I. INTRODUCTION

A. RISK FACTORS:

Apart from the risk factors mentioned in SAI, following are some of the additional risk factors which investors are advised to go through before investing:

a) STANDARD RISK FACTORS:

- Investment in Mutual Fund Units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal.
- As the price / value / interest rates of the securities in which the Scheme invests fluctuates, the value of your investment in the Scheme may go up or down.
- Past performance of the Sponsor/AMC/Mutual Fund does not guarantee future performance of the Scheme.
- Edelweiss Technology Fund is only the name of the Scheme & it does not in any manner indicate either the quality of the Scheme or its future prospects and returns.
- The sponsor is not responsible or liable for any loss resulting from the operation of the Scheme beyond the initial contribution of Rs.1,00,000 made by it towards setting up the Fund.
- The Scheme is not a guaranteed or assured return Scheme.

b) SCHEME SPECIFIC RISK FACTORS:

The performance of the Scheme may be affected by changes in Government policies, general levels of interest rates and risks associated with trading volumes, liquidity and settlement systems, etc. Some of the Risks are listed below:

1. Risk Factors Associated with Equity & Equity related instruments

- The value of the Scheme's investments may be affected generally by factors affecting securities markets, such as price and volume volatility in the capital markets, etc.
- Settlement periods and transfer procedures may restrict the liquidity of the investments made by the Scheme. The Scheme may face liquidity risk or execution risk or redemption risk or the risk of NAV going below par.
- Investments in equity and equity related securities involve a degree of risk and investors should not invest in the Scheme unless they can afford to take the risk of losing their investment. The liquidity and valuation of the Scheme's investments due to its holdings of unlisted securities may be affected if they have to be sold prior to the target date for disinvestment.
- Securities which are not quoted on the stock exchanges are inherently illiquid in nature and carry a larger liquidity risk in comparison with securities that are listed on the exchanges or offer other exit options to the investors, including put options. The AMC may choose to invest in unlisted securities that offer attractive yields within the regulatory limit. This may however increase the risk of the portfolio.
- At times, taking benefit of investing in Special Situations may involve certain risks like the promoter may choose not to accept the discovered prices or the Regulatory hurdles may delay any specific corporate action. For details, please refer SAI.
- Though the constituent stocks of most indexes are typically liquid, liquidity differs across stocks. Due to the heterogeneity in liquidity in the capital market segment, trades on this segment may not get implemented instantly.

2. Risks Associated with investing in Debt and Money Market Instruments

- i. **Interest rate Risk:** Price of a fixed income instrument generally falls when the interest rates move up and vice-versa. The extent of the fall or rise in the prices depends upon the coupon and maturity of the security. It also depends upon the yield level at which the security is being traded. The NAV of the Scheme is expected

to increase from a fall in interest rates while it would be adversely affected by an increase in the level of interest rates.

- ii. **Credit risk or default Risk:** Credit risk is the risk that the issuer of a debenture/ bond or a money market instrument may default on interest and/or principal payment obligations. Even when there is no default, the price of a security may change with expected changes in the credit rating of the issuer. It is to be noted here that Government Security is a sovereign security and is the safest. Corporate bonds carry a higher amount of credit risk than Government Securities. Within corporate bonds also there are different levels of safety and a bond rated higher by a particular rating agency is safer than a bond rated lower by the same rating agency.
- iii. **Liquidity & Settlement Risk:** The liquidity of a fixed income security may change, depending on market conditions, leading to changes in the liquidity premium attached to the price of such securities. At the time of selling the security, the security can become illiquid, leading to loss in value of the portfolio. Different segments of the financial markets have different settlement cycle/periods, and such settlement cycle/periods may be impacted by unforeseen circumstances, leading to Settlement Risk. This can adversely affect the ability of the Fund to swiftly execute trading strategies which can lead to adverse movements in NAV.
- iv. **Reinvestment Risk:** Interest rates may vary from time to time. The rate at which intermediate cash flows are reinvested may differ from the original interest rates on the security, which can affect the total earnings from the security.
- v. **Performance Risk:** Performance of the Scheme may be impacted with changes in factors, which affect the capital market and in particular the debt market.
- vi. **Prepayment Risk:** The Scheme may receive payment of monthly cashflows earlier than scheduled, which may result in reinvestment risk.
- vii. **Market Risk:** Lower rated or unrated securities are more likely to react to developments affecting the market as they tend to be more sensitive to changes in economic conditions than higher rated securities.

There can be no assurance that a Scheme's investment objectives will be achieved, or that there will be no loss of capital. Investment results may vary substantially on a monthly, quarterly, or annual basis.

3. Risk factors associated with Derivatives

i) General Risk Factors associated with derivatives:

Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the Fund Manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and the decision of fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies.

The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments.

Trading in derivatives has the following risks:

- An exposure to derivatives in excess of the hedging requirements can lead to losses.
- An exposure to derivatives, when used for hedging purposes, can also limit the profits from a genuine investment transaction.
- Derivatives carry the risk of adverse changes in the market price.
- Illiquidity Risk i.e. risk that a derivative trade may not be executed or reversed quickly enough at a fair price, due to lack of liquidity in the market.

The Fund may use derivatives instruments like equity futures & options, or other derivative instruments as permitted under the Regulations and Guidelines. Usage of derivatives will expose the Scheme to liquidity risk,

open position risk, and opportunities risk etc. Such risks include the risk of mispricing or improper valuation and the inability of derivatives to correlate perfectly with underlying assets, rates and indices. In case, of the derivative strategies, it may not be possible to square off the cash position against the corresponding derivative position at the exact closing price available in the Value Weighted Average Period. Debt derivatives instruments like interest rate swaps, forward rate agreements or other derivative instruments also involve certain risks. For details, please refer SAI.

4. Risks Associated with exposure in Tri-party Repo

Risk of exposure in the Tri-party Repo settlement Segment provided by CCIL emanates mainly on two counts –

- Risk of failure by a lender to meet its obligations to make funds available or by a borrower to accept funds by providing adequate security at the settlement of the original trade of lending and borrowing under Tri-party Repo transaction.
- Risk of default by a borrower in repayment.

