aim is not to eliminate the risk completely but to have a structured mechanism towards risk management thereby maximizing potential opportunities and minimize the adverse effects of risk. Few of the key risks identified are:

Risk associated with Equity and Equity-related instruments:

Risk & Description specific to the Investment strategy	Risk mitigants / Management Strategy
<p>Market Risk The value of the Investment strategy's investments, may be affected generally by factors affecting securities markets, such as price and volume, volatility in the capital markets, interest rates, currency exchange rates, changes in policies of the Government, taxation laws or any other appropriate authority policies and other political and economic developments which may have an adverse bearing on individual securities, a specific sector or all sectors including equity and debt markets.</p>	<p>Market risk is a risk which is inherent to an equity Investment strategy. Understand the working of the markets and respond effectively to market movements. The Investment strategy may use derivatives to limit this risk.</p>
<p>Concentration risk Risk arising due to over exposure in few securities</p>	<p>Investing across the spectrum of issuers and keeping flexibility to invest across tenor</p>
<p>Derivatives Risk Various inherent risks arising because of investing in derivatives.</p>	<p>Continuous monitoring of the derivatives positions and strict adherence to the regulations and internal norms</p>
<p>Liquidity risk Risk arising due to inefficient Asset Liability Management, resulting in high impact costs</p>	<p>Control portfolio liquidity at portfolio construction stage. Having optimum mix of cash & cash equivalents along with the money market instruments in the portfolio as defined in asset allocations. The fund will try to maintain a proper asset-liability match to ensure redemption payments are made on time and not affected by illiquidity of the underlying stocks.</p>

Risk associated with debt and money market instruments:

Risk Category	Mitigation Strategy
Volatility Risk	Managed through diversification, reducing exposure to market fluctuations caused by factors like liquidity flows, economic policies, etc
Liquidity Risk	Government bonds, money market instruments and shorter maturity instruments are generally easier to sell vs. corporate bonds and other instruments. Liquidity risk will be managed by creating portfolios that are diversified across maturities, ratings, types of securities, etc
Credit Risk	Mitigated by investing in debt securities of companies with strong reputations, solid fundamentals, and financial stability. A comprehensive and in-depth credit evaluation of each issuer will be undertaken. The Investment strategy will endeavour to maintain adequate diversification across issuers / sectors / ratings in line with Investment strategy objectives, regulations and investment strategy
Interest rate Risk	Change in interest rate typically has a higher impact on high duration securities. As per the nature of the fund, investments will be in low duration securities. The AMC shall strive to actively manage the duration of the respective funds based on the prevailing market conditions / outlook of interest rates, keeping in mind the Investment strategy objectives, investment strategy and applicable regulations
Concentration Risk	The AMC will attempt to mitigate this risk by maintaining adequate diversification across issuers/ sectors / instrument type in line with the Investment strategy objectives, investment strategy and applicable regulations. This will also be managed by keeping prudent internal limits
Debt Derivatives Risk	Interest Rate Swaps will be done with approved counter parties under pre approved ISDA agreements. Mark to Market of swaps, netting off of cash flow and default provision clauses will be provided as per standard practice on a reciprocal basis. Interest Rate Swaps and other derivative instruments will be used as per local (RBI and SEBI) regulatory Guidelines

II. INFORMATION ABOUT THE INVESTMENT STRATEGY:

A. WHERE WILL THE INVESTMENT STRATEGY INVEST –

1. Investment in Equity and Equity related instruments:

The Investment strategy will invest in Equity and Equity related instruments inclusive of convertible debentures, equity warrants, convertible preference shares, equity derivatives and REITs etc.

2. Investment in Debt and Money Market securities:

The Investment strategy shall invest in a range of Debt & Money Market Instruments. Some of these instruments are:

- a. Securities created and issued by Governments of India and/or repos/ reverse repos in such Government Securities as may be permitted by RBI (including but not limited to coupon bearing bonds, zero coupon bonds and treasury bills).
- b. Securities guaranteed by the Central and State Governments (including but not limited to coupon bearing bonds, zero coupon bonds and treasury bills).
- c. Corporate debt securities and repo in corporate debt Securities (of both public and private sector undertakings)

including Bonds, Debentures, Notes, etc.

