<b>INVESTMENT OBJECTIVE</b>	<p>The investment objective of the scheme is to track the Nifty BHARAT Bond Index – April 2033 by investing in bonds of AAA-rated CPSEs/CPSUs/CPFIs and other Government organizations, subject to tracking errors.</p> <p>However, there is no assurance that the investment objective of the Scheme will be realized and the Scheme does not assure or guarantee any returns.</p>

<p><b>RISK PROFILE OF THE SCHEME</b></p>	<p>The performance of the Scheme may be affected by changes in Government policies, general levels of interest rates and risks associated with trading volumes, liquidity and settlement systems, etc. Some of the risks are listed below:</p> <p><b>1. Risks Associated with Fixed Income and Money Market Instruments:</b></p> <ul style="list-style-type: none"> <li>• <b>Interest rate risk:</b> Price of a fixed income instrument falls when the interest rates move up and vice-versa, which will affect the NAV accordingly.</li> <li>• <b>Spread risk:</b> Investments in corporate bonds are exposed to the risk of widening of the spread between corporate bonds and gilts. Prices of corporate bonds tend to fall if this spread widens which will affect the NAV of the Scheme accordingly.</li> <li>• <b>Credit risk or default risk:</b> Credit risk is the risk that the issuer of a debenture/ bond or a</li> </ul>

money market instrument may default on interest &/or principal payment obligations.

- **Liquidity:** The Risk of non-execution of sale/purchase order due to low volumes is liquidity risk.
- **Reinvestment risk:** Interest rates may vary from time to time. The rate at which intermediate cash flows are reinvested may differ from the original interest rates on the security, which can affect the total earnings from the security.
- **Performance Risk:** Performance of the Scheme may be impacted with changes in factors, which affect the capital market and in particular the debt market.
- **Market risk:** Lower rated or unrated securities are more likely to react to developments affecting the market as they tend to be more sensitive to changes in economic conditions than higher rated securities.

**2. Risk Factors associated with Exchange Traded Fund investing in Bonds:**

i. Lack of Vibrant Secondary Market for Units of the Scheme:

Although the Units of the Scheme will be listed on the Stock Exchanges such as NSE and BSE, there can be no assurance that a vibrant secondary market for units of the Scheme will be developed or maintained by the Market Makers.

ii. Halting of Trading in Units of the Scheme:

Trading in the Units of the Scheme on NSE/BSE may be halted because of market conditions or for reasons that in view of NSE/BSE, SEBI or any other Regulatory authorities. Thus, active trading in the units of the Scheme is not advisable.

In addition, trading of the Units of the Scheme are subject to trading halts caused by extraordinary market volatility and pursuant to stock exchange and SEBI 'circuit filter' rules.

There can be no assurance that the requirements of NSE/BSE necessary to maintain the listing of the Units of the Scheme will continue to be met or will remain unchanged.

iii. Lack of secondary market depth:

In case of unit creation and unit redemption, the Scheme will have to either buy a basket of securities or sell a basket of securities. - This requires an active secondary market for underlying securities at all points of time. A lack of depth in secondary market for underlying securities could hamper the efficient transaction in unit creation and unit redemption.

iv. Units of the scheme may trade at prices other than NAV:

Depending on the demand-supply dynamic, the units of the Scheme may either trade on the Stock Exchange above or below the NAV of the Scheme. This may give rise to arbitrage opportunities. However, the in-built mechanisms of unit creation and unit redemption in the form of Cash or in-kind is designed to reduce the arbitrage opportunity for market participants.

v. Regulatory Risk:

Any changes in Regulations by SEBI / RBI / Stock Exchange / GOI / and other decision makers may hamper the ability of the market participants in trading resulting into wider premium/discount to NAV.

vi. Asset Class Risk:

The returns from the types of Securities in which the Scheme invests may underperform returns of general Securities markets or different asset classes. Different types of securities tend to go through cycles of out-performance and under-performance in comparison of Securities markets.

vii. Redemption Risk:

Investors should note that even though the Scheme is an open-ended Scheme, subscription/redemptions of Units of the Scheme directly with the Fund would be limited to such investors who have the ability to subscribe/redeem the units of the Scheme in specific Creation Size. Generally, these lot sizes are larger as compared to normal funds. Thus, even though this Scheme is open ended, due to large lot size, very few investors can directly subscribe and redeem the units of the Scheme. However, investors wishing to subscribe/redeem units in other than specific lot sizes can do so by buying/selling the same on NSE/BSE.

The AMC will endeavor to pay the redemption proceeds in Cash. However depending on the market volatility, liquidity conditions, applicable regulatory provisions, investor request etc., the AMC may redeem the Units and make the payout either "in-kind" i.e. through slice of the entire bond Portfolio or in combination of both i.e. Cash and "in-kind".

viii. Risk of Investment Strategy:

As the Scheme would be primarily investing in the Bonds of CPSE or any other eligible entities, any government policy which will have an impact on central public sector enterprises, including any change in the disinvestment policy of the government, could impact the price of the underlying assets. This may have negative impact on the performance of the Scheme.

ix. Risk of Credit Rating changes:

It is understood that most of the CPSE securities have higher credit rating essentially due to government ownership and implied government support. Any potential change in government control, shareholding pattern, market perception, corporate action etc., could result in potential downgrade of credit rating of the Issuers. This may have negative impact on the performance of the Scheme.

x. Risk of Investment in eligible securities:

The Scheme's objective is to invest in CPSEs securities as defined in the Index. The Scheme will invest in the securities predominantly through private placement route. These securities are generally auctioned on Electronic Bidding Platforms (EBP) in anonymous manner through competitive bidding. It is quite possible that the Scheme may not be able to subscribe to these securities in sufficient quantities. This may result in sub-optimal asset allocation until the next bidding takes place.

xi. Risk of variation in asset allocation as compared to the Index:

The Scheme intends to accept "in-kind" unit creation request from investors. The criteria for securities eligible for "in-kind" subscription has been defined in this document. It is possible that the "in-kind" subscription may result in variation in asset

	<p>allocation as compared to the Index asset allocation. However, the rebalancing provisions of the SEBI Regulations will be applicable.</p> <p>xii. <u>Risk of sovereign rating change:</u> The valuation of the CPSE securities is based on the shape of the sovereign bond yield curve. The level of sovereign bonds are, apart from other factors, dependent on the sovereign rating of India by global Credit Rating Agencies. Any potential change in India's sovereign credit rating may have direct impact on the levels of sovereign bonds which in turn may have impact on the CPSE securities.</p> <p>xiii. <u>Risk of higher supply of CPSEs securities:</u> There has been a sharp decline in the issuance of bonds of AAA-rated CPSE issuers since the onset of the pandemic. At the same time, the demand for high-quality CPSE issuers have remained robust. This has resulted in tightening of credit spread of AAA-rated CPSE issuers. Normalization in the CPSE issuances to the pre-pandemic level may cause credit spreads to widen at some point. This may result in decline in the value of underlying CPSE bonds.</p> <p>xiv. <u>Lack of supply of eligible securities with desired maturity:</u> The target maturity bond ETF structure has a pre-defined maturity date. This necessitates investment in securities maturing within 3 months before the maturity date of the Scheme. Any decline in potential supply of securities maturing within 3 months before the maturity date of the Scheme may expose the Scheme to the reinvestment risk or investing in lower yielding T-bills / TREPS in the maturing year of the Scheme. This may be detrimental to the investor interest.</p> <p>xv. <u>Increase in supply of Tax-free bonds from CPSEs Issuers:</u> The target maturity bond ETF structure is designed to provide investor with long-term fixed income asset allocation to high qualities CPSEs with better tax-adjusted returns in the current interest rate environment. Any potential increase in supply of Tax-free bonds from CPSEs issuer may adversely impact the demand and future growth of the Scheme.</p> <p>xvi. <u>Risk of divergence in credit rating of the Scheme and the Index:</u> The Scheme intends to invest in AAA rated CPSEs entities. Any potential credit rating downgrade will necessitate the Scheme to sell bonds of downgraded CPSEs entities at market level and invest in new AAA rated CPSEs entities. This exercise is dependent on the secondary market liquidity in affected CPSEs entities. In case if the Scheme is unable to liquidate these bonds in the open market, this will result in divergence in the credit rating composition between the Scheme and the Index.</p> <p>xvii. <u>Risk of disinvestment / privatization of invested CPSE entities:</u> The GOI has recently made several announcements regarding their intentions to either disinvest full or part of their holdings in several CPSE entities. In case if a CPSE entity, which is part of the portfolio, is privatized, it will result in exclusion from the Index. The Scheme will also be required to exit their positions at the prevailing market levels and reinvest the proceeds in CPSE entities at prevailing market levels. This may result in untoward volatility and undesirable outcome.</p>
--	---

	<p><b>3. Risks associated with investing in Tri Party Repo through CCIL (TREPS):</b> Risk of exposure in the Triparty Repo settlement Segment provided by CCIL emanates mainly on two counts –</p> <ol style="list-style-type: none"> <li>a. Risk of failure by a lender to meet its obligations to make funds available or by a borrower to accept funds by providing adequate security at the settlement of the original trade of lending and borrowing under Triparty Repo transaction.</li> <li>b. Risk of default by a borrower in repayment.</li> </ol> <p><b>4. Risk associated with Tracking error / Tracking difference:</b> Tracking error / Tracking difference is the annualized standard deviation of the difference in daily returns between the underlying index and the NAV of the Index Fund.</p> <p>Tracking errors / Tracking difference are inherent in any ETF and such errors may cause the schemes to generate returns which are not in line with the performance of the underlying index. Tracking error / Tracking difference could be the result of a variety of factors including but not limited to:</p> <ul style="list-style-type: none"> <li>• Delay in the purchase or non- availability of CPSEs securities which are part of the Index</li> <li>• Delay in liquidation of CPSEs bonds which have been removed by the Index</li> <li>• Due to partial investment in Government securities, Repo in Government securities and TREPS</li> <li>• Due to investment in eligible CPSEs issuer which are yet to be part of the Index</li> <li>• Due to mismatch in the weight of the Index and the Scheme throughout life of the Scheme.</li> <li>• Change in asset allocation between the Index and the Scheme in the last year of the Scheme.</li> <li>• Difference in valuation of underlying bonds by the Index Provider and AMC's valuation providers.</li> </ul> <p><b>5. Risks Associated with Segregated Portfolio</b></p> <ol style="list-style-type: none"> <li>1) Unit holder holding units of Segregated Portfolio may not be able to liquidate their holdings till the recovery of money from the issuer.</li> <li>2) Portfolio comprising of Segregated Portfolio may not realise any value or may have to be written down.</li> <li>3) Listing of units of Segregated Portfolio in recognised stock exchange does not necessarily guarantee their liquidity. There may not be active trading of units in the stock market. Further trading price of units on the stock market may be significantly lower than the prevailing NAV.</li> </ol>
<b>PLANS &amp; OPTIONS / FACILITIES</b>	The Scheme does not offer any Plans/Options for investment.