5. Risks Associated with Stock Lending & Short Selling:

i) Risks associated With Stock Lending

The risks in lending portfolio securities, as with other extensions of credit, consist of the failure of another party, in this case the approved intermediary, to comply with the terms of agreement entered into between the lender of securities i.e. the Scheme and the approved intermediary. Such failure to comply can result in the possible loss of rights in the collateral put up by the borrower of the securities, the inability of the approved intermediary to return the securities deposited by the lender and the possible loss of any corporate benefits accruing to the lender from the securities deposited with the approved intermediary. It may be noted that this activity would have the inherent probability of collateral value drastically falling in times of strong downward market trends, rendering the value of collateral inadequate until such time as that diminution in value is replenished by additional security. It is also possible that the borrowing party and/or the approved intermediary may suddenly suffer severe business setback and become unable to honour its commitments. This, along with a simultaneous fall in value of collateral would render potential loss to the Scheme. Besides, there can be temporary illiquidity of the securities that are lent out and the Scheme will not be able to sell such lent-out securities until they are returned. There is also a possibility of opportunity loss.

ii) Risks associated with short selling

Scheme may enter into short selling transactions, subject to SEBI and RBI regulations in the matter. This will be done if the fund management team is of the view that there exists an opportunity to make trading gains. Calls for short selling will be taken after considering the liquidity, price movement & volatility of the security by the fund management team. There can be a loss in such a transaction if the price of the security goes up instead of falling down.

6. Risk factors associated with Repo transactions in Corporate Debt:

i) Lending transactions:

The scheme may be exposed to counter party risk in case of repo lending transactions in the event of the counterparty failing to honour the repurchase agreement. However, in repo lending transactions, the collateral may be sold, and a loss is realized only if the sale price is less than the repo amount. The risk may be further mitigated through over-collateralization (the value of the collateral being more than the repo amount). Further, the liquidation of underlying securities in case of counterparty default would depend on liquidity of the securities and market conditions at that time. It is endeavoured to mitigate the risk by following an appropriate counterparty selection process, which includes their credit profile evaluation and over-collateralization to cushion the impact of market risk on sale of underlying security.

ii) Borrowing transactions:

In the event of the scheme being unable to pay back the money to the counterparty as contracted, the counterparty may dispose of the assets (as they have sufficient margin). This risk is normally mitigated by better cash flow planning to take care of such repayments. Further, there is also a Credit Risk that the Counterparty may fail to return the security or Interest received on the due date. It is endeavoured to mitigate the risk by following an appropriate counterparty selection process, which includes their credit profile evaluation.

7. Risks associated with writing covered call options for equity shares

- Writing call options are highly specialized activities and entail higher than ordinary investment risks. In such investment strategy, the profits from call option writing is capped at the option premium, however the downside depends upon the increase in value of the underlying equity shares. This downside risk is reduced by writing covered call options.
- The Scheme may write covered call option only in case it has adequate number of underlying equity shares as per regulatory requirement. This would lead to setting aside a portion of investment in underlying equity shares. If covered call options are sold to the maximum extent allowed by regulatory authority, the scheme may not be able to sell the underlying equity shares immediately if the view changes to sell and exit the stock. The covered call options need to be unwound before the stock positions can be liquidated. This may lead to a loss of opportunity, or can cause exit issues if the strike price at which the call option contracts have been written become illiquid. Hence, the scheme may not be able to sell the underlying equity shares, which can lead to temporary illiquidity of the underlying equity shares and result in loss of opportunity.
- The writing of covered call option would lead to loss of opportunity due to appreciation in value of the underlying equity shares. Hence, when the appreciation in equity share price is more than the option premium received the scheme would be at a loss.
- The total gross exposure related to option premium paid and received must not exceed the regulatory limits of the net assets of the scheme. This may restrict the ability of Scheme to buy any options.

8. Risk Factors Associated with Investments in REITs and InvITs:

- **Market Risk:** REITs and InvITs are volatile and prone to price fluctuations on a daily basis owing to market movements. Investors may note that AMC/Fund Manager's investment decisions may not always be profitable, as actual market movements may be at variance with the anticipated trends. The NAV of the Scheme is vulnerable to movements in the prices of securities invested by the scheme, due to various market related factors like changes in the general market conditions, factors and forces affecting capital market, level of interest rates, trading volumes, settlement periods and transfer procedures.
- **Liquidity Risk:** As the liquidity of the investments made by the Scheme(s) could, at times, be restricted by trading volumes and settlement periods, the time taken by the Mutual Fund for liquidating the investments in the scheme may be high in the event of immediate redemption requirement. Investment in such securities may lead to increase in the scheme portfolio risk.
- **Reinvestment Risk:** Investments in REITs & InvITs may carry reinvestment risk as there could be repatriation of funds by the Trusts in form of buyback of units or dividend pay-outs, etc. Consequently, the proceeds may get invested in assets providing lower returns.

The above are some of the common risks associated with investments in REITs & InvITs. There can be no assurance that a Scheme's investment objectives will be achieved, or that there will be no loss of capital. Investment results may vary substantially on a monthly, quarterly or annual basis.

9. Risk Factors Associated with Investments in Foreign Securities

Investments in International (overseas) securities including Exchange Traded Funds involves increased risk and volatility, not typically associated with domestic investing,

Some of the risk associated are:

- Changes in currency exchange rates
- Foreign government regulations
- Differences in auditing and accounting standards
- Political and economic instability
- Liquidity and volatile prices
- Economic deterioration, and changes in bi-lateral relationships.

The investment by the Scheme in overseas securities and overseas ETFs is subject to compliance with the industry-wide limit as stipulated by RBI/SEBI from time to time. The Scheme may not be able to make investment in overseas securities and overseas ETFs in case of breach of such industry-wide overseas limits. In such a situation, the performance of the Scheme could be affected.

10. Risks Associated with segregated portfolio

- Unit holders holding units of Segregated Portfolio may not be able to liquidate their holdings till the recovery of money from the issuer.
- Portfolio comprising of Segregated Portfolio may not realise any value or may have to be written down.
- Listing of units of Segregated Portfolio in recognised stock exchange does not necessarily guarantee their liquidity. There may not be active trading of units in the stock market. Further the trading price of units on the stock market may be significantly lower than the prevailing NAV.

Investment in Securitized Debt:

A securitization transaction involves true sale of cash generating assets & receivables by the originator (a bank, non-banking finance company, housing finance company, or a manufacturing/service company) to a Special Purpose Vehicle (SPV), typically set up in the form of a trust. Investors are issued rated Pass Through Certificates (PTCs), the proceeds of which are paid as consideration to the originator. In this manner, the originator, by

transferring his cash generating asset(s) to an SPV, receives consideration from investors upfront. Investors get paid from the periodic distribution of cash generated by the underlying asset(s). Typically, the transaction is provided with some sort of credit enhancement (as stipulated by the rating agency for a target rating). This mechanism attempts to protect investors against potential delay in cash flows from assets as well as potential defaults by trenching risks by structuring cash flows in different forms.