- d. Money Market instruments includes commercial papers, commercial bills, treasury bills, Tri-party repo, Government securities having an unexpired maturity up to one year, call or notice money, certificate of deposit, usance bills, and any other like instruments as specified by the Reserve Bank of India from time to time.
- e. Fixed Income Securities of domestic Government agencies and statutory bodies, which may or may not carry a Central/State Government guarantee.
- f. Certificate of Deposits (CDs).
- g. Commercial Paper (CPs).
- h. Securitized Debt Obligations.
- i. Special features debt instruments
- j. Debt Instruments with SO / CE
- k. Credit Default Swaps
- l. Any other domestic fixed income securities as permitted by SEBI/ RBI

The above-mentioned securities could be listed, secured, unsecured, rated, unrated and may be acquired through Primary, secondary market offerings, private placements, rights offer etc. Further, investments in debentures, bonds and other fixed income securities will usually be in instruments, which have been assigned investment grade ratings by an approved rating agency.

3. Investments in Derivative Instruments:

The Investment strategy may invest in Derivative Instruments to the extent permitted under Clause 8.5, 13.15 & 21.6. of SEBI Master Circular dated March 20, 2026 as amended from time to time. Derivative products are specialized instruments that require investment techniques and risk analysis different from those associated with stocks and bonds. The use of derivatives requires an understanding not only of the underlying instrument but also of the derivative instrument itself. The Investment strategy may use derivative instruments such as index futures and options, stock futures and options contracts, warrants, convertible securities, swap or forward rate agreements or any other derivative instruments that are permissible or may be permissible in future under applicable regulations and such investments shall be in accordance with the investment objective of the Investment strategy.

Index futures/options are meant to be an efficient way of buying/selling an index compared to buying/selling a portfolio of physical shares representing an index for ease of execution and settlement. Index futures/options can be an efficient way of achieving the Investment strategy's investment objective. Notwithstanding the pricing, they can help in reducing the Tracking Error in the Investment strategy. Index futures/options may avoid the need for trading in individual components of the index, which may not be possible at times, keeping in mind the circuit filter system and the liquidity in some of the individual stocks. Index futures/options can also be helpful in reducing the transaction costs and the processing costs on account of ease of execution of one trade compared to several trades of shares comprising the Underlying Index and will be easy to settle compared to physical portfolio of shares representing the Underlying Index. In case of investments in index futures/options, the risk/reward would be the same as investments in portfolio of shares representing an index. However, there may be a cost attached to buying an index future/option. Further, there could be an element of settlement risk, which could be different from the risk in settling physical shares. This settlement risk is likely to be minimized if the exchange acts as the clearing corporation and the counter party, as is the practice in the developed markets. The Investment strategy will not maintain any leveraged or trading positions.

• Investments in units of Infrastructure Investment Trusts (InvITs):

In accordance with Clause 21.5 read with Clause 13.13.5 of the SEBI Master Circular dated March 20, 2026, the Investment strategy may invest in units of Infrastructure Investment Trusts (InvITs) within the stipulated investment

limits.

• **Investments in the Schemes of Mutual Fund:**

The Investment strategy may invest in units of the schemes managed by the AMC, provided it is in conformity with the investment objectives of the Investment strategy and in terms of the prevailing SEBI Regulations. As per SEBI Regulations, no Investment Management fees will be charged for such investments and the aggregate inter Investment strategy investment made by all Investment strategies in the schemes of the Mutual Fund shall not exceed 5% of the Net Asset Value of the Mutual Fund / SIF.

4. In accordance with clause 13.11. of SEBI's Master Circulars dated March 20, 2026 the following conditions shall apply to the Investment strategy's participation in the overseas investments. Please note that the investment restrictions applicable to the Investment strategy's participation in overseas investments will be as prescribed or varied by SEBI or by the Trustee (subject to SEBI requirements) from time to time. The SEBI Regulations pertaining to investment in ADRs / GDRs / foreign Securities and overseas ETFs by mutual funds / SIFs have now been decided as follows:

The aggregate ceiling for overseas investments is USD 7 billion as per the above SEBI circulars. Within the overall limit of USD 7 billion, mutual funds can make overseas investments subject to a maximum of USD 1 billion per mutual fund. The overall ceiling for investment in overseas ETFs that invest in securities is US\$ 1 billion subject to a maximum of US\$ 300 million per mutual fund. In accordance with clause 13.11. of SEBI's Master Circulars dated March 20, 2026, permissible overseas investments are:

- ADRs / GDRs issued by Indian or foreign companies.
- Equity of overseas companies listed on recognized stock exchanges overseas.
- Initial and follow on public offerings for listing at recognized stock exchanges overseas.
- Foreign Debt Securities in the countries with fully convertible currencies, short term as well as long term debt instruments with rating not below investment grade by accredited / registered credit rating agencies.
- Money market instruments rated not below investment grade.
- Repurchase agreements in the form of investment, where the counterparty is rated not below investment grade; repurchase agreements should not, however, involve any borrowing of funds by mutual funds.
- Government Securities where the countries are rated not below investment grade.
- Short term deposits with banks overseas where the issuer is rated not below investment grade.
- Derivatives traded on recognized stock exchanges overseas only for hedging and portfolio balancing with underlying as securities.
- Units / Securities issued by overseas mutual funds or unit trusts registered with overseas regulators and investing in (a) aforesaid Securities, (b) Real Estate Investment Trusts (REITs) listed in recognized stock exchanges overseas or (c) unlisted overseas Securities (not exceeding 10% of their net assets). The exposure of the Underlying Fund in India will not be gained through participatory notes. However, participatory notes which have non-Indian securities as underlying are permitted.

Position of Bond Markets In India

India's bond market has witnessed a rapid growth in the last five years. The aggregate Face Value of bonds was Rs 270 trillion (\$2.99 trillion) as on 31 Dec 2025 according to data from RBI, SEBI and CCIL.

India's bond market comprises mainly of sovereign bonds, corporate bonds, and money market assets. Sovereign bonds comprised 73%; corporate bonds were 23% while money market assets comprised 4% of the aggregate Face Value of bonds as of 31 Dec 2025.

Sovereign bonds are issued by the Government of India & Indian States to finance their budget deficits. The budget deficit is generally announced in the Union Budget for the next financial year. It is widely followed by the market participants for their analysis on the government finances. It forms the basis for India's monetary policy and demand-supply dynamic in the secondary market.

The Government of India typically funds a significant portion of its budget deficit by auctioning government bonds on weekly basis. The auction calendar is made public in advance. For last few years, the government has made conscious efforts to auction bonds with residual maturity greater than ten years to lengthen its maturity profile. The government also auctions Treasury Bills on weekly basis to finance their short-term cash flow mismatches. The government's Treasury Bill auction calendar is also available for market participants in advance. The government auctions 91-day, 182-day, 364-day treasury bills on every Wednesday. Indian states also borrow in the bond market by auctioning State Development Loans (SDL) on every Tuesdays. These bonds are mostly purchased by Banks, Insurance companies as well as other market participants due to their sovereign nature, superior secondary market liquidity and statutory holding requirements by the regulators.

Indian corporate entities as well as Public Financial Institutions typically borrow wholesale money from the debt capital market. Primary supply of corporate bonds has been steadily increasing in the last three years in proportion to the increase in the demand for quality assets from mutual funds, insurance companies, foreign portfolio investors and pension funds.

As on 31 Dec 2025, size of the Indian government bond market is around Rs 128 trillion, which is distributed amongst 114 unique issues. As compared to that India's corporate bond market is more fragmented. The total corporate bond market size is around Rs 63 trillion, which is distributed amongst ~5,499 unique issuers, according to NSDL data.

Following table exhibits various debt instruments along with indicative yields as on March 31, 2026:

B. WHAT ARE THE INVESTMENT RESTRICTIONS?

The investment policy of the Investment strategy complies with the rules, regulations and guidelines laid out in SEBI (Mutual Funds) Regulations, 2026. As per the Regulations, specifically the Seventh Schedule, the following investment limitations are currently applicable:

1. All the investments by Investment strategy shall be made only in listed equity shares and equity related securities.
2. The Investment strategy shall not invest more than 10 per cent of its NAV in the equity shares or equity related instruments of any entity.
3. An investment strategy under SIF shall not invest more than 20% of its NAV in debt and money market securities issued by a single issuer and rated AAA or 16% in securities rated AA or 12% in securities rated A and below. These instrument limits may be extended by up to 5% of the NAV of investment strategy with prior approval of trustees of MF and board of AMC.

Provided that such limit shall not be applicable for investments in Government Securities, treasury bills and triparty repo on Government securities or treasury bills:

Provided further that investments within such limit can be made in mortgaged backed securitised debt which are rated not below investment grade by a credit rating agency registered with the Board:

Provided further that such limit shall not be applicable for investments in case of debt exchange traded funds or such other funds as may be specified by the Board from time to time.