Generally available asset classes for securitization in India are:

- Commercial vehicles
- Auto and two wheeler pools
- Mortgage pools (residential housing loans)
- Personal loans
- Corporate loans/receivables
- Commercial Mortgage-backed securities

Investment / Risk Mitigation Strategy:

1. Risk profile of securitized debt vis-à-vis risk appetite of the Scheme(s):

The risk profile of securitized debt is generally slightly better than the risk profile of other debt securities at the same level of credit rating due to presence of credit-enhancing mechanism. Moreover, PTCs generally offer additional income (spread) over a debt security of similar rating and maturity, which enables the scheme to optimize its income without taking any additional credit risk. Securitized debt is generally less liquid, however, investment in securitized debt is made to maintain a diversified portfolio of debt securities that optimizes return without increasing the overall risk profile of the Scheme(s).

2. Policy relating to originators based on nature of originator, track record, NPAs, losses in earlier securitized debt, etc:

The originator is an entity (like banks, non-banking finance companies, corporates etc), which has initially provided the loan & is also generally responsible for servicing the loans. The schemes will invest in securitized debt of originators with at least investment grade credit rating and established track record. A detailed evaluation of originator is done before the investment is made in securitized debt of any originator on various parameters given below:

Track record:

The investment in securitized debt is done based on the evaluation of the origination & underwriting process and capabilities of the originator, overview of corporate structure, group to which they belong, experience of the company in the business & longevity, processes, financial condition of the company, credit rating, past performance of similar pools by the originator, etc.

Willingness to pay through credit enhancement facilities etc:

Credit enhancement is provided by the originator, as indicated by rating agencies, so as to adequately cover delinquencies and defaults and acts as a risk mitigation measure. The size of the credit enhancement as indicated by the rating agency depends on the originator's track record, past delinquencies, pattern of the portfolio & characteristics of the pool vis-a-vis of the portfolio, nature of the asset class.

Ability to pay:

The quality of the origination impacts the performance of the underlying asset & thus originators with strong systems and processes in place can eliminate poor quality assets. A robust risk management system of the originator and availability of MIS reports on timely basis, results in creation of strong asset portfolio.

Business Risk Assessment:

The business risk assessment of originator / underlying borrower also includes assessment wherein following factors are also considered:

- Outlook for the economy (domestic and global)
- Outlook for the industry
- Company specific factors

In addition, a detailed review and assessment of rating rationale is done along with interactions with the company as well as the rating agency. All investment in securitized debt is done after taking into account, the Critical Evaluation Parameters (for pool loan and single loan securitization transactions) regarding the originator / underlying issuer as mentioned below:

- Default track record/ frequent alteration of redemption conditions / covenants
- High leverage ratios of the ultimate borrower (for single sell downs) - both on a standalone basis as well on a consolidated level/ group level
- Higher proportion of reschedulement of underlying assets of the pool or loan, as the case may be
- Higher proportion of overdue assets of the pool or the underlying loan, as the case may be
- Poor reputation in market
- Insufficient track record of servicing of the pool or the loan, as the case may be.

3. Risk mitigation strategies for investments with each kind of originator:

Investments are based on assessment of following parameters, so as to mitigate risk associated with such investment:

- a. Credit quality, size and reach of the originator
- b. Nature of receivables/asset category i.e. cars, construction equipment, commercial vehicles, personal loans etc.
- c. Collection process, infrastructure and follow-up mechanism
- d. Quality of MIS
- e. Credit cum liquidity enhancement
- f. Credit appraisal norms of originator
- g. Asset Quality - portfolio delinquency levels
- h. Past performance of rated pools
- i. Pool Characteristics - seasoning, Loan-to-value ratios, geographic diversity etc.

4. The level of diversification with respect to the underlying assets, and risk mitigation measures for less diversified investments:

Diversification of underlying assets is achieved through a) prudent mix of asset categories - i.e. cars (new, used), commercial vehicles, construction equipment, unsecured loans to individuals or small & medium enterprises b) total number of contracts in a pool c) average ticket size of loans and d) geographical distribution.

Risk mitigation measures for less diversified investments in pools is accomplished through the size of credit enhancement, seasoning or loan to value ratios.

Illustrative framework, which will be applied while evaluating investment decision relating to a pool securitization transaction:

| Characteristics | Mortgage loan | Commercial Vehicle and Constructions Equipment | Car | 2 Wheelers | Micro Finance Pool | Personal Loans | Single Sell Downs | Others |

NA - Not Applicable Information in the table above is based on current scenario and is subject to change depending upon the change in related factors.

Notes:

- A. In case of securitised debt with underlying being single loan, the investment limit applicable to the underlying borrower is considered.
- B. Other investment will be decided on a case to case basis. In case of asset backed pools (ABS), evaluation of the pool assets is done considering the following factors: (Refer the table above which illustrates the averages of parameters considered while selecting the pool)
 - Size of the loan
 - Average original maturity of the pool
 - Loan to Value Ratio
 - Average seasoning of the pool
 - Default rate distribution
 - Geographical Distribution
 - Credit enhancement facility
 - Liquid facility
 - Structure of the pool

5. Minimum retention period of the debt by originator prior to securitisation

The illustrative average seasoning of the debt by originator prior to securitisation is given above in table (Refer Point 4). Minimum retention period of the debt by originator prior to securitisation in the case of asset pools is in the form of seasoning of loans to various asset classes (cars, commercial vehicles, etc.) and generally varies from one month to six months depending on the nature of asset.

6. Minimum retention percentage by originator of debts to be securitised.

While minimum retention percentage by originator is not prescribed, any amount retained by the originator through subordination is viewed positively at the time of making investment and generally varies from 5% to 10%.

7. The mechanism to tackle conflict of interest when the mutual fund invests in securitised debt of an originator and the originator in turn makes investments in that particular scheme of the fund

All proposals for investment in securitised debt are evaluated by the credit analyst based on several parameters such as nature of underlying asset category, pool characteristics, asset quality, credit rating of the securitisation transaction, and credit cum liquidity enhancement available. Investment in securitised debt in any scheme is made by the respective fund manager in line with the investment objective of that scheme.

8. The resources and mechanism of individual risk assessment with the AMC for monitoring investment in securitised debt (in general)

Investment in securitised debt is monitored regularly with regards to its performance on various parameters such as collection efficiency, delinquencies, prepayments and utilization of credit enhancement. Information on these parameters is available through monthly reports from Pool Trustees and through information disseminated by the rating agencies. Monthly performance report is released by the credit analyst to the fund management team and the fund management team periodically reviews the same

- **Investments in the Schemes of Mutual Fund**

The Scheme may invest in schemes managed by the AMC or in the schemes of any other Mutual Fund, provided it is in conformity with the investment objectives of the Scheme and in terms of the prevailing SEBI Regulations. As per the SEBI Regulations, no Investment Management fees will be charged for such investments and the aggregate inter scheme investment made by all schemes in the schemes of the Mutual Fund or in the schemes under the management of any other asset management company shall not exceed 5% of the Net Asset Value of the Mutual Fund.