However, exposure limits for special features bond will be in line with the regulatory framework.

4. No Specialized Investment Fund under all its investment strategies should own more than fifteen per cent of any company's paid up capital carrying voting rights or 15% of units of REITs issued by single issuer, as the case may be:

Provided that investment in the asset management company or the trustee company of a mutual fund shall be governed by clause (a) of sub-regulation (1) of regulation 6:

Provided further that the 15% limit shall be inclusive of 10% limit for mutual fund schemes as specified at Item No. 5 under Paragraph 13.1.

Explanation: If a mutual fund under all its Investment strategys owns ten per cent of any company's paid up capital carrying voting rights, then the Specialized Investment fund under all its investment strategies shall not own more than five per cent of that company's paid up capital carrying voting rights.

5. Investment in unrated debt and money market instruments (other than government securities, treasury bills, derivative products such as Interest Rate Swaps (IRS), Interest Rate Futures (IRF), etc.) by the Investment strategy shall not exceed 5% of the net assets of the Investment strategy. However, all such investments shall be made with the prior approval of the Board of AMC and Trustees.

6. Exposure to non-convertible preference shares and non-convertible portion of compulsory convertible debentures will be construed as exposure to unrated debt instruments.
7. The Investment strategy shall not invest in unlisted debt instruments other than (a) government securities, (b) other money market instruments such as Certificates of Deposits and (c) derivative products such as Interest Rate Swaps (IRS), Interest Rate Futures (IRF), etc. which are used by SIFs. However, Investment strategy may invest in unlisted Non-Convertible Debentures (NCDs) not exceeding 10% of the debt portfolio of the Investment strategy subject to the condition that such unlisted NCDs have a simple structure (i.e. with fixed and uniform coupon, fixed maturity period, without any options, fully paid up upfront, without any credit enhancements or structured obligations) and are rated and secured with coupon payment frequency on monthly basis. Provided further that, the Investment strategy shall comply with the norms under this clause within the time and in the manner as may be specified by the Board.
8. All investments by the Investment strategy in CPs would be made only in CPs which are listed or to be listed.
9. The investment of the Investment strategy in the following instruments shall not exceed 10% of the debt portfolio of the Investment strategy and the group exposure in such instruments shall not exceed 5% of the debt portfolio of the Investment strategy:
 - Unsupported rating of debt instruments (i.e. without factoring-in credit enhancements) is below investment grade; and
 - Supported rating of debt instruments (i.e. after factoring-in credit enhancement) is above investment grade
10. Investment by the Investment strategy in debt instruments, having credit enhancements backed by equity shares directly or indirectly, shall have a minimum cover of 4 times considering the market value of such shares. Further, the investment in debt instruments having credit enhancements should be sufficiently covered to address the market volatility and reduce the inefficiencies of invoking of the pledge or cover, whenever required, without impacting the interest of the investors. In case of fall in the value of the cover below the specified limit, AMCs will initiate necessary steps to ensure protection of the interest of the investors.
11. An investment strategy under the SIF shall not invest more than 25% of its NAV in debt and money market securities of a particular sector (excluding investments in Bank CDs, triparty repo on Government securities or treasury bills, G-Secs, TBills, short term deposits of Scheduled Commercial Banks and AAA rated securities issued by Public Financial Institutions and Public Sector Banks). An additional exposure to financial services sector (over and above the limit of 25%) not exceeding 10% of the net assets of the investment strategy on account of purchase shall be allowed by way of increase in exposure to Housing Finance Companies (HFCs) only. Further, an additional exposure of 5% of the net assets of the investment strategy shall be allowed for investments in securitized debt instruments based on retail housing loan portfolio and/or affordable housing loan portfolio. Provided that the additional exposure to such securities issued by HFCs are rated AA and above and these HFCs are registered with National Housing Bank (NHB) and the total investment/ exposure in HFCs shall not exceed 25% of the net assets of the scheme on account of purchase
12. The Investment strategy may invest in debt instruments with special features viz. subordination to equity (absorbs losses before equity capital) and /or convertible to equity upon trigger of a pre-specified event for loss absorption including Additional Tier I bonds and Tier 2 bonds issued under Basel III framework subject to following prudential limits as prescribed under para 13.1 of SEBI Master circular dated March 20, 2026.:

- i. No Mutual Fund /SIF under all its Investment strategy shall own more than 10% of such instruments issued by a single issuer
- ii. A Mutual Fund / SIF shall not invest –
 - a. more than 10% of its NAV of the debt portfolio of the Investment strategy in such instruments; and
 - b. more than 5% of its NAV of the debt portfolio of the Investment strategy in such instruments issued by a single issuer.
(The above investment limit for the Investment strategy shall be within the overall limit for debt instruments issued by a single issuer, as specified at item no 2 under Clause 13.1 of SEBI Master Circular dated March 20, 2026 for Mutual funds.)
13. Transfer of investments from one Investment strategy to another Investment strategy in the SIF is permitted provided:
 - Such transfers are done at the prevailing market price for quoted instruments on spot basis (spot basis shall have the same meaning as specified by a Stock Exchange for spot transactions); and

E. Other Investment Strategy Specific Disclosures:

Listing and transfer of units	<p>Listing - Being an open ended investment strategy, the Units of the investment strategy will not be listed on any stock exchange, at present. The Trustee may, at its sole discretion, cause the Units under the investment strategy to be listed on one or more Stock Exchanges.</p> <p>Transfer of units –</p> <p>In accordance with Paragraph 15.2 of SEBI Master Circular dated March 20, 2026, units of the Investment strategy will be held in demat form and hence will be transferable and will be subject to the transmission facility in accordance with the provisions of SEBI (Depositories and Participants) Regulations, 2018 as may be amended from time to time.</p> <p>If a person becomes a holder of the Units consequent to operation of law, or upon enforcement of a pledge, the transfer may be effected in accordance with the provisions of SEBI (Depositories and Participants) Regulations, 2018, provided the transferee is otherwise eligible to hold the Units.</p> <p>However, for Units of the Investment strategy held on physical form the AMC shall, on production of instrument of transfer together with relevant unit certificates / account statements, register the transfer and return the unit certificate to the transferee within 30 days from the date of such production. The cost of stamp duty paid for issuing the unit certificate in case of a transfer or otherwise will form part of the annual on-going expenses and/or may be recovered from the unit holder(s).</p>
Dematerialization of units	<p>The Unit holders will have an Option to hold the units by way of an Account Statement or in Dematerialized ('Demat') form. Unit holders opting to hold the units in Demat form must provide their Demat Account details in the specified section of the application form. The Applicant intending to hold the units in Demat form are required to have a beneficiary account with a Depository Participant (DP) registered with NSDL / CDSL and will be required to indicate in the application the DP's name, DP ID Number and the Beneficiary Account Number of the applicant held with the DP at the time of purchasing Units. Unitholders are requested to note that request for conversion of units held in Account Statement (non-demat) form into Demat (electronic) form or vice versa should be</p>

	<p>submitted to their Depository Participants.</p> <p>In case Unit holders do not provide their demat account details or the demat details provided in the application form are incomplete / incorrect or do not match with the details with the Depository records, the Units will be allotted in account statement mode provided the application is otherwise complete in all respect and accordingly an account statement shall be sent to them.</p> <p>In case of Investors investing through SIP facility and opting to hold the Units in Demat form, the units will be allotted based on the Applicable Net Asset Value (NAV) and the same will be credited to investor's Demat Account on weekly basis on realization of funds.</p> <p>The AMC shall issue units in dematerialized form to a unit holder in a Investment strategy within two working days of the receipt of request from the unit holder.</p>
Minimum Target amount (This is the minimum amount required to operate the investment strategy and if this is not collected during the NFO period, then all the investors would be refunded the amount invested without any return.)	The minimum subscription amount to be raised by the Investment strategy at the time of new fund offer shall be Rs. 10 crore.
Redemption and subscription frequency	Subscription frequency – Daily Redemption frequency – Daily
Notice period of the investment strategy	Not Applicable
Maximum Amount to be raised (if any)	Not applicable
Dividend Policy (IDCW)	<p>IDCW Distribution Procedure:</p> <p>SEBI Circular lays down the procedure for Declaration of IDCW which clearly says that quantum of IDCW and record date shall be fixed by the Board of Trustees and AMC shall issue a notice to the public communicating the decision about IDCW including the record date, within one calendar day of the decision made by the Board of Trustees in their meeting.</p> <p>Record date shall be the date that will be considered for the purpose of determining the eligibility of investors whose name appears on the register of Unit holders. The record date shall be 2 working days from the issue of public notice.</p> <p>The Trusteeship Company reserves the right to declare IDCW on a regular basis. The Investment strategy does not guarantee or assure declaration or payment of IDCW. Although the Trustees have intention to declare IDCW under IDCW Option, such</p>

declaration of IDCW if any, is subject to Investment strategy's performance & the availability & adequacy of distributable surplus in the Investment strategy at the time of declaration of such IDCW.