- Derivative Instrument like Interest Rate Swaps, Forward Rate Agreement and such other derivative instruments as may be permitted under the Regulations.
- Any other domestic equity and equity related instruments / debt securities as permitted by RBI/SEBI/ such other Regulatory Authority from time to time.

The above-mentioned securities could be listed, secured, unsecured, rated or unrated and may be acquired through Primary, secondary market offerings, private placements, rights offer etc. Further, investments in debentures, bonds and other fixed income securities will usually be in instruments, which have been assigned investment grade ratings by an approved rating agency. In cases where the debt instrument is unrated, specific approval from the Board of the Asset Management Company and the Board of Trustees shall be obtained. However, the same shall be subject to limitations as contained in clause 1 and 1A, of Schedule VII to SEBI (Mutual Funds) Regulations, 1996.

For further details please refer SAI.

B. REQUIREMENT OF MINIMUM INVESTORS IN THE SCHEME

The Scheme shall have a minimum of 20 investors and no single investor shall account for more than 25% of the corpus of the Scheme. If either/both of such limit(s) is breached during the NFO of the Scheme, it shall be ensured that within a period of three months or the end of the succeeding calendar quarter from the close of the NFO of the Scheme, whichever is earlier, the Scheme complies with these two conditions. During the ongoing offer these two conditions shall be complied with on calendar quarter basis, on an average basis, as specified by SEBI. In case the Scheme does not have a minimum of 20 investors in the stipulated period, the provisions of Regulation 39(2) (c) of the SEBI (MF) Regulations would become applicable automatically without any reference

from SEBI and accordingly the Scheme shall be wound up and the Units would be redeemed at applicable NAV. If there is a breach of the 25% limit by any investor over the quarter, a rebalancing period of one month would be allowed and thereafter the investor who is in breach of the rule shall be given 15 days' notice to redeem his exposure over the 25% limit. Failure on the part of the said investor to redeem his exposure over the 25 % limit within the aforesaid 15 days would lead to automatic redemption by the Mutual Fund on the Applicable Net Asset Value on the 15th day of the notice period. The Mutual Fund shall adhere to the requirements prescribed by SEBI from time to time in this regard.

In order to track the investor's holding rather than the folio/account's holdings, the fund houses are recommended to track the investors at the master folio/ master account (whatever be the terminology used by the fund houses) level. In addition, since there is a possibility of an investor holding multiple accounts, the account is identified for the purpose of aggregation to comply with 20/25 rule by using a common parameter like PAN. Thus, tracking of investor's holding & number of investors may be conducted using a common parameter like PAN, Master Folio/Master Account, since there is possibility of an investor holding multiple accounts. In line with AMFI's suggestion, tracking of investor's holding & number of investors may be conducted using a common parameter like PAN, master folio/master account, since there is possibility of an investor holding multiple accounts. In case of multiple folios, the sequence or the order of the compulsory redemption is left to the discretion of the fund house in consultation with the investor.

The IC can extend the timelines up to sixty (60) business days from the date of completion of the mandated rebalancing period. In case the portfolio of schemes is not rebalanced within the aforementioned mandated plus extended timelines, AMCs shall:

- i. not be permitted to launch any new scheme till the time the portfolio is rebalanced.

 - h) Unit holders, who wish to redeem their units under the Scheme will receive redemption proceeds only for the units held under the Main Portfolio of the Scheme based on its NAV and will continue to hold the Units of Segregated Portfolio. However, upon recovery of money from Segregated Portfolio, whether partial or full, it will be immediately distributed to the unit holders in proportion to their holding in the Segregated Portfolio;
- 3) If the Trustees do not approve the proposal to segregate portfolio, the AMC will issue a press release immediately informing investors of the same. In that case, subscription and redemption applications will be processed based on the NAV of Total Portfolio.

Creation of Segregated Portfolio of unrated debt or money market instruments by mutual fund schemes of an issuer that does not have any outstanding rated debt or money market instruments, subject to the following:

- a. Segregated Portfolio of such unrated debt or money market instruments may be created only in case of actual default of either the interest or principal amount.
- b) The AMC is required to inform AMFI immediately about the actual default by the issuer. Upon being informed about the default, AMFI shall immediately inform the same to all AMCs. Pursuant to dissemination of information by AMFI about actual default by the issuer, the AMC may segregate the portfolio.

Valuation:

The valuation would take into account the credit event and the portfolio shall be valued based on the principles of fair valuation (i.e. realizable value of the assets) in terms of the relevant provisions of SEBI (Mutual Funds) Regulations, 1996 and Circular(s) issued thereunder.

Disclosure Requirement:

- a. A statement of holding indicating the units held by the investors in the segregated portfolio along with the NAV of both segregated portfolio and main portfolio as on the day of the credit event shall be communicated to the investors within 5 working days of creation of the segregated portfolio.
- b. Adequate disclosure of the segregated portfolio shall appear in all scheme related documents, in monthly and half-yearly portfolio disclosures and in the annual report of the mutual fund and the scheme.
- c. The Net Asset Value (NAV) of the segregated portfolio shall be declared on daily basis.
- d. The information regarding number of segregated portfolios created in a scheme shall appear prominently under the name of the scheme at all relevant places such as SID, KIM-cum-Application Form, advertisement, AMC and AMFI websites, etc.
- e. The scheme performance required to be disclosed at various places shall include the impact of creation of segregated portfolio. The scheme performance should clearly reflect the fall in NAV to the extent of the portfolio segregated due to the credit event and the said fall in NAV along with recovery(ies), if any, shall be disclosed as a footnote to the scheme performance.
- f. The disclosures at paragraph (d) and (e) above regarding the segregated portfolio shall be carried out for a period of at least 3 years after the investments in segregated portfolio are fully recovered/ written-off.
- g. The investors of the segregated portfolio shall be duly informed of the recovery proceedings of the investments of the segregated portfolio. Status update may be provided to the investors at the time of recovery and also at the time of writing-off of the segregated securities.

Monitoring by Trustees

- a. In order to ensure timely recovery of investments of the segregated portfolio, trustees shall ensure that:
 - i. The AMC puts in sincere efforts to recover the investments of the segregated portfolio.
 - ii. Upon recovery of money, whether partial or full, it shall be immediately distributed to the investors in proportion to their holding in the segregated portfolio. Any recovery of amount of the security in the segregated portfolio even after the write off shall be distributed to the investors of the segregated portfolio.
 - iii. An Action Taken Report (ATR) on the efforts made by the AMC to recover the investments of the segregated portfolio is placed in every trustee meeting till the investments are fully recovered/ written-off.
 - iv. The trustees shall monitor the compliance of this circular and disclose in the half-yearly trustee reports filed with SEBI, the compliance in respect of every segregated portfolio created.
- b. In order to avoid mis-use of segregated portfolio during the credit event trustees have put mechanism in place to negatively impact the performance incentives of Fund Managers, Chief Investment Officers (CIOs), etc. involved in the investment process of securities under the segregated portfolio, mirroring the existing mechanism for performance incentives of the AMC, including claw back of such amount to the segregated portfolio of the scheme.

Benefits of Segregated Portfolio

While very stringent internal credit evaluation norms are being followed by the AMC/Mutual Fund, the risk of credit downgrade in portfolio companies due to various factors cannot be ruled out. In the event of credit downgrade the downgraded instrument generally becomes illiquid making it very difficult for the fund manager to dispose of such instruments. In such an event segregation of such an instrument from the main portfolio will prevent the distressed asset(s) from damaging the returns generated from more liquid and better-performing assets of the portfolio. It also provides fair treatment to all existing, incoming and outgoing investors, as any

recovery from the issuer in future would get distributed among those investors, who would have suffered a loss due to a downgrade event.

D. WHERE WILL THE SCHEME INVEST?

1. Investment in Equity and Equity related instruments:

The Scheme will invest in Equity and Equity related instruments inclusive of convertible debentures, equity warrants, convertible preference shares, equity derivatives etc.

2. Investment in Debt and Money Market securities:

The Scheme shall invest in a range of Debt & Money Market Instruments. Some of these instruments are:

- a. Securities created and issued by Governments of India and/or repos/ reverse repos in such Government Securities as may be permitted by RBI (including but not limited to coupon bearing bonds, zero coupon bonds and treasury bills).
- b. Securities guaranteed by the Central and State Governments (including but not limited to coupon bearing bonds, zero coupon bonds and treasury bills).
- c. Corporate debt securities and repo in corporate debt Securities (of both public and private sector undertakings) including Bonds, Debentures, Notes, etc in line with paragraph 12.18 of the Master Circular for Mutual Funds dated May 19, 2023, read with SEBI circular no. SEBI/HO/IMD/IMD PoD-2/P/CIR/2023/85 dated June 8, 2023 and SEBI circular no. SEBI/HO/IMD/IMD PoD-2/P/CIR/2023/87 dated June 13, 2023.
- d. Money Market instruments includes commercial papers, commercial bills, treasury bills, Tri-party repo, Government securities having an unexpired maturity up to one year, call or notice money, certificate of deposit, usance bills, and any other like instruments as specified by the Reserve Bank of India from time to time.
- e. Fixed Income Securities of domestic Government agencies and statutory bodies, which may or may not carry a Central/State Government guarantee.
- f. Certificate of Deposits (CDs).
- g. Commercial Paper (CPs).
- h. Securitized Debt Obligations.

The above-mentioned securities could be listed, secured, unsecured, and may be acquired through Primary, secondary market offerings, private placements, rights offer etc. Further, investments in debentures, bonds and other fixed income securities will usually be in instruments, which have been assigned investment grade ratings by an approved rating agency.

3. Investments in Derivative Instruments:

The Scheme may invest in Derivative Instruments to the extent permitted paragraph 7.5 & 12.25 of the Master Circular for Mutual Funds dated May 19, 2023 on 'Trading by Mutual Funds on Exchange Traded Derivatives' as amended from time to time. Derivative products are specialized instruments that require investment techniques and risk analysis different from those associated with stocks and bonds. The use of derivatives requires an understanding not only of the underlying instrument but also of the derivative instrument itself. The Scheme may use derivative instruments such as index futures and options, stock futures and options contracts, warrants, convertible securities, swap or forward rate agreements or any other derivative instruments that are permissible or may be permissible in future under applicable regulations and such investments shall be in accordance with the investment objective of the Scheme.

Index futures/options are meant to be an efficient way of buying/selling an index compared to buying/selling a portfolio of physical shares representing an index for ease of execution and settlement. Index futures/options can be an efficient way of achieving the Scheme's investment objective. Notwithstanding the pricing, they can

help in reducing the Tracking Error in the Scheme. Index futures/options may avoid the need for trading in individual components of the index, which may not be possible at times, keeping in mind the circuit filter system and the liquidity in some of the individual stocks. Index futures/options can also be helpful in reducing the transaction costs and the processing costs on account of ease of execution of one trade compared to several trades of shares comprising the Underlying Index and will be easy to settle compared to physical portfolio of shares representing the Underlying Index. In case of investments in index futures/options, the risk/reward would be the same as investments in portfolio of shares representing an index. However, there may be a cost attached to buying an index future/option. Further, there could be an element of settlement risk, which could be different from the risk in settling physical shares. This settlement risk is likely to be minimized if the exchange acts as the clearing corporation and the counter party, as is the practice in the developed markets. The Scheme will not maintain any leveraged or trading positions.

4. Covered Call Options:

A call option gives the holder (buyer) the right but not the obligation to buy an asset by a certain date for a certain price. Covered calls are an options strategy where a person holds a long position in an asset and writes (sells) call options on that same asset. Benefits of using Covered Call strategy in Mutual Funds: The covered call strategy can be followed by the Fund Manager in order to hedge risk thereby resulting in better risk adjusted returns of the Scheme. The strategy offers the following benefits:

- a) Hedge against market risk - Since the fund manager sells a call option on a stock already owned by the mutual fund scheme, the downside from fall in the stock price would be lower to the extent of the premium earned from the call option.
- b) Generating additional returns in the form of option premium in a range bound market. Thus, a covered call strategy involves gains for unit holders in case the strategy plays out in the right direction.

Illustration – Covered Call strategy using stock call options:

A fund manager buys equity stock of ABC Ltd. For Rs.1000 and simultaneously sells a call option on the same stock at a strike price of Rs. 1100. Further, it is assumed that the scheme earned a premium of Rs. 50 and the fund manager is of the opinion that the stock price will exceed Rs. 1100, during the expiry period of the option.

Scenario 1: Stock price exceeds Rs. 1100 The call option will get exercised, and the fund manager will sell the stock to settle his obligation on the call at Rs. 1100 (earning a return of 10% on the stock purchase price). Also, the scheme has earned a premium of Rs. 50, this has reduced the purchase cost of the stock (Rs. 1000 – Rs. 50 = Rs. 950).

Hence, the Net Gain = Rs. 150 (Rs. 100 stock appreciation + Rs. 50 call option premium)

(However, please note that in a scenario where the stock price reaches Rs. 1300, investment in long only equity would be more beneficial than a covered call strategy as the net gain under the covered call strategy would be Rs. 150, against a net gain of Rs. 300 under a pure long only equity strategy.)