Investors should note that, when the SIF declares an IDCW under the Investment strategy, the Income distribution shall be dispatched within 7 working days of the record date. The requirement of giving notice & the above laid procedure shall not be compulsory for Investment strategy/plan/option having frequency of IDCW distribution from daily upto monthly IDCW.

Further, investors are requested to note that the amounts can be distributed out of the investor's capital (Equilization Reserve), which is part of sales price that represents realized gains.

Effect of IDCWs:

When IDCWs are declared and paid under the Investment strategy, the net assets attributable to Unit holders in the IDCW Option will stand reduced by the IDCW amount subject to TDS and statutory levy if any. The NAV of the Unit holders in the Growth Option will remain unaffected by the payment of IDCW.

Even though the asset portfolio will be un-segregated, the NAVs of the Growth Option and IDCW Option will be distinctly different after declaration of the first IDCW to the extent of distributed income, tax and statutory levy paid thereon, where applicable, and expenses relating to the distribution of IDCWs.

Mode of Payment of IDCWs:

The Investment strategy proposes to pay IDCW by Direct Credit or through RTGS or NEFT or any other EFT means.

RBI offers the facility of EFT for facilitating better customer service by direct credit of IDCW amount to a Unit holder's bank account through electronic credit which avoids loss of IDCW in transit or fraudulent encashment. The SIF will endeavour to offer this facility for payment of IDCW/repurchase proceeds to the Unit holders residing in any of the cities where such a Bank facility is available.

The Fund is arranging with selected bankers to enable direct credits into the bank accounts of the investors at these banks. If an investor has an account with a bank with which the Fund will tie up for direct credit, the IDCW amount will be credited directly to the bank account, under intimation to the Unit holder by email/SMS/post. The SIF, on a best effort basis, and after scrutinising the names of the banks where Unit holders have their accounts, will enable direct credit/RTGS/NEFT/ to the Unit holders' bank accounts.

While the preferred mode of payment is through EFT route, the AMC is at the sole discretion to pay IDCW by any other means (including at par cheques and demand drafts, where the EFT facility is not available in a particular city or Bank or as the Trusteeship Company or the AMC deems fit in the interest of investors.)

	<p>All the IDCW payments shall be in accordance and compliance with SEBI Regulations, as amended from time to time.</p> <p>If Unit holders have opted for IDCW Payout Option, if the IDCW amount payable to such Unit holders (net of tax deducted at source, wherever applicable) is less than or equal to Rs. 250, following treatment shall be:</p> <ol style="list-style-type: none"> a. Where the option to payout IDCW is available in electronic mode: The IDCW amount shall be paid to the Unit holders. However, if the payment through electronic mode is unsuccessful, the AMC shall issue IDCW warrant for such amount; and b. Where the option to payout IDCW is not available in electronic mode: The IDCW shall be mandatorily reinvested in the respective Investment strategy/Plan by issuing additional Units at the applicable ex-IDCW NAV.
<p>Allotment (Detailed procedure)</p>	<p>Allotment will be completed after due reconciliation of receipt of funds for all valid applications within 5 Business Days from the closure of the NFO period. Allotment to NRIs/FIIs will be subject to RBI approval, if required. Subject to the SEBI (MF) Regulations, the Trustee may reject any application received in case the application is found invalid/incomplete or for any other reason in the Trustee's sole discretion. In case the returned cheques are presented again, the necessary charges, if any, are liable to be debited to the investor. It is expressly understood that at the time of investment, the investor/Unit holder has the express authority to invest in Units of the Investment strategy and AMC / Trustees / Mutual Fund will not be responsible if such investment is ultravires the relevant constitution. Subject to the Regulations, the Trustee may reject any application received in case the application is found invalid/ incomplete or for any other reason in the Trustee's sole discretion.

Non-Resident Indians (NRIs) and Persons of Indian Origin (PIOs) residing abroad/ Overseas Citizens of India (OCI) / Foreign Portfolio Investors (FPIs) have been granted a general permission by Reserve Bank of India under Schedule 5 of the Foreign Exchange Management (Transfer or Issue of Security by a Person Resident Outside India) Regulations, 2000 for investing in / redeeming units of the mutual funds subject to conditions set out in the aforesaid regulations. If a person who is a resident Indian at the time of subscription becomes a resident outside India subsequently, he/she shall have the option to either be paid repurchase value of Units or continue into the Investment strategy if he/she so desires and is otherwise eligible.

However, the AMC shall not be liable to pay interest or any compensation, arising on account of taxation law or otherwise, on redemption, IDCW or otherwise, to such a person during the period it takes for the Fund to record change in residential status, bank mandates, and change in address due to change in tax status on account of change in

residential status.

Notwithstanding the aforesaid, the Trustee reserves the right to close the Unit holder's account and to pay the repurchase value of Units, subsequent to his becoming a person resident outside India, should the reasons of cost, interest of other Unit holders and any other circumstances make it necessary for the Fund to do so.

Investors desiring to invest / transact in the Investment strategy are required to comply with the KYC norms applicable from time to time. Under the KYC norms, Investors are required to provide prescribed documents for establishing their identity and address such as copy of the Passport/PAN Card/Memorandum and Articles of Association/byelaws/Trust Deed/Partnership Deed/ Certificate of Registration along with the proof of authorization to invest, as applicable, to the KYC Registration Agency (KRA) registered with SEBI.

The Government of India has authorized the Central Registry of Securitization and Asset Reconstruction and Security Interest of India (CERSAI, an independent body), to perform the function of Central KYC Records including receiving, storing, safeguarding and retrieving KYC records in digital form. Accordingly, in line with SEBI circular nos. CIR/MIRSD/66/2016 dated July 21, 2016 and CIR/MIRSD/120/2016 dated November 10, 2016 on Operationalisation of Central KYC (CKYC), read with AMFI Best Practice Guidelines circular no. 68/2016-17 dated December 22, 2016, new individual investors investing into the Fund are requested to comply with the CKYC norms.

It is compulsory for investors to give certain mandatory disclosures while applying in the Investment strategy like bank details & PAN/PEKRN copy etc. For details please refer SAI.

The Trustee may also periodically add and review the persons eligible for making application for purchase of Units under the Investment strategy.

The Fund / AMC / Trustees / other intermediaries will rely on the declarations/affirmations provided by the Investor(s) in the Application/ Transaction Form(s) and the documents furnished to the KRA that the Investor(s) is permitted/ authorised by the constitution document/ their Board of Directors etc. to make the investment / transact. Further, the Investor shall be liable to indemnify the Fund / AMC / Trustee / other intermediaries in case of any dispute regarding the eligibility, validity and authorization of the transactions and / or the applicant who has applied on behalf of the Investors. The Fund / AMC / Trustee reserves the right to call for such other information and documents as may be required by it in connection with the investments made by the investor.

Investors are requested to view full details on eligibility /non-eligibility for investment in the Investment strategy mentioned in the SAI under the head "Who Can Invest" & also note that this is an indicative list and you are requested to consult your financial advisor to ascertain whether the Investment strategy is suitable to your risk profile.

Foreign Account Tax Compliance Act (commonly known as "FATCA"):

The Foreign Account Tax Compliance Act is a United States (US) federal law, aimed at prevention of tax evasion by US Citizens and Residents ("US Persons") through use of offshore accounts. The Government of India and the US have reached an agreement in substance on the terms of an Inter-Governmental Agreement ("IGA") to implement the

FATCA provisions, which have become globally applicable from July 1, 2014.

Edelweiss Asset Management Limited (“the AMC”) is classified as a FFI under the FATCA provisions, in which case the Fund / AMC is required, from time to time, to:

undertake necessary due diligence process by collecting information/documentary evidence of the US/non-US status of the investors;

disclose/report information as far as may be legally permitted about the holdings/investment returns pertaining to reportable accounts to the US Internal Revenue Service and/or such Indian authorities as may be specified under FATCA or other applicable laws and

carry out such other activities as prescribed under the FATCA provisions, as amended from time to time.

FATCA due diligence will have to be directed at each investor/unit holder (including joint investors) and on being identified as a reportable person/specified US person, all the folios will be reported. Further, in case of folio with joint investors, the entire account value of investment portfolio will be attributable under each such reportable person. Investors/Unit holders would therefore be required to furnish such information to the Fund/AMC, from time to time, in order to comply with the reporting requirements stated in the IGA and or circulars/guidelines issued by SEBI/AMFI in this regard.