Scenario 2: Stock prices stay below Rs. 1100 The call option will not get exercised and will expire worthless. The premium earned on call option will generate alpha for the scheme. Hence, the Net Gain = Rs. 50.

5. Investments in units of Infrastructure Investment Trusts (InvITs) and Real Estate Investment Trusts (REITs):

In accordance with clause 12.21 of the Master Circular for Mutual Funds dated May 19, 2023 and amendments thereto from time to time, the Scheme may invest in units of Infrastructure Investment Trusts (InvITs) and Real Estate Investment Trusts (REITs) within the stipulated investment limits.

6. Investments in the Schemes of Mutual Fund:

The Scheme may invest in units of the schemes managed by the AMC, provided it is in conformity with the investment objectives of the Scheme and in terms of the prevailing SEBI Regulations. As per SEBI Regulations, no Investment Management fees will be charged for such investments and the aggregate inter Scheme investment made by all Schemes in the schemes of the Mutual Fund shall not exceed 5% of the Net Asset Value of the Mutual Fund.

E. INVESTMENT STRATEGY & APPROACH

The fund will follow a bottom-up approach to stock-picking and choose companies which are expected to derive benefit from development, use and advancement of technology.

The companies will be selected after rigorous fundamental research which includes parameters like management competitiveness, business competitiveness, corporate governance, growth prospects, valuations, past track record etc.

Indicative list of businesses where the scheme would invest in are:

- IT services, software, consulting, and outsourcing companies

- IT products and hardware including computers, smartphones, wearables, electronic devices & components, semiconductors, etc.
- Internet companies and Internet-enabled services including Fintech, e-retail/e-commerce, technology platforms, IoT (Internet of Things), and other digital service providers.
- Telecommunications, including networking, wireless, and wire-line services, equipment, software, and support and other Infrastructure providers..
- Media and information services, including the distribution of information and content providers.
- Data and data solutions providers
- IT infrastructure providers like data centres, leased line providers etc
- PaaS, SaaS, DaaS, DBaaS, etc companies

Please note that the above list is indicative, and the Fund Manager may add such other businesses that are part of the Technology and technology-related sector.

A portion of the scheme will also be invested in IPOs and other primary market offerings that meet the Scheme's investment criteria. Further, to achieve diversification, the Scheme may also invest up to 20% of the assets in companies other than those in Technology & technology related sectors.

The Scheme may also invest some portion of the investible funds in debt and money market instruments. Investment in overseas securities will be subject to restrictions stated in the Asset Allocation Pattern.

The Scheme may seek to invest up to 30% of its net assets in foreign securities.

For the present, the Scheme does not intend to enter into underwriting obligations. However, if the Scheme does enter into an underwriting agreement, it would do so with the prior approval of the Board of the AMC/Trustee.

- **Risk Control:**

The Fund shall invest in a diversified basket of equity stocks spread across sectors, debt and money market instruments along with a portion of fund invested in initial/primary market offerings.

This allocation will be steadily monitored, and it shall be ensured that investments are made in accordance with the Scheme objective and within the regulatory and internal investment restrictions prescribed from time to time. Diversification across sectors/companies at the time of investments shall also manage the risk.

The Fund has designed a detailed process to identify, measure, monitor and manage the portfolio risk. The aim is not to eliminate the risk completely but to have a structured mechanism towards risk management thereby maximizing potential opportunities and minimize the adverse effects of risk. Few of the key risks identified are:

Risk control / mitigation measures

| Type of Risk | Risk mitigants / management strategy |
|---|--|
| Credit risk Risk associated with repayment of investment | Investment universe carefully selected to only include issuers with high credit quality and good net worth |
| Performance risk Risk arising due to change in factors affecting the market | Understand the working of the markets and respond effectively to market movements |
| Concentration risk Risk arising due to over exposure in few securities | Invest across the spectrum of issuers and keeping flexibility to invest across tenor |

| | |
|---|---|
| Liquidity risk Risk arising due to inefficient Asset Liability Management, resulting in high impact costs | Control portfolio liquidity at portfolio construction stage. Having optimum mix of cash & cash equivalents along with the money market instruments in the portfolio |
| Interest rate risk Price volatility due to movement in interest rates | Control the portfolio duration and periodically evaluate the portfolio structure with respect to existing interest rate scenario |

- **Portfolio Turnover:**

The Scheme will endeavour to keep the portfolio turnover at a minimum. However, the portfolio turnover ratio may vary as the Scheme may change the portfolio according to Asset Allocation to align itself with the objectives of the Scheme. The effect of higher portfolio turnover could be higher brokerage and transaction costs.

F. INVESTMENT BY THE AMC IN THE SCHEME

The AMC may invest either directly or indirectly in the Scheme during the NFO Period and on ongoing basis. However, the AMC shall not charge any investment management and advisory services fee on such investments in a Scheme.

Investment Restrictions pertaining to Debt Derivatives:

In terms of Circular No. MFD.BC.191/07.01.279/1999-2000 and MPD. BC.187/07.01.279/1999-2000 dated November 1, 1999 and July 7, 1999 respectively issued by the RBI permitting participation by mutual funds in interest rate swaps and forward rate agreements, the Fund will use derivative instruments for the purpose of hedging and portfolio balancing. Further, the guidelines issued by the RBI from time to time for forward rate agreements and interest rate swaps and other derivative products will be adhered to by the Fund.

Interest Rate Swaps (IRS)

An IRS is an agreement between two parties to exchange stated interest obligations for an agreed period in respect of a notional principal amount. The most common form is a fixed to floating rate swap where one party receives a fixed (pre-determined) rate of interest while the other receives a floating (variable) rate of interest.

Forward Rate Agreement (FRA)

A FRA is basically a forward starting IRS. It is an agreement between two parties to pay or receive the difference between an agreed fixed rate (the FRA rate) and the interest rate (reference rate) prevailing on a stipulated future date, based on a notional principal amount for an agreed period. The only cash flow is the difference between the FRA rate and the reference rate. As is the case with IRS, the notional amounts are not exchanged in FRAs.

Example of a derivatives transaction -**Basic Structure of a Swap Bank**

A has a six-month V 10 crore liability, currently being deployed in call. Bank B has a V 10 crore, six-month asset, being funded through call. Both banks are running an interest rate risk.

To hedge this interest rate risk, they can enter into a six-month MIBOR swap. Through this swap, A will receive a fixed pre-agreed rate (say 7%) and pay "call" on the NSE MIBOR ("benchmark rate"). Bank A paying at "call" on the benchmark rate will hedge the interest rate risk of lending in call. Bank B will pay 7% and receive interest at the benchmark rate. Bank A receiving of "call" on the benchmark rate will hedge its interest rate risk arising from its call borrowing.

The mechanism is as follows: -

- Assume the swap is for V 10 crore March 1, 2005 to September 1, 2005. A is a fixed rate receiver at 7% and B is a floating rate receiver at the overnight compounded rate.
- On March 1, 2005, A and B will exchange only an agreement of having entered this swap. This documentation would be based on an International Swaps and Derivatives Association (ISDA) template.
- On a daily basis, the benchmark rate fixed by NSE will be tracked by them. On September 1, 2005 they will calculate the following:
- A is entitled to receive interest on R 10 crore at 7% for 184 days i.e. V 35.28 lakh, (this amount is known at the time the swap was concluded) and will pay the compounded benchmark rate.
- B is entitled to receive daily compounded call rate for 184 days and pay 7% fixed.
- On September 1, 2005, if the total interest on the daily overnight compounded benchmark rate is higher than V 35.28 lakhs, A will pay B the difference. If the daily compounded benchmark rate is lower, then B will pay A the difference.
- Effectively, Bank A earns interest at the rate of 7% p.a. for six months without lending money for six months fixed, while Bank B pays interest @ 7% p.a. for six months on V 10 crore, without borrowing for six months fixed.

As per the above-mentioned RBI circulars, mutual funds are permitted to do interest rate swaps / forward rate agreements for hedging purposes only. Accordingly, the AMC would undertake the same for similar purposes only. IRS and FRAs also have inherent credit and settlement risks. However, these risks are reduced as they are limited to the interest streams and not the notional principal amounts.

Investments in derivatives will be in accordance with the SEBI Regulations / guidelines and presently derivatives shall be used for hedging and / or portfolio balancing purposes, as permitted under the Regulations. The circumstances under which such transactions would be entered into would be when, using the IRS route, it is possible to generate better returns / meet the objective of the Scheme at a lower cost. For example, if buying a two-year MIBOR based instrument and receiving the two-year swap rate yields better return than buying the two-year AAA corporate instrument, the Scheme would endeavour to do that. Alternatively, the Scheme would also look to hedge existing fixed rate positions if the view on interest rates is that they are likely to rise in the future.

The Trustee may alter the above restrictions from time to time to the extent that changes in the Regulations may allow and as deemed fit in the general interest of the Unit Holders.

These investment restrictions shall be applicable at the time of investment and changes do not have to be effected merely because, owing to appreciations or depreciations in value, or by reason of the receipt of any rights, bonuses or benefits in the nature of capital or of any Schemes of arrangement or for amalgamation, reconstruction or exchange, or at any repayment or redemption or other reason outside the control of the Fund, any such limits would thereby be breached. If these limits are exceeded for reasons beyond its control, AMC shall as soon as possible take appropriate corrective action, taking into account the interests of the Unit holders.

In addition, certain investment parameters may be adopted internally by AMC, and amended from time to time, to ensure appropriate diversification / security for the Fund. The Trustee Company / AMC may alter these above stated limitations from time to time, and also to the extent the SEBI (Mutual Funds) Regulations, 1996 change, so as to permit the Schemes to make its investments in the full spectrum of permitted investments for Mutual Funds to achieve its investment objective. As such all investments of the Schemes will be made in accordance with SEBI (Mutual Funds) Regulations, 1996, including Schedule VII thereof.

K. SCHEME PERFORMANCE

L. INVESTMENT OF SUBSCRIPTION MONEY

Pending deployment in securities as per the investment objectives of the Scheme and also taking into consideration the current SEBI Regulations, the Fund may invest subscription money received from the investors in bank deposits, or money market instruments before finalisation of the allotment of Units. The AMC, on being satisfied of the receipt of the minimum subscription amount, can commence investment out of the funds received in accordance with the investment objectives of the Scheme and as per the existing Regulations, on or after the closure of the NFO period. The income earned out of such investments would be merged with the corpus of the Scheme on completion of the allotment of the Units.

Income / profits received / earned on the Scheme's corpus would be accumulated by the Fund as capital accretion & will remain invested in the Scheme and will be reflected in the Net Asset Value (NAV). Unit holders who opt for this Option will not receive any IDCW in normal circumstances.</p> <p>(b) INCOME DISTRIBUTION CUM CAPITAL WITHDRAWAL Option (Payout Facility): Under this Option, IDCW will be declared subject to the availability of distributable surplus as computed in accordance with SEBI Regulations. IDCWs, if declared, will be paid (subject to deduction of TDS and statutory levy, if any) to those Unit holders, whose names appear in the register of Unit holders on the notified record date. AMC reserves the right to change the record date from time to time. However, it must be distinctly understood that actual declaration of IDCWs and frequency thereof is at the discretion of Board of Trustees. There is no assurance or guarantee to Unit holders as to the rate of IDCW distribution nor that the IDCWs will be declared regularly, though it is the intention of the Mutual Fund to make regular IDCW distribution under the IDCW Option. On payments of IDCWs, the NAV will stand reduced by the amount of IDCW paid and the dividend distribution tax, if applicable.</p> <p>(c) INCOME DISTRIBUTION CUM CAPITAL WITHDRAWAL Option (Reinvestment Facility): Unit holders opting for IDCW option may choose to reinvest the IDCWs to be received by them. Under this facility the IDCW due and payable to the Unit holders will be compulsorily and without any further act by the Unit holders, reinvested in the IDCW option at a price based on the prevailing Net Asset Value per Unit on the record date. The Units for the purpose of reinvestment will be created and credited to the Unit holder's account at a price based on the prevailing Ex-IDCW Net Asset Value (NAV derived post declaration of IDCW) per unit on the record date. There shall, however, be no load on the IDCWs so reinvested. In case the selected date for IDCW declaration falls on a holiday/non-Business Day then the next Business Day will be considered.</p> <p>Default Option: Growth Option If the investor does not clearly specify the choice of Option at the time of investing, the Units of the respective Scheme(s) will be allotted in the Growth Option of the Scheme.</p> <p>Default Facility: IDCW Reinvestment If the investor selects IDCW Option but fails to mention the facility, it will be deemed that the investor has opted for IDCW Reinvestment facility.</p> |