The impact of FATCA is relevant not only at the point of on-boarding of the investors but also throughout the life cycle of the investor account / folio with the Fund. Hence investor(s) should immediately intimate the Fund/AMC, in case of any change in the FATCA related information provided by them at the time of initial subscription.

The AMC reserves the right to reject any application or compulsorily redeem the units held directly or beneficially in case the applicant/investor fails to furnish the relevant information and/or documentation or is found to be holding units in contravention of the FATCA provisions.

Further, in accordance with the regulatory requirements relating to FATCA/CRS read along with SEBI Circular no. CIR/MIRSD/2/2015 dated August 26, 2015 and AMFI Best practices guidelines circular no. 63/2015-16 dated September 18, 2015 regarding uniform implementation of FATCA/CRS requirements, investors are requested to ensure the following:

With effect from November 1, 2015 all investors have to mandatorily provide the details and declaration pertaining to FATCA/CRS for all new accounts opened, failing which the application shall be liable to be rejected.

For accounts opened between July 1, 2014 and October 31, 2015 and certain pre - existing accounts opened till June 30, 2014, the AMC shall reach out to the investors to seek the requisite information/declaration which has to be submitted by the investors before December 31, 2015. In case the information/declaration is not received from the investor on or before December 31, 2015, the account shall be treated as reportable account.

	<p>Ultimate Beneficial Ownership: In accordance with SEBI Circular no. CIR/MIRSD/2/2013 dated January 24, 2013 and AMFI Best practices guidelines circular no. 62/2015-16 dated September 18, 2015, Investors may note the following:</p> <ul style="list-style-type: none"> • With effect from November 1, 2015, it is mandatory for new investors to provide beneficial ownership details as part of account opening documentation failing which the AMC shall reject the application. • With effect from January 1, 2016 it is mandatory for existing investors/unit holders to provide beneficial ownership details, failing which the AMC may reject the transaction for additional subscription (including switches).

C. LIQUIDITY RISK MANAGEMENT TOOLS AND ITS APPLICABILITY

Liquidity risk management refers to the process of ensuring that a fund can meet its short-term obligations, particularly investor redemptions and operational expenses, without needing to sell assets at distressed prices.

- **Liquidity Stress Testing:**
Simulate various adverse scenarios to evaluate the fund's ability to meet redemption demands.
- **Liquidity Buffers:**
Maintain an adequate level of highly liquid assets to cover potential redemption needs.
- **Liquidity Bucketing:**
Categorize assets based on their expected liquidation time (e.g., daily, weekly, monthly). Align asset liquidity with expected redemption profiles.
- **Liquidity Monitoring and Reporting:**
Regular monitoring of liquidity positions and stress test results. Reporting to management and regulators as necessary to ensure transparency.
- **Liquidity Policy and Procedures:**
Establish clear policies specific to SIF's investment strategy and asset liquidity.

D. TRANSPARENCY/NAV DISCLOSURE (DETAILS WITH REFERENCE TO INFORMATION GIVEN IN SECTION I)

The AMC will calculate and disclose the first NAV within the timelines stipulated under the Regulations from the closure of the New Fund Offer Period. Subsequently, the NAVs of the Investment strategy will be calculated by the SIF on each Business Day and will be made available by 11.00 p.m.* on every Business Day.

***Notes:**

- The investment strategy is permitted to take exposure to overseas securities. In case where the Investment Strategy has taken exposure to overseas securities, the NAV of the investment strategy would be declared by 10:00 a.m. on the following business day.
- In case the investment strategy ceases to hold exposure to any overseas securities during the business day, NAV of the investment strategy for that day would continue to be declared on 10:00 a.m. on the following business day, Subsequent to that day, NAV of the investment strategy shall be declared on 11:00 p.m., on the same day.

The AMC will prominently disclose the NAVs under a separate head on its website (<https://www.edelweissmf.com/altivasif>) NAV will be updated on the website of the AMC (<https://www.edelweissmf.com/altivasif>) and on the AMFI website www.amfiindia.com.

In case of any delay, the reasons for such delay would be explained to AMFI by the next day. If the NAVs are not available before commencement of working hours on the following day due to any reason, the Fund shall issue a press release providing reasons and explaining when the Fund would be able to publish the NAV.

The NAV will be calculated in the manner as provided in this SID or as may be prescribed by the SEBI Regulations from time to time. The NAV will be computed up to Four decimal places.

Investors may write to the AMC for availing facility of receiving the latest NAVs through SMS.