| IDCW Policy | <ul style="list-style-type: none"> ● IDCW Distribution Procedure: SEBI Circular lays down the procedure for Declaration of IDCW which clearly says that quantum of IDCW and record date shall be fixed by the Board of Trustees and AMC shall issue a notice to the public communicating the decision about IDCW including the record date, within one calendar day of the decision made by the Board of Trustees in their meeting. Record date shall be the date that will be considered for the purpose of determining the eligibility of investors whose name appears on the register of Unit holders. The record date shall be 2 working days from the issue of public notice. The Trusteeship Company reserves the right to declare IDCW on a regular basis. The Fund does not guarantee or assure declaration or payment of IDCW. Although the Trustees have intention to declare IDCW under IDCW Option, such declaration of IDCW if any, is subject to Scheme's performance & the availability & adequacy of distributable surplus in the Scheme at the time of declaration of such IDCW. Investors should note that, when the Mutual Fund declares an IDCW under the Scheme, the Income distribution shall be dispatched within 7 working days of the record date. The requirement of giving notice & the above laid procedure shall not be compulsory for Scheme/plan/option having frequency of IDCW distribution from daily upto monthly IDCW. Further, investors are requested to note that the amounts can be distributed out of the investor's capital (Equilization Reserve), which is part of sales price that represents realized gains. ● Effect of IDCWs: When IDCWs are declared and paid under the Scheme, the net assets attributable to Unit holders in the IDCW Option will stand reduced by the IDCW amount subject to TDS and statutory levy if any. The NAV of the Unit holders in the Growth Option will remain unaffected by the payment of IDCW. Even though the asset portfolio will be un-segregated, the NAVs of the Growth Option and IDCW Option will be distinctly different after declaration of the first IDCW to the extent of distributed income, tax and statutory levy paid thereon, where applicable, and expenses relating to the distribution of IDCWs. ● Mode of Payment of IDCWs: The Scheme proposes to pay IDCW by Direct Credit or through RTGS or NEFT or any other EFT means. RBI offers the facility of EFT for facilitating better customer service by direct credit of IDCW amount to a Unit holder's bank account through electronic credit which avoids loss of IDCW in transit or fraudulent encashment. The Mutual Fund will endeavour to offer this facility for payment of IDCW/repurchase proceeds to the Unit holders residing in any of the cities where such a Bank facility is available. |

| | |
|------------------|--|
| | <p>The Fund is arranging with selected bankers to enable direct credits into the bank accounts of the investors at these banks. If an investor has an account with a bank with which the Fund will tie up for direct credit, the IDCW amount will be credited directly to the bank account, under intimation to the Unit holder by email/SMS/post. The Mutual Fund, on a best effort basis, and after scrutinising the names of the banks where Unit holders have their accounts, will enable direct credit/RTGS/NEFT/ to the Unit holders' bank accounts.</p> <p>While the preferred mode of payment is through EFT route, the AMC is at the sole discretion to pay IDCW by any other means (including at par cheques and demand drafts, where the EFT facility is not available in a particular city or Bank or as the Trusteeship Company or the AMC deems fit in the interest of investors.)</p> <p>All the IDCW payments shall be in accordance and compliance with SEBI Regulations, as amended from time to time.</p> <p>If Unit holders have opted for IDCW Payout Option, if the IDCW amount payable to such Unit holders (net of tax deducted at source, wherever applicable) is less than or equal to Rs. 250, following treatment shall be:</p> <ol style="list-style-type: none"> a. Where the option to payout IDCW is available in electronic mode: The IDCW amount shall be paid to the Unit holders. However, if the payment through electronic mode is unsuccessful, the AMC shall issue IDCW warrant for such amount; and b. Where the option to payout IDCW is not available in electronic mode: The IDCW shall be mandatorily reinvested in the respective Scheme/Plan by issuing additional Units at the applicable ex-IDCW NAV. |

Unit holders under the Scheme have the option to switch part or all of their Unit holdings in the respective Plans to any other open-ended Schemes launched by the Mutual Fund from time to time. The Mutual Fund also, provides the investors the flexibility to switch their investments from any other open-ended Scheme(s) / plan (s) that will be offered by the Mutual Fund in future to this Scheme.

This Option will be useful to Unit holders who wish to alter the allocation of their investment among the open ended Scheme(s) / Plan(s)/Options of the Mutual Fund (subject to completion of lock-in period, if any, of the Units of the Scheme(s) from where the Units are being switched) in order to meet their changed investment needs. The Switch will be effected by way of a redemption of Units from the Scheme / Plan/Option and a reinvestment of the redemption proceeds in an open-ended Scheme / Plan/Option and accordingly, to be effective, the switch must comply with the redemption rules of the Scheme and the issue rules of the other Scheme (for e.g.

applicable cut off time & NAV, minimum amount to be subscribed/ redeemed, Entry/ Exit Load etc.). The price at which the Units will be switched out of the respective Plans/Options will be based on the Redemption Price, and the proceeds will be invested in any open ended Scheme / Plan/Option at the prevailing sale price for Units in that Scheme / Plan/Option.

Valid applications for 'switch-out' shall be treated as applications for redemption and valid applications for 'switch-in' shall be treated as applications for Purchase.

Exit Load, as applicable, will be charged in case of switch-outs/systematic transfers between Edelweiss Balanced Advantage Fund, Edelweiss Midcap Fund and Edelweiss ELSS Tax saver Fund.

In such cases, after the switch, exit load under the Scheme prevailing on the date of the switch shall apply for subsequent redemptions/switch out from Edelweiss Technology Fund - Direct Plan. However, where investments were made directly, i.e. without any Distributor Code, exit load will not be levied on switch of units from Edelweiss Technology Fund - Regular Plan to Edelweiss Technology Fund - Direct Plan.
- No exit load shall be levied in case of switch of units from Edelweiss Technology Fund - Direct Plan to Edelweiss Technology Fund - Regular Plan. However, after the switch, exit load under the Scheme prevailing on the date of switch shall apply for subsequent redemptions/switch out from Edelweiss Technology Fund.
- No exit load shall be levied in case of switch of units between the Options under the same Plan.

Any valid Intra Scheme Switching between Plans will be treated in the same manner as applications for purchase or redemption & will attract load as applicable in case of purchase/ redemption. It will also have tax consequences.

It should be noted that switch between Options will not attract load & such switches will take place at the Applicable NAV based prices and the difference between the NAVs of the two Plans/Options will be reflected in the number of Units allotted.

D. COMPUTATION OF NET ASSET VALUE

The Net Asset Value (NAV) of the Units will be calculated on every Business Day and for such other days as may be required for the purpose for transaction of Units. The NAV shall be calculated in accordance with the following formula, or such other formula as may be prescribed by SEBI from time to time:

$$\text{NAV} = \frac{\text{Market or Fair Value of the Scheme's Investments+ Receivables+ Accrued Income+ Other Assets- Accrued Expenses- Payables- Other Liabilities}}{\text{Number of Units Outstanding}}$$

The NAV of the Scheme will be calculated and declared upto Four decimal places & the fourth decimal will be rounded off higher to the next digit if the fifth decimal is or more than 5 i.e., if the NAV is Rs. 10.12789 it will be rounded off to Rs. 10.1279.

Computation of NAV in case of investment in foreign securities: On the valuation day, all the assets and liabilities denominated in foreign currency will be valued in Indian Rupees.
